Q68A: Having my tubes tied or blocked (female sterilization or Essure®) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 140
Q68B: A vasectomy (male sterilization) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 141
Q68C: Birth control pills are the birth control that I or my husband or partner is using now to keep from getting pregnant. 141
Q68D: Condoms are the birth control that I or my husband or partner is using now to keep from getting pregnant. 142
Q68E: Shots or injections (Depo-Provera®) are the birth control that I or my husband or partner is using now to keep from getting pregnant. 142
Q68F: The contraceptive patch (OrthoEvra®) or vaginal ring (NuvaRing®) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 143
Q68G: An IUD (including Mirena®, ParaGard®, Liletta®, or Skyla®) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 143
Q68H: A contraceptive implant (Nexplanon® or Implanon®) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 144
Q68I: Natural family planning (including rhythm method) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 144
Q68J: Withdrawal (pulling out) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 145
Q68K: Not having sex (abstinence) is the birth control that I or my husband or partner is using now to keep from getting pregnant. 145

HEALTH PROMOTING BEHAVIORS

Q28: During your most recent pregnancy, did you get a Tdap shot or vaccination? 88
Q29: During your most recent pregnancy, did you have your teeth cleaned by a dentist or dental hygienist? 89
Q30A: During my most recent pregnancy, I knew it was important to care for my 89
teeth and gums during my pregnancy. 89
Q30B: During my most recent pregnancy, a dental or other health care worker talked with me about how to care for my teeth and gums. 90
Q30C: During my most recent pregnancy, I had insurance to cover dental care during my pregnancy. 90

HEALTH PROMOTING BEHAVIORS (Continued)

Q55A: Before or after your new baby was born, did you receive information about breastfeeding from your doctor? 123
Q55B: Before or after your new baby was born, did you receive information about breastfeeding from a nurse, midwife, or doula? 123
Q55C: Before or after your new baby was born, did you receive information about breastfeeding from a breastfeeding or lactation specialist? 124
Q55D: Before or after your new baby was born, did you receive information about breastfeeding from your baby's doctor or health care provider? 124
Q55E: Before or after your new baby was born, did you receive information about breastfeeding from a breastfeeding support group? 125
Q55F: Before or after your new baby was born, did you receive information about breastfeeding from a breastfeeding hotline ortoll-free number? 125
Q55G: Before or after your new baby was born, did you receive information about breastfeeding from family or friends? 126
Q77C: During your most recent pregnancy, did you receive counseling for family and personal problems? 155
Q77D: During your most recent pregnancy, did you receive help to quite smoking? 156
Q77E: During your most recent pregnancy, did you receive help to reduce violence in your home? 156
Q79A: During your most recent pregnancy, did you take any parenting classes? 159
Q79B: During your most recent pregnancy, did you receive counseling for depression or anxiety? 159

SOCIOECONOMIC INDICATORS

Q46A: During the 12 months before your new baby was born, was a close family member very sick and had to go to the hospital? 111
Q46B: During the 12 months before your new baby was born, did you get separated or divorced from your husband or partner? 111
Q46C: During the 12 months before your new baby was born, did you move to a new address? 112
Q46D: During the 12 months before your new baby was born, were you homeless or had to sleep outside, in a car, or in a shelter? 112
Q46E: During the 12 months before your new baby was born, did your husband or partner lose his job? 113
Q46F: During the 12 months before your new baby was born, did you lose your job even though you wanted to go on working? 113
Q46G: During the 12 months before your new baby was born, did your husband, partner, or you have a cut in work hours or pay? 114
Q46H: During the 12 months before your new baby was born, were you apart from your husband or partner due to military deployment or extended work-related travel? 114
Q46I: During the 12 months before your new baby was born, did you argue with your husband or partner more than usual? 115

SOCIOECONOMIC INDICATORS (Continued)

Q46J: During the 12 months before your new baby was born, did your husband or partner say that he didn't want you to be pregnant? 115
Q46K: During the 12 months before your new baby was born, did you have problems paying the rent, mortgage, or other bills? 116
Q46L: During the 12 months before your new baby was born, did your husband, partner, or you go to jail? 116
Q46M: During the 12 months before your new baby was born, did someone close to you have a problem with drinking or drugs? 117
Q46N: During the 12 months before your new baby was born, did someone very close to you die? 117
Q77A: During your most recent pregnancy, did you receive food stamps or money to buy food? 154
Q77B: During your most recent pregnancy, did you receive WIC (the Special Supplemental Nutrition Program for Women, Infants, and Children)? 155
Q78A: During your most recent pregnancy, would you know someone who could loan you $50 if you needed it? 157
Q78B: During your most recent pregnancy, would you know someone who could help you if you were sick and needed to be in bed? 157
Q78C: During your most recent pregnancy, would you know someone who could take you to the clinic or doctor's office if you needed a ride? 158
Q78D: During your most recent pregnancy, would you know someone who you could talk with about your problems? 158

EXECUTIVE SUMMARY

Introduction

PRAMS, the Pregnancy Risk Assessment Monitoring System, is a comprehensive surveillance project conducted by both the Centers for Disease Control and Prevention (CDC) and state health departments. This survey collects state-specific, population-based data on maternal attitudes and experiences before, during, and shortly after pregnancy. PRAMS seeks to improve the health of mothers and infants by reducing adverse outcomes such as low birth weight, infant mortality and morbidity, and maternal morbidity. This report offers a detailed snapshot of Delaware's 2016 PRAMS data and should be considered as a resource for future maternal and child health project and policy initiatives. The survey year of 2016 is part of the Phase 8 survey cycle, which started in 2016.

Methods

Delaware's 2016 PRAMS data was analyzed by using IBM SPSS, Microsoft Access, and Microsoft Excel. Out of 82 questions in the survey, 12 questions were omitted from analysis as they provided data specific to the respondent or were too complex to derive meaningful results. The remaining 70 questions were analyzed and, if necessary, adjusted so that all results were binary ("Yes" or "No"). The adjustments ultimately generated a total of 246 questions for analysis. The results for each of these questions were then stratified by five demographic categories – age of the respondent, race/ethnicity of the respondent, marital status of the respondent, whether or not the respondent had a previous live birth, and the educational status of the respondent. A set of chi-square tests was then performed to uncover whether any significant relationships existed among these five demographic categories. Finally, a weighted average scheme outlined by the CDC was implemented in order to apply the survey results to the entire 2016 Delaware PRAMS-eligible population.

It is essential to note that the denominators used to generate the percentages throughout this report are based on how the entire PRAMS-eligible population would have responded to the question. Therefore, the denominators - in total and stratified by age, race/ethnicity, marital status, prior live birth, educational attainment - were the same for every response presented in the report. These denominators are given in Table 6. This way of reporting differs from the method used by the CDC, in which the inclusion (or exclusion) criteria specific to each question are used to calculate the percentages. This inclusion (or exclusion) criteria are based on the flow of the questions and responses in the PRAMS survey. For example, in the PRAMS survey, if the respondent answers "No" to question 19 ("When you got pregnant with your new baby, were you trying to get pregnant?"), then the survey prompts the respondent to proceed to question 20 ("When you got pregnant with your new baby, were you or your husband or partner doing anything to keep from getting pregnant?"). If the respondent answers "Yes" to question 19, then the respondent is prompted to skip question 20 and proceed to question 21. In this report, the entire PRAMS-eligible population (in total and stratified by the demographic categories listed above) was used for the denominators in the calculations to question 20, regardless of the

response given by the respondent to question 19. However, in the method used by the CDC, only those respondents who answered "No" to question 19 were included in the denominator calculation for question 20.

Results

The age of the respondent was significantly associated with a respondent being married, having a previous live birth, and having higher educational status. In addition, White non-Hispanic respondents were generally more likely to be in older age groups, more likely to be married, and more likely to have more years of education completed as compared to both Black non-Hispanic and Hispanic respondents.

These differences among race/ethnicity categories permeated the overall results for the analysis of all questions. Compared to Black non-Hispanic women, White non-Hispanic women were more likely to report engaging in health promoting behaviors during the 12 months before becoming pregnant. Roughly one-eighth of Black non-Hispanic women did not want to be pregnant; this contrasts with approximately one-twentieth of White non-Hispanic women. A significantly higher percentage of White non-Hispanic women wanted to be pregnant sooner as compared to Black non-Hispanic women. Moreover, more than half of White non-Hispanic women tried to get pregnant at the time they became pregnant with their new baby as compared to a third of Black non-Hispanic women. In addition, White non-Hispanic women and women with a higher level of socioeconomic status (as compared to Black non-Hispanic women and women with a lower level of socioeconomic status) were more likely to report breastfeeding and laying their baby down on his or her back to sleep. However, generally speaking, the percentage of White non-Hispanic women consuming alcohol or using tobacco was higher than the percentage reported by Black non-Hispanic women and Hispanic women. As in previous PRAMS analyses, a high percentage of Hispanic women – about 1 in 6 – said that they did not have health insurance to help pay for prenatal care. Finally, a higher percentage of women at lower education levels and non-married women tended to report adverse social and economic support structures as compared to women at higher education levels and married women, respectively.

Conclusions

Overall, women who were married and who had more years of education had a greater level of social support as compared to non-married women and women with fewer years of education, respectively. Compared to Black non-Hispanics, White non-Hispanics generally report having a higher health status before, during, and after pregnancy with the notable exceptions of alcohol and tobacco use. As in previous PRAMS analyses, although Black non-Hispanic women (as compared to White non-Hispanic women) were more likely to report *having a discussion* with a health care provider about health promoting behaviors, such as breastfeeding, a higher percentage of White non-Hispanic women were likely to report *engaging* in these health promoting behaviors as compared to Black non-Hispanic women. Generally speaking, these, as

well as the other significant associations and contrasts, should be considered when designing and modifying programs and policies aimed at improving maternal and infant health. Finally, although no direct comparisons are provided in this report, it is worth noting that the results in the 2016 PRAMS analysis tended to be more favorable across all socio-demographic categories as compared to the results in the previous PRAMS analyses.

INTRODUCTION

PRAMS, the Pregnancy Risk Assessment Monitoring System, is a surveillance project conducted by both the Centers for Disease Control and Prevention (CDC) and state health departments. PRAMS collects state-specific, population-based data on maternal attitudes and experiences before, during, and shortly after pregnancy. The goal of the PRAMS project is to improve the health of mothers and infants by reducing adverse outcomes such as low birth weight, infant mortality, and maternal morbidity.[*]

PRAMS is essential for the following reasons:

- PRAMS allows the CDC and states to monitor changes in maternal and child health indicators (e.g., unintended pregnancy, prenatal care, smoking, drinking, infant health);
- PRAMS provides data for state health officials to use to improve the health of mothers and infants;
- PRAMS not only provides state-specific data but also allows comparisons among participating states because the same data collection methods are used in all states.[*]

PRAMS provides valuable data not available from other sources about pregnancy and the first few months after birth. These data can be used to identify groups of women and infants at high risk for health problems, to monitor changes in health status, and to measure progress towards goals in improving the health of mothers and infants. PRAMS data can also be used by state agencies to identify other agencies that have important contributions to make in planning maternal and infant health programs and to develop partnerships with those agencies.[*]

This report offers a comprehensive snapshot of Delaware's 2016 PRAMS data and should be considered as a resource for future maternal and child health project and policy initiatives.

METHODS

The PRAMS sample of women who have had a recent live birth in 2016 were drawn from the state's birth certificate file. Each participating state samples between 1,300 and 3,400 women per year. Women from some groups are sampled at a higher rate to ensure adequate data are available in smaller but higher risk populations. In Delaware, low birthweight births are sampled at a higher rate. Selected women are first contacted by mail. If there is no response to repeated mailings, women are contacted and interviewed by telephone.[*] In order to reduce response bias, the CDC has set a benchmark rate of 60% as the PRAMS survey response rate. In 2016, Delaware surveyed 1,478 women between two and four months postpartum who gave birth in that year and achieved an average response rate of 63.06% (932 women responding).

Choosing & Retooling the Questions for Analysis

PRAMS data was analyzed using IBM SPSS, Microsoft Access, and Microsoft Excel.

Of the 82 questions in the 2016 survey, questions that provided data specific to the respondent or were too complex to derive meaningful results were omitted (Table 1).

Table 1. Questions Omitted from Analysis.

Question	Reason for Omission from Analysis
1, 2, 3, 21, 22, 49, 50, 58, 73, 81, and 82	Data Specific to Respondent
80	Too Complex to Derive Meaningful Results

Of the remaining 70 questions, 53 questions featured binary results (i.e., the respondent could only answer "Yes" or "No" to the question) while 17 questions offered multi-response results (i.e., the respondent could answer only one option out of at least three or more options presented). Several of the binary responses had several sub-questions or sub-conditions listed; for example, question 12 requested six different binary responses based on whether or not the respondent had the certain health condition listed. Each of these sub-questions or sub-conditions was analyzed separately, which ultimately brought the total number of binary questions examined from 53 to 227. To ease analysis and downstream comparisons, the 17 multi-response questions were retooled into binary responses as defined by Table 2.

Table 2. Multi-Response Questions Redefined as Binary Indicator Variables.[†]

	Response = "No"	Response = "Yes"	Response = "N/A"[‡]
Q9	1	2, 3, 4	
Q27	Segmented into two questions.		
Q36	4, 5, 6	1, 2, 3	7
Q37	6	1, 2, 3, 4, 5	7
Q38	4, 5, 6	1, 2, 3	7
Q39	1	2, 3	
Q41	3, 4, 5	1, 2	
Q42	3, 4, 5	1, 2	
Q44	4, 5, 6	1, 2, 3	7
Q45	6	1, 2, 3, 4, 5	7
Q52	1, 2	3, 4, 5, 7	6
Q59	1, 3	2	
Q60	3, 4, 5	1, 2	
Q64	1	2	3
Q71	3, 4, 5	1, 2	
Q72	3, 4, 5	1, 2	
Q75	Segmented into two questions.		

[†] Note that "1" refers to the first answer listed that a respondent can choose, "2" refers to the second answer, etc.
[‡] "N/A" responses refer to responses that cannot be categorized in a binary manner.

These 17 multi-response questions resulted in 19 additional binary questions, which brought the total number of questions under investigation to 246.

Finally, note that this analysis makes use of "non-RAW" variables. Of the 246 questions investigated, 129 comprised of variables that were transformed by the CDC from "RAW" to "non-RAW". Graphs of the 129 "RAW" variables are presented in Appendix A (pages 183 to 247) and the corresponding tables of the 129 "RAW" variables are given in Appendix B (pages 248 to 259). The results, graphs, and tables of the "non-RAW" variables are featured with the other variables (questions) in the body of this report.

Choosing Demographic Categories for Analysis

Five different demographic categories were chosen ("Age", "Ethnicity", "Married" [Marital Status], "Previous Live Birth", and "Education"). These categories were then divided into subcategories (e.g., "12 Years" for "Education") and the number of actual respondents for each subcategory was compared to the total number of possible respondents as given in Table 3.

Table 3. Response Rates by Demographic Category, Delaware 2016 PRAMS.

Total		**Respondents**	**Total**	**Percent Response**
		932	*1,478*	*63.06%*
Age	Under 20 Years	44	92	47.83%
	20-24 Years	152	303	50.17%
	25-34 Years	557	839	66.39%
	Over 34 Years	179	244	73.36%
	Total	*932*	*1,478*	*63.06%*
Ethnicity	White Non-Hispanics	499	732	68.17%
	Black Non-Hispanics	233	438	53.20%
	Hispanic	146	212	68.87%
	Total[§]	*878*	*1,382*	*63.53%*
Married	Married	525	749	70.09%
	Not Married	407	729	55.83%
	Total	*932*	*1,478*	*63.06%*
Previous Live Birth	Yes	549	872	62.96%
	No	383	606	63.20%
	Total	*932*	*1,478*	*63.06%*
Education	Less Than 12 Years	163	276	59.06%
	12 Years	223	413	54.00%
	Greater Than 12 Years	543	783	69.35%
	Total[**]	*929*	*1,472*	*63.11%*

[§] The "Ethnicity" totals were lower since only White non-Hispanics, Black non-Hispanics, and Hispanics were included. The number of respondents not in any one of these three categories was 54 (5.79%).

[**] The "Education" totals were lower since this data was not available for three (0.32%) respondents and six (0.41%) individuals in the survey population.

A cross-table of the demographic category was created (Table 4) and χ^2 tests were performed (Table 5) to assess whether a significant relationship ($\alpha = 0.05$) exists between categories. Note that all cells were included in the statistical analysis regardless of count size, and therefore, caution should be exercised when interpreting results for analyses that include cell counts of less than five.

Not surprisingly, "Age" was significantly associated with "Married", "Previous Live Birth", and "Education" while "Married" was significantly associated with "Education". In this population, significant associations occurred between "Ethnicity: Hispanic/White NH" and all other demographic categories. In addition, significant associations also took place between "Ethnicity: Black NH/White NH" and all other demographic categories except for "Previous Live Birth". Based on the data and these results, White non-Hispanic respondents were generally more likely to be in older age groups, more likely to be married, and more likely to have more years of education completed as compared to both Black non-Hispanic and Hispanic respondents.

Putting the Questions & Demographic Categories Together for Analysis

To calculate results, an approach that would report what percentage of Delaware's *entire* 2016 PRAMS-eligible population would respond "Yes" to each question was implemented. To achieve this, a weighted average scheme designed by the CDC was applied to the dataset.[††] This weighted average methodology involved performing the following steps for each of the 246 binary questions and for each of the five demographic categories ("Age", "Ethnicity", "Married", "Previous Live Birth", and "Education"):

1. List only the respondents who answered "Yes" to the question.
2. Add the designated weighted averages (field *wtanal* in the 2016 PRAMS dataset) for each of the respondents from step 1.
3. Divide the sum of the weighted averages from step 2 by the Delaware PRAMS-eligible population in that specific demographic category. The Delaware PRAMS-eligible population in each specific category is given in Table 6 on page 26.
4. Convert the fraction calculated in step 3 into a percentage. This is the weighted average response to the question (for each demographic category).

[††] Pregnancy Risk Assessment Monitoring System (PRAMS): Methodology. *Detailed PRAMS Methodology.* Retrieved from CDC website http://www.cdc.gov/prams/methodology.htm.

Table 4. Cross-Table of Respondents by Demographic Categories, Delaware 2016 PRAMS.

		Total	Ethnicity			Married		Previous Live Birth		Education		
			White Non-Hispanic	Black Non-Hispanic	Hispanic	Married	Not Married	Yes	No	Less Than 12 Years	12 Years	Greater Than 12 Years
Age	Under 20 Years	44	11	17	15	1	43	7	37	26	11	7
	20-24 Years	152	63	54	32	39	113	63	89	36	55	61
	25-34 Years	557	324	123	76	360	197	339	218	75	124	356
	Over 34 Years	179	101	39	23	125	54	140	39	26	33	119
Ethnicity	White Non-Hispanic	499				333	166	276	223	46	95	356
	Black Non-Hispanic	233				85	148	145	88	36	88	109
	Hispanic	146				58	88	99	47	76	31	38
Married	Married	525						317	208	49	78	398
	Not Married	407						232	175	114	145	145
Previous Live Birth	Yes	549								119	140	289
	No	383								44	83	254
Education	Less Than 12 Years	163										
	12 Years	223										
	Greater Than 12	543										

Table 5. $\chi 2$ of Demographic Category Comparisons, Delaware 2016 PRAMS. Significant *(S)* and non-significant *(N/S)* χ^2 values are indicated ($\alpha = 0.05$).

	Black NH	Hispanic	Married	Previous Live Birth	Education
Age	26.68‡‡ *(S)*	29.07‡‡ *(S)*	139.27 *(S)*	81.19 *(S)*	92.41 *(S)*
Ethnicity: Black NH			59.35‡‡ *(S)*	3.11‡‡ *(N/S)*	42.82‡‡ *(S)*
Ethnicity: Hispanic			34.51‡‡ *(S)*	7.25‡‡ *(S)*	148.06‡‡ *(S)*
Married				1.08 *(N/S)*	150.73 *(S)*
Previous Live Birth					22.03 *(S)*

‡‡ The χ^2 results are the comparisons of either Black non-Hispanics or Hispanics and White non-Hispanics to a different demographic category.

Table 6. PRAMS-Eligible Population Used in Weighted Average Scheme, Delaware 2016 PRAMS.

		Population of Births	Percent Response
Total		10,334	N/A
Age	Under 20 Years	590	5.71%
	20-24 Years	1,818	17.59%
	25-34 Years	6,260	60.58%
	Over 34 Years	1,666	16.12%
Ethnicity	White NH	5,510	55.79%
	Black NH	2,691	27.26%
	Hispanic	1,674	16.95%
Married	Married	5,666	54.83%
	Not Married	4,668	45.17%
Previous Live Birth	Yes	6,061	58.65%
	No	4,273	41.35%
Education	Less Than 12 Years	2,006	19.47%
	12 Years	2,569	24.94%
	Greater Than 12 Years	5,728	55.60%

Note that some minor differences in the results may be reported here as compared to other sources. Skips and missing responses that can cause slight differences in results may be included or excluded in base calculations. For this report, they were included as a first step in PRAMS analysis. Overall, these minor differences do not change the overall discussion of the report.

For each weighted average response, a bar graph was constructed with 95% confidence intervals added. A graph for each response is given from pages 37 to 159. The 95% confidence intervals are denoted as the thin black lines spread across the end of each bar in the graph. The tables on pages 160 to 182 detail the exact percentage of "Yes" responses and the exact lower and upper bound 95% confidence intervals.

RESULTS

The following are the notable results for the weighted averages among each demographic subcategory based on careful examination of the graphs and tables. In this report, a result was considered to be statistically significant if the 95 percent confidence intervals for the percent response "Yes" for one or more of the demographic subcategories within a demographic category did not overlap one another. For example, in the results for Q4 (shown in the figure on page 37 and provided in the table on page 160), the 95 percent confidence interval for the percent of White non-Hispanics responding "Yes" (56.53%) did not overlap the 95 percent confidence interval for the percent of Hispanics responding "Yes" (64.89%). Accordingly, the difference in the average percentage of individuals in these two demographic subcategories responding "Yes" was considered statistically significant. In addition, concerns regarding small cell counts were

mitigated given the relatively large sample sizes of the denominators for each demographic subcategory (Table 3). Note also that a weighted average scheme was used to generate these results, and therefore, these results reflect the entire 2016 PRAMS-eligible population in Delaware. Finally, the results presented here center on racial and ethnic disparities in health outcomes, behaviors, and access, all of which are of particular interest to the State of Delaware and relevant stakeholders.

Pregnancy Intention & Becoming Pregnant

Pregnancy Intention

A significantly higher percentage of White non-Hispanics (17.14%) wanted to be pregnant *sooner* as compared to Black non-Hispanics (8.79%) and Hispanics (6.38%) as given in the results to Q18B. As indicated in Q18A, however, a significantly lower percentage of White non-Hispanics (17.89%) wanted to be pregnant *later* as compared to Black non-Hispanics (24.90%) or Hispanics (27.03%). In addition, 46.47% of White non-Hispanics and 36.93% of Hispanics wanted to be pregnant then; this contrasts with 29.50% of Black non-Hispanics (Q18C). Furthermore, as given in Q19, a significantly higher percentage of White non-Hispanics (60.71%) tried to get pregnant at the time they became pregnant with their new baby, which was significantly higher than both Black non-Hispanics (35.07%) and Hispanics (41.70%). This also was the case for married women (70.37%) compared with non-married women (28.49%) and for older women and women with more years of education.

Moreover, 16.70% of White non-Hispanics stated that they or their husband or partner were doing something to keep from getting pregnant (Q20); this was significantly lower than the corresponding percentages for Black non-Hispanics (22.95%) and Hispanics (30.44%).

Becoming Pregnant

As given in Q12D, a lower percentage of White non-Hispanic women (9.34%) stated that a doctor, nurse, or other health care worker talked with them in the 12 months before getting pregnant about their desire to have or not have children as compared to 13.08% of Black non-Hispanic women and 12.27% of Hispanic women. Conversely, a substantially higher percentage of White non-Hispanic women (31.51%) claimed that a doctor, nurse, or other health care worker talked with them in the 12 months before getting pregnant about using bith control to prevent pregnancy as compared to Black non-Hispanic (21.05%) and Hispanic (19.62%) women (Q12E). Similarly, compared to Black non-Hispanic and Hispanic women, a higher percentage of White non-Hispanic women responded that a doctor, nurse, or other health care worker talked with them in the 12 months before getting pregnant about taking a vitamin with folic acid (Q12A), about maintaining a healthy weight (Q12B), about whether someone was hurting them emotionally or physically (Q12I), and about whether they were feeling down or depressed (Q12J).

Furthermore, when asked if a doctor, nurse, or other health care worker talked with the respondent about getting counseling or treatment for depression or anxiety before getting pregnant with their new baby (Q14D), a lower percentage of White non-Hispanic women (6.80%) and Black non-Hispanic women (6.91%) answered "Yes" as compared to Hispanic women (12.01%). Moreover, a lower percentage of White non-Hispanic women stated that a doctor, nurse, or other health care worker talked with them about how smoking during pregnancy can affect their baby (Q14F: 16.31%), how drinking alcohol during pregnancy could affect their baby (Q14G: 16.83%), and how using illegal drugs during pregnancy could affect their baby (Q14H: 15.08%) as compared to Black non-Hispanic women (Q14F: 20.90%: Q14G: 20.90%; Q14H: 20.07%) and Hispanic women (Q14F: 24.36%; Q14G: 23.93%; Q14H: 24.21%).

Prenatal Care

Starting Prenatal Care

A higher percentage of White non-Hispanic women (82.53%) and Black non-Hispanic women (82.71%) stated that they received prenatal care as early in their pregnancy as they wanted (Q23) as compared to Hispanic women (78.82%). For the same question, the percentages reported among women who were married, who had higher levels of educational attainment, and who were in older age groups were significantly higher as compared to women who were not married, who had lower levels of educational attainment, and who were in younger age groups.

Access to Prenatal Care

As shown in Q24B, a substantially higher percentage of Hispanic women (5.12%) compared to non-Hispanic women claimed that they did not have enough money or insurance to pay for prenatal care visits. In addition, a sizeably higher percentage of Hispanic women (3.02%) compared to White non-Hispanic women (1.54%) and Black non-Hispanic women (1.00%) responded that they had no way to get to the clinic or doctor's office (Q24C). Moreover, a higher percentage of Hispanic women compared to White non-Hispanic and Black non-Hispanic women responded that they didn't have anyone to take care of their children (Q24H), which kept them from getting prenatal care when they wanted it. Similar results to Q22H occurred among women with fewer years of education (higher percentages reported) compared to women with more years of education (lower percentages reported). As compared to women in older age ranges, a higher percentage of women under age 20 years said that they didn't know they were pregnant (Q24I) as a reason for why they could not get prenatal care when they wanted. Finally, a significantly higher percentage of Hispanics (3.02%) when compared with White non-Hispanics (0.26%) and Black non-Hispanics (0.73%) reported that they didn't want prenatal care as a reason for why they didn't get prenatal care when they would have wanted it (Q24K).

During Prenatal Care Visits

A significantly lower percentage of White non-Hispanics (75.73%) as compared to Black non-Hispanics (85.94%) and Hispanics (82.53%) claimed that a doctor, nurse, or other health care worker asked them if they were feeling down or depressed during any of their prenatal care visits

(Q25F). Overall, compared to White non-Hispanic women, a higher percentage of Black non-Hispanic women answered "Yes" when asked whether or not a health care provider discussed the following: if someone was hurting them emotionally or physically (Q25E); if they were using drugs uch as marijuana, cocaine, crack, or meth (Q25G); if they wanted to be tested for HIV (Q25H); if they planned to breastfeed their new baby (Q25I); and if they planned to use birth control after their new baby was born (Q25J).

Infant Care

Approximately one-fifth (20.03%) of Black non-Hispanic women stated that a home visitor came to their home to help them learn about how to take care of themselves or their new baby after their new baby was born (Q65). This was higher than the reported percentage of White non-Hispanics (16.88%) and approximated the percentage reported by Hispanics (19.60%).

Breastfeeding

As compared to Black non-Hispanics and Hispanics, a slightly higher percentage of White non-Hispanic respondents stated that they received information about breastfeeding from a nurse, midwife, or doula (Q55B) or a breastfeeding or lactation specialist (Q55C). Conversely, compared to White non-Hispanic women, a higher percentage of Black non-Hispanic and Hispanic women reported that they received information about breastfeeding from a breastfeeding support group (Q55E) or a breastfeeding hotline or toll-free number (Q55F).

A significantly higher percentage of White non-Hispanics (83.65%) reported breastfeeding or pumping breast milk to feed their new baby after delivery as compared to Black non-Hispanics (79.14%) as indicated in the results to Q56. Overall, a higher percentage of women with more education, that were married, or were in older age groups stated that they breastfed or pumped breast milk to feed their new baby after delivery as compared to women with fewer years of education, that were non-married, or were in lower age groups. Similar results took place for all demographic groups when women were asked whether they were still breastfeeding or feeding pumped milk to their new baby (Q57). In fact, only 32.70% of Black non-Hispanic women stated that they were currently breastfeeding or feeding pumped milk to their new baby as compared to 55.70% of White non-Hispanic women and 45.70% of Hispanic women.

SIDS Prevention

A significantly higher percentage of White non-Hispanics (84.73%) and Hispanics (76.45%) compared to Black non-Hispanics (62.72%) reported laying their baby down on his or her back when they sleep (Q59). Compared with non-married women and women with fewer years of education, married women and women with more years of education were more likely to lay their baby down on his or her back to sleep as well. Moreover, a significantly higher percentage of White non-Hispanics (82.80%) reported that their baby always or often sleeps alone in his or her own crib or bed as compared to the corresponding percentages reported by Black non-Hispanics (67.47%) and Hispanics (75.22%) as indicated in Q60.

Infant Survival

As given in Q53, when women were asked whether or not their baby was alive at the time of the survey, a significantly higher percentage of White non-Hispanic women (98.13%) responded "Yes" as compared to Black non-Hispanic women (92.78%). Moreover, as given in Q54, a significantly higher percentage of White non-Hispanic women (95.82%) claimed that their baby was living with them now as compared to Black non-Hispanic women (91.95%).

Alcohol & Tobacco Use

Alcohol Use

A significantly higher percentage of White non-Hispanics (78.86%) stated that they had consumed at least one alcoholic drink in the past two years (Q43) as compared to Black non-Hispanics (45.77%) and Hispanics (47.27%). As given in Q44, the percentage of White non-Hispanics claiming alcohol use and binge alcohol consumption in the three months prior to becoming pregnant was markedly higher than the percentage reported by Black non-Hispanics and Hispanics.

Tobacco Use

Compared to Black non-Hispanics (17.59%) and Hispanics (14.04%), a significantly higher percentage of White non-Hispanics (30.27%) stated that they smoked in the past two years (Q35). When asked whether or not they smoked in the past two years, the percentage of non-married women responding "Yes" (35.75%) was almost triple that of married women (12.69%).

In addition, the percentage of White non-Hispanics saying that they smoked at least 11 cigarettes on average each day in the three months before becoming pregnant was more than double the percentage reported by Black non-Hispanic women (White non-Hispanics: 8.87% compared to Black non-Hispanics: 3.76%) as indicated in Q36. As given in Q36, Q37, and Q38, non-married women and women with fewer years of education were more likely to smoke than married women and women with more years of education completed.

Health Care Utilization

HIV Testing

As presented in Q12L, a significantly higher percentage of White non-Hispanic women (52.03%) stated that they had a test for HIV in the 12 months before they got pregnant as compared to Black non-Hispanic women (41.40%) or Hispanic women (28.90%).

Flu Shots

Almost half of White non-Hispanic women (46.71%) and Hispanic women (47.81%) reported that they received a flu shot during their pregnancy of their new baby (Q27B), which contrasts with 35.61% of Black non-Hispanic women.

Parenting Classes

A higher percentage of women under 20 years of age (19.48%) stated that they took parenting classes as compared to 5.17% of women ages 20-24 years and 4.29% of women ages 25-34 years (Q79A).

Physician Visits

As compared to both Black non-Hispanic and Hispanic women, a significantly higher percentage of White non-Hispanic women responded that they had a regular checkup with an OB/GYN (Q11B), a visit for an illness or chronic condition (Q11C), a visit for family planning or birth control (Q11E), or a visit ofr depression or anxiety (Q11F) in the 12 months before they got pregnant with their new baby.

Dentist Visits

As given in Q11G, more than half (53.11%) of White non-Hispanics claimed that they had a visit to have thir teeth claned by a dentist or dental hygienist in the 12 month before they got pregnant with their new baby; this contrasts with 29.99% of Black non-Hispanics and 20.55% of Hispanics. In addition, as indicated in Q30A, 85.23% of respondents stated that they knew it was important to care for their teeth and gums during pregnancy. Furthermore, approximately half (47.77%) said that a dental or other health care worker talked with them about how to care for their teeth and gums (Q30B). For these two questions, the percentages reported by race/ethnicity, age, marital status, and educational attainment were roughly the same. However, as indicated in Q29, a significantly higher percentage of White non-Hispanics (51.77%) claimed that they had their teeth cleaned by a dentist or dental hygienist during their most recent pregnancy as compared to Black non-Hispanics (32.58%) or Hispanics (34.36%). Moreover, as shown in Q30C, 70.21% of White non-Hispanics had insurance to cover dental care during their pregnancy, which was significantly higher than Black non-Hispanics (56.942%) and more than double that of Hispanics (31.25%). Finally, a higher percentage of Black non-Hispanics (23.28%) *needed* to see a dentist for a problem, as compared to 18.68% of White non-Hispanics (Q30D). However, the percentage of Black non-Hispanics who reported *actually* going to a dentist or dental clinic about a problem was comparable to both White non-Hispanics and Hispanics (Q30F).

Contraception

As evidenced by Q68G, a significantly higher percentage of White non-Hispanic womn (14.34%) said that they are now using an IUD (such as Mirena®, ParaGard®, Liletta®, or Skyla®) as compared to 7.91% of Black non-Hispanic women and 9.64% of Hispanic women. However, a significantly higher percentage of Hispanic women (19.08%) compared to White non-Hispanic (0.85%) and Black non-Hispanic (3.12%) women stated that they are using a contraceptive implant in the arm (Nexplanon® or Implanon®) to keep from getting pregnant now (Q68H). Roughly two-fifths (38.76%) of all respondents reported that a doctor, nurse, or other health care worker gave or prescribed a contraceptive method such as the pill, shot (Depo-

Provera®, NuvaRing®, or condoms (Q70E) while 17.91% said that a health care provider inserted an IUD or contraceptive implant at a postpartum checkup (Q70F).

Health Status

Before Becoming Pregnant

Overall, White non-Hispanic women as compared to Black non-Hispanic women were more likely to report engaging in health promoting behaviors during the 12 months before becoming pregnant. According to Q7B, 48.15% of White non-Hispanic women stated that they were exercising 3 or more days of the week for fitness outside of their regular jobs; this contrasts with 30.05% of Black non-Hispanic women and 37.75% of Hispanic women. The results were mixed for health care checkups and treatments in the 12 months prior to becoming pregnant; a significantly higher percentage of White non-Hispanic women compared to Black non-Hispanic women reported regular use of prescription medicines other than birth control (Q7C) while a significantly higher percentage of Black non-Hispanic women compared to White non-Hispanic women reported being checked or treated for diabetes (Q7D).

As provided in Q9, slightly more than half (54.48%) of White non-Hispanic women stated that they took a multivitamin or prenatal vitamin at least once a week during the month before they became pregnant with their new baby. This percentage was significantly higher than that reported by Black non-Hispanic women (37.67%) and Hispanic women (39.20%).

Furthermore, the race/ethnicity categories differed in the reported presence of adverse health conditions in the three months before getting pregnant (Q8A-H). In Q8B, 7.96% of Black non-Hispanics stated they had high blood pressure or hypertension as compared to 3.73% of White non-Hispanics and 2.38% of Hispanics. Similar disparities, in which the percentages reported by Black non-Hispanics were higher than White non-Hispanics and Hispanics, were apparent for asthma (Q8D) and anemia (Q8E). Conversely, a higher percentage of White non-Hispanic women reported having thyroid problems (Q8F), polycystic ovarian syndrome (Q8G), and anxiety (Q8H) as compared to Black non-Hispanic women.

Finally, a higher percentage of Black non-Hispanic women (3.48%) as compared to White non-Hispanic women (1.06%) and Hispanic women (0.84%) stated that their husband or partner pushed, hit, slapped, kicked, chocked, or physically hurt them before they got pregnant with their new baby (Q47A).

During Most Recent Pregnancy

In Q32A, 7.66% of White non-Hispanic women and 5.43% of Black non-Hispanic women reported that a doctor, nurse, or other health care worker told them that they had gestational diabetes (diabetes that started during this pregnancy); these percentages were lower than the percentage reported by Hispanic women (9.65%). A markedly high percentage (24.92%) of Black non-Hispanic women stated that they had a problem with severe nausea, vomiting, or

dehydration during their most recent pregnancy; this contrasts with only 13.35% of White non-Hispanic women and 16.97% of Hispanic women (Q33C). Compared to White non-Hispanic women and Hispanic women, a significantly higher percentage of Black non-Hispanic women also had a problem with vaginal bleeding (Q33A), kidney or bladder (urinary tract infection) (Q33B), and labor pains more than 3 weeks before their baby was due (Q33F).

As presented in Q34C, a higher percentage of Black non-Hispanics reported having Chlamydia (5.16%) during their pregnancy as compared to White non-Hispanics (1.03%) and Hispanics (4.34%). In Q34H, a significantly higher percentage of Black non-Hispanic women (6.75%) also stated that they had bacterial vaginosis during their pregnancy as compared to White non-Hispanic women (3.89%) and Hispanic women (4.06%).

Postpartum Depression

A significantly higher percentage of non-married women (7.41%) stated that they always or often felt down, depressed, or sad since their new baby was born as compared with married women (4.44%) as given in Q71. As indicated in Q72, roughly one-tenth (10.98%) of Black non-Hispanic women stated that they have always or often felt little interest or little pleasure in doing things since their new baby was born, which contrasts with 4.41% of White non-Hispanic women and 3.14% of Hispanic women.

Health Coverage

Before Becoming Pregnant

The race/ethnicity groups differed in their self-reported health insurance status prior to becoming pregnant. Compared to Black non-Hispanic (31.49%) and Hispanic (11.39%) women, a significantly higher percentage of White non-Hispanic women (56.79%) stated that they were covered by private insurance during the month before getting pregnant with their new baby (Q15A). Conversely, the percentage of Black non-Hispanic women who were covered by Medicaid during the month before they got pregnant with their new baby was more than double that of White non-Hispanic women (Black non-Hispanic: 57.26%; White non-Hispanic: 22.51%) as presented in Q15D. Finally, compared to the other two race/ethnicity groups, a relatively high percentage of Hispanic women (16.62%) stated that they were covered by CHAP (Community Healthcare Access Program) during the month before they got pregnant with their new baby (Q15F); furthermore, a high percentage of Hispanic women (27.67%) claimed that they did not have any health insurance during the month before they became pregnant (Q15H).

Prenatal Care Payer

A significantly higher percentage of Black non-Hispanic women (64.46%) said Medicaid paid for at least part of their prenatal care as compared to Hispanic women (59.50%) and White non-Hispanic women (32.17%) as indicated in Q16E. Similar results occurred for younger women (89.09% of women under 20 years of age) as compared to older women (31.83% of women over 34 years of age), non-married women (73.23%) compared to married women (20.62%), and

women with fewer years of education compared to women with more years of education completed. For women saying that health insurance from a job or the job of a husband, partner, or parents paid for at least part of their prenatal care, the converse of the Q16E results generally took place at each demographic category as shown in Q16B. Compared to the other race/ethnicity groups, a relatively high percentage of Hispanic respondents said that the Delaware Healthy Children Program (Q16F: 4.50%) or Community Healthcare Access Program (Q16G: 23.74%) helped pay for their prenatal care. As given in Q16I, a disproportionately high percentage of Hispanic women (17.87%) said that they did not have health insurance to help pay for prenatal care.

During Most Recent Pregnancy

During their most recent pregnancy, a significantly higher percentage of younger women claimed to be on WIC (the Special Supplemental Nutrition Program for Women, Infants, and Children) as compared to older women (Q77B). Similar results were reported among women with fewer years of education (77.37% of women less than 12 years of education and 56.85% of women with 12 years of education) compared with women with more years of education (19.05% of women with over 12 years of education) and non-married women (64.03%) compared with married women (19.67%). A significantly higher percentage of Hispanic women (70.26%) were on WIC compared to Black non-Hispanics (59.58%), and in corresponding manner, a significantly lower percentage of White non-Hispanics (23.33%). Finally, as given in Q77A, a significantly higher percentage of Black non-Hispanics (50.52%) and Hispanics (43.28%) compared to White non-Hispanics (21.37%) reported that they were on food stamps or received money to buy food during their most recent pregnancy.

During Delivery and Well-Baby Checkups

As provided in Q17D, a significantly higher percentage of Black non-Hispanics (68.16%) stated that Medicaid is currently their health insurance as compared to White non-Hispanics (32.52%) and Hispanics (50.23%). Similar results occurred for non-married women (74.84%) compared to married women (18.34%) and younger age groups (90.49% of women under 20 years of age and 70.63% of women ages 20 to 24) compared to older age groups (35.17% of women ages 25 to 34 years and 30.85% of women over 34 years of age). The converse of these results was generally reported for each of the demographic categories when women were asked whether health insurance from a job or the job of a husband, partner, or parents (Q17A) is currently their health insurance. Compared to the other two race/ethnicity groups, a relatively high percentage of Hispanic respondents said that the Community Healthcare Access Program (Q17F: 24.58%) is their current form of health insurance. Finally, an estimated 1 in 6 Hispanic women were reported as not having health insurance now (Q17H).

Across all socio-demographic categories assessed, approximately 7 out of 8 women reported having had a postpartum checkup since their new baby was born (Q69).

Social Support

A significantly higher percentage of White non-Hispanics (25.77%) and Black non-Hispanics (18.59%) claimed to have a close family member who was very sick and had to go to the hospital during the 12 months before their new baby was born as compared to Hispanics (9.90%) as given in Q46A. In addition, as shown in Q46D, a significantly higher percentage of Black non-Hispanics (4.16%) as compared to White non-Hispanics (1.74%) stated that they were homeless or had to sleep outside in a car or in a shelter at some point during the 12 months before their new baby was born. A significantly higher percentage of Black non-Hispanic women (29.99%) as compared to White non-Hispanic women (15.88%) and Hispanic women (14.56%) stated that they had argued with their husband or partner more than usual during the 12 months before their baby was born (Q46I). Furthermore, as provided by Q46J, the percentage of Black non-Hispanic women who stated that their husband or partner said that they didn't want them to be pregnant (8.18%) was slightly more than double that of White non-Hispanics (3.35%). Finally, as shown in Q78A, a significantly higher percentage of White non-Hispanics (85.75%) compared to Black non-Hispanics (63.53%) or Hispanics (60.59%) stated that they would know someone who could loan them $50 if they needed it.

Overall, a higher percentage of women at lower education levels and non-married women tended to report adverse social and economic support structures as compared to women at higher education levels and married women, respectively (Q46A-N and Q78A-D).

DISCUSSION

As consistently evidenced by the Results and alluded to in the Methods section, the percentage responses for each of the questions are significantly different when stratified by demographic categories. Overall, women who were in older age groups, who were married, and who had more years of education had a higher socioeconomic status (based on the indicators in the "Health Coverage" and "Social Support" sections of the Results) and health status (based on the measures in the "Health Status" section of the Results). According to the "Health Status" section of the Results, White non-Hispanics were frequently in significantly better health than Black non-Hispanics and Hispanics.

Generally speaking, the results from the 2016 PRAMS analysis tend to echo the results of the 2013, 2014, and 2015 PRAMS analyses. Black non-Hispanics and non-married women generally reported greater utilization of parenting classes and said that a health care provider asked them about whether someone was hurting them emotionally or physically, if they were feeling down or depressed, and if they wanted to be tested for HIV during their pregnancy; these results may indicate success in the targeted interventions already in place throughout Delaware. On the other hand, compared to the other race/ethnicity categories, Hispanic women were less likely to have health insurance throughout the perinatal period (see "Prenatal Care" and "Health Coverage"

sections of the Results). Future maternal and child health programs should take this growing ethnic population into greater consideration.

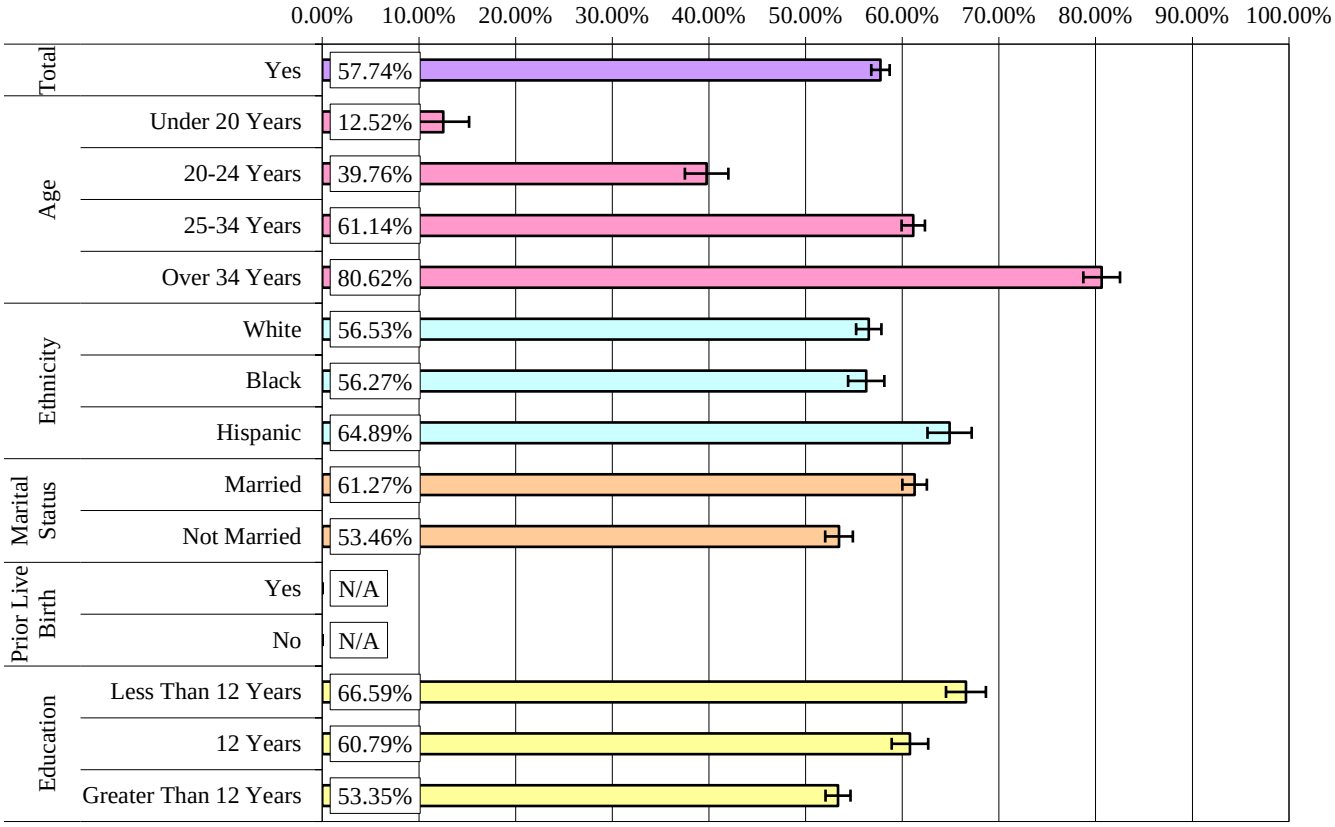
Like previous PRAMS analyses, some noteworthy discrepancies were uncovered in this analysis. As in prior years, although a higher percentage of Black non-Hispanics reported that a health care provider discussed breastfeeding their baby in comparison to White non-Hispanics, a significantly higher percentage of White non-Hispanics reported breastfeeding or pumping breast milk to feed their new baby after delivery as compared to Black non-Hispanics (see "Infant Care" and "Prenatal Care" sections of the Results). This difference in prenatal discussion and infant care practice may be a result of several different factors and should further be examined. In addition, the general lack of consistent statistical differences between women with no Previous Live Birth and a Previous Live Birth may suggest that women do not necessarily change their behavior with the increased knowledge and experience acquired during a prior pregnancy.

Besides serving as a standardized and widely-used survey, one of the most potent features of the PRAMS survey is that it offers maternal and child health officials a window into the self-reported thoughts and behaviors of perinatal women. Moreover, PRAMS allows researchers to examine whether differences in these thoughts and behaviors exist among various socio-demographic cohorts. For example, in this analysis, about half of Black non-Hispanic women reported being happy or very happy when they found out they were pregnant; this contrasts with three out of every four White non-Hispanic women. This result, combined with the reported disparities in socioeconomic supports between Black non-Hispanic and White non-Hispanic women, have been linked to the diverging perinatal outcomes between these two race/ethnicity categories. Overall, these differences in socio-demographic categories should be considered when tailoring programs and policies aimed at improving maternal and infant health at the state level.

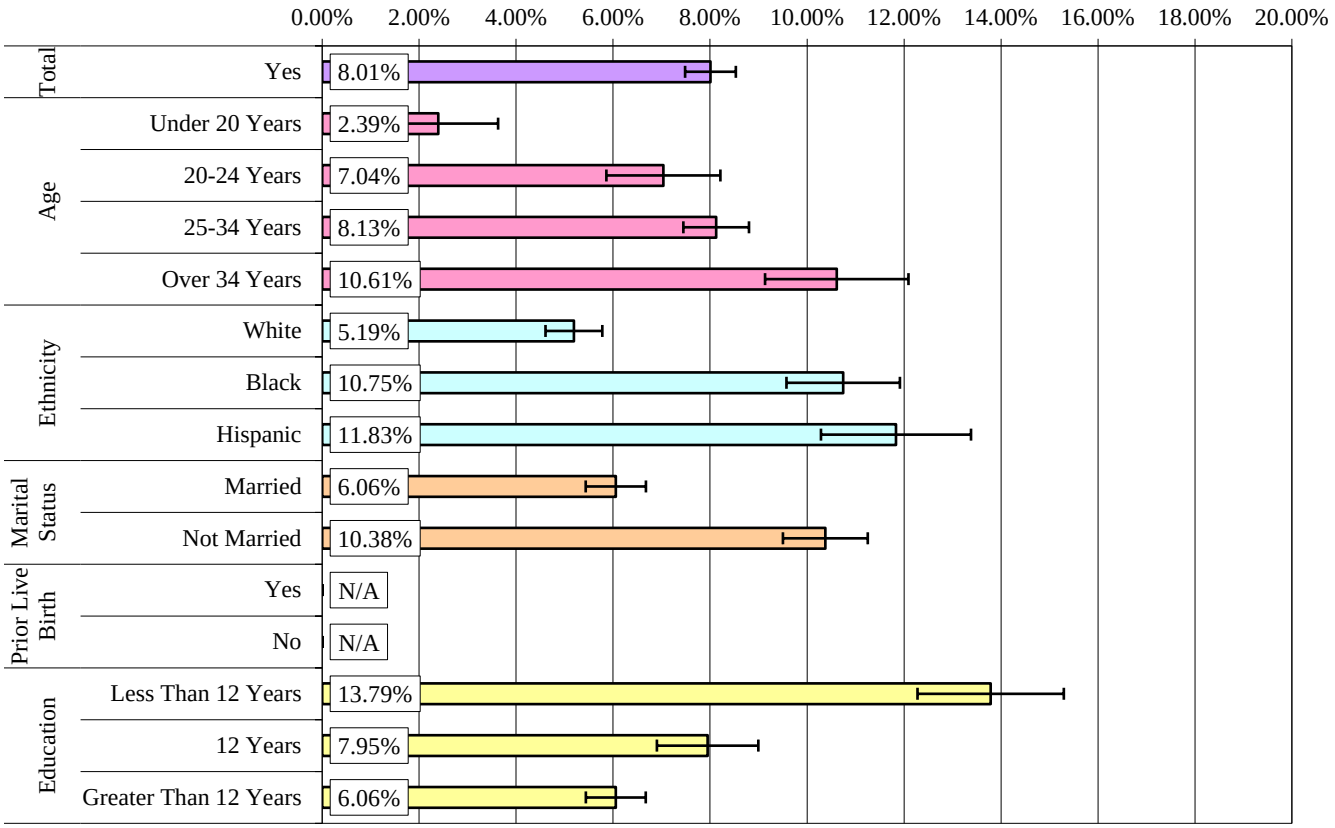
Finally, although no direct comparisons are provided in this report, it is essential to note that the results in the 2016 PRAMS analysis tended to be more encouraging across all socio-demographic categories as compared to the results in the previous PRAMS analyses. This may suggest that maternal and infant health initiatives within the State of Delaware are demonstrating an effect on improving self-reported behaviors and outcomes.

GRAPHS

Q4: Before you got pregnant, did you have any other babies who were born alive?[§§,*] (% "Yes")**

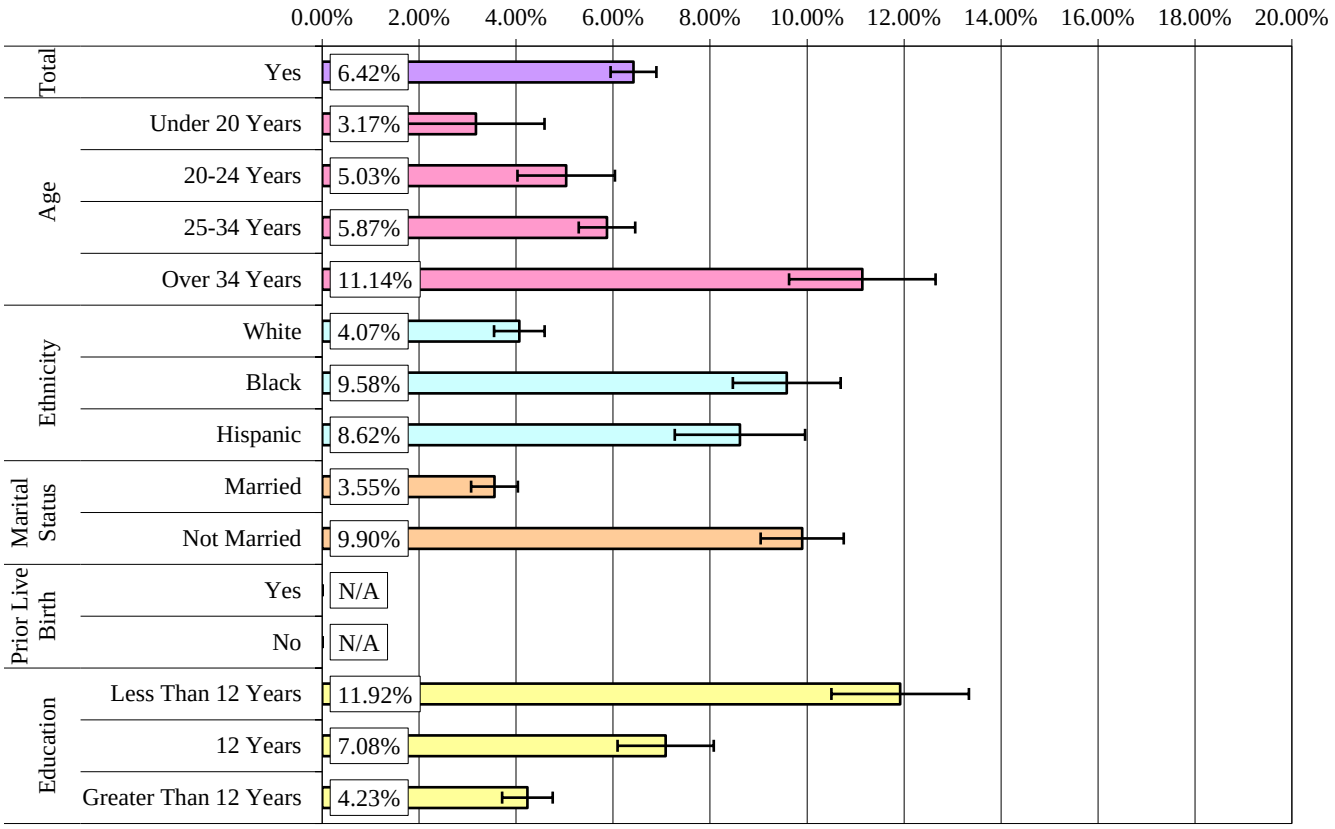


Q5: Did the baby born just before your new one weigh less than 5 pounds, 8 ounces (2.5 kg) at birth?[§§,*] (% "Yes")**

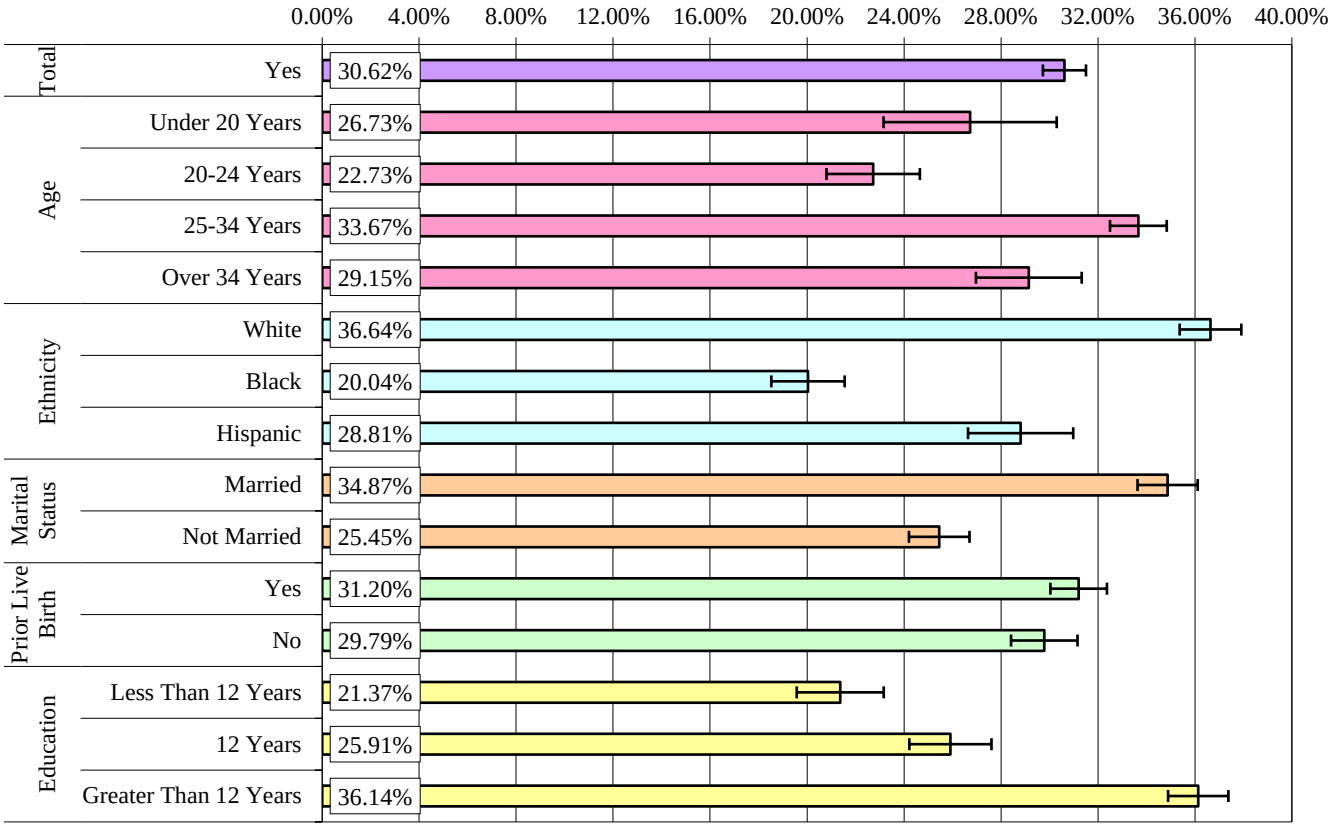


[§§] For this question, "Prior Live Birth" was assigned a response of "N/A" as comparisons in this category are not plausible.
[***] Indicates that at least one cell count used as a numerator for a percentage in this graph or table is less than 30.

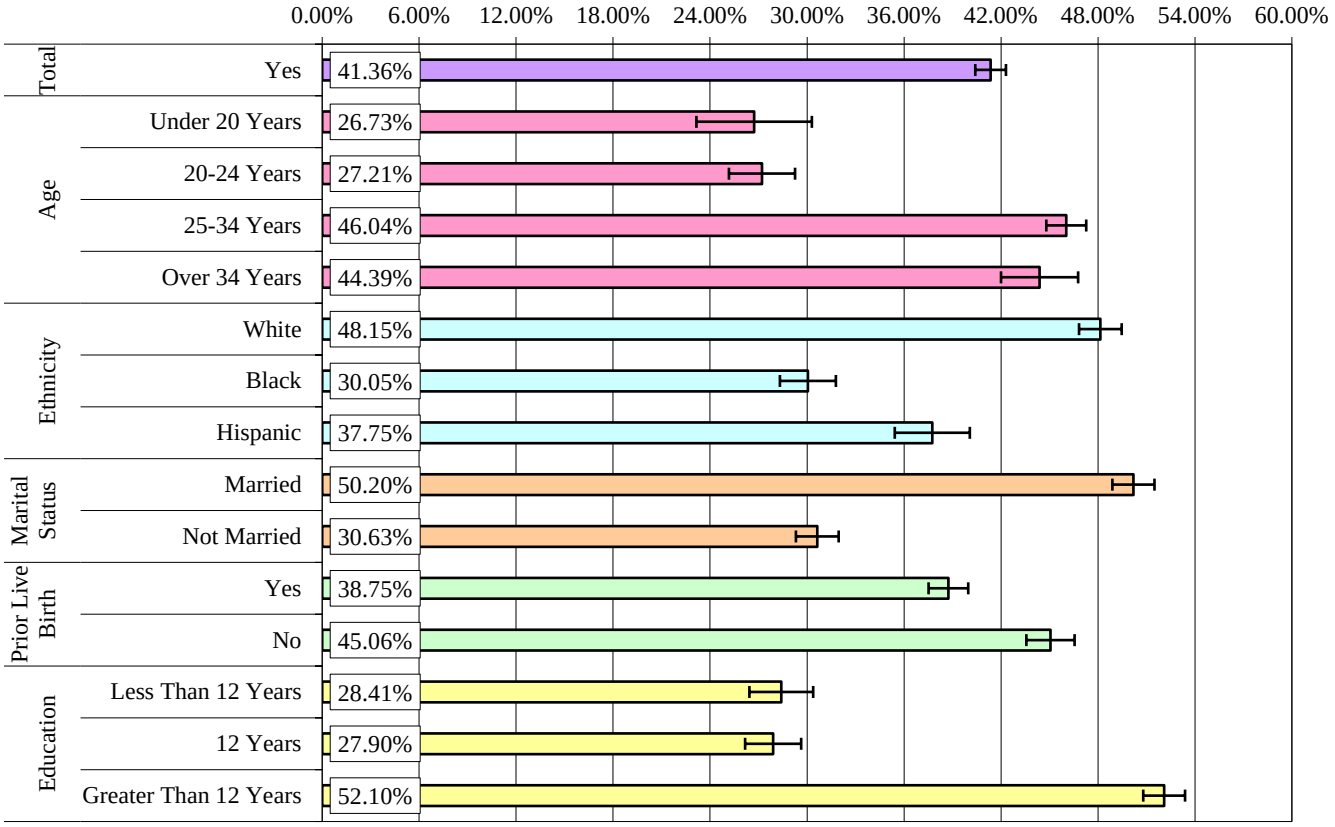
Q6: Was the baby just before your new one born earlier than 3 weeks before his or her due date?§§,* (% "Yes")**



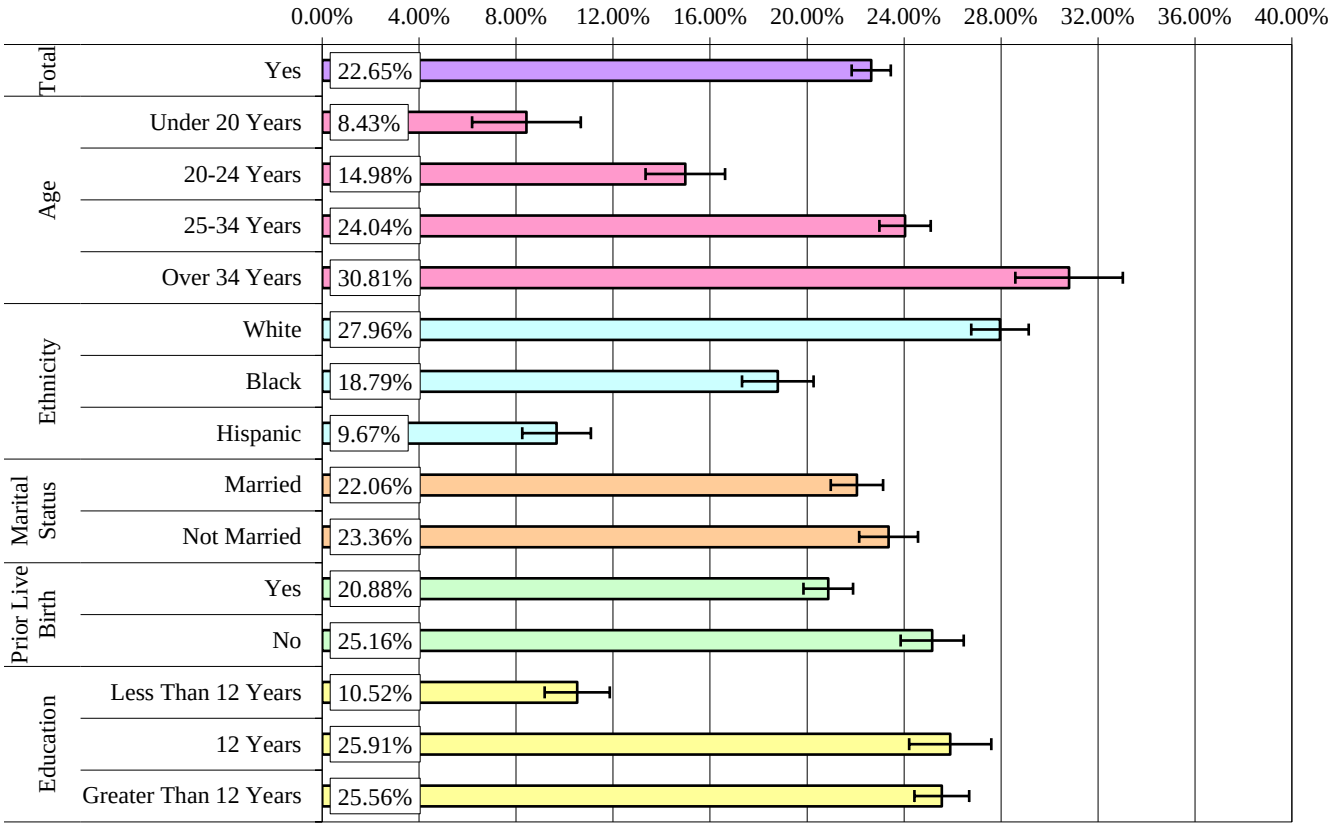
Q7A: At any time during the 12 months before you got pregnant with your new baby, were you dieting (changing eating habits) to lose weight? (% "Yes")



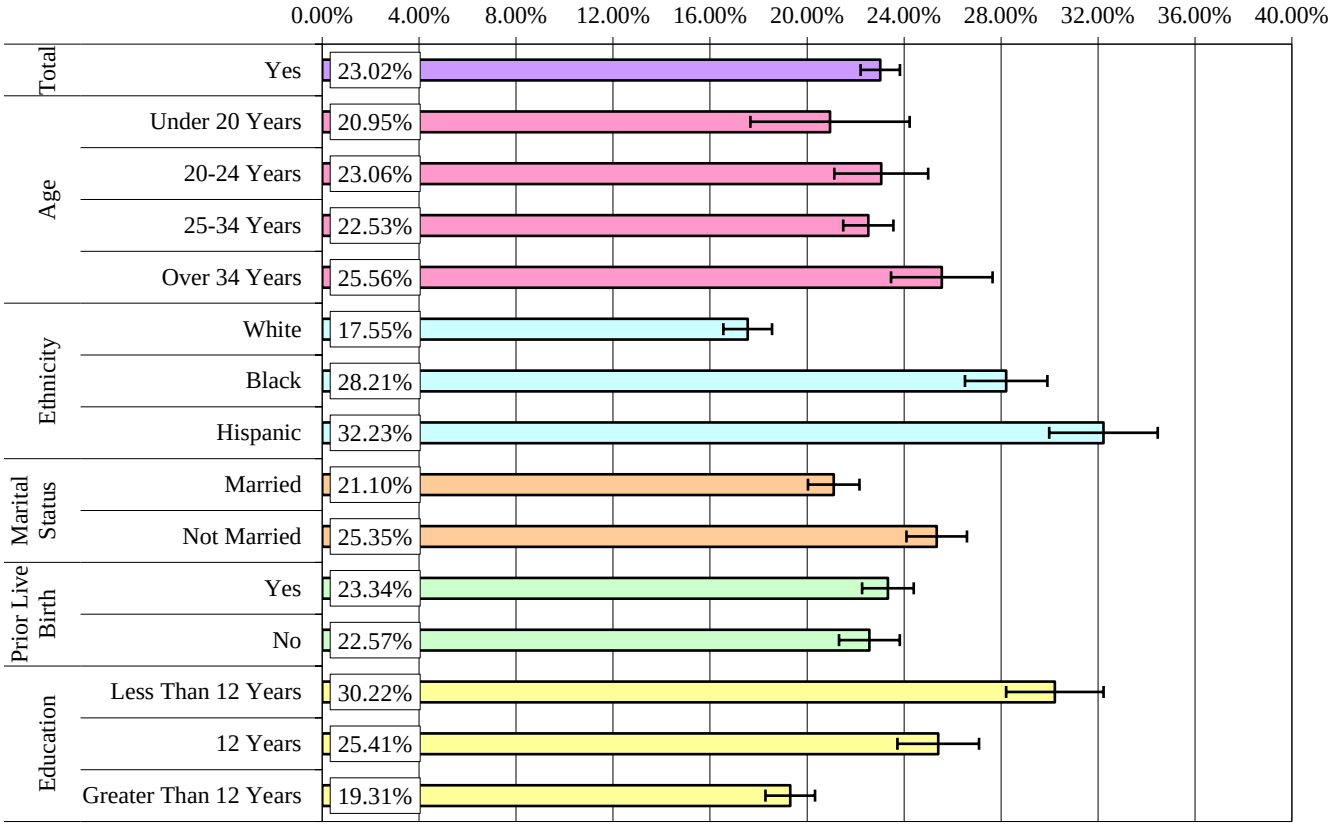
Q7B: At any time during the 12 months before you got pregnant with your new baby, were you exercising 3 or more days of the week? (% "Yes")



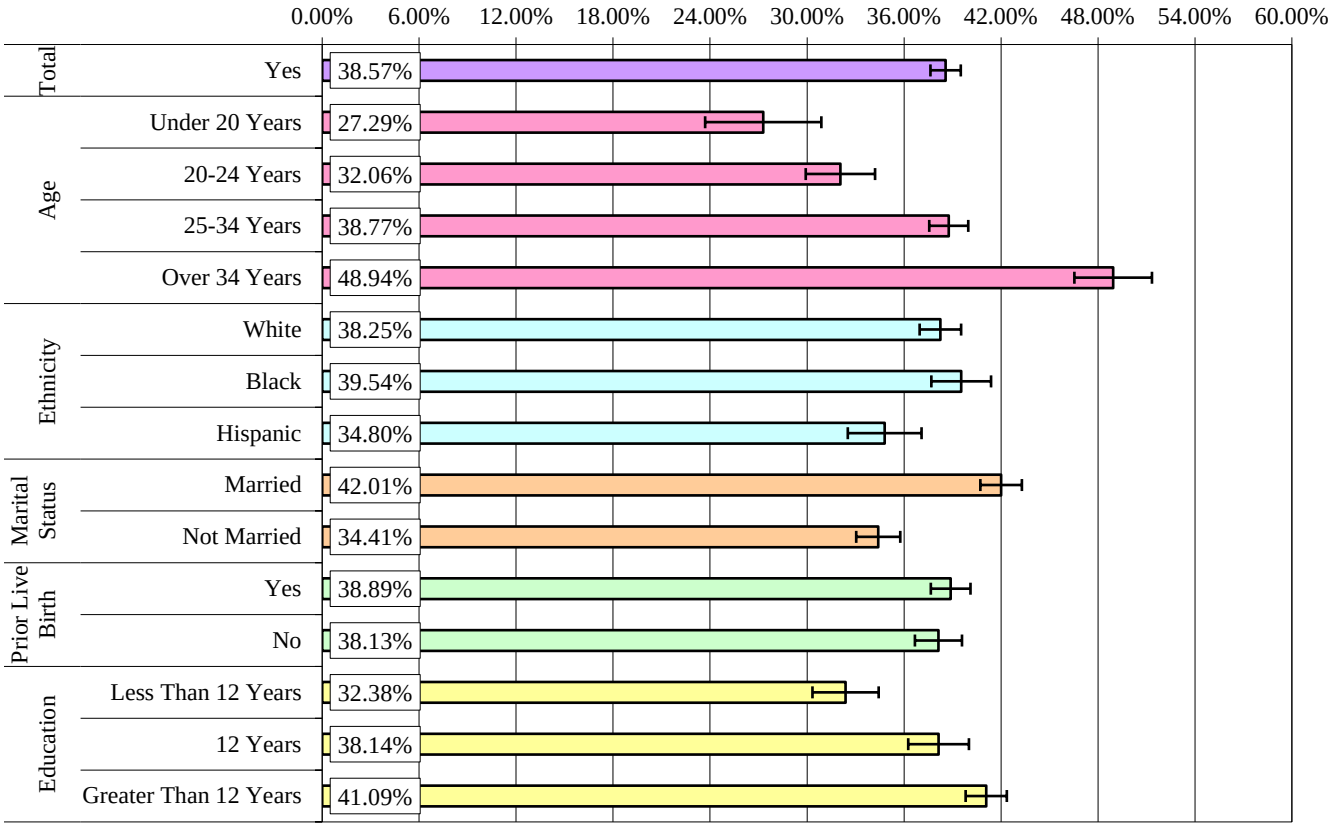
Q7C: At any time during the 12 months before you got pregnant with your new baby, were you regularly taking prescription medicines other than birth control? (% "Yes")



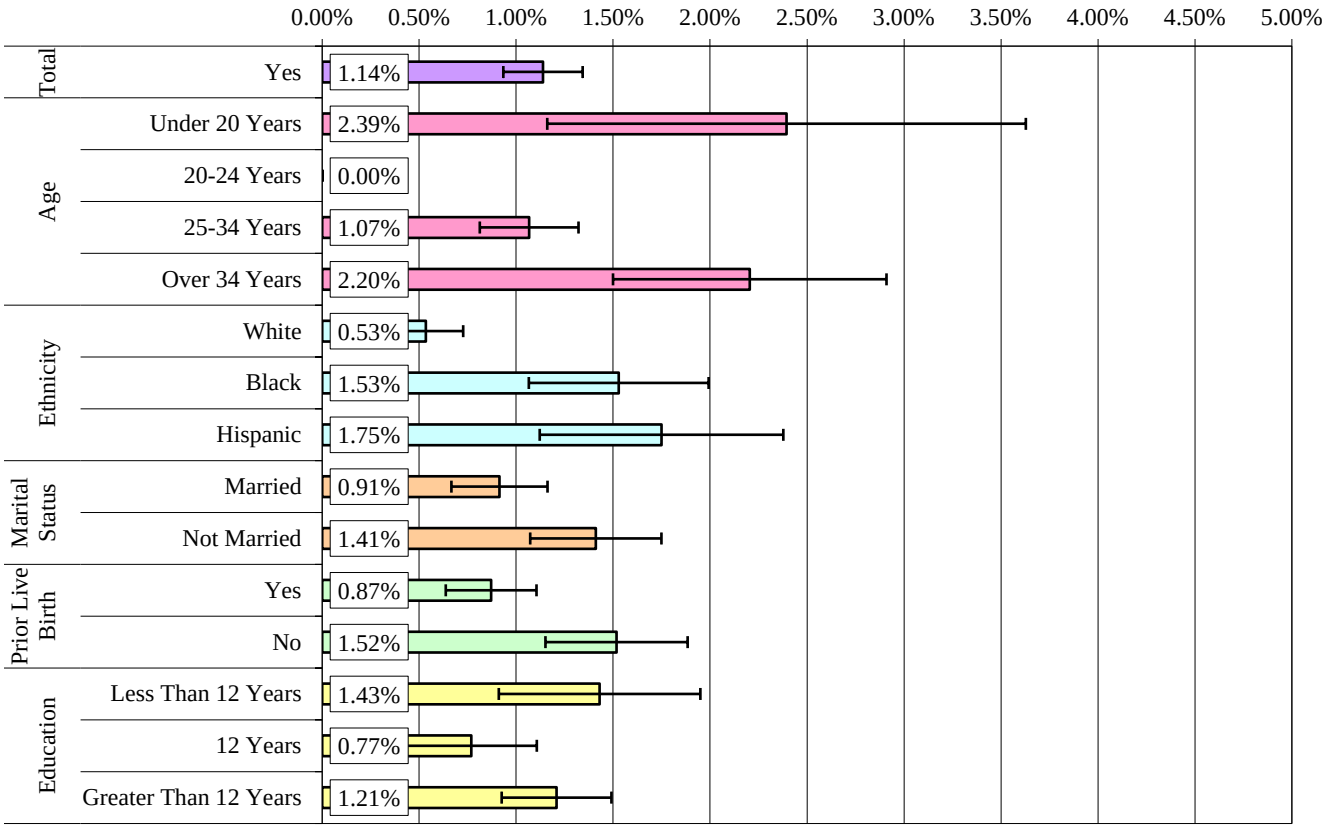
Q7D: At any time during the 12 months before you got pregnant with your new baby, did you visit a health care worker to be checked for diabetes? (% "Yes")



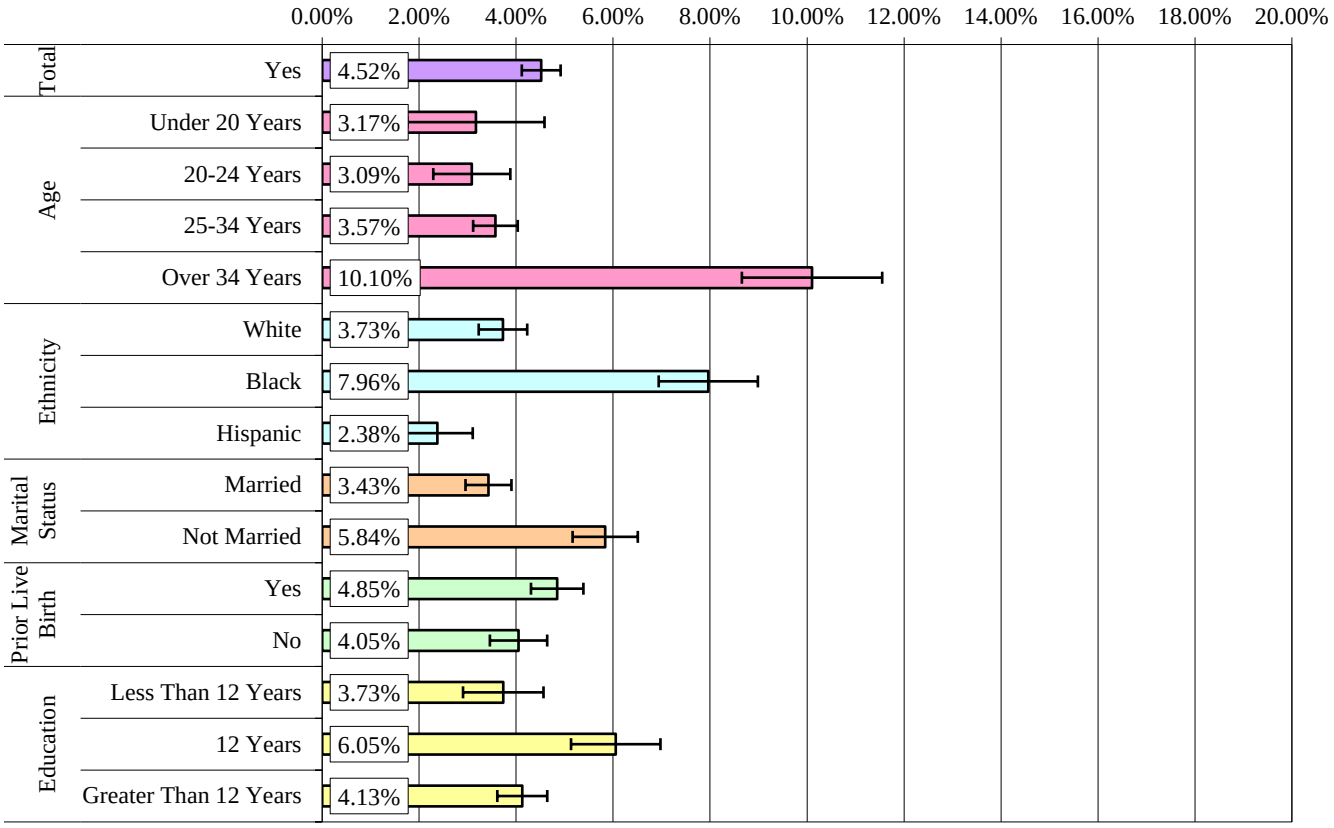
Q7E: At any time during the 12 months before you got pregnant with your new baby, did you talk to a health care worker about your family medical history?* (% "Yes")**



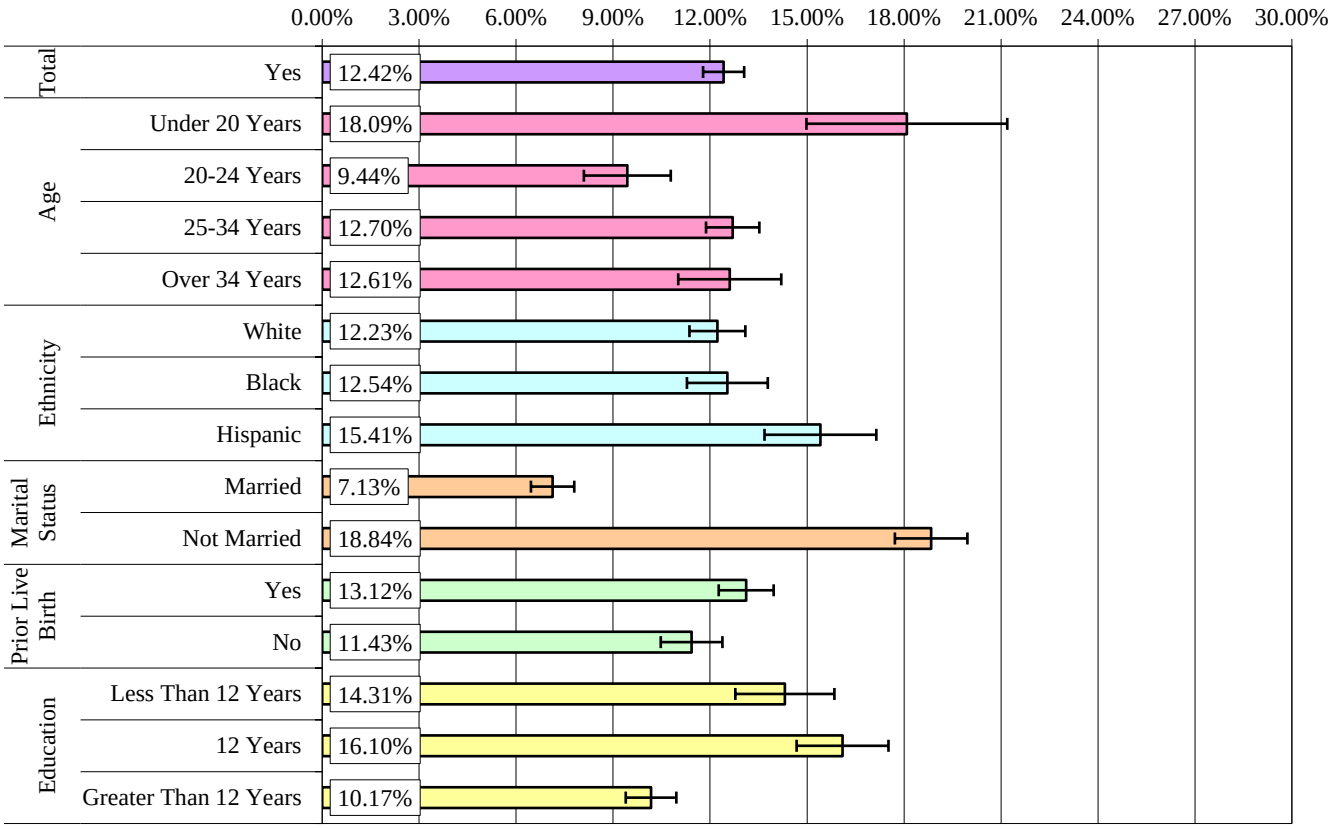
Q8A: During the 3 months before you got pregnant with your new baby, did you have Type 1 or Type 2 diabetes? (% "Yes")



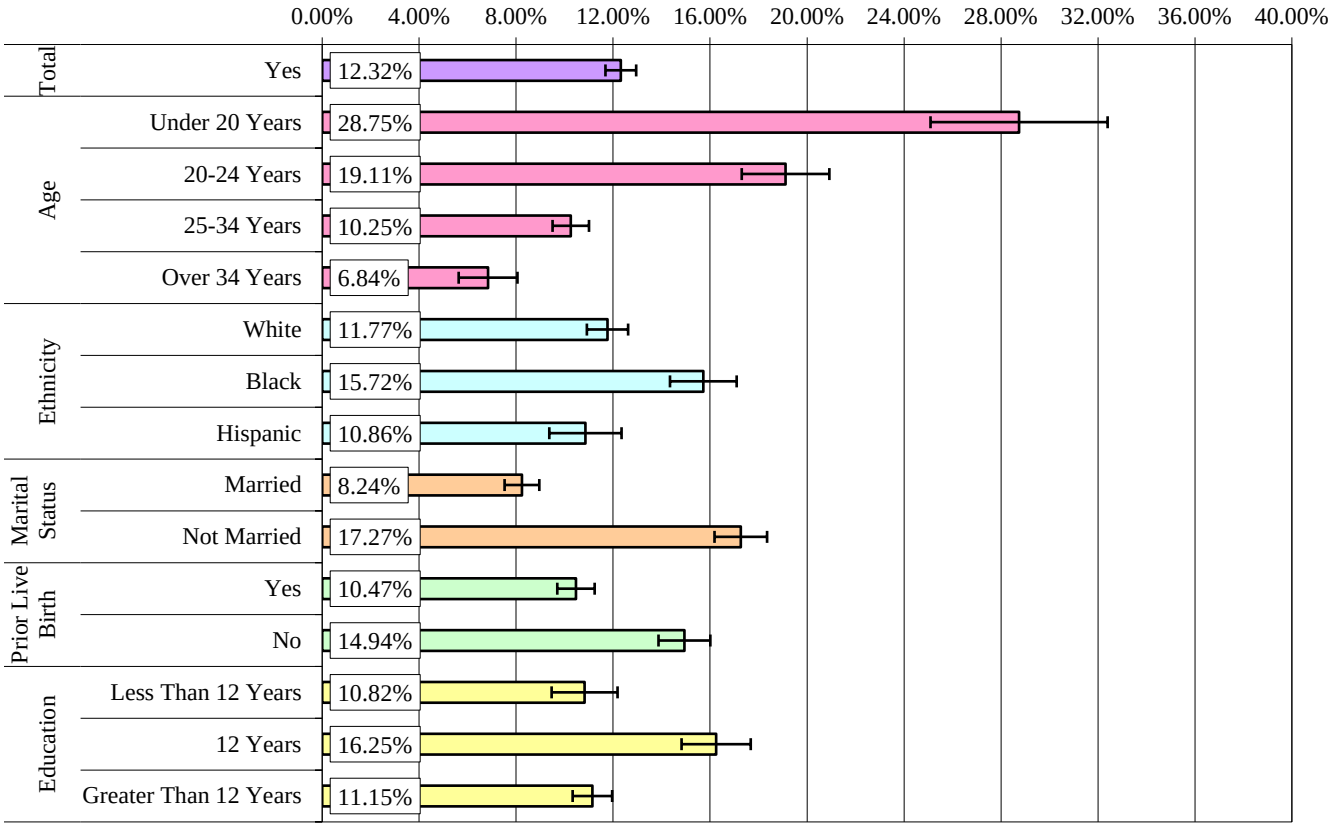
Q8B: During the 3 months before you got pregnant with your new baby, did you have high blood pressure or hypertension? (% "Yes")



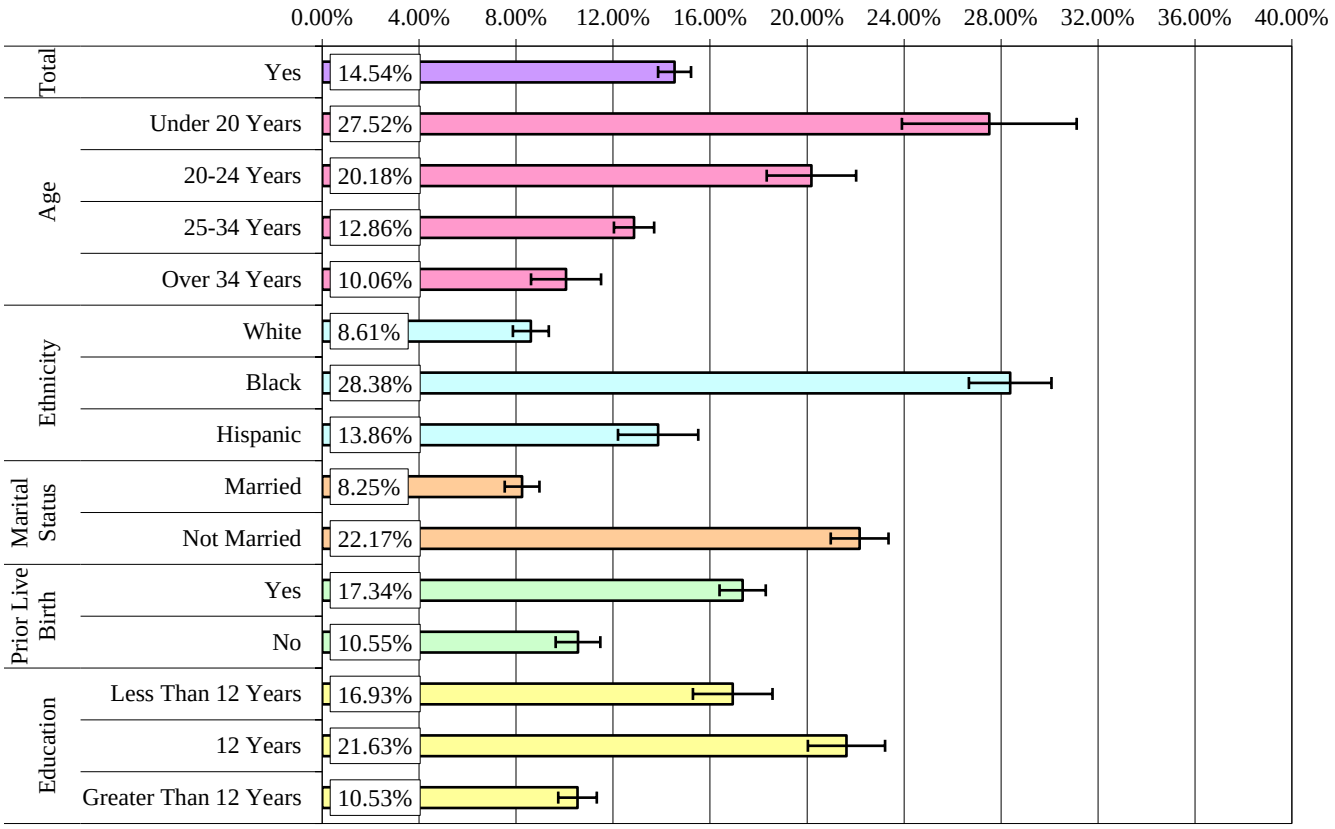
Q8C: During the 3 months before you got pregnant with your new baby, did you have <u>depression</u>?* (% "Yes")**



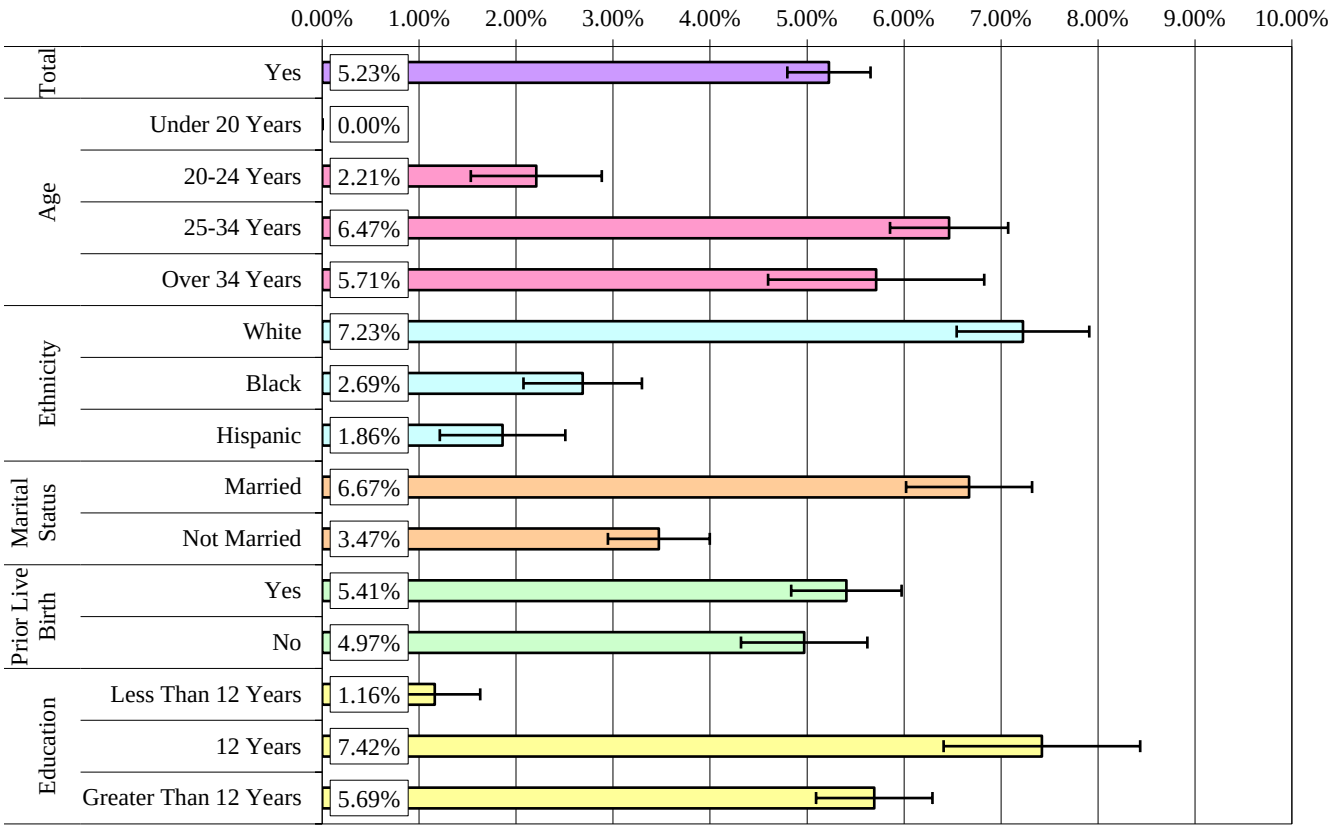
Q8D: During the 3 months before you got pregnant with your new baby, did you have <u>asthma</u>?* (% "Yes")**



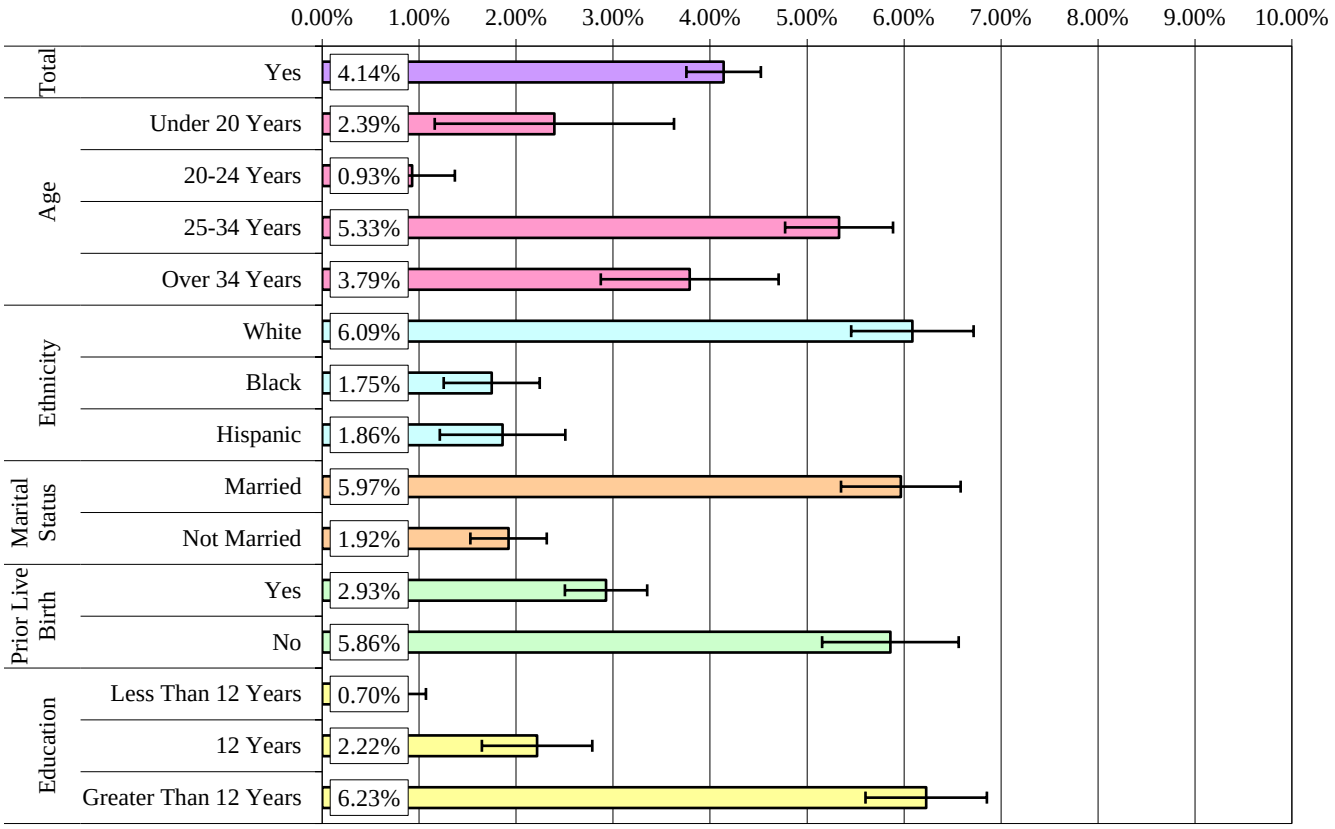
Q8E: During the 3 months before you got pregnant with your new baby, did you have anemia? (% "Yes")



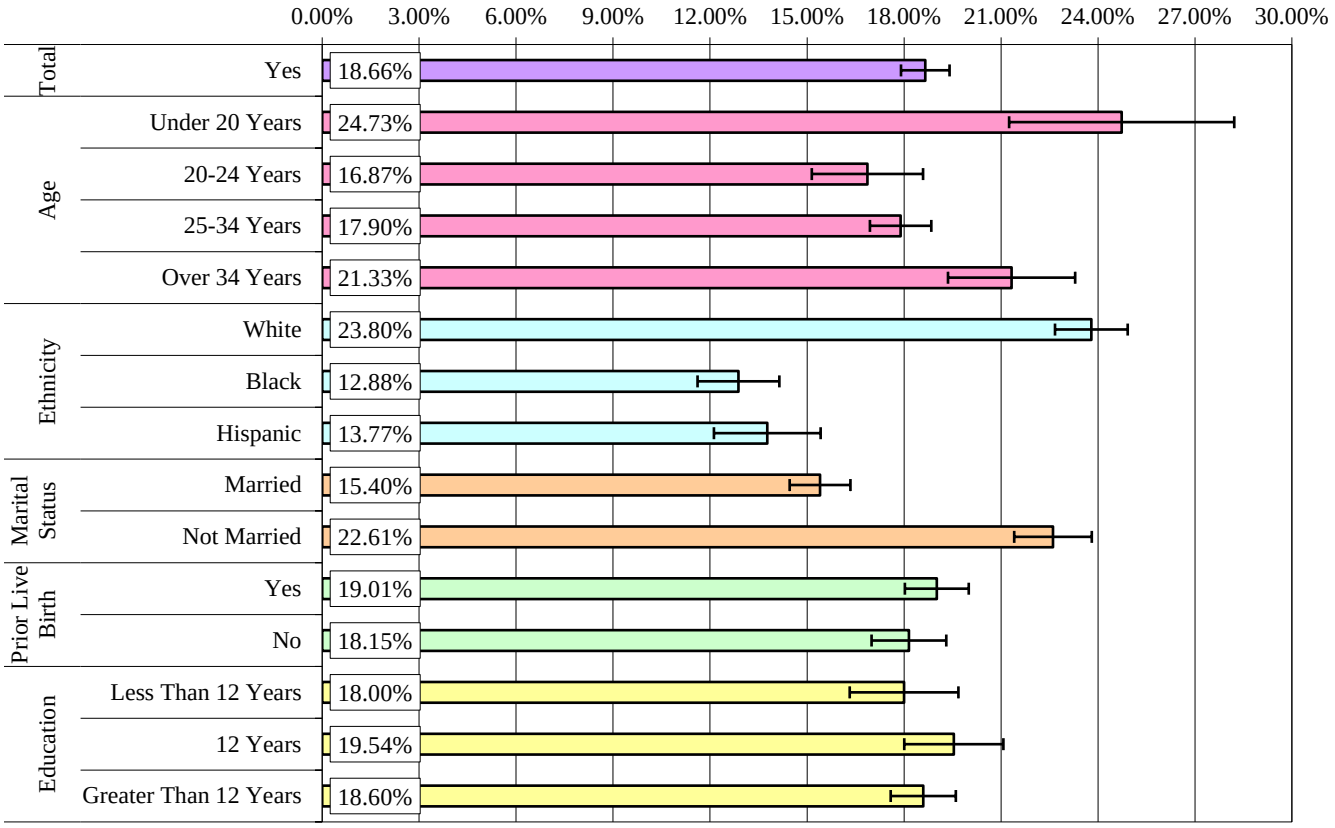
Q8F: During the 3 months before you got pregnant with your new baby, did you have thyroid problems? * (% "Yes")**



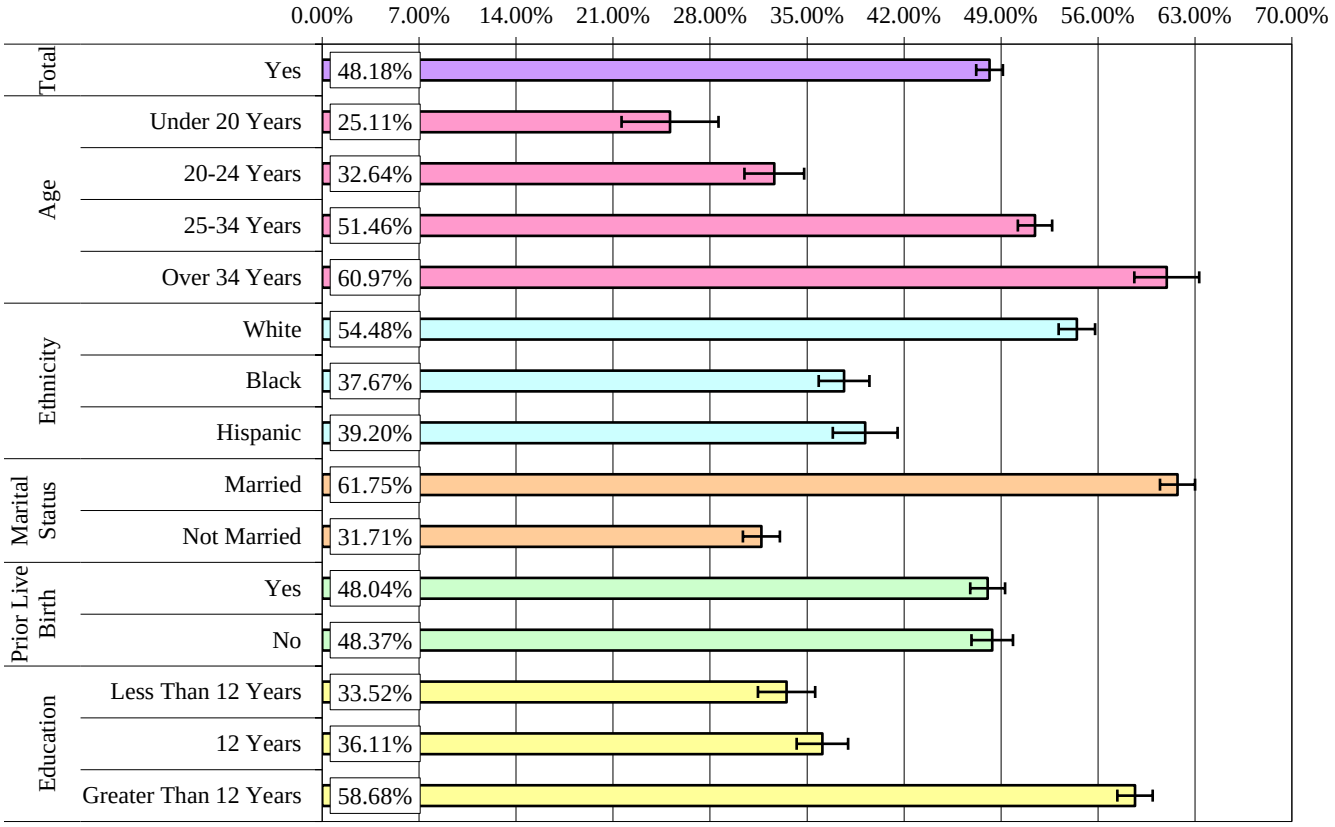
Q8G: During the 3 months before you got pregnant with your new baby, did you have PCOS (polycystic ovarian syndrome)? (% "Yes")



Q8H: During the month before you got pregnant with your new baby, did you have anxiety? (% "Yes")



Q9: During the month before you got pregnant with your new baby, did you take a multivitamin or a prenatal vitamin at least once a week? * (% "Yes")**



Q10: In the 12 months before you got pregnant with your new baby, did you have any health care visits with a doctor, nurse, or other health care worker, including a dental or mental health worker?* (% "Yes")**

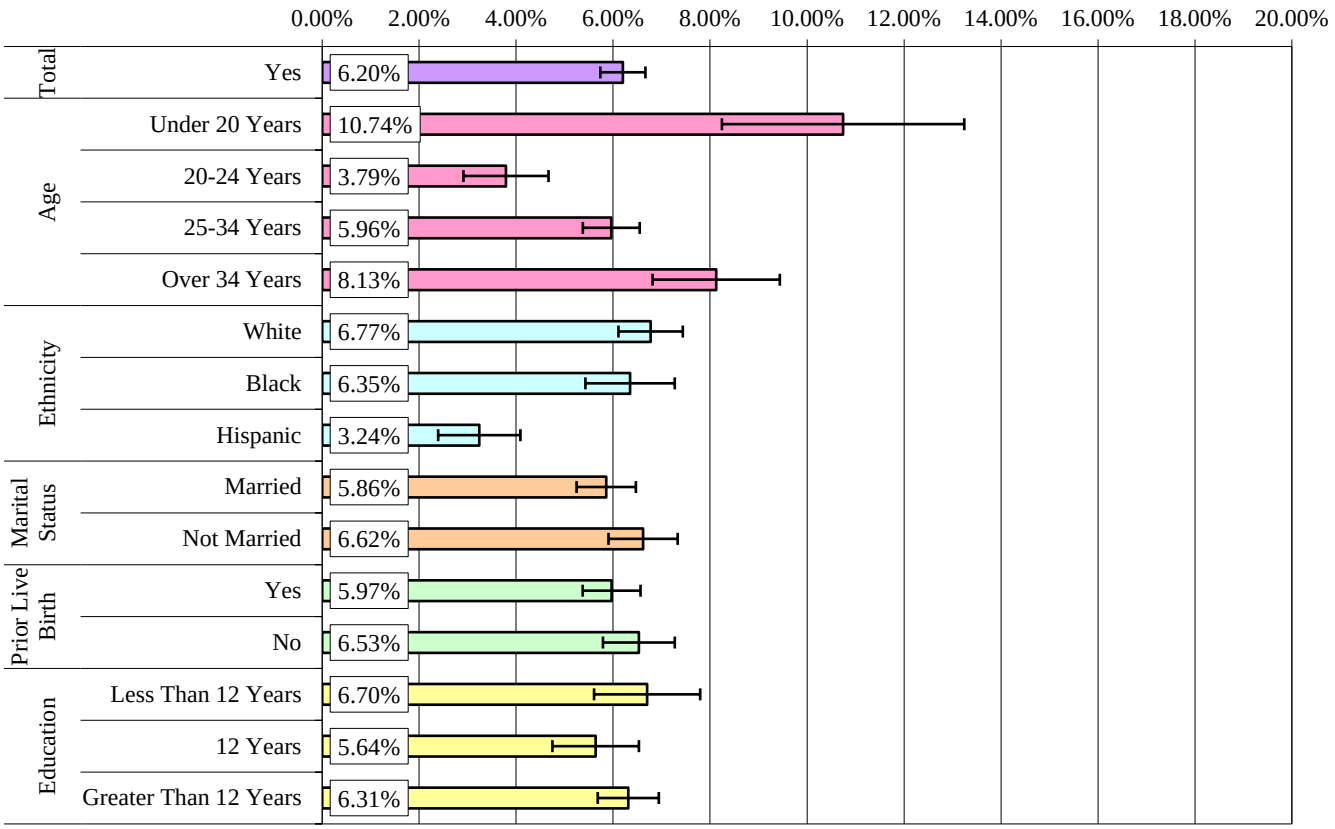
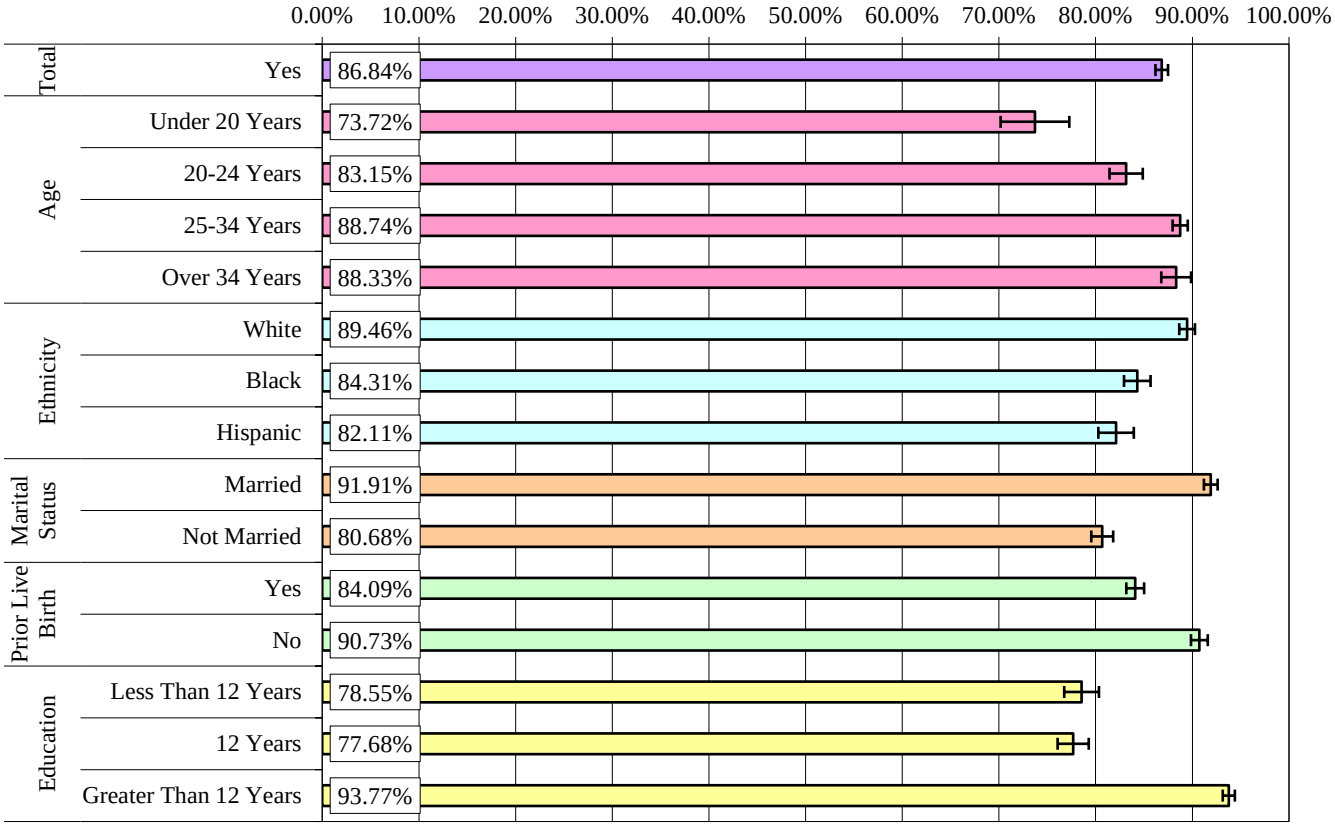
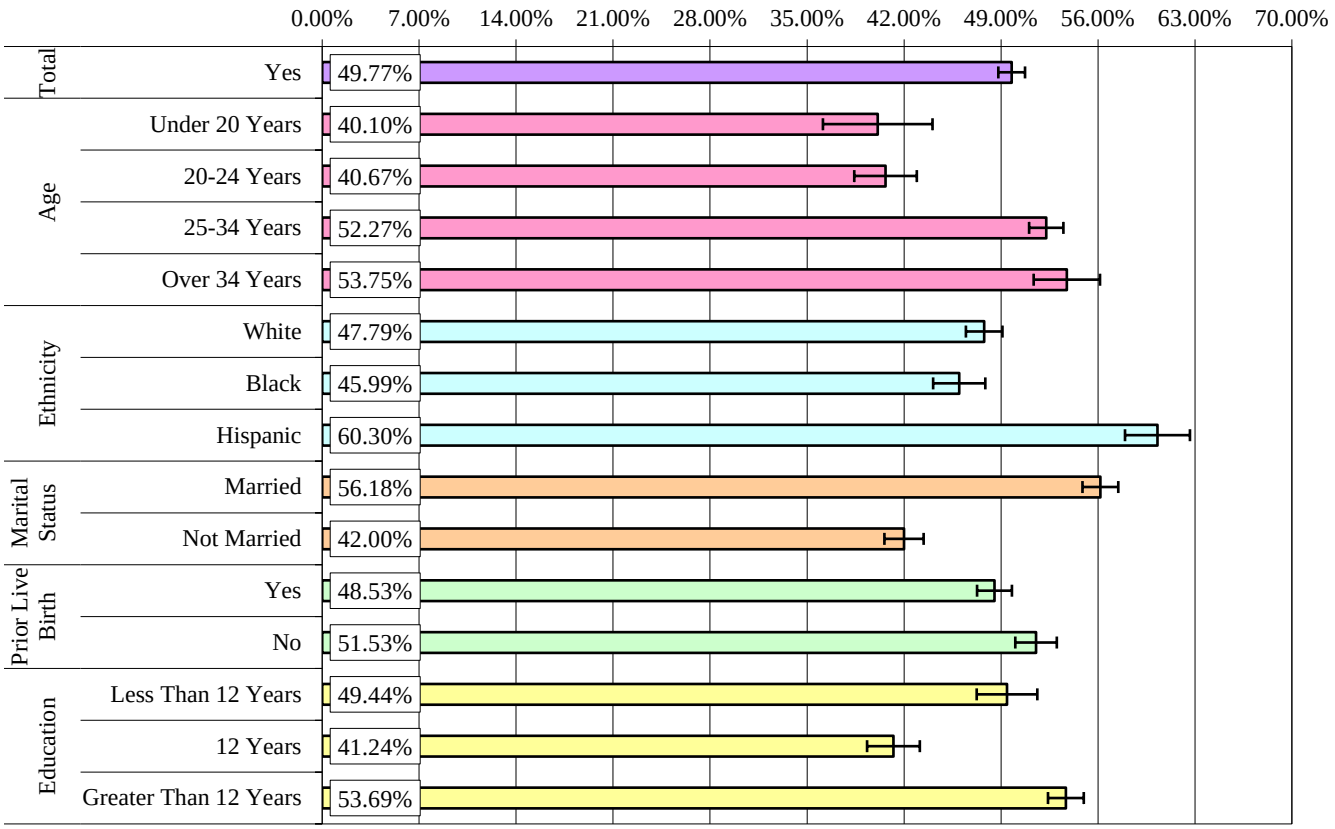
Q68K: <u>Not having sex (abstinence)</u> is the birth control that I or my husband or partner is using now to keep from getting pregnant.†††,* (% "Yes")**



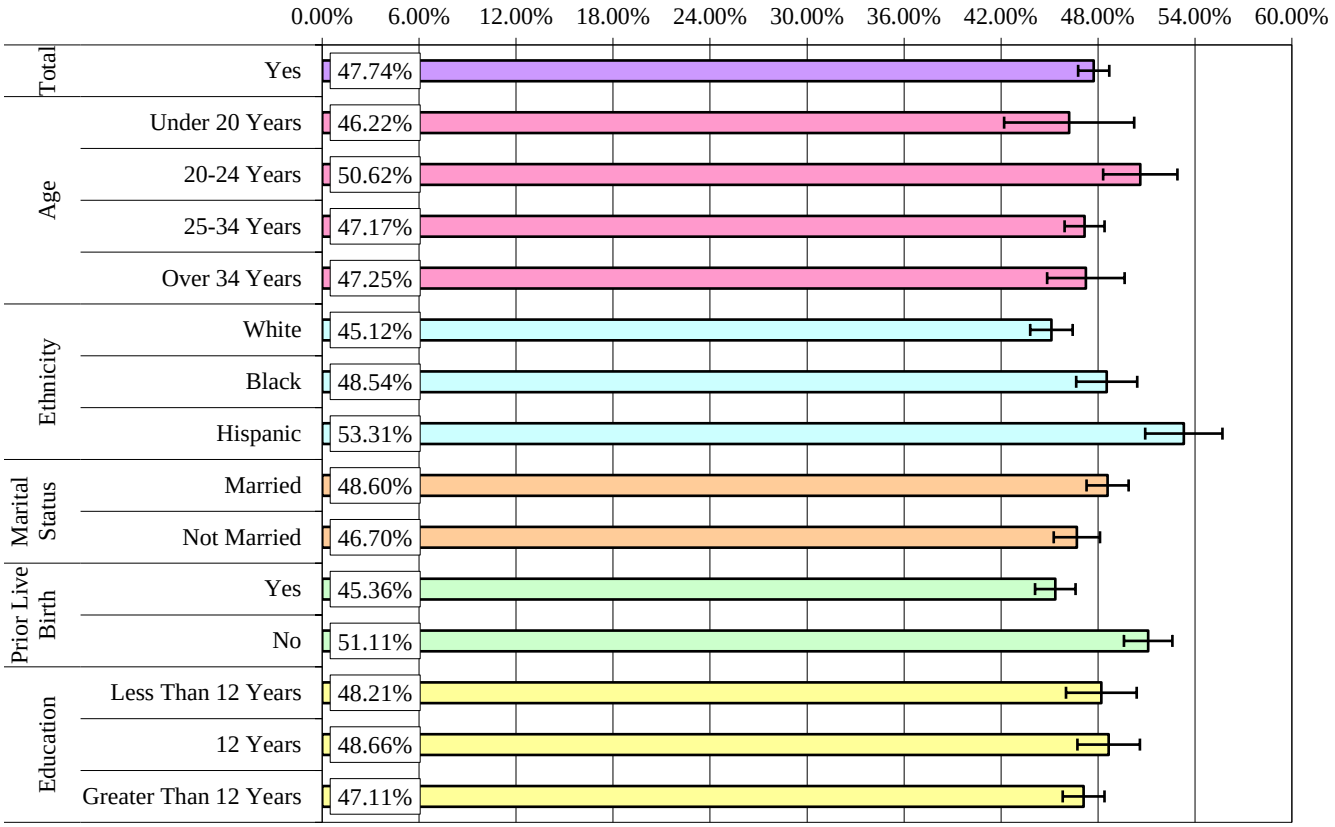
Q69: Since your new baby was born, have you had a postpartum checkup for yourself?†††,* (% "Yes")**



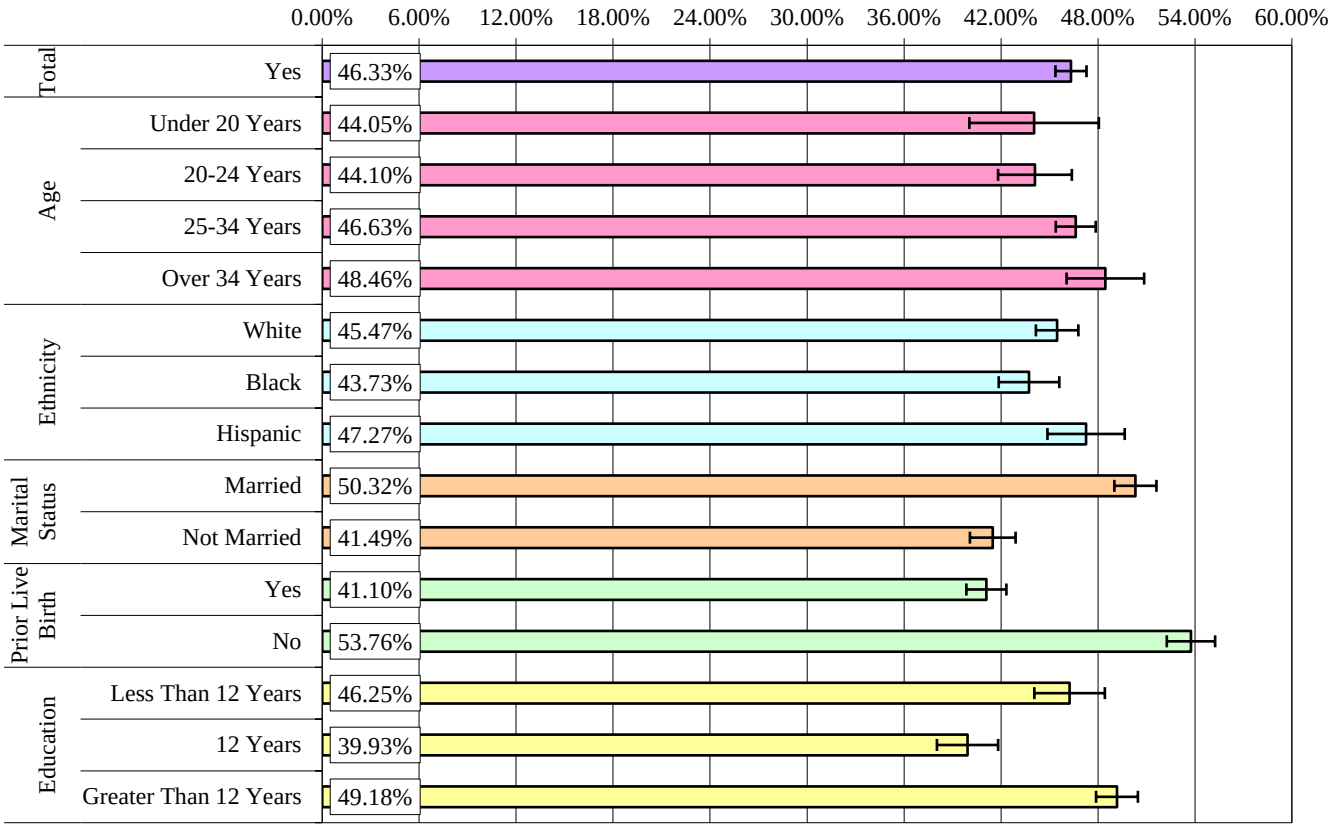
Q70A: During your postpartum checkup, did a doctor, nurse, or other health care worker <u>tell you to take a vitamin with folic acid</u>?†††,* (% "Yes")**



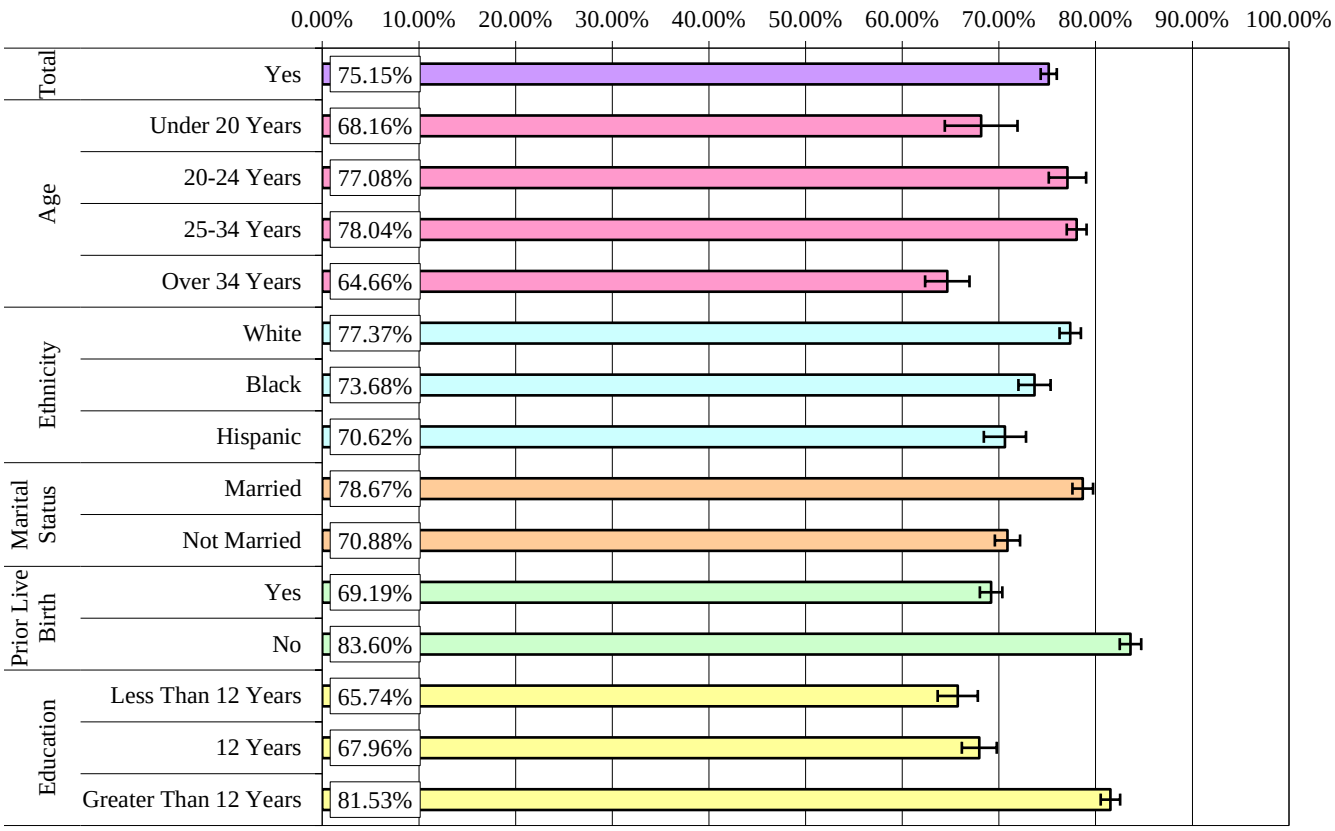
Q70B: During your postpartum checkup, did a doctor, nurse, or other health care worker talk with you about healthy eating, exercise, and losing weight gained during pregnancy?†††,* (% "Yes")**



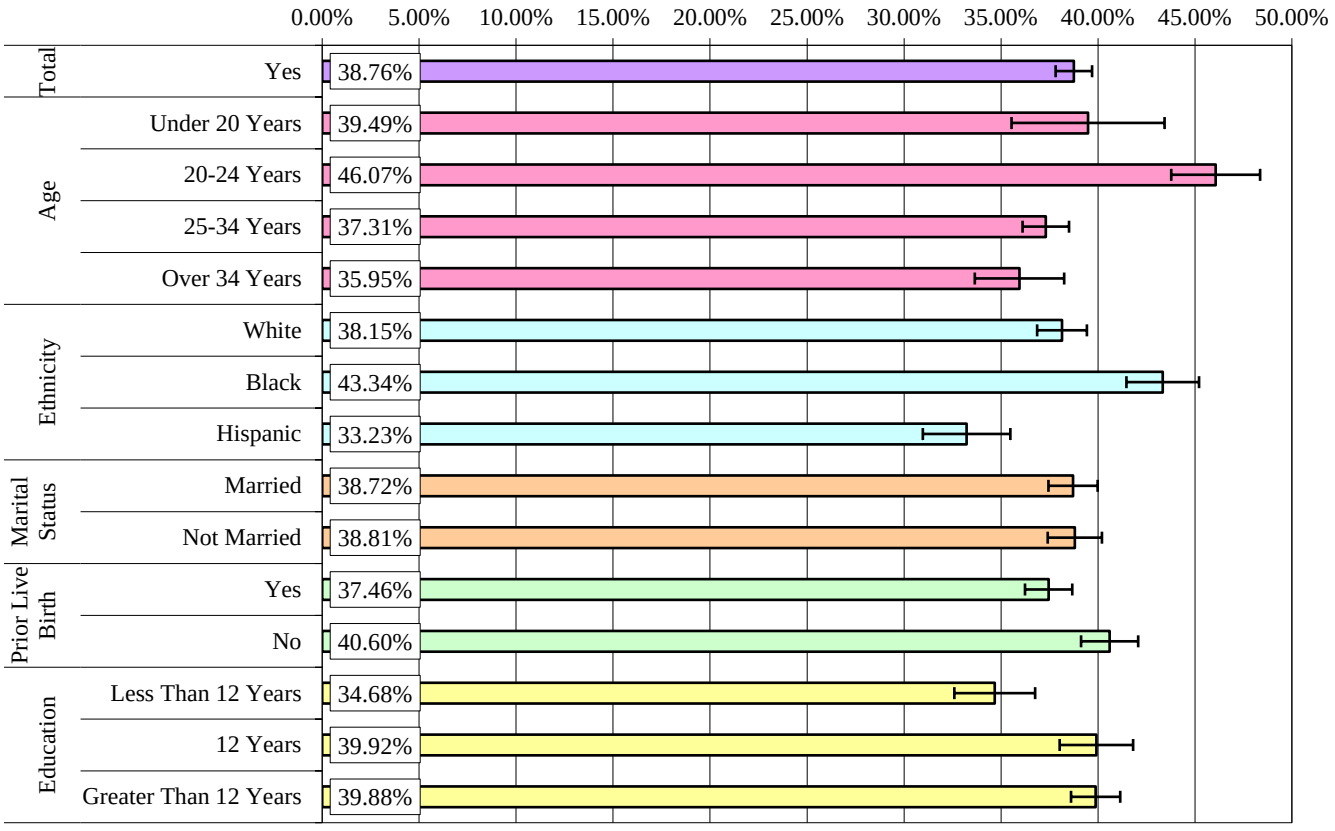
Q70C: During your postpartum checkup, did a doctor, nurse, or other health care worker talk with you about how long to wait before getting pregnant again?†††,* (% "Yes")**



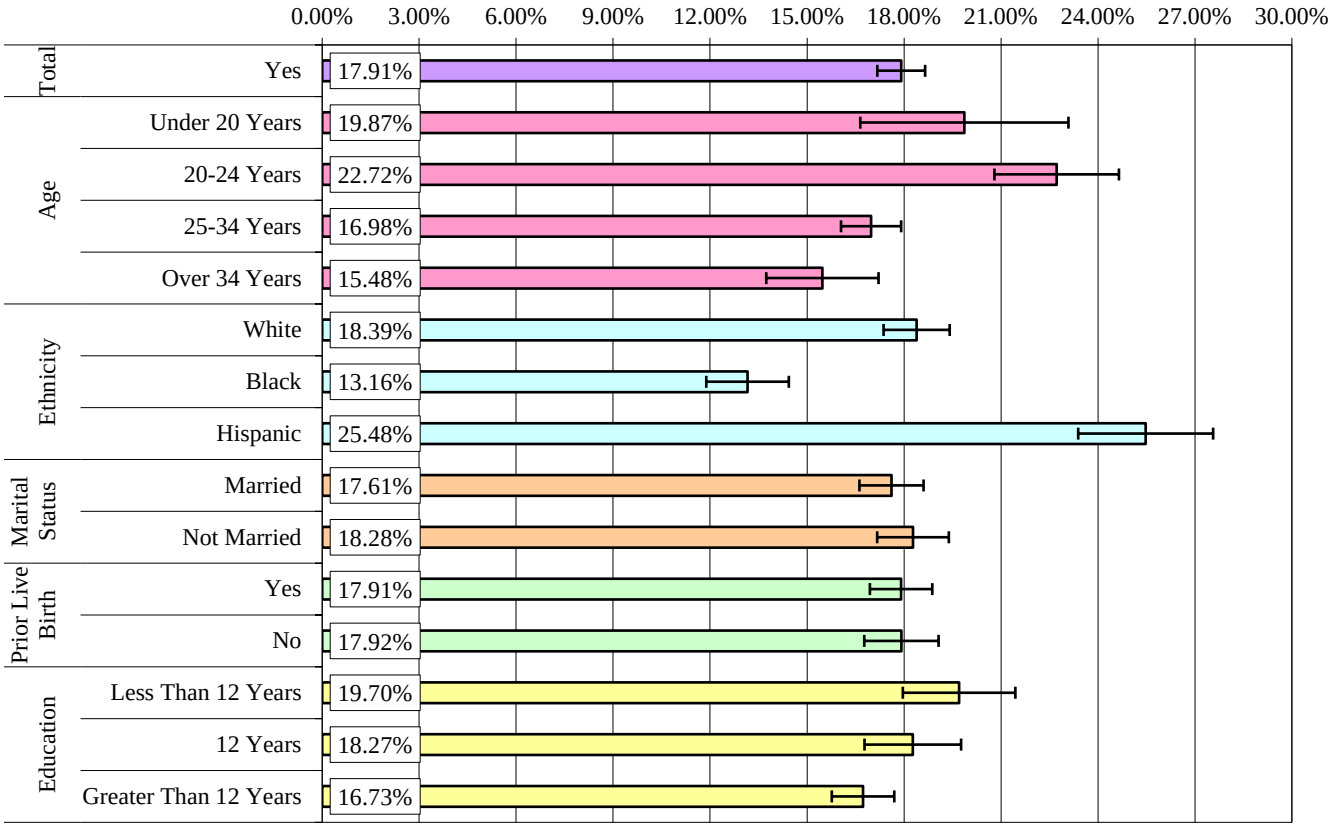
Q70D: During your postpartum checkup, did a doctor, nurse, or other health care worker talk with you about birth control methods you can use after giving birth? (% "Yes")



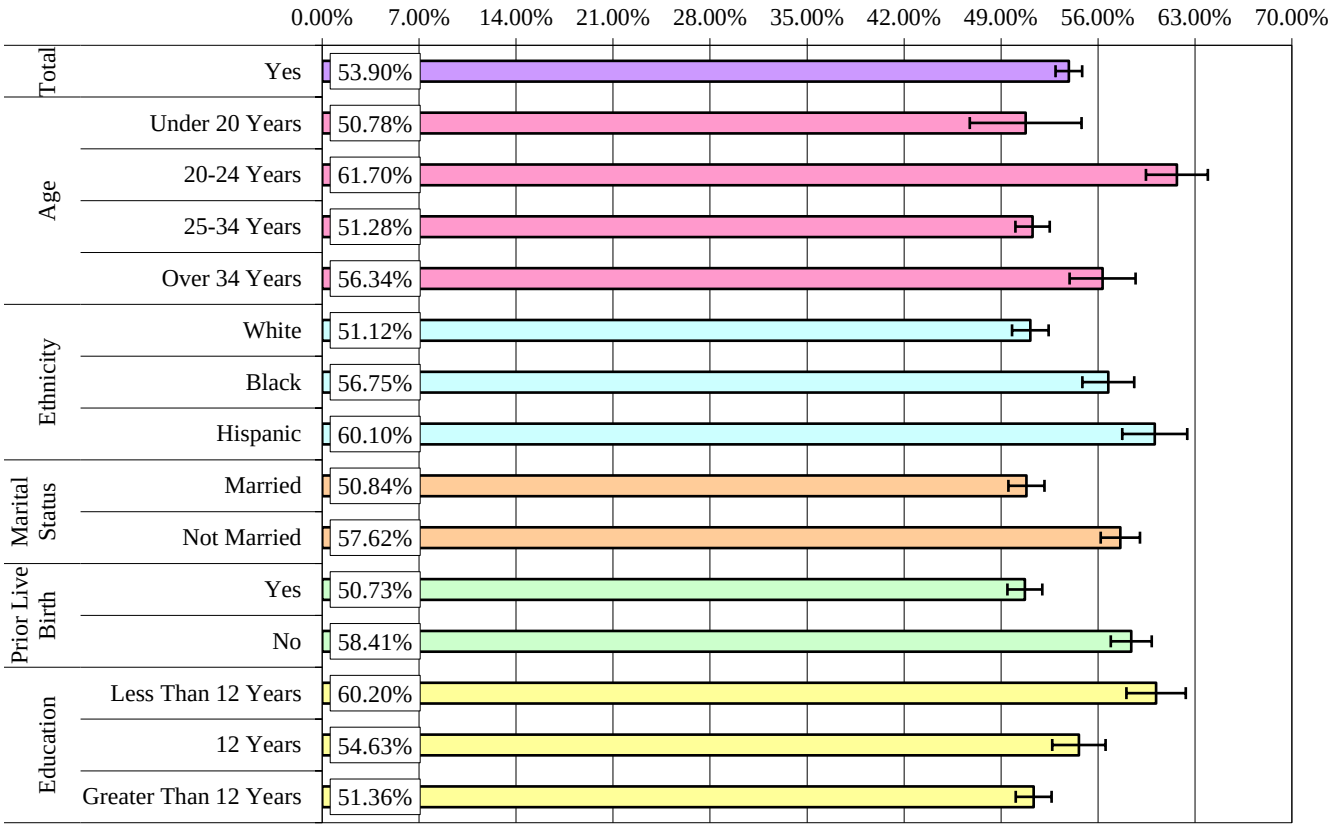
Q70E: During your postpartum checkup, did a doctor, nurse, or other health care worker give or prescribe for you a contraceptive method such as the pill, patch, shot (Depo-Provera®), NuvaRing®, or condoms?†††,* (% "Yes")**



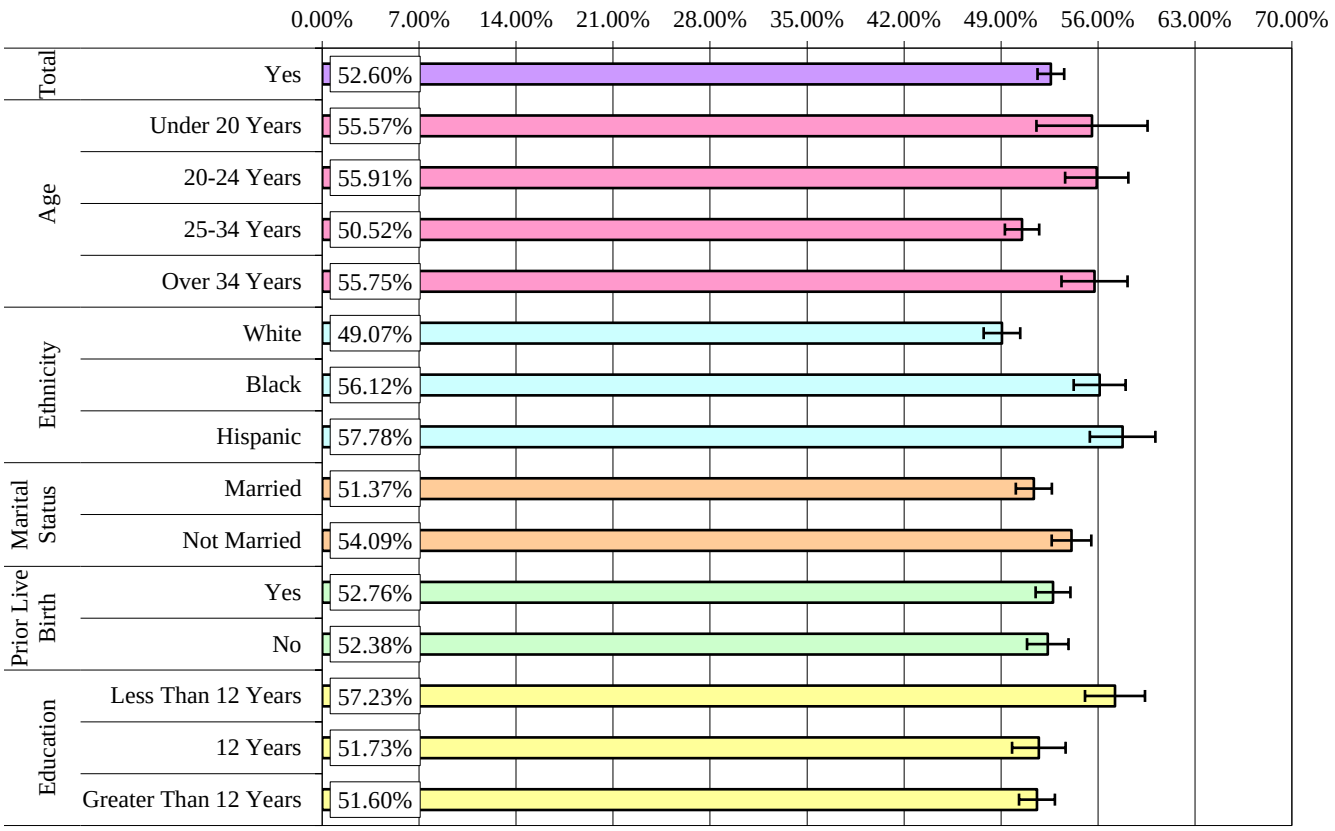
Q70F: During your postpartum checkup, did a doctor, nurse, or other health care worker insert an IUD (Mirena®, ParaGard®, Liletta®, or Skyla®) or a contraceptive implant (Nexplanon® or Implanon®)?†††,* (% "Yes")**



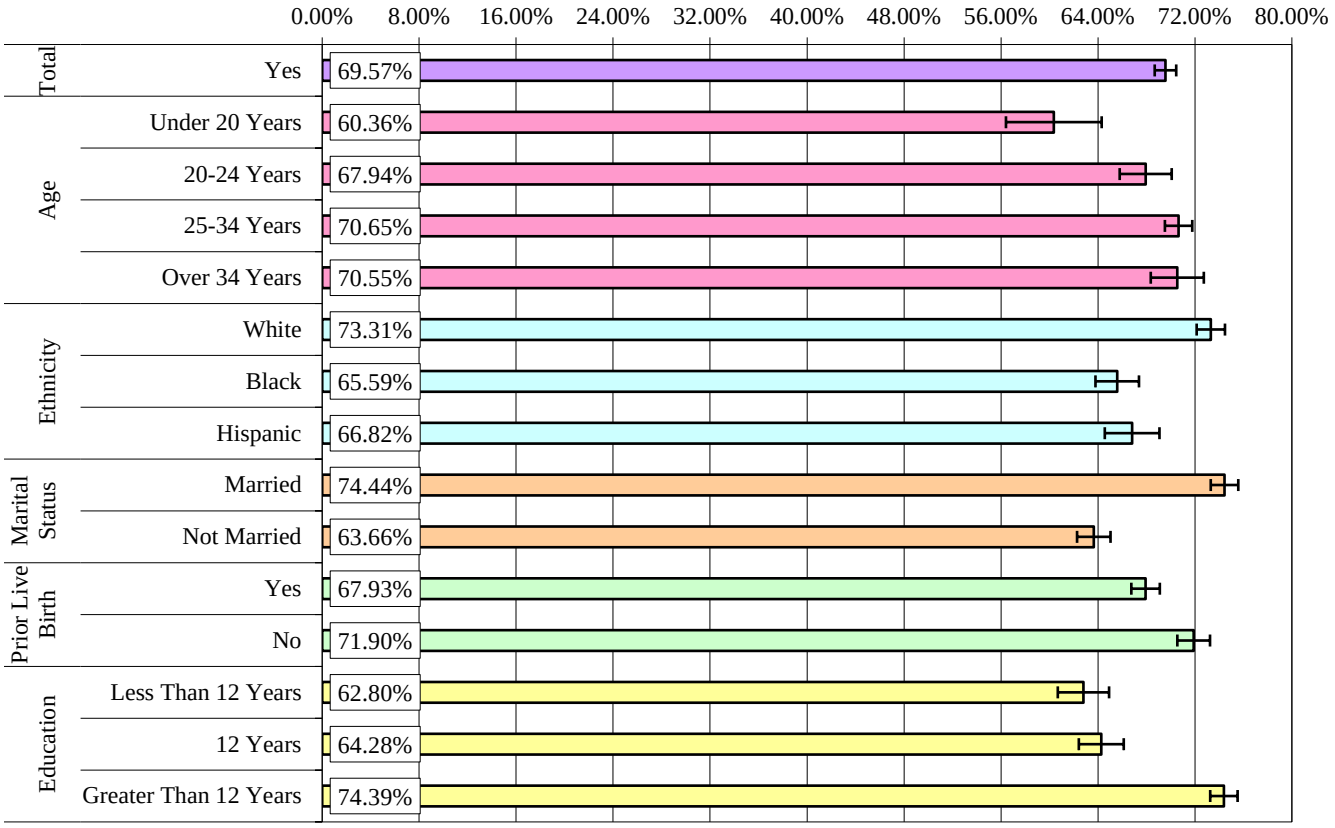
Q70G: During your postpartum checkup, did a doctor, nurse, or other health care worker <u>ask you if you were smoking cigarettes</u>?†††,* (% "Yes")**



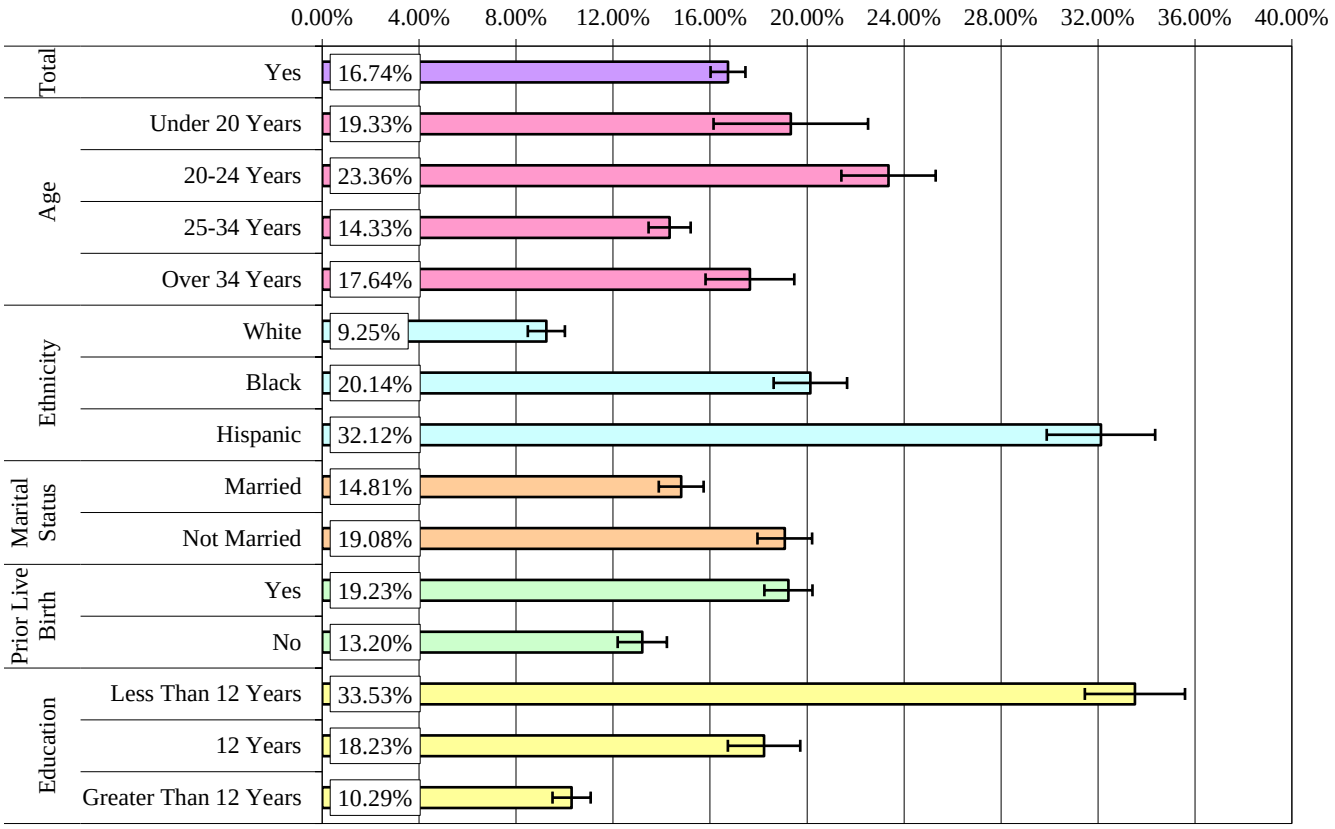
Q70H: During your postpartum checkup, did a doctor, nurse, or other health care worker ask you if someone was hurting you emotionally o physically?†††,* (% "Yes")**



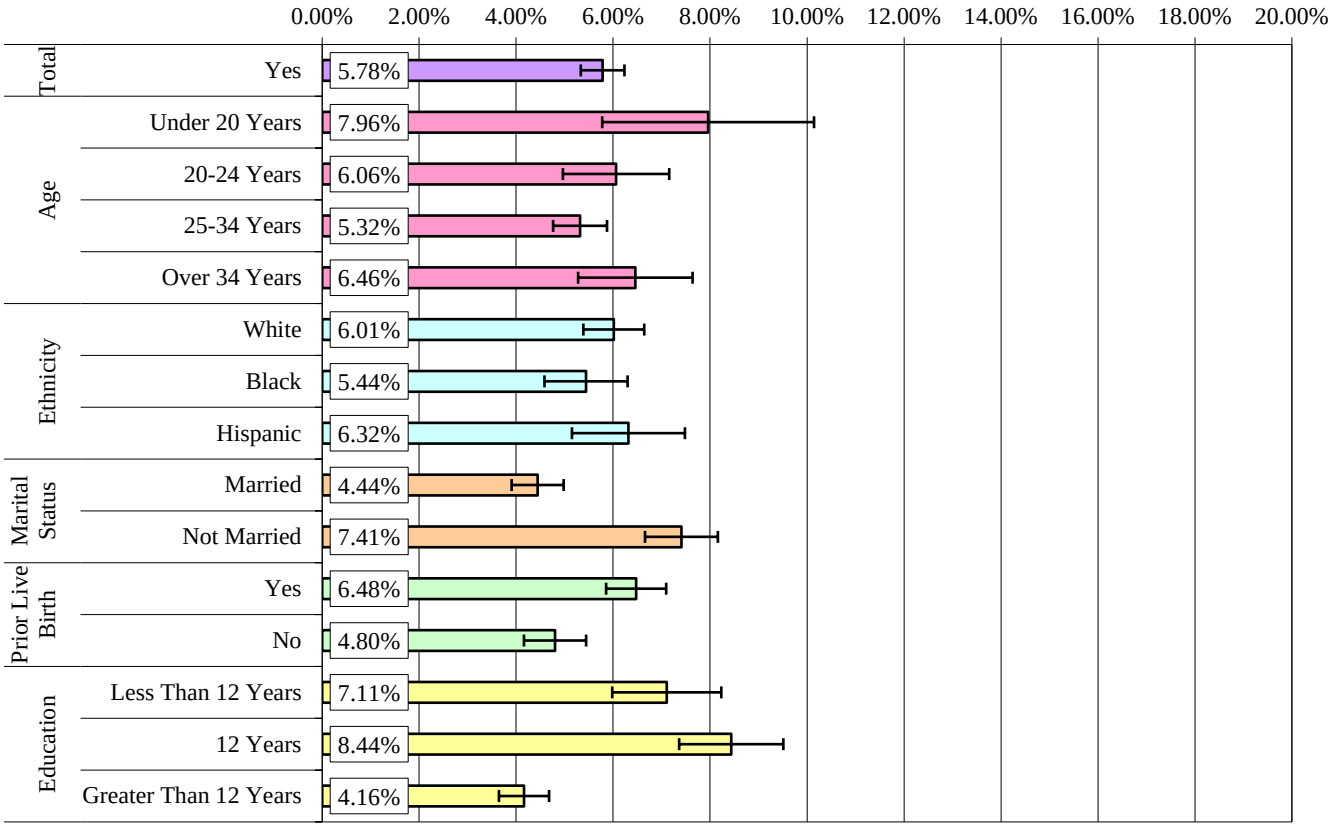
Q70I: During your postpartum checkup, did a doctor, nurse, or other health care worker ask you if you were feeling down or depressed?†††,* (% "Yes")**



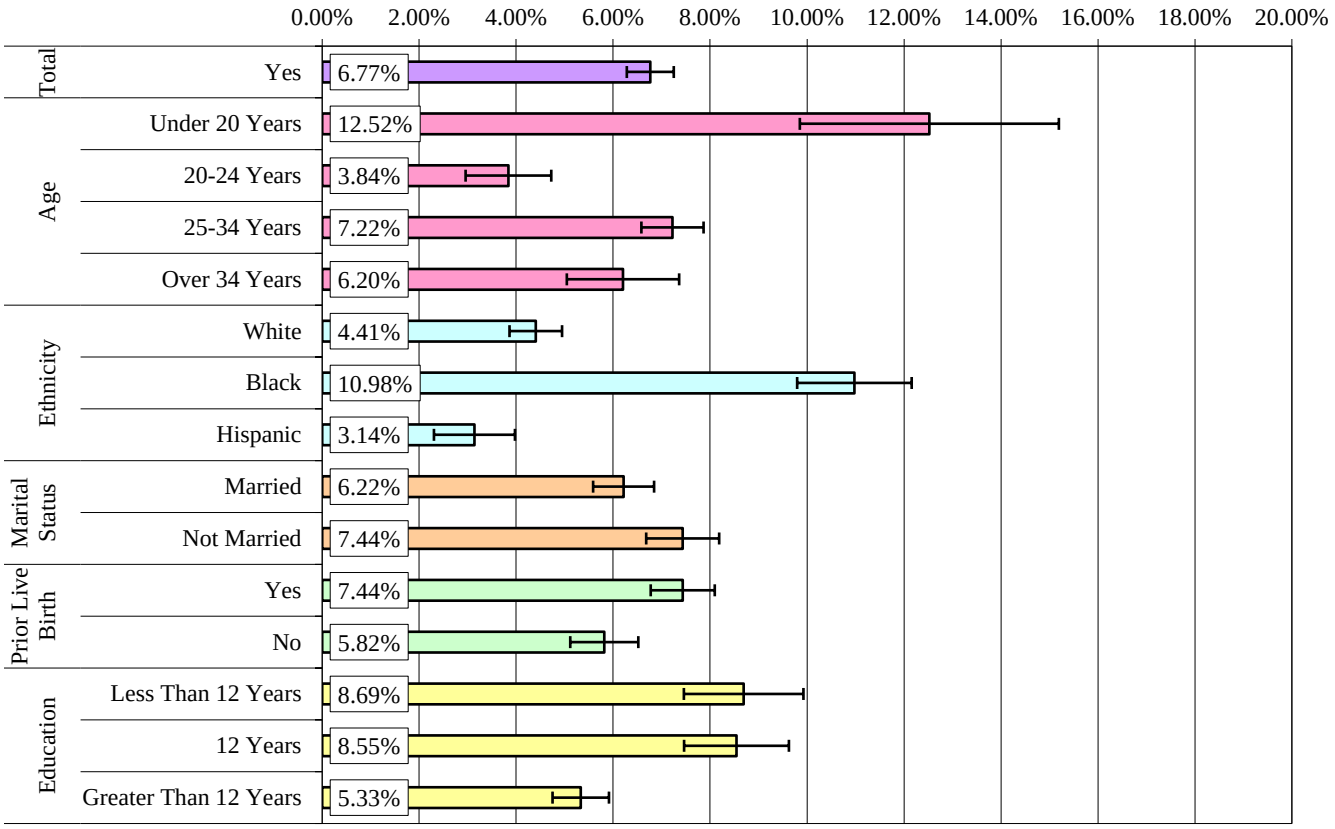
Q70J: During your postpartum checkup, did a doctor, nurse, or other health care worker test you for diabetes?†††,* (% "Yes")**



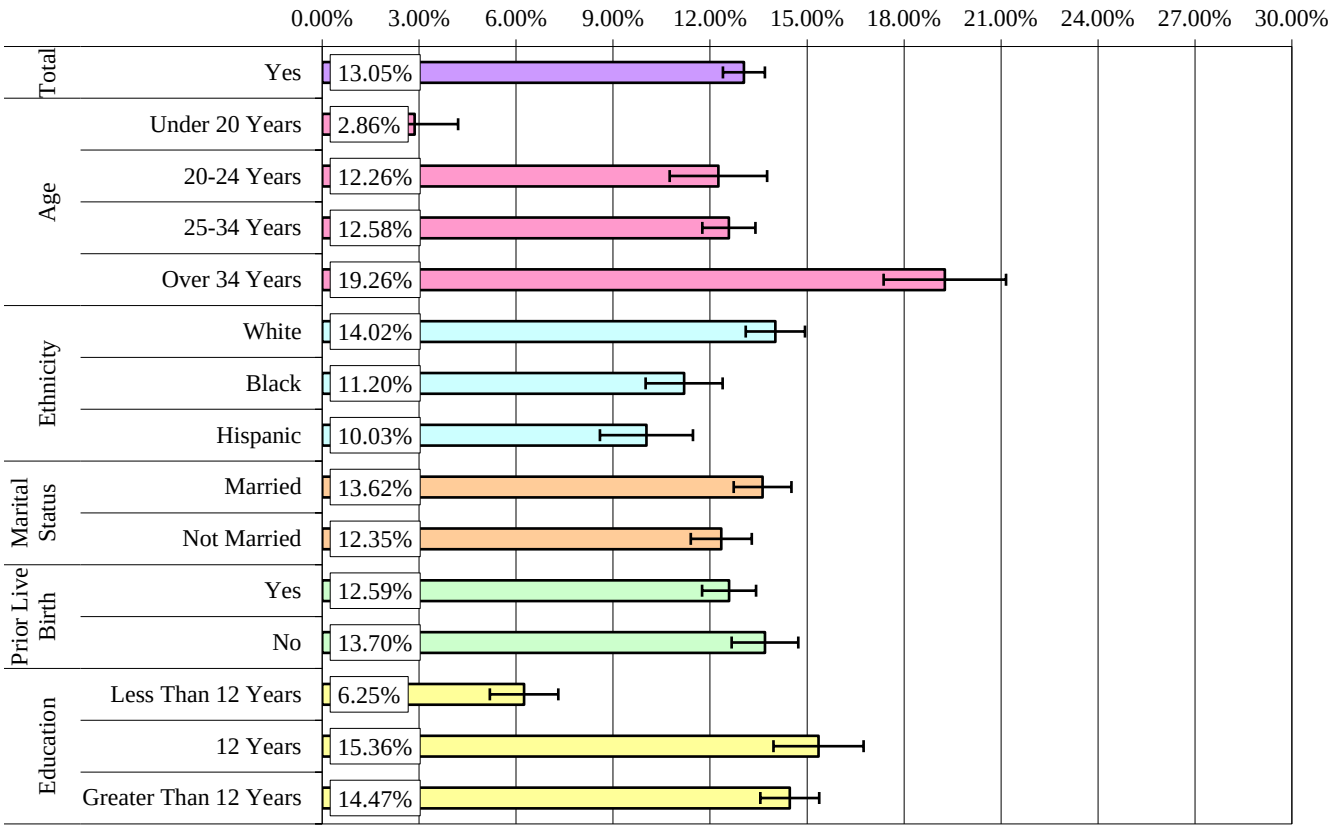
Q71: Since your new baby was born, have you always or often felt down, depressed, or hopeless?* (% "Yes")**



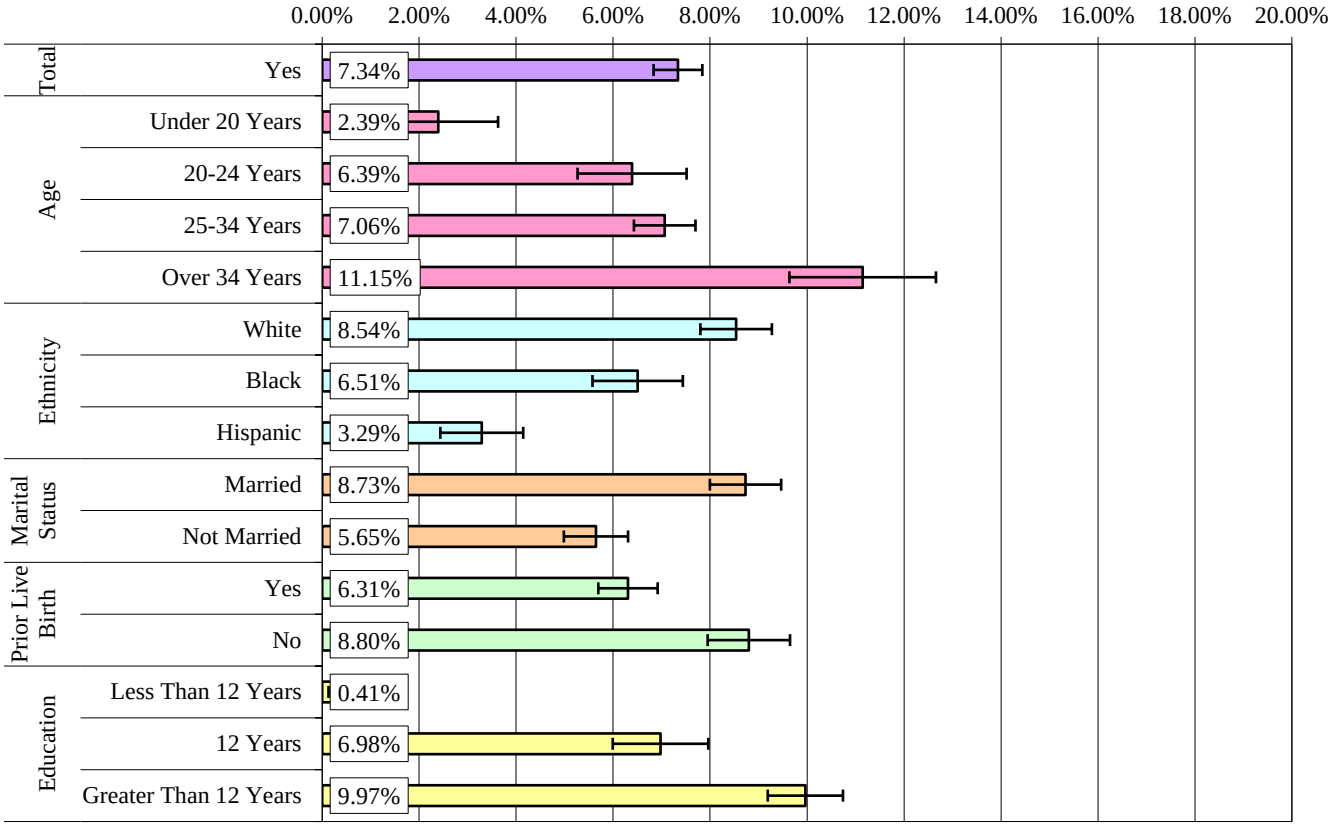
Q72: Since your new baby was born, have you always or often felt little interest or little pleasure in doing things you usually enjoyed?* (% "Yes")**



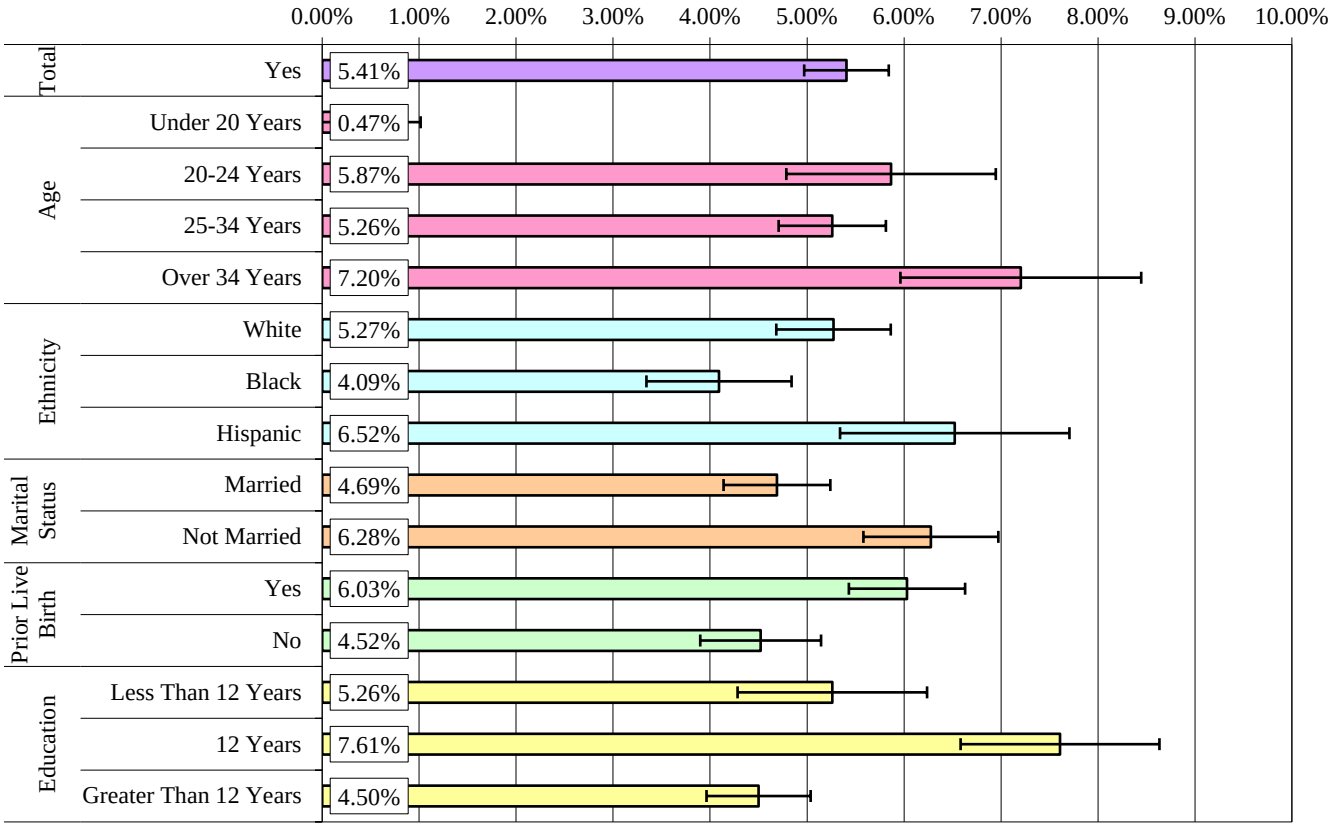
Q74: During the 12 months before you got pregnant with your new baby, did you have a miscarriage, fetal death (baby died before being born), or stillbirth? (% "Yes")



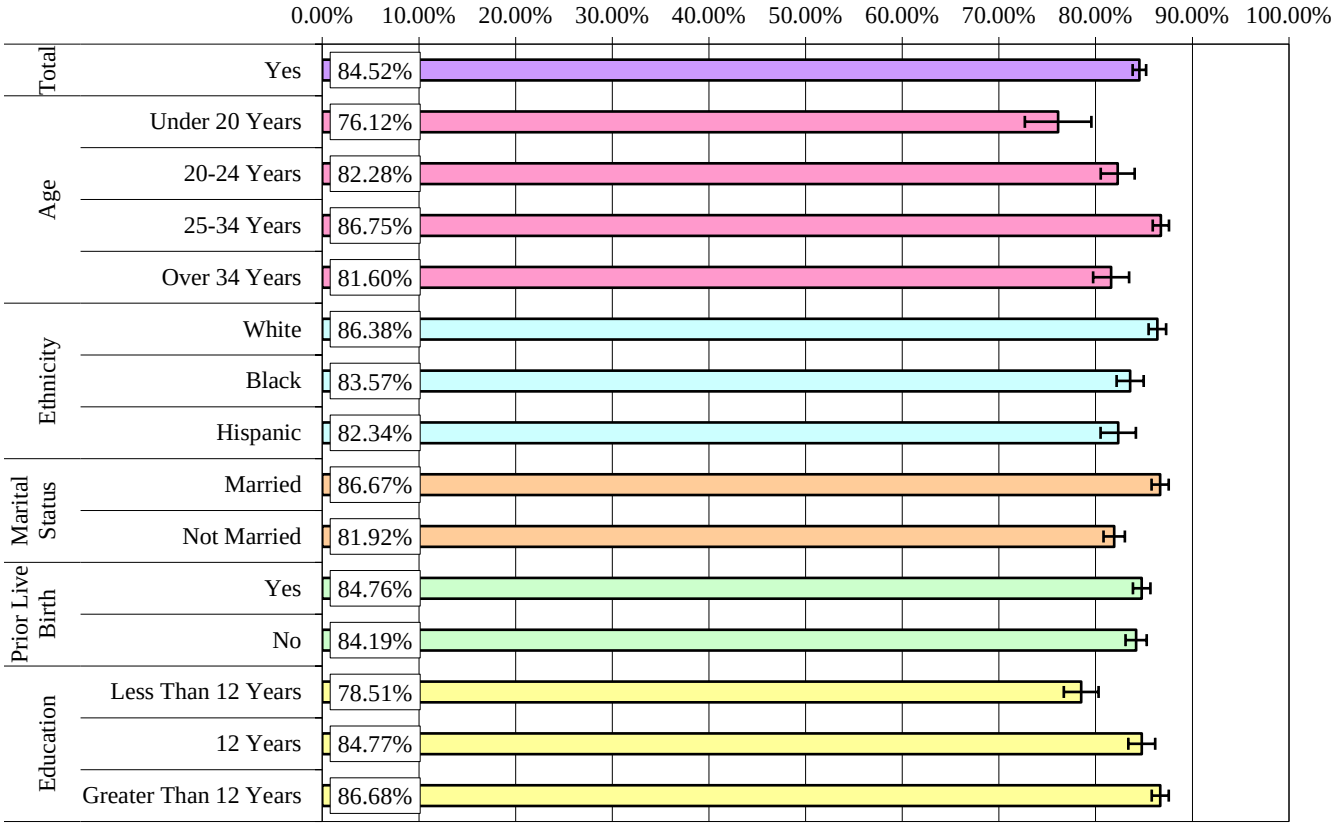
Q75A: During the 12 months before you got pregnant with your new baby, did you have a miscarriage, fetal death, or stillbirth <u>less than 6 months</u> before getting pregnant?* (% "Yes")**



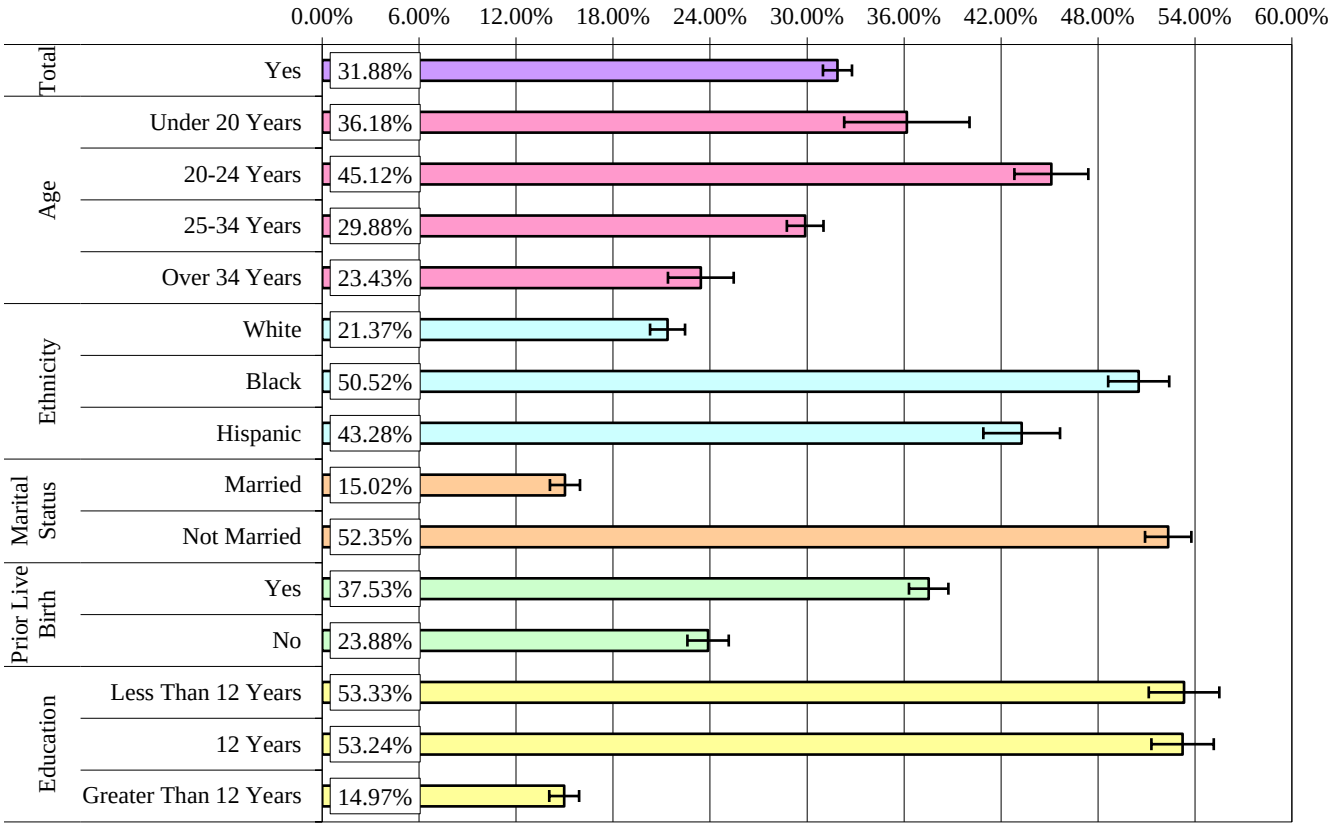
Q75B: During the 12 months before you got pregnant with your new baby, did you have a miscarriage, fetal death, or stillbirth <u>6 to 12 months</u> before getting pregnant?* (% "Yes")**



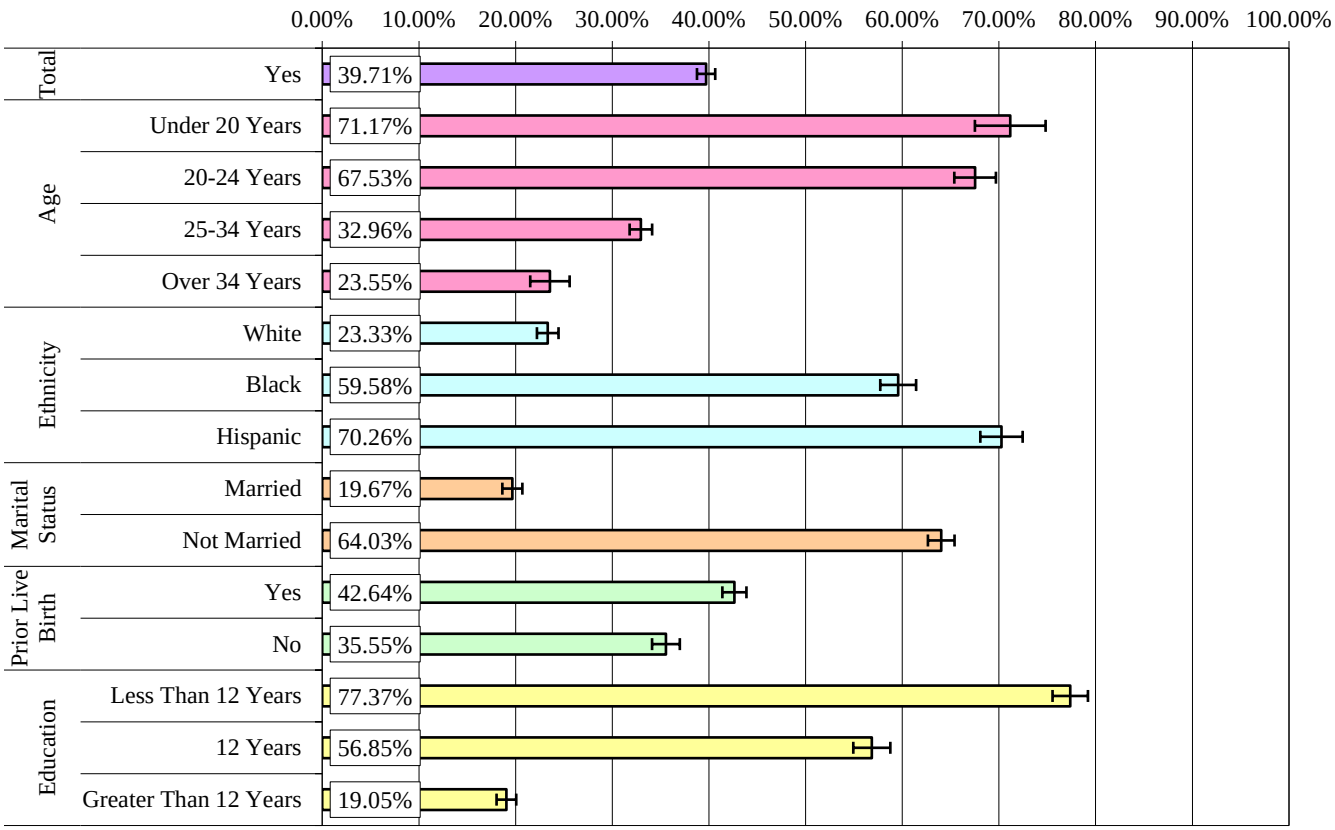
Q76: During any of your prenatal care visits, did a doctor, nurse, or other health care worker talk with you about fetal (baby) kick counts and how to do them?* (% "Yes")**



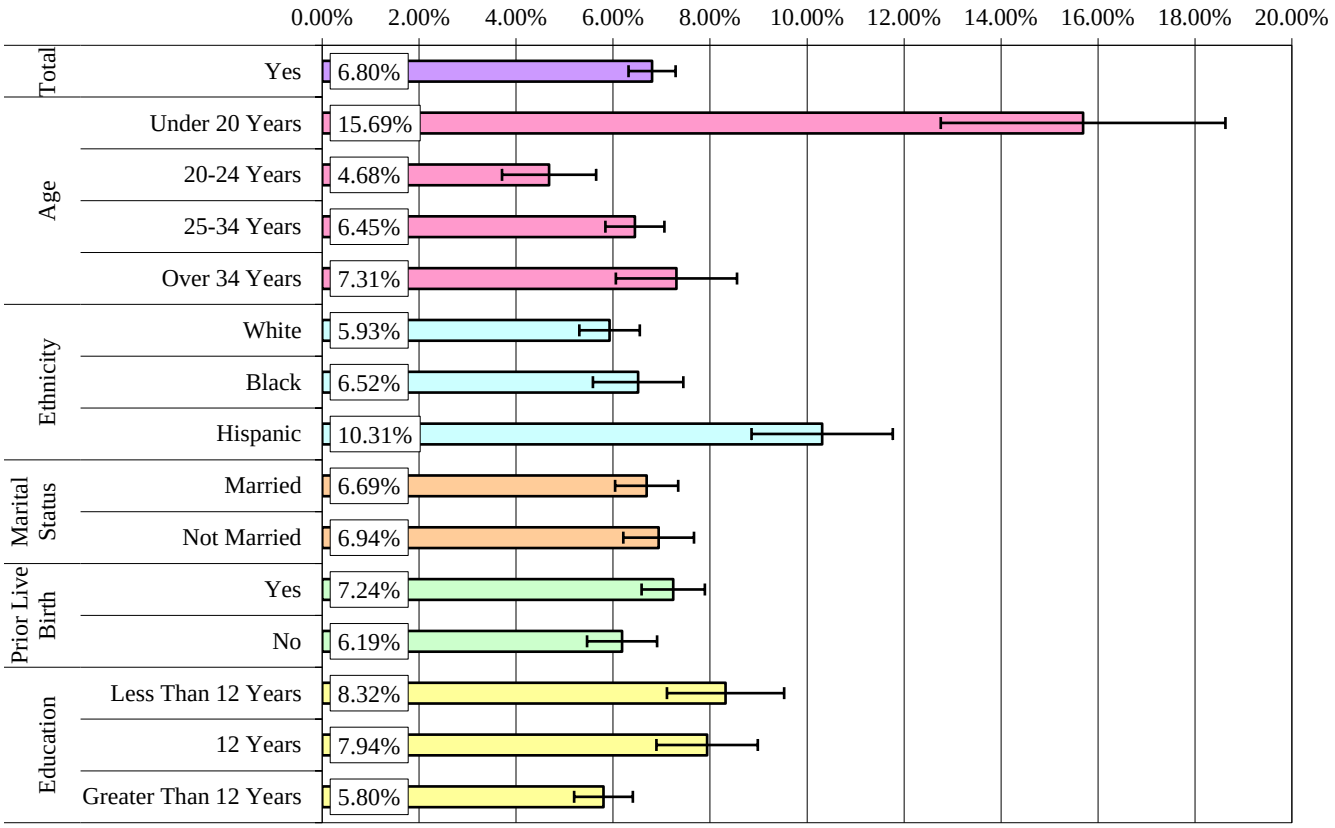
Q77A: During your most recent pregnancy, did you receive <u>food stamps or money to buy food</u>?* (% "Yes")**



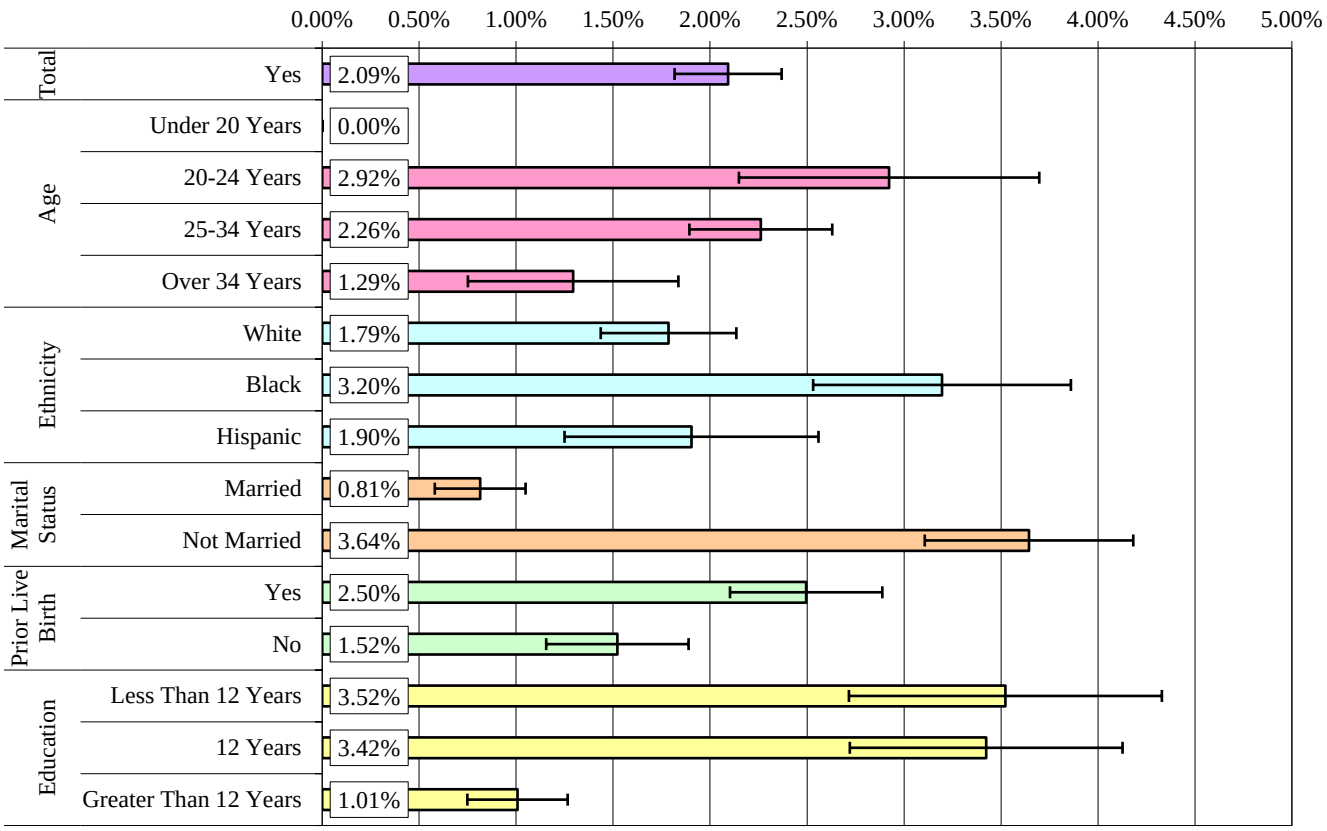
Q77B: During your most recent pregnancy, did you receive WIC (the Special Supplemental Nutrition Program for Women, Infants, and Children)?* (% "Yes")**



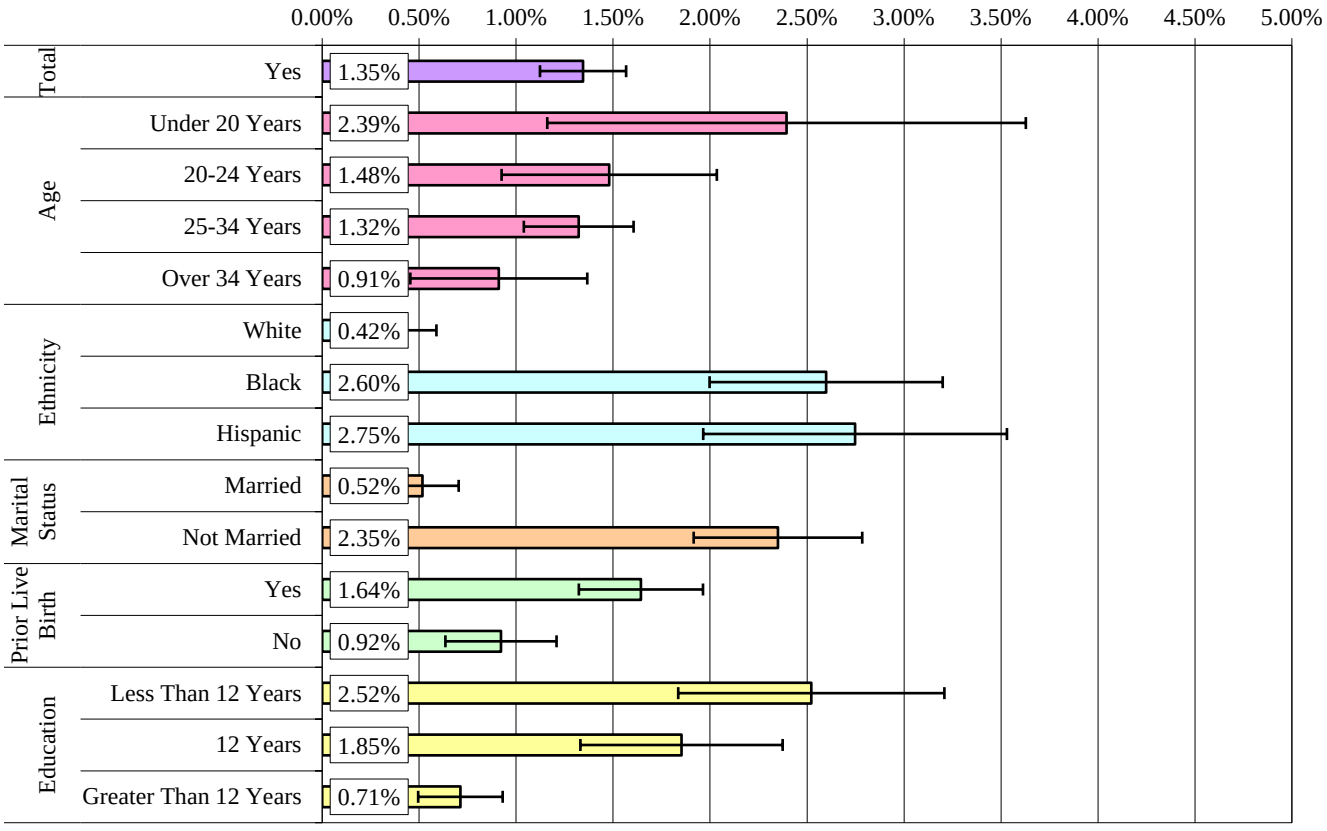
Q77C: During your most recent pregnancy, did you receive counseling for family and personal problems? (% "Yes")



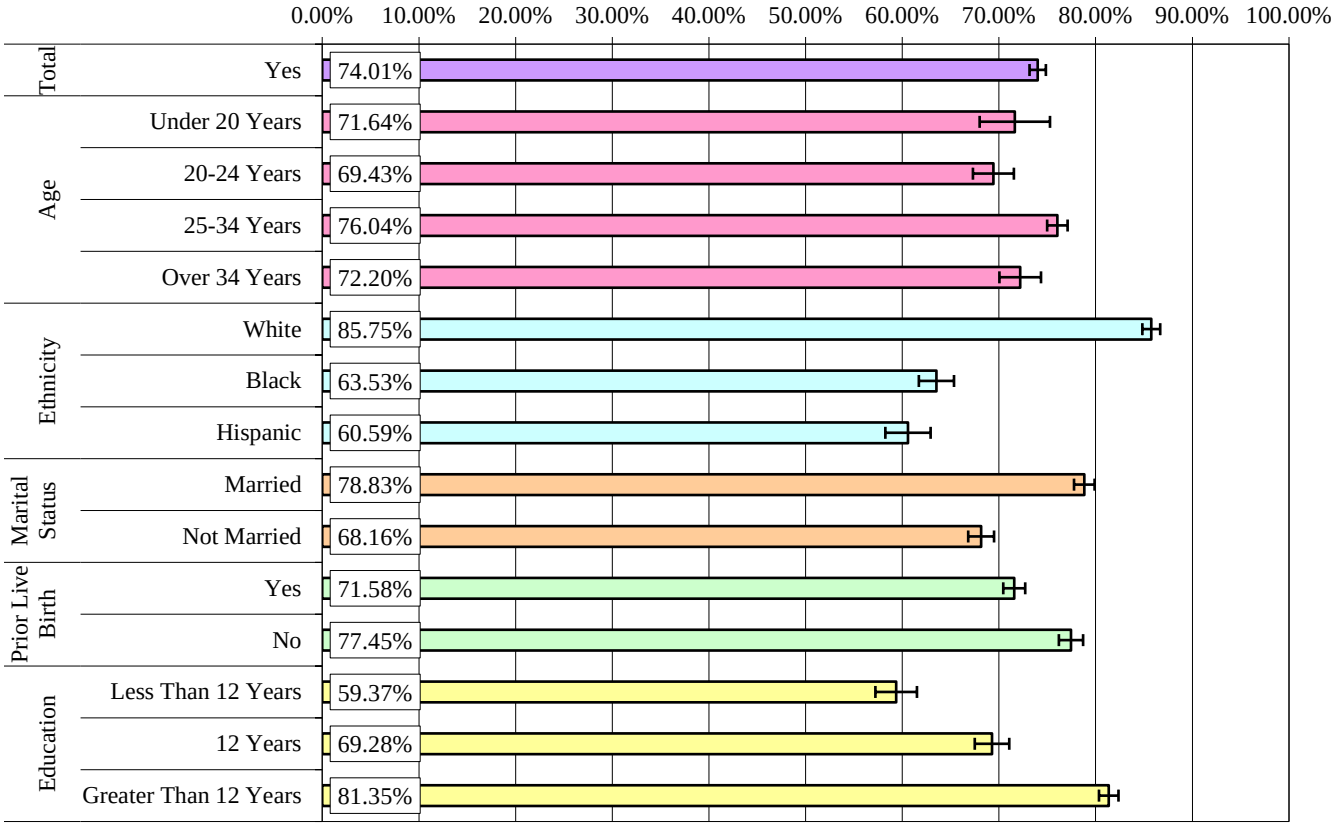
Q77D: During your most recent pregnancy, did you receive help to quite smoking? (% "Yes")



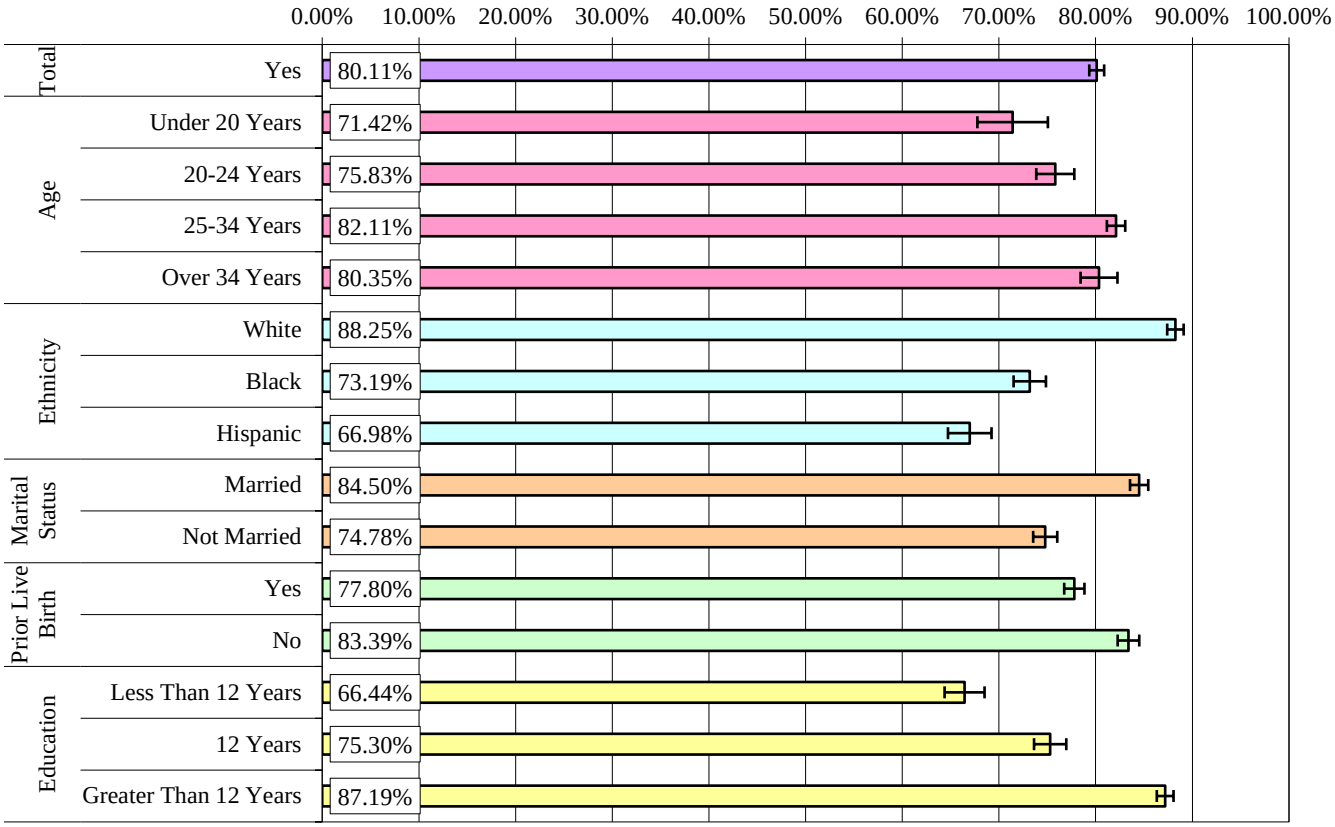
Q77E: During your most recent pregnancy, did you receive help to reduce violence in your home? (% "Yes")



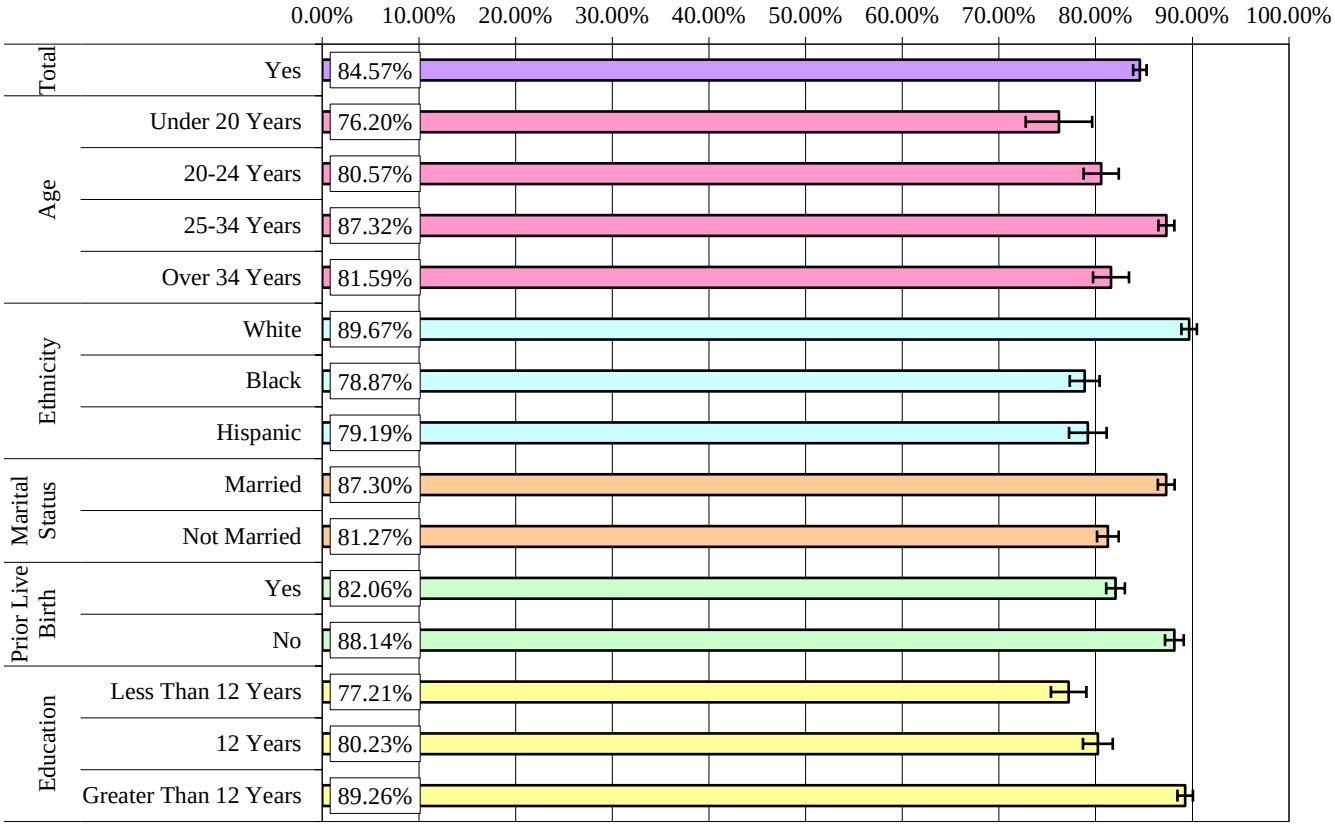
Q78A: During your most recent pregnancy, would you know someone <u>who could loan you $50 if you needed it</u>?* (% "Yes")**



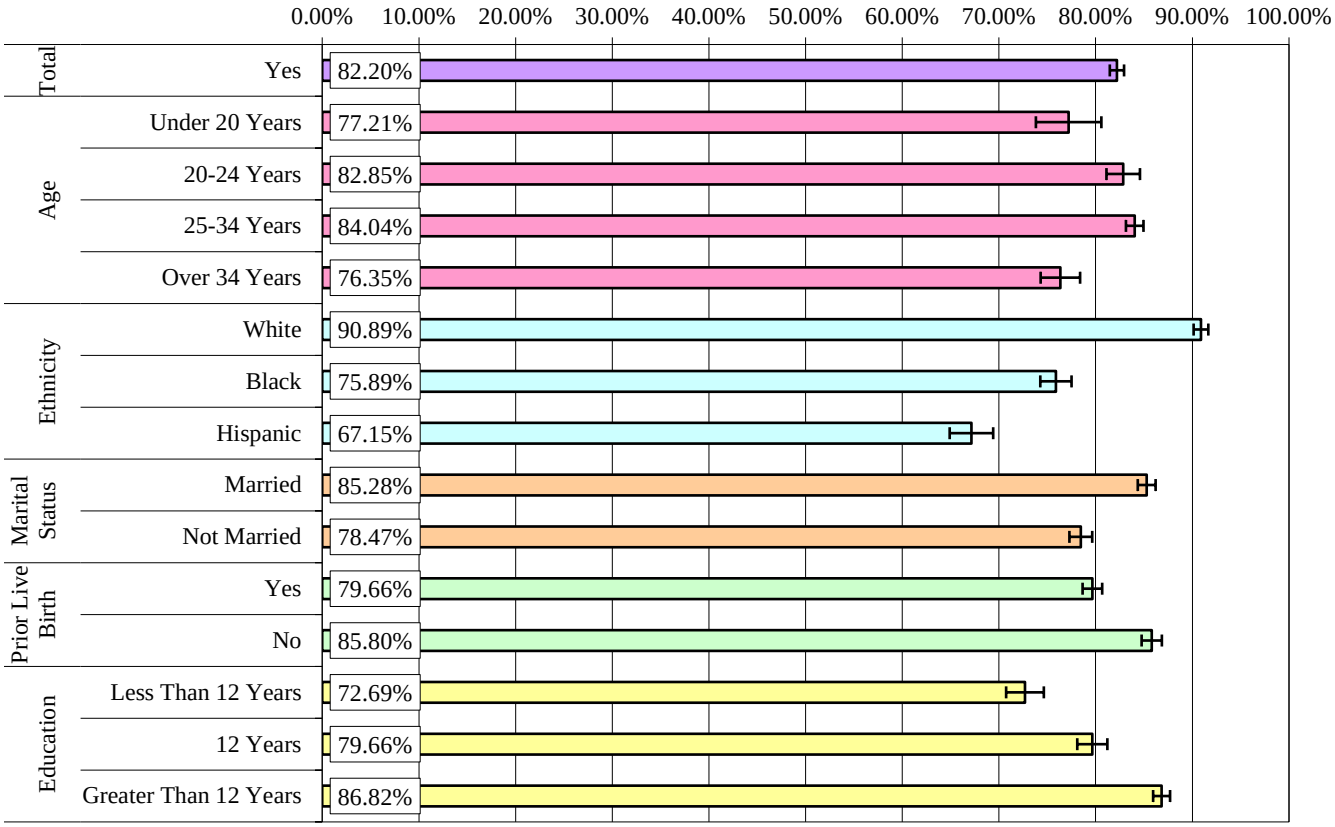
Q78B: During your most recent pregnancy, would you know someone <u>who could help you if you were sick and needed to be in bed</u>?* (% "Yes")**



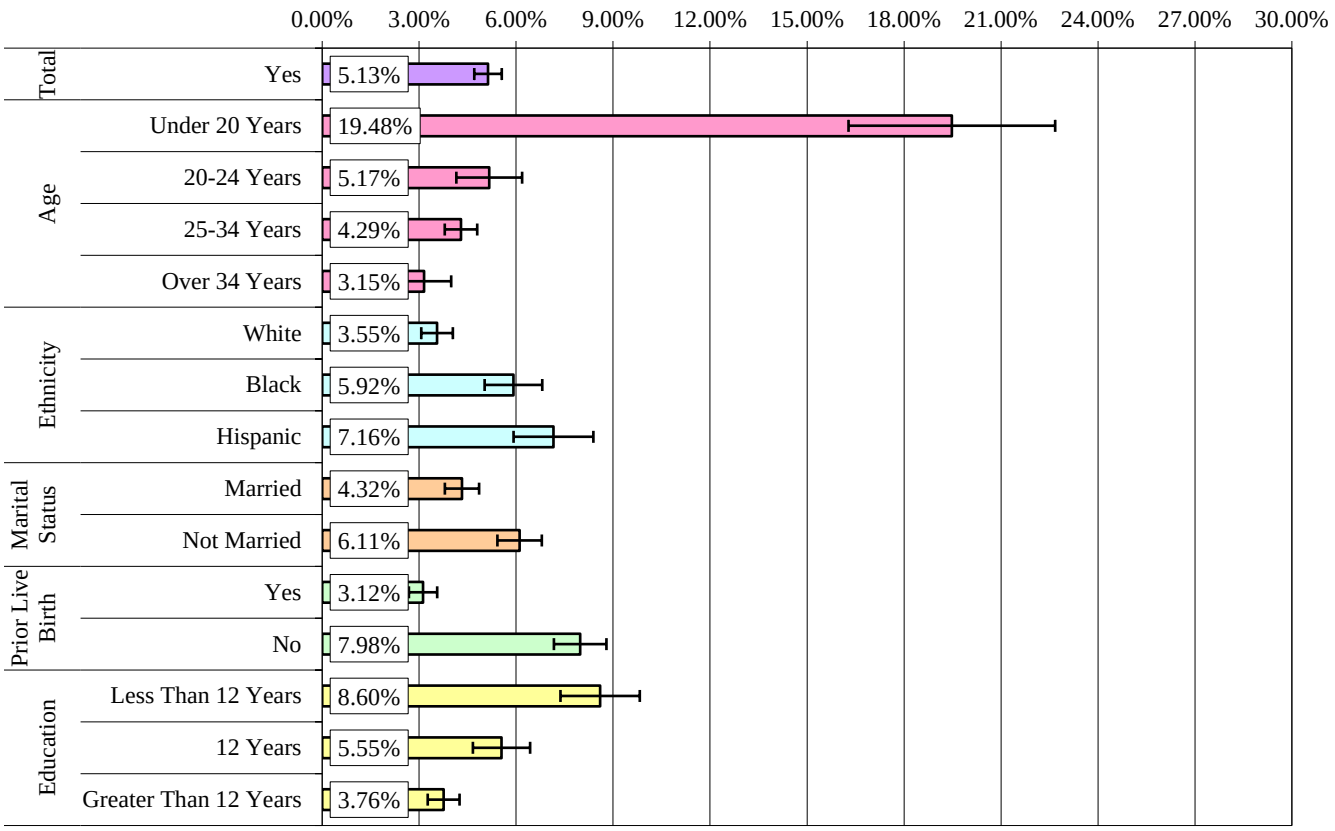
Q78C: During your most recent pregnancy, would you know someone <u>who could take you to the clinic or doctor's office if you needed a ride</u>?* (% "Yes")**



Q78D: During your most recent pregnancy, would you know someone <u>who you could talk with about your problems</u>?* (% "Yes")**



Q79A: During your most recent pregnancy, did you take any parenting classes?* (% "Yes")**



Q79B: During your most recent pregnancy, did you receive counseling for depression or anxiety? (% "Yes")

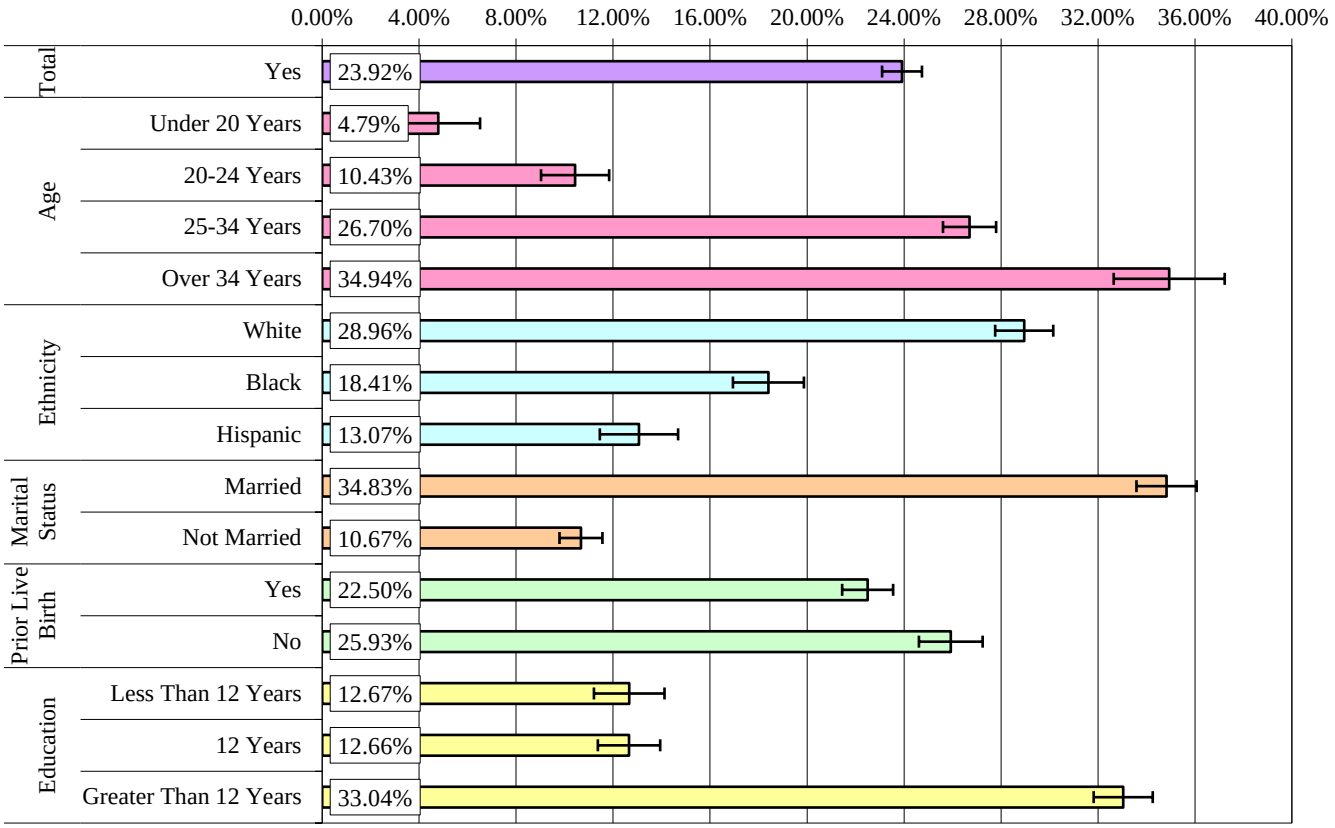
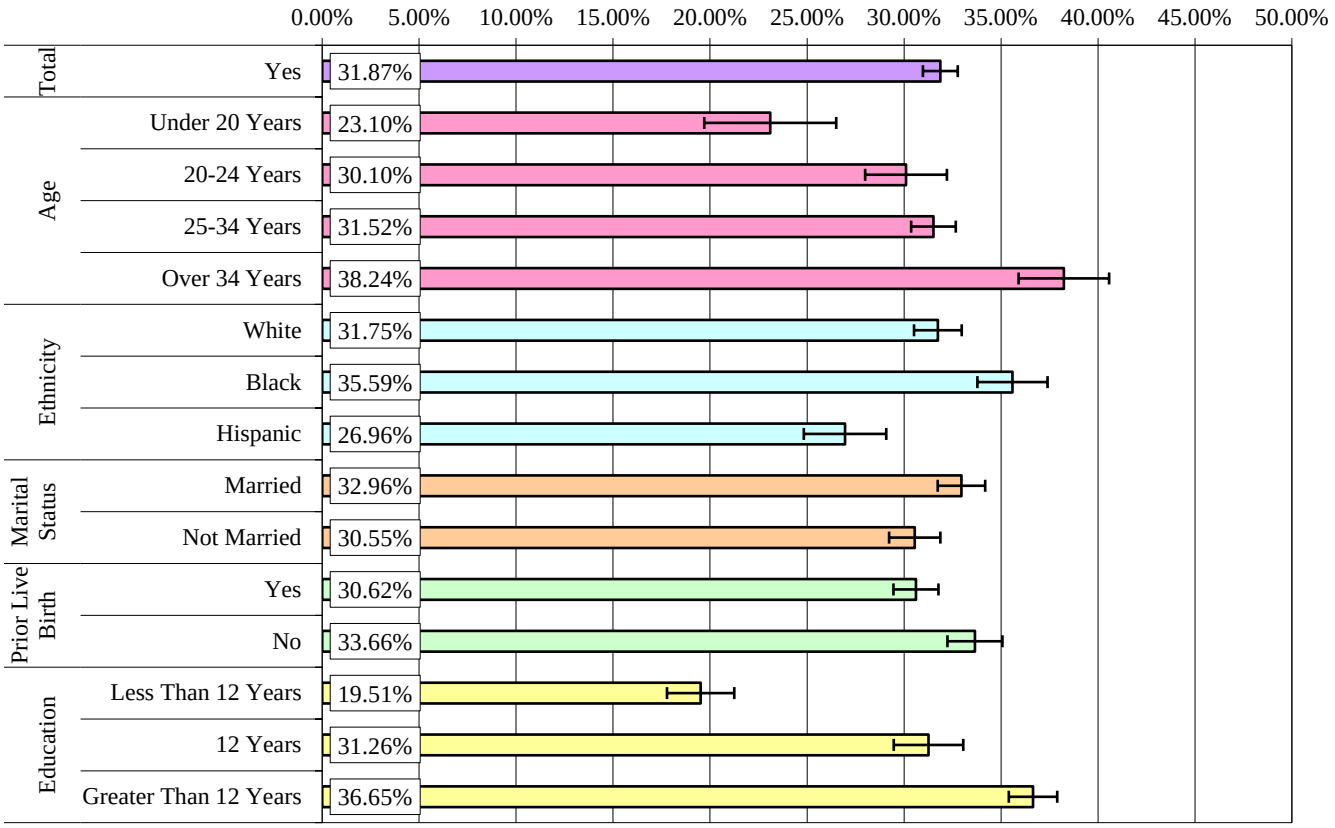
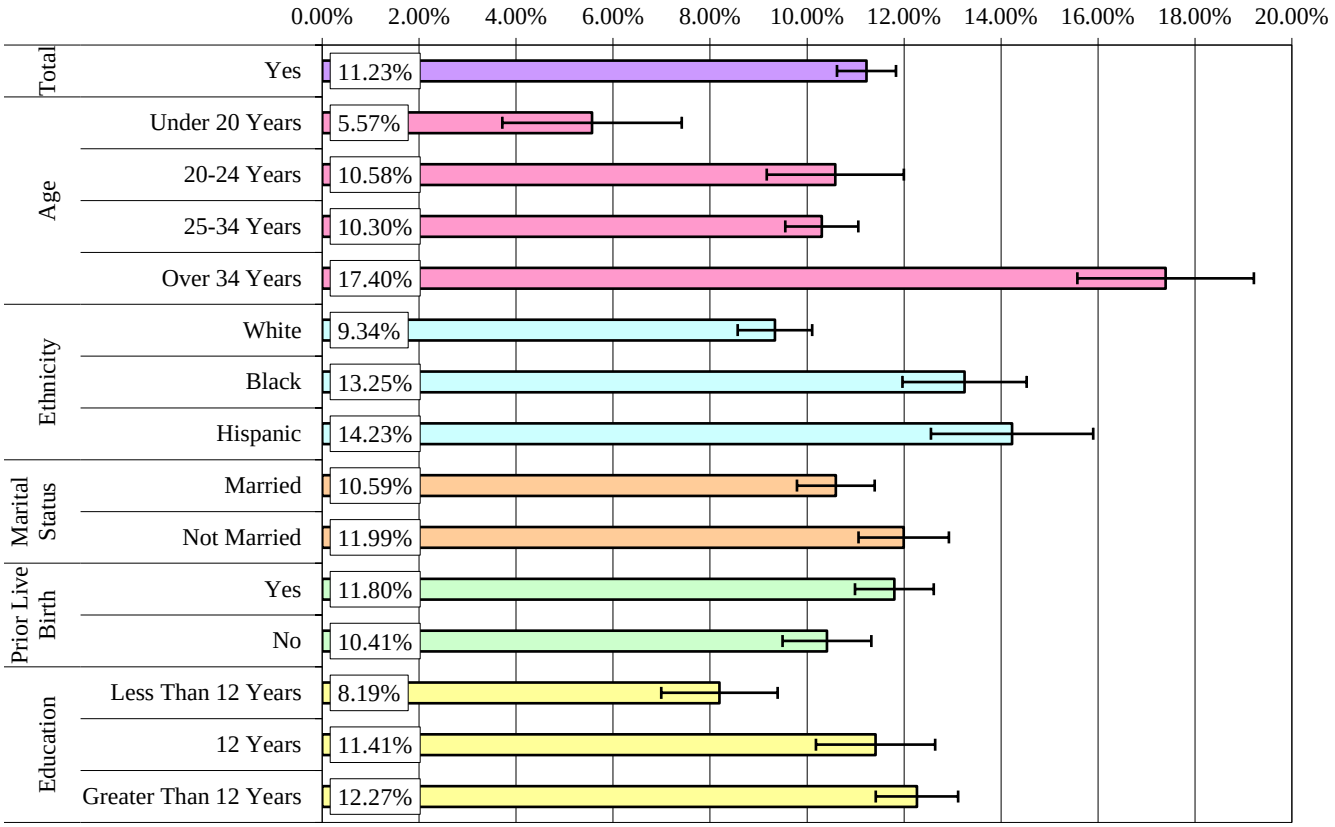
Appendix AQ12A: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker tell you to take a vitamin with folic acid?[***] [RAW] (% "Yes")



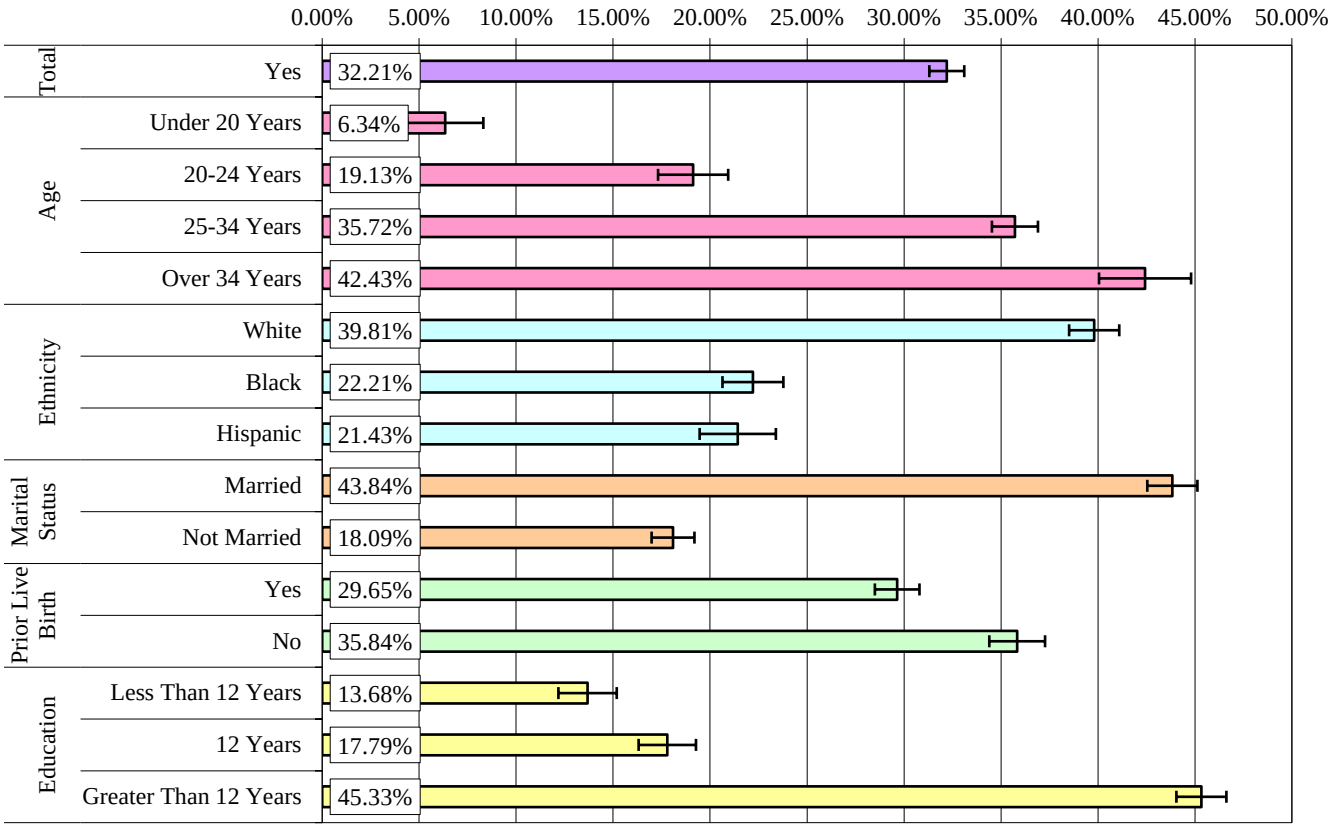
Appendix AQ12B: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker talk to you about maintaining a healthy weight?* [RAW] (% "Yes")



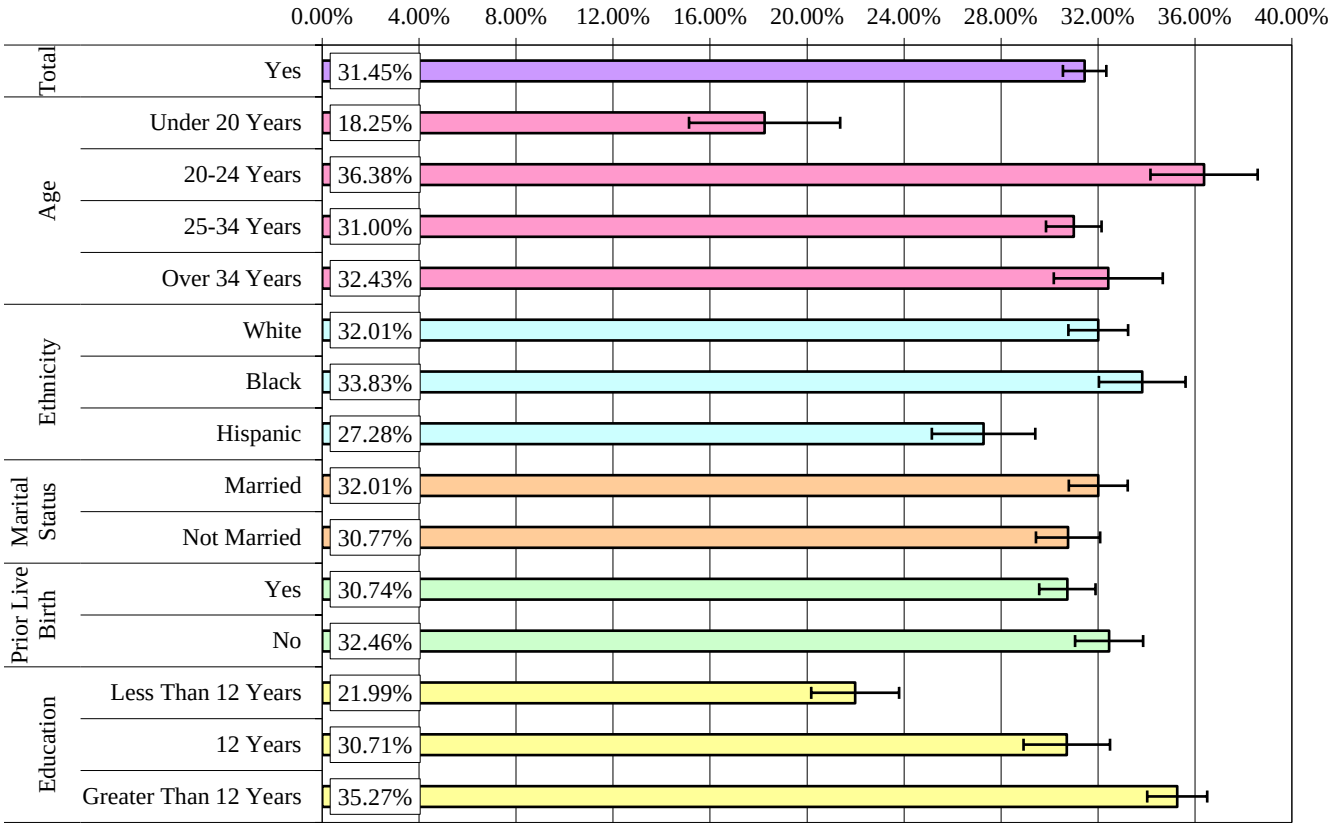
Appendix AQ12C: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker talk to you about controlling any medical conditions such as diabetes or high blood pressure?* [RAW] (% "Yes")



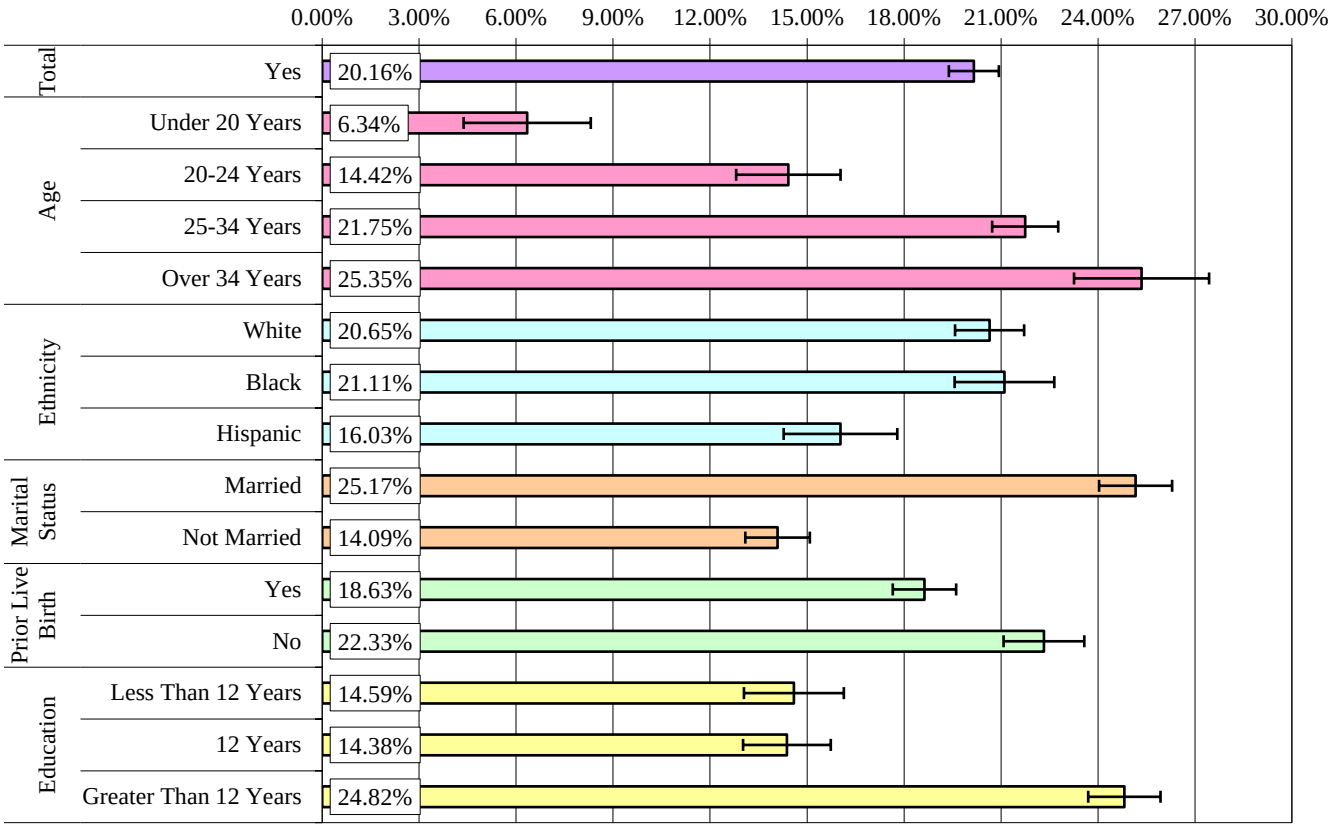
Appendix AQ12D: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker talk to you about your desire to have or not have children?[***] [RAW] (% "Yes")



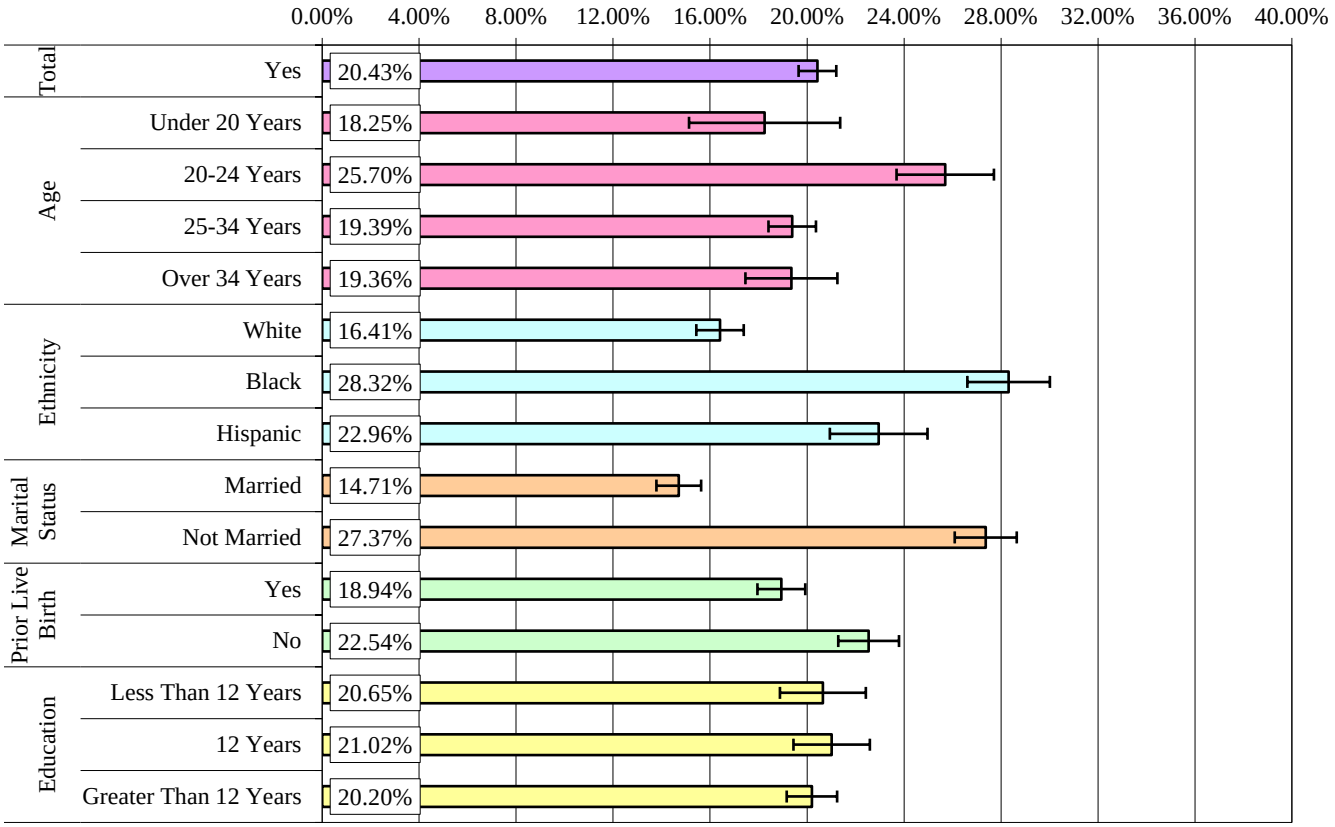
Appendix AQ12E: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker talk to you about using birth control to prevent pregnancy?[***] [RAW] (% "Yes")



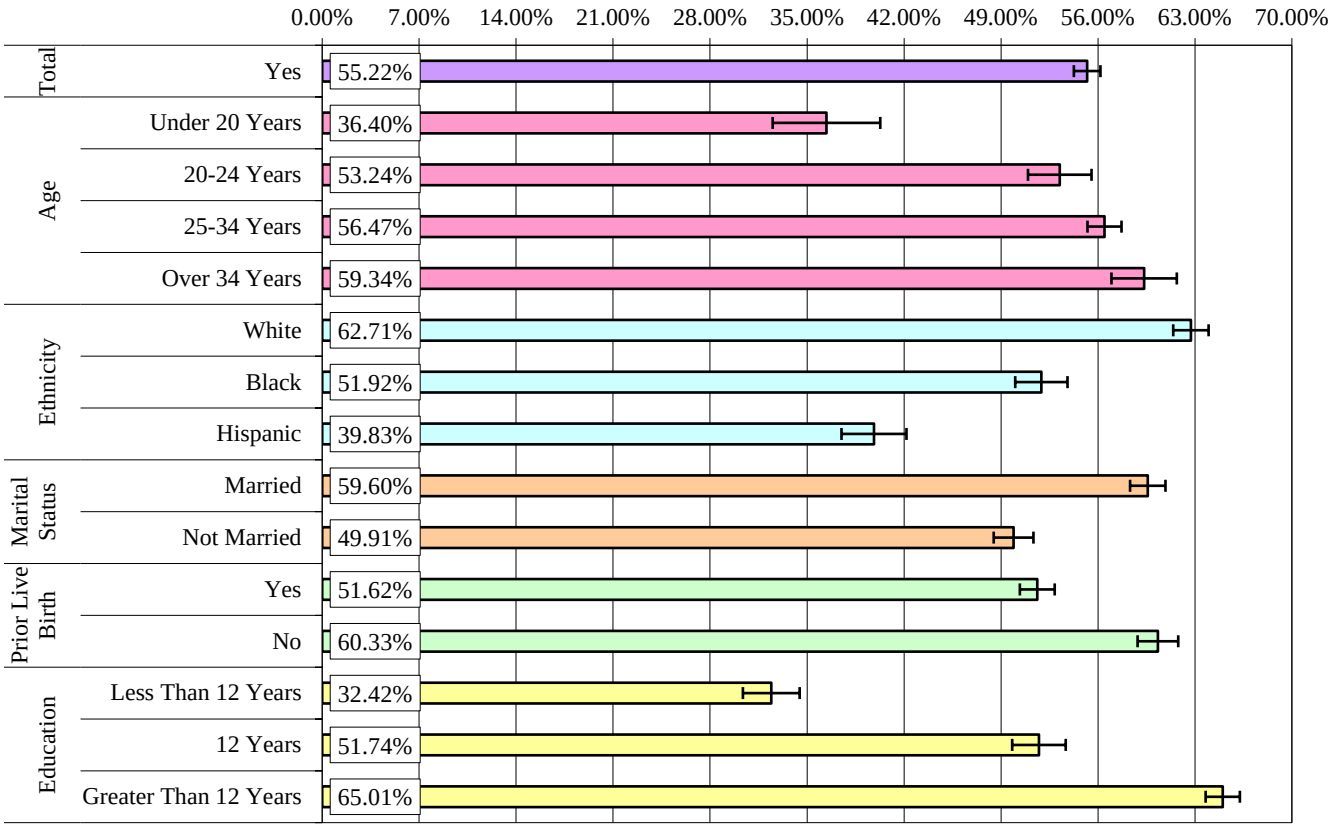
Appendix AQ12F: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker talk to you about how you could improve your health before a pregnancy?[***] [RAW] (% "Yes")



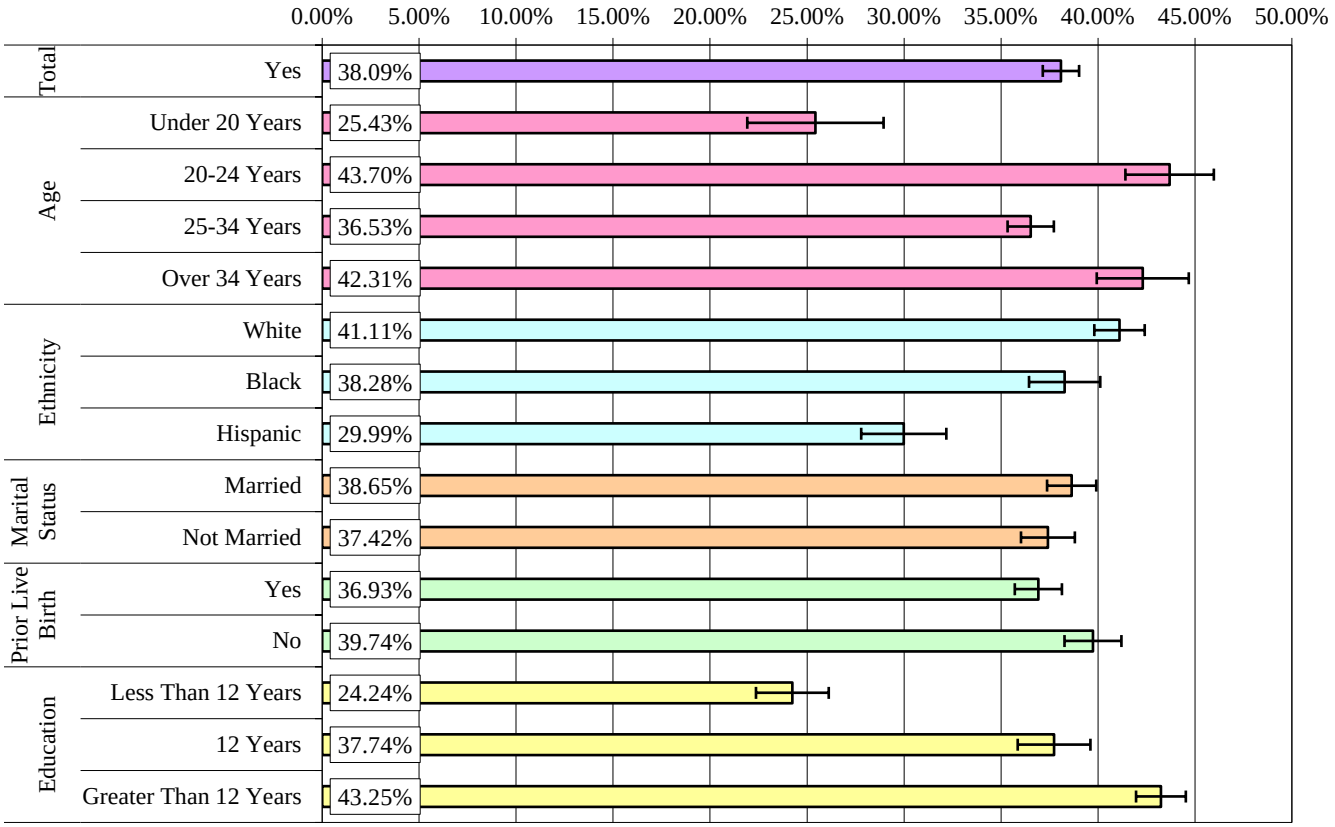
Appendix AQ12G: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker talk to you about sexually transmitted infections such as chlamydia, gonorrhea, or syphilis?[***] [RAW] (% "Yes")



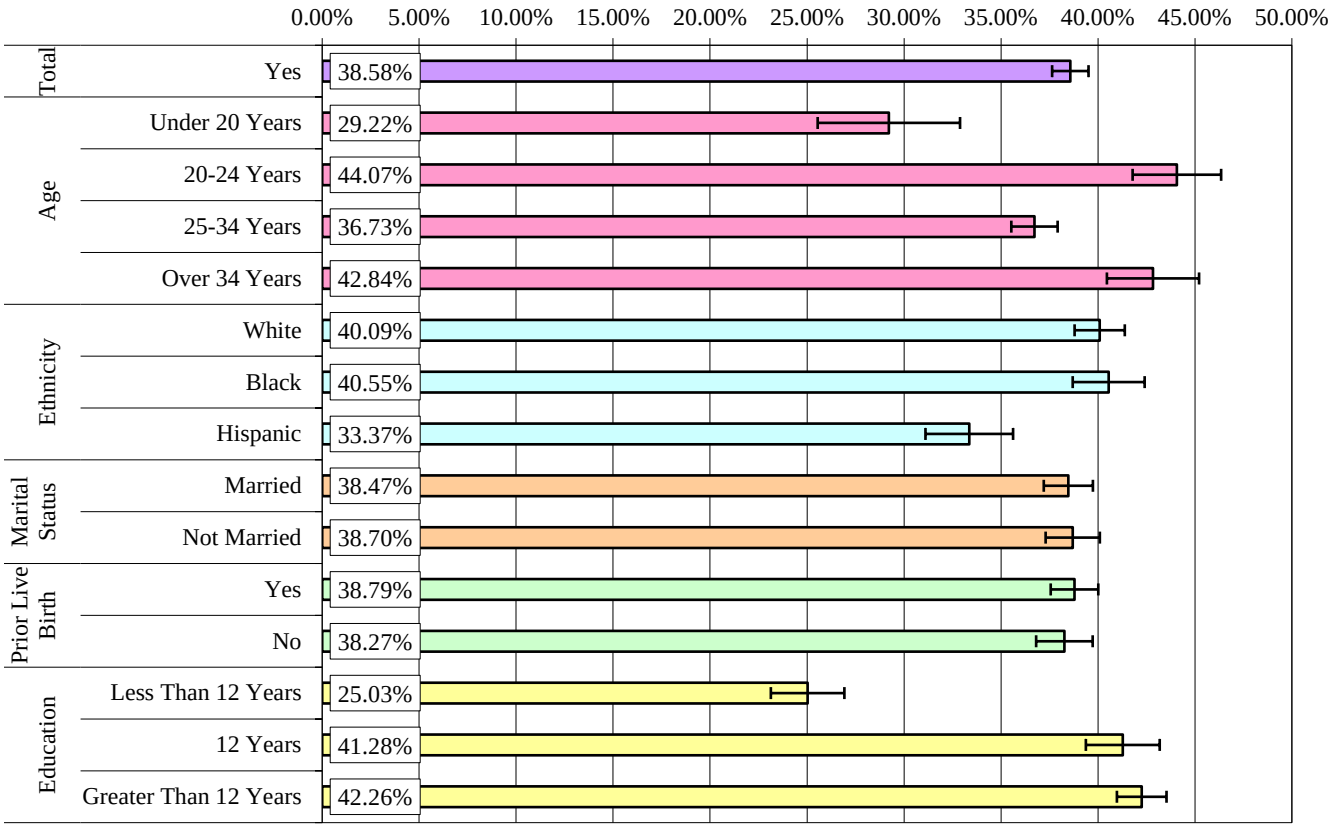
Appendix AQ12H: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker ask you if you were smoking cigarettes?[***] [RAW] (% "Yes")



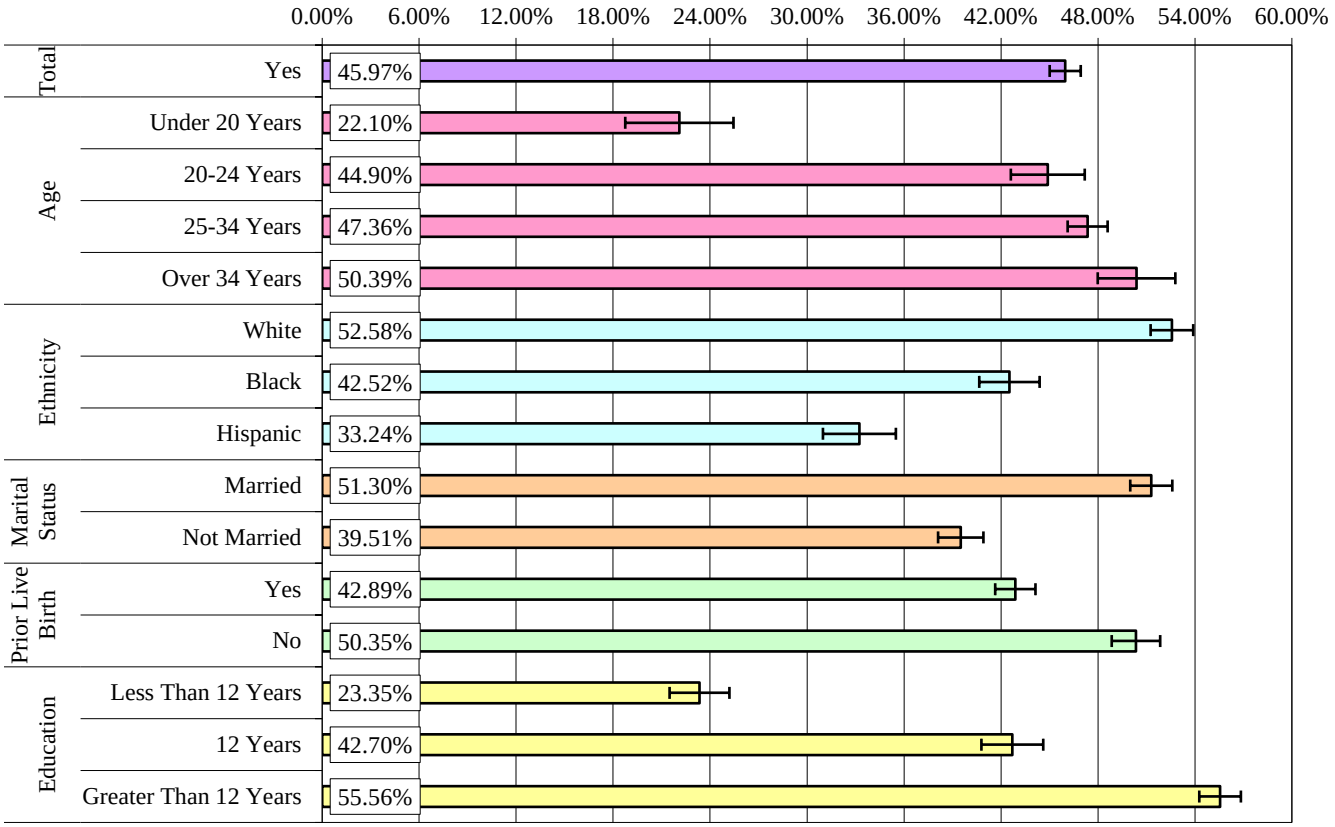
Appendix AQ12I: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker ask you if someone was hurting you emotionally or physically?[***] [RAW] (% "Yes")



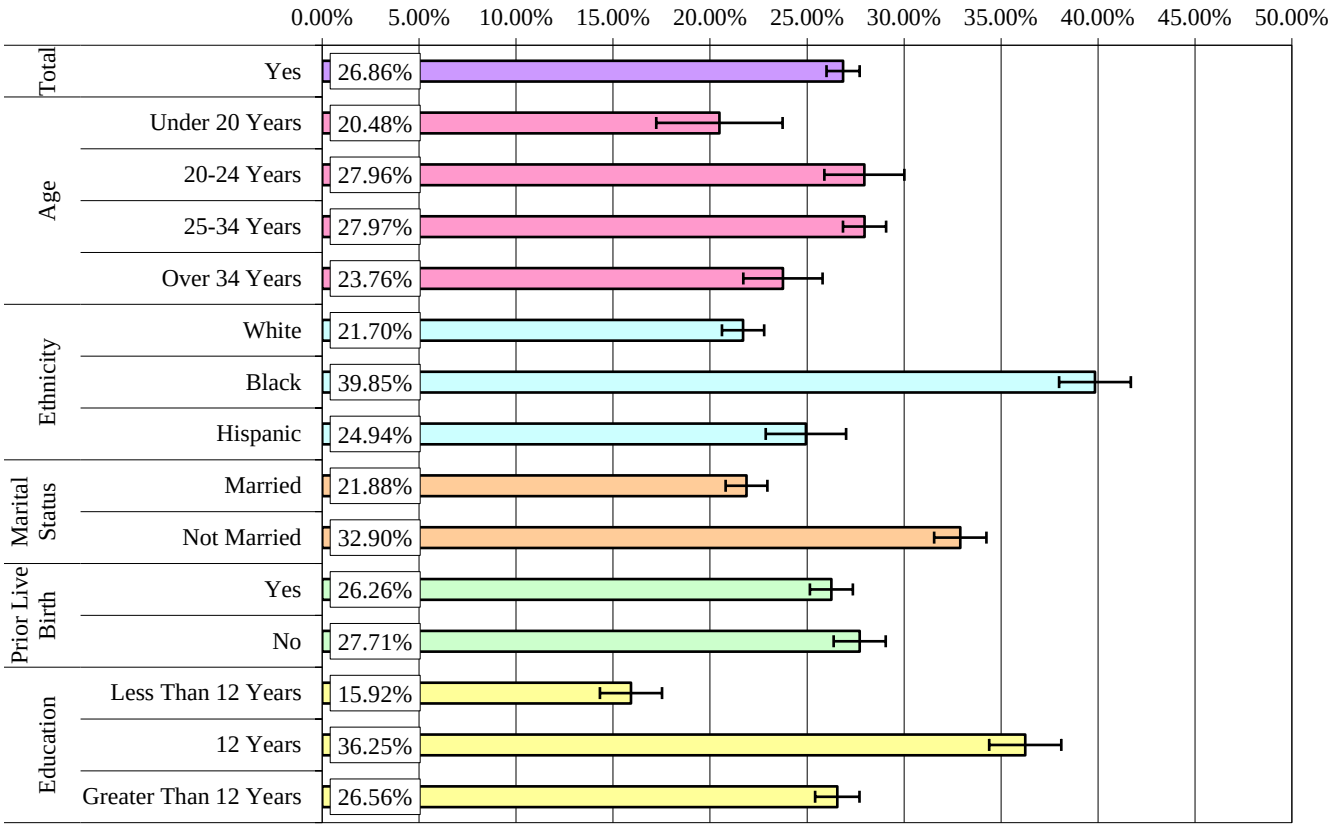
Appendix AQ12J: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker ask if you were feeling down or depressed?[***] [RAW]
(% "Yes")



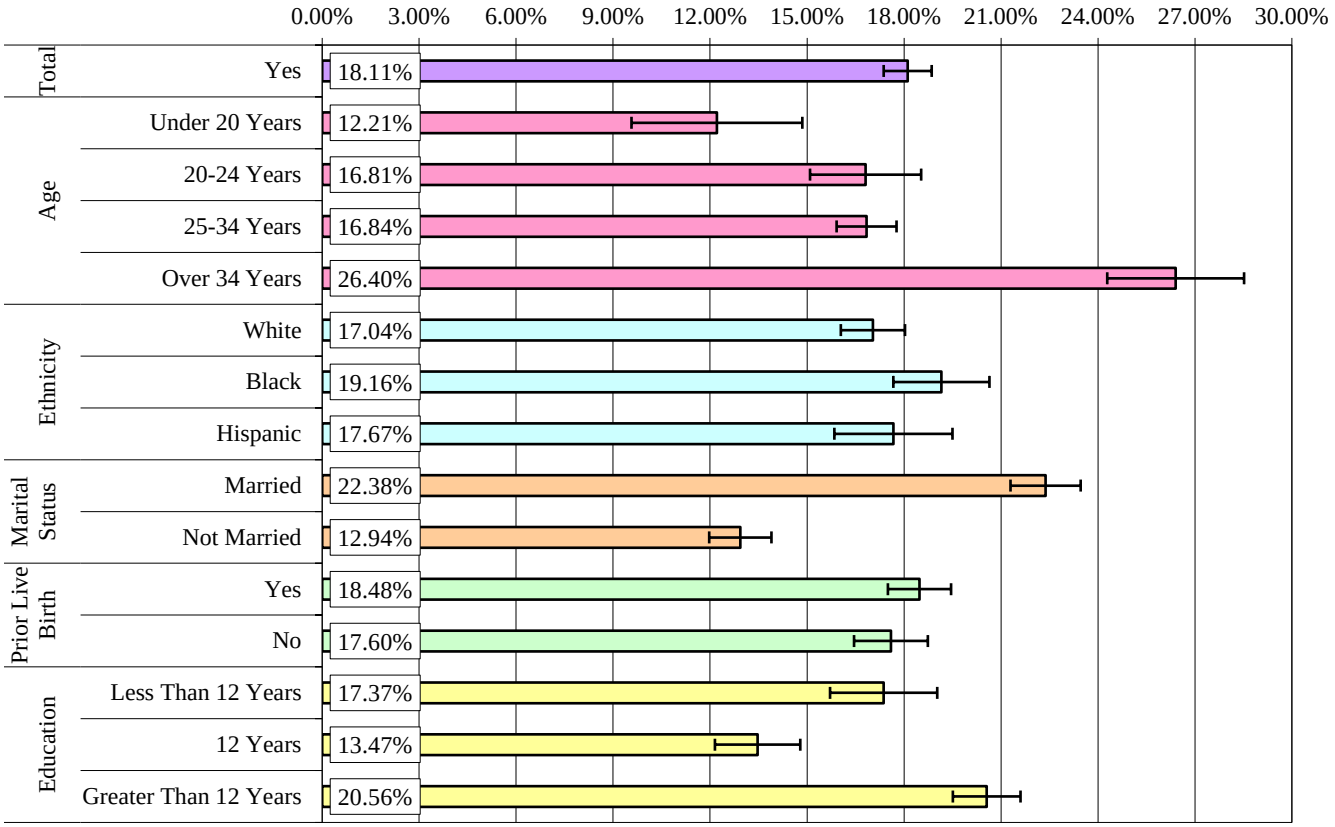
Appendix AQ12K: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker ask about what kind of work you do?[***] [RAW]
(% "Yes")



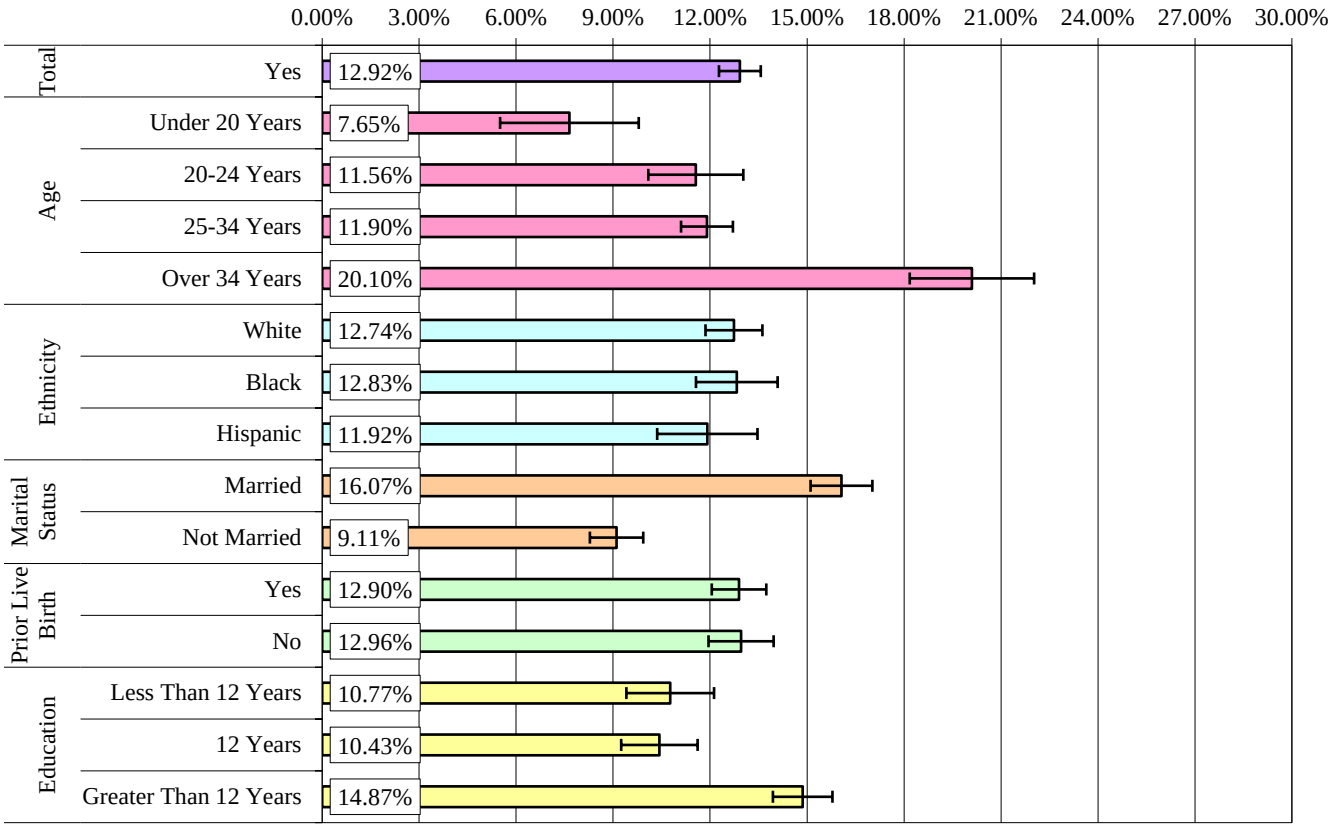
Appendix AQ12L: During any of your health care visits in the 12 months before you got pregnant, did a doctor, nurse, or health care worker test you for HIV (the virus that causes AIDS)?[***] [RAW] (% "Yes")



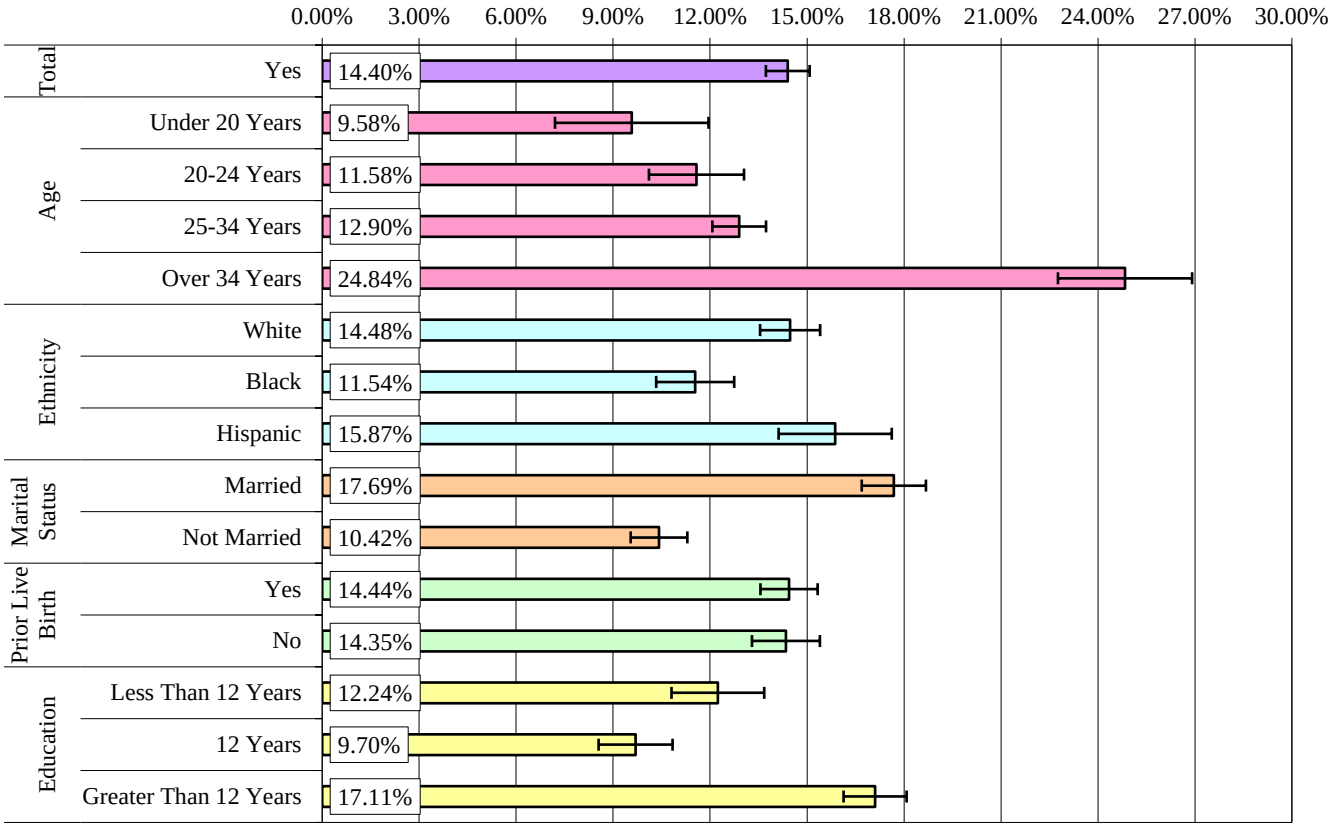
Appendix AQ14A: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about getting your vaccines updated before pregnancy?[***] [RAW] (% "Yes")



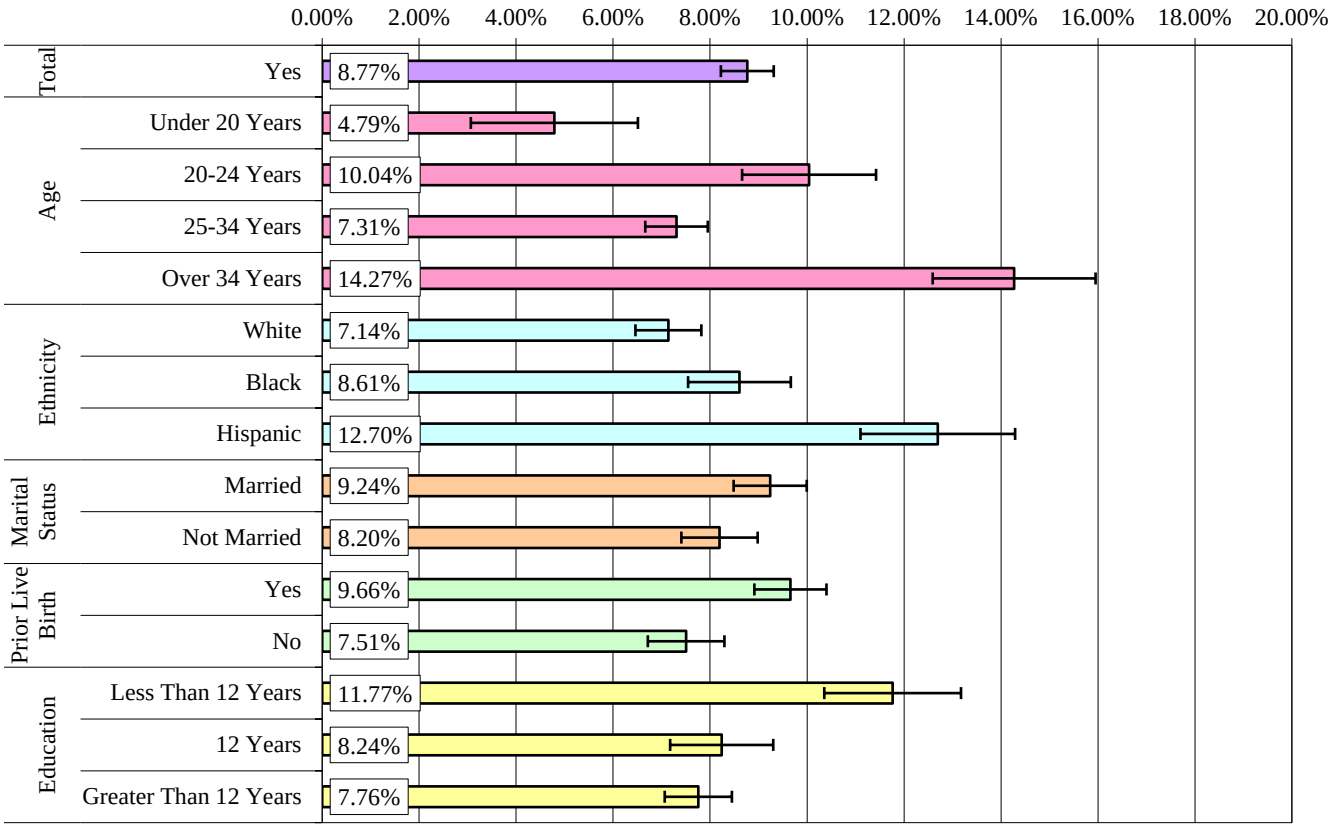
Appendix AQ14B: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about visiting a dentist or dental hygienist before pregnancy?[***] [RAW] (% "Yes")



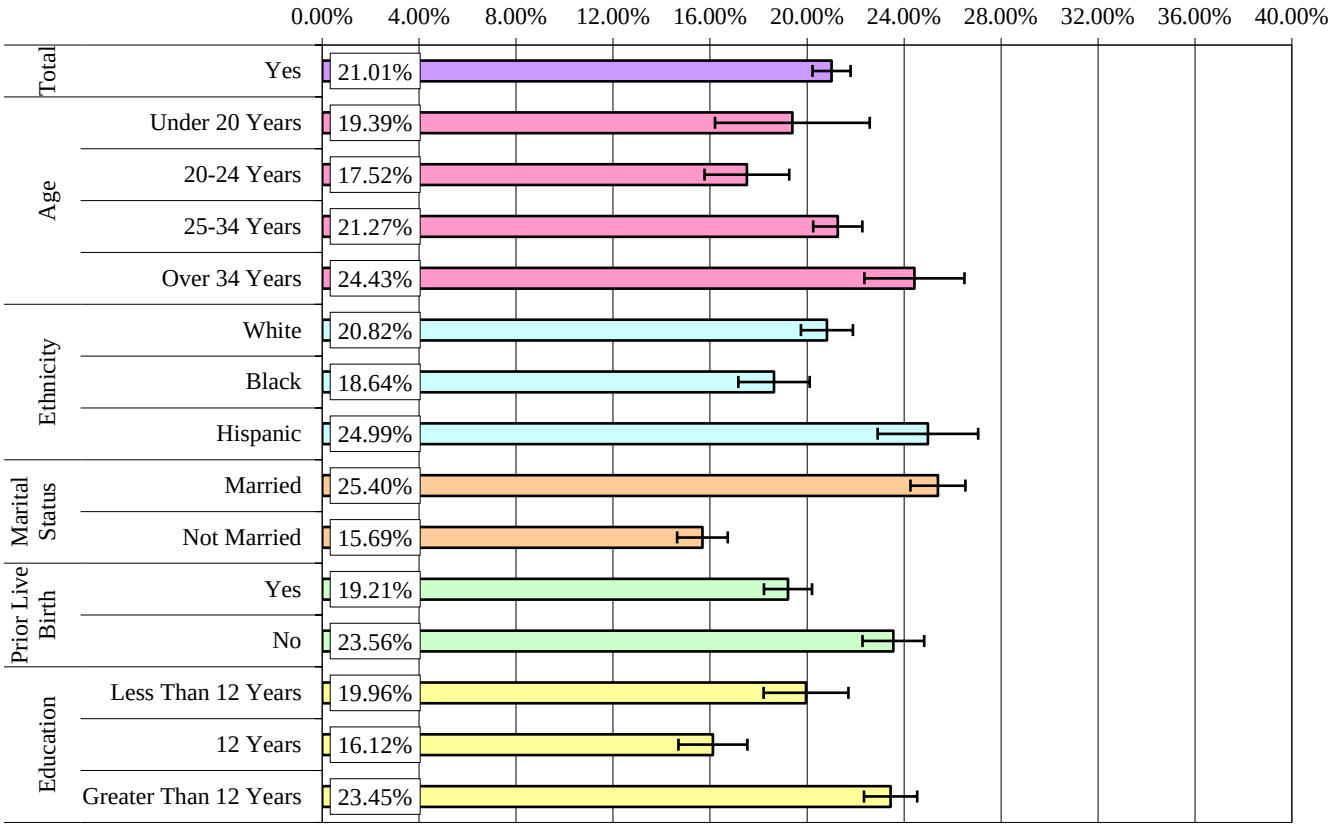
Appendix AQ14C: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about getting counseling for any genetic diseases that run in your family?[***] [RAW] (% "Yes")



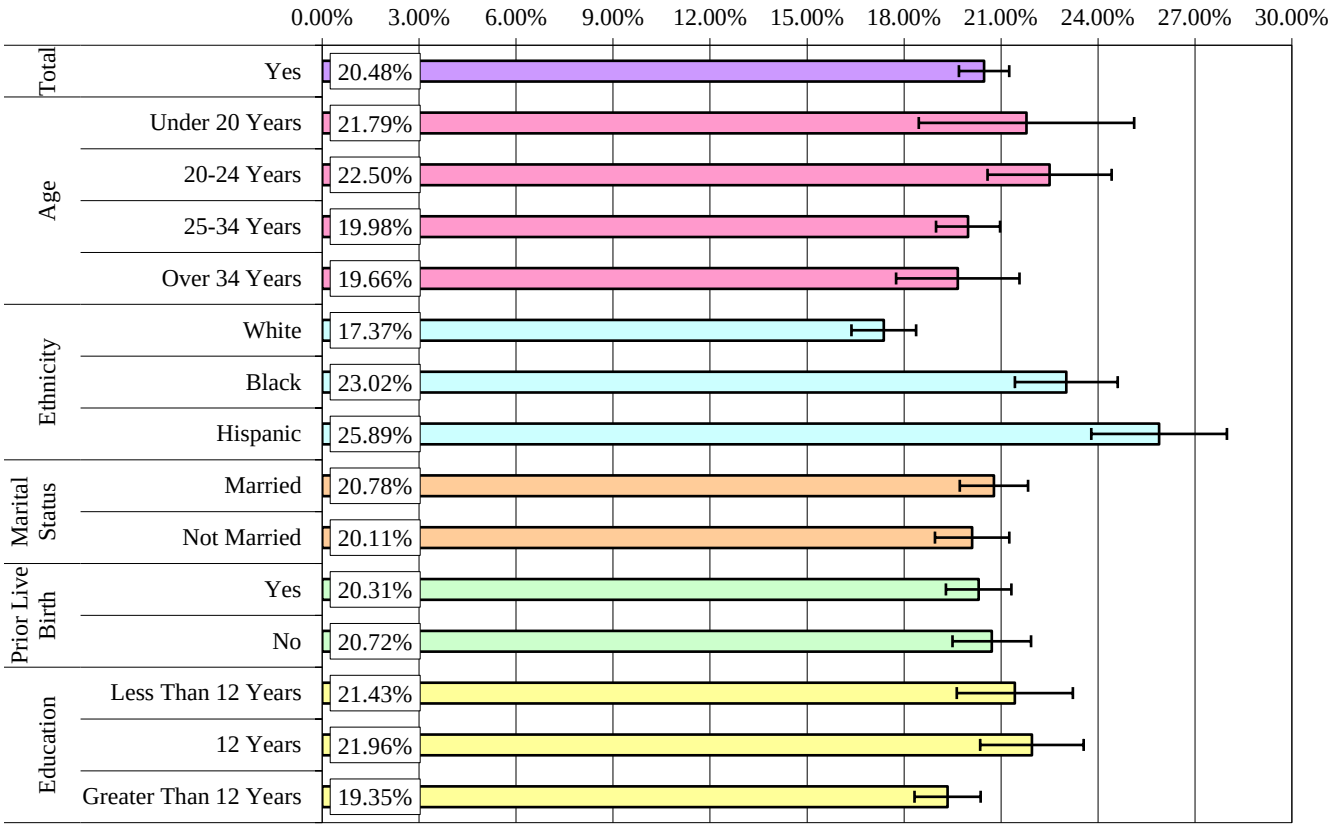
Appendix AQ14D: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about getting counseling or treatment for depression or anxiety?[***] [RAW] (% "Yes")



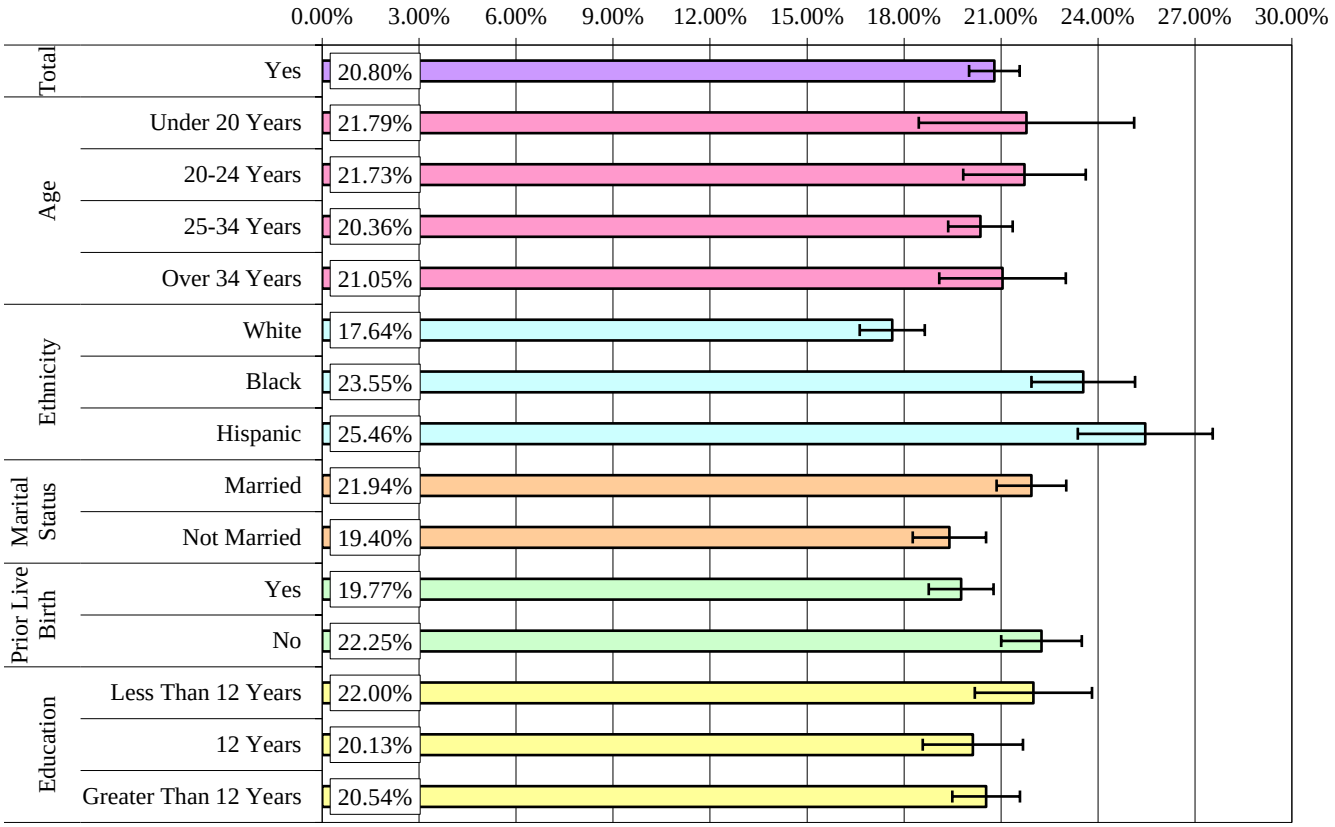
Appendix AQ14E: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about the safety of using prescription or over-the-counter medicines during pregnancy?[***] [RAW] (% "Yes")



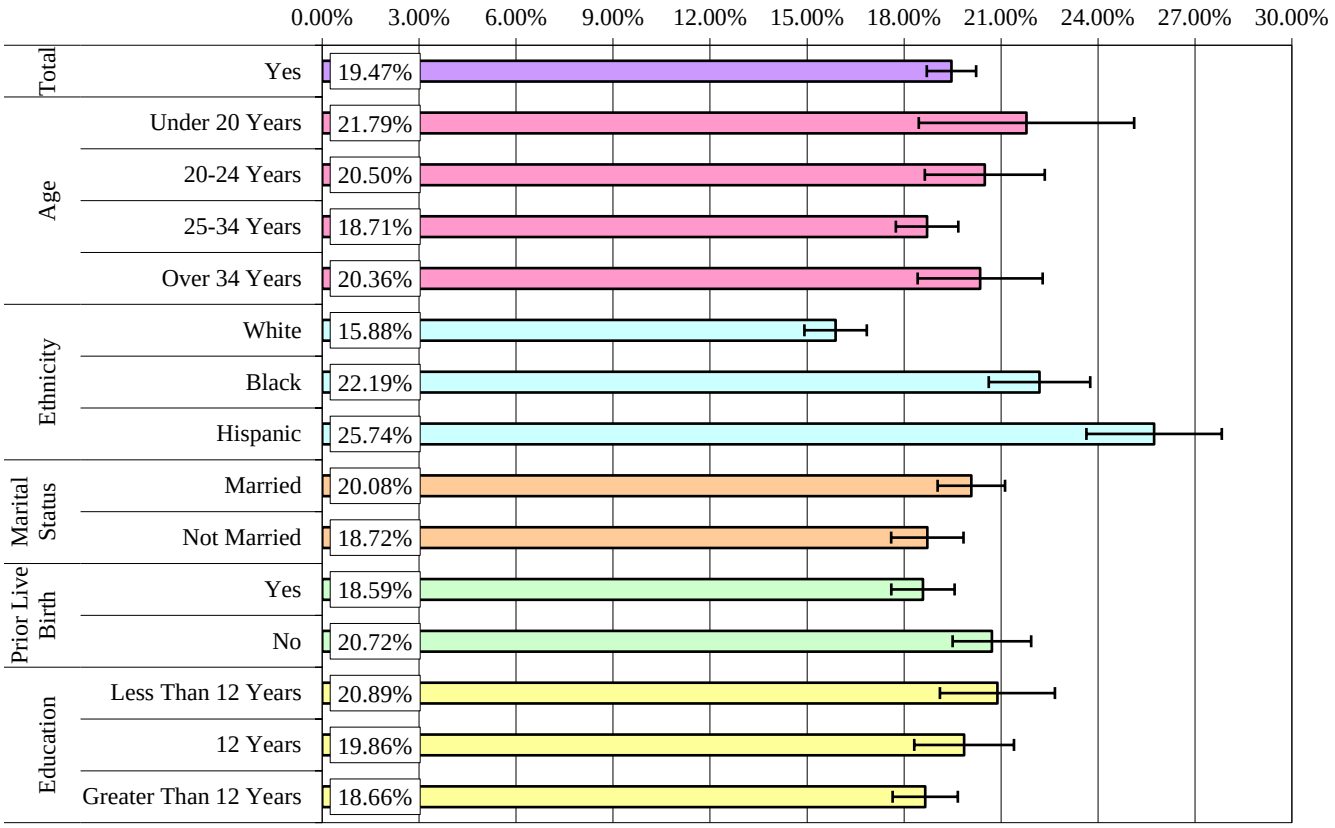
Appendix AQ14F: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about how smoking during pregnancy can affect a baby? [RAW] (% "Yes")



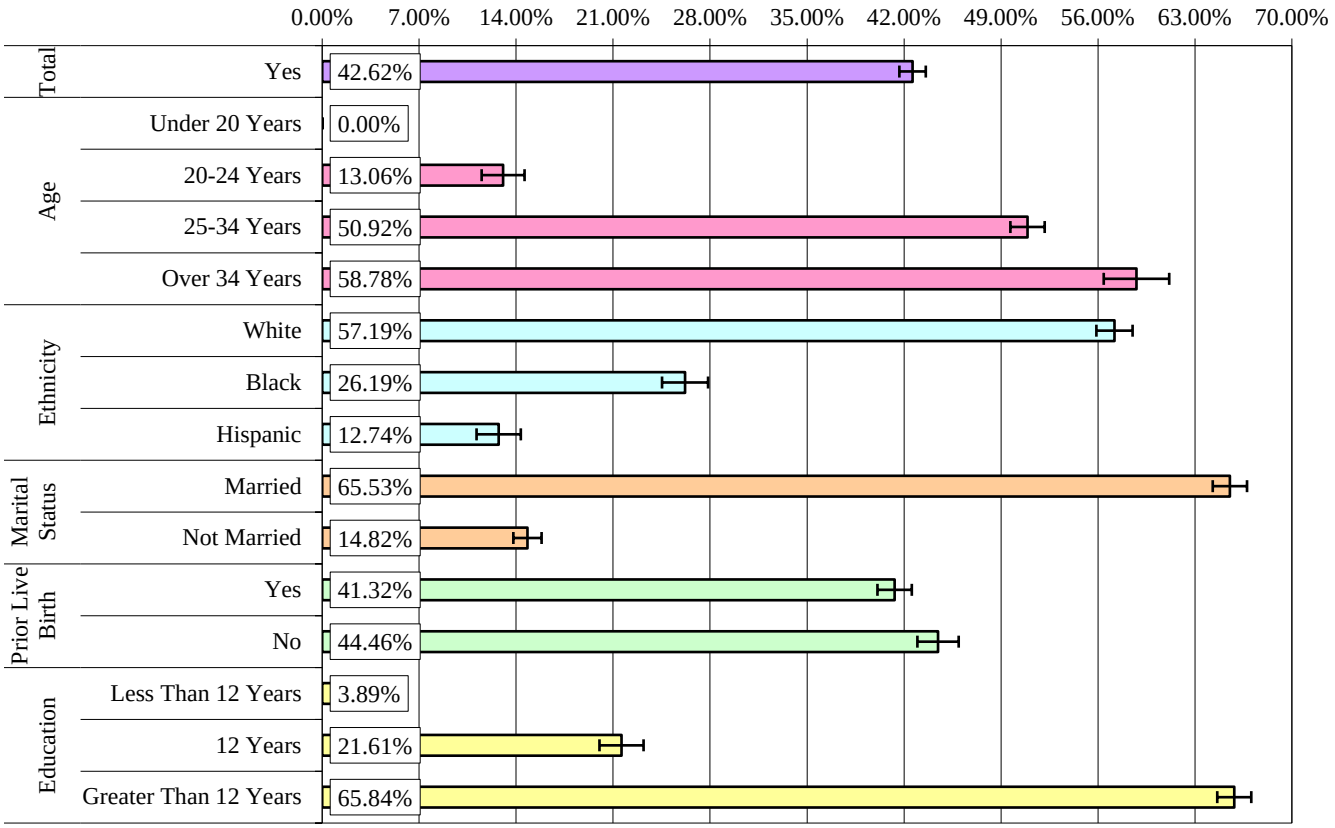
Appendix AQ14G: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about how drinking alcohol during pregnancy can affect a baby?[***] [RAW] (% "Yes")



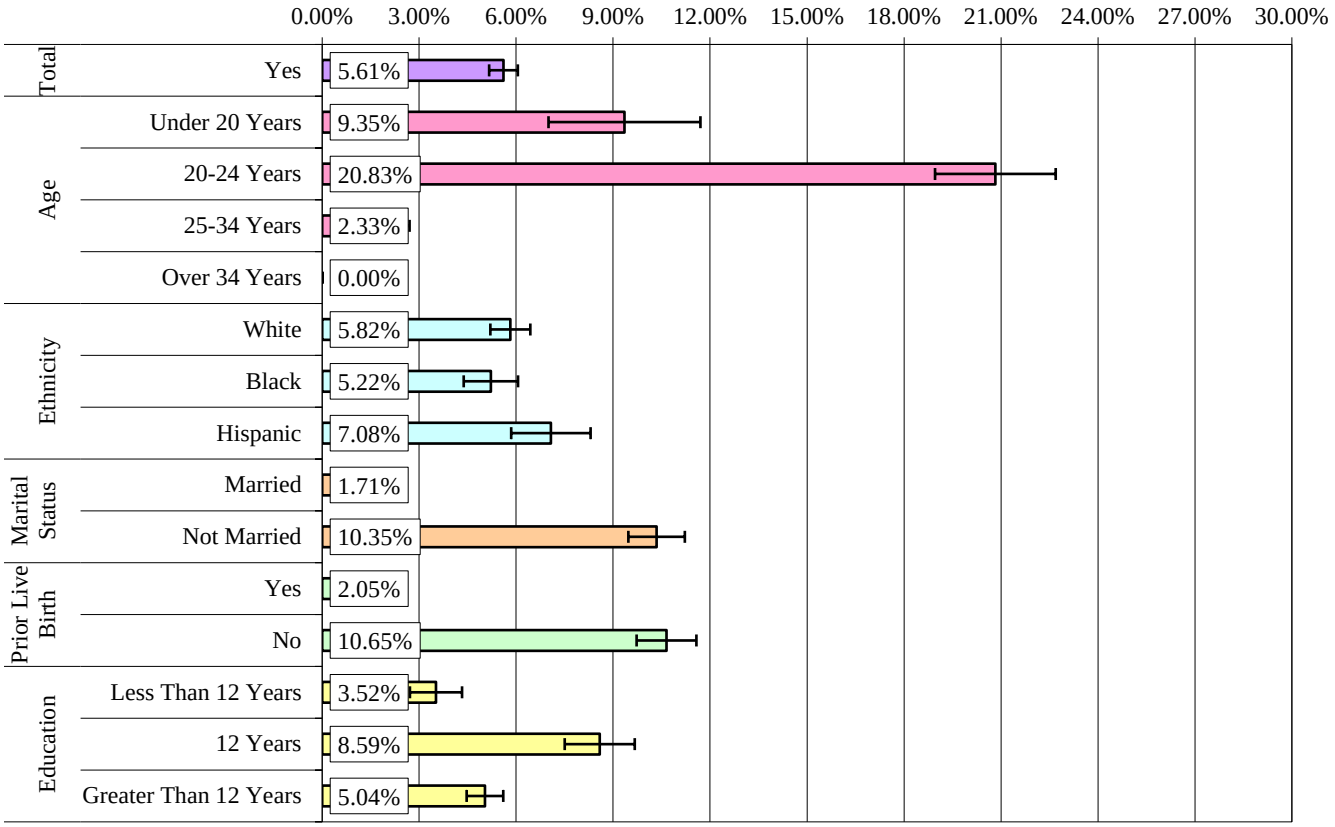
Appendix AQ14H: Before you got pregnant with your new baby, did a doctor, nurse, or other health care worker talk to you about how using illegal drugs during pregnancy can affect a baby?[***] [RAW] (% "Yes")



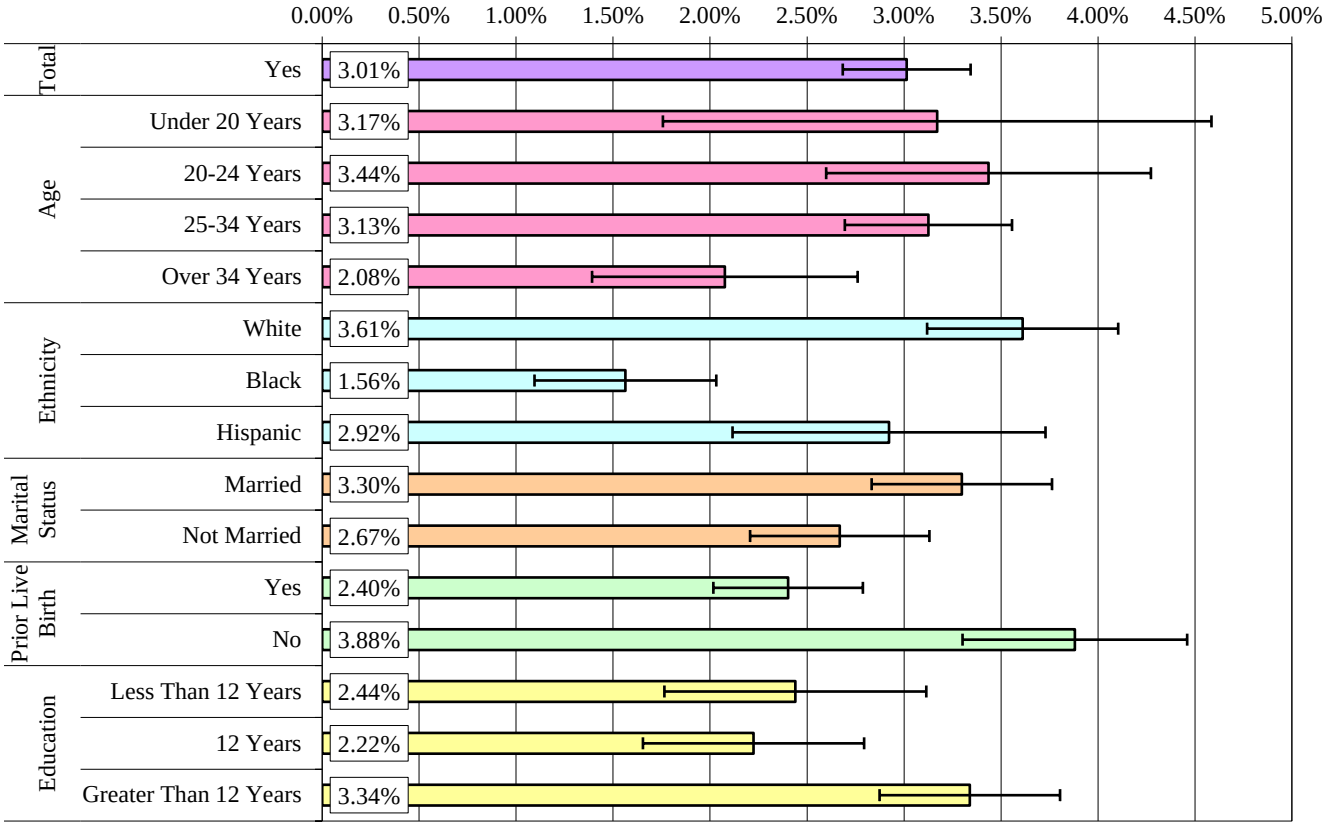
Appendix AQ16B: During my most recent pregnancy, I had private health insurance from my job or the job of my husband or partner as my health insurance for prenatal care. [RAW] (% "Yes")



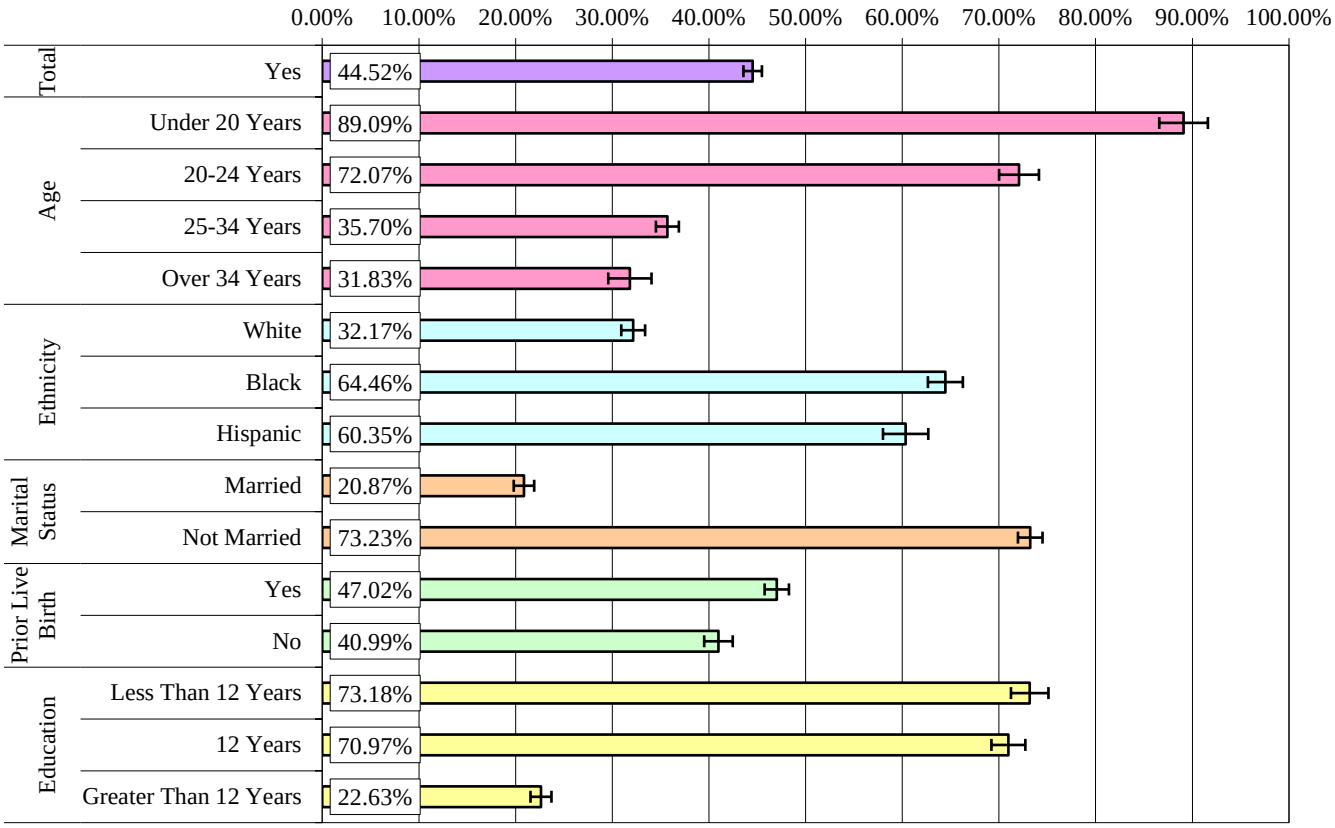
Appendix AQ16C: During my most recent pregnancy, I had private health insurance from my parents as my health insurance for prenatal care. [RAW] (% "Yes")



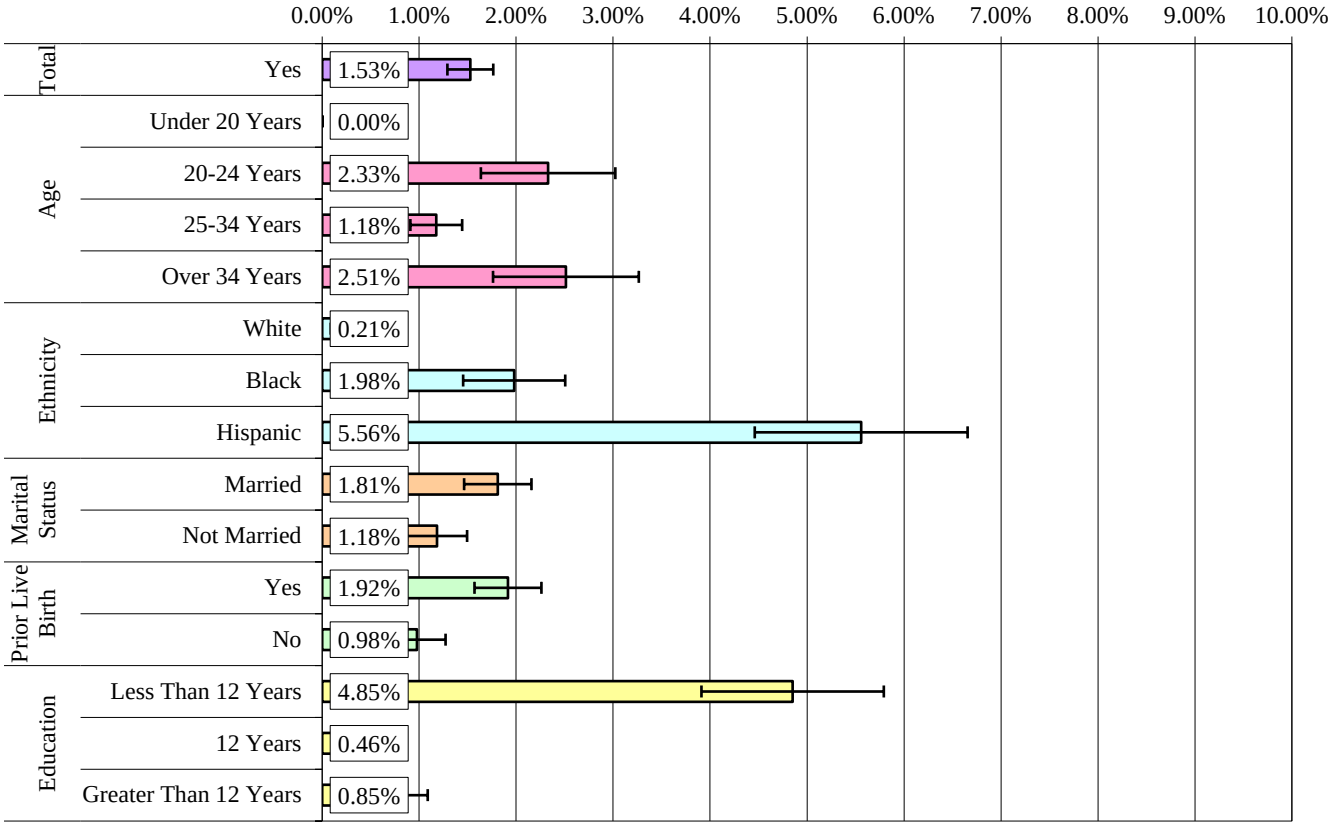
Appendix AQ16D: During my most recent pregnancy, I had private health insurance from the Delaware Healht Insurance Marketplace or HealthCare.gov as my health insurance for prenatal care. [RAW] (% "Yes")



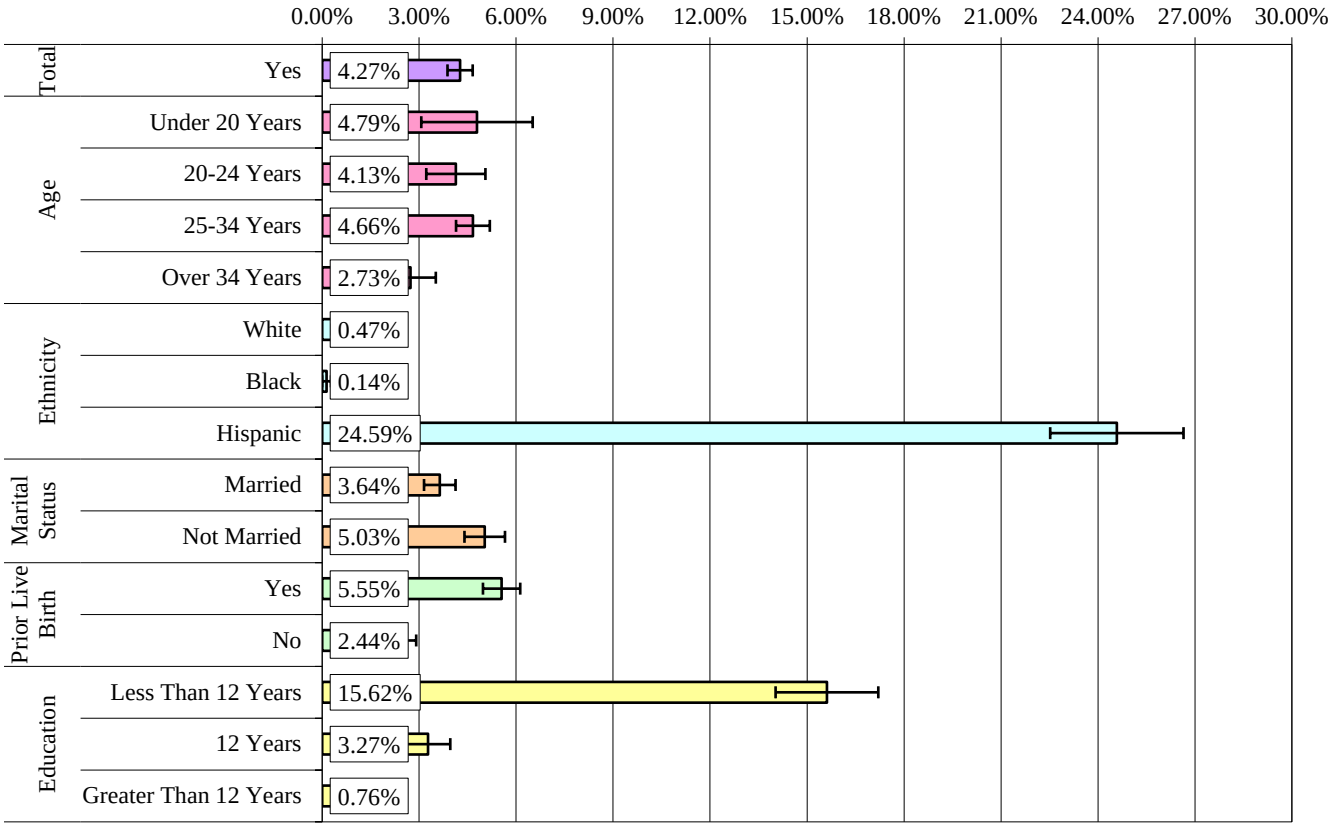
Appendix AQ16E: During my most recent pregnancy, I had Medicaid (Diamond State Health Plan, Highmark Health Options, United Healthcare) as my health insurance for prenatal care.[***] [RAW] (% "Yes")



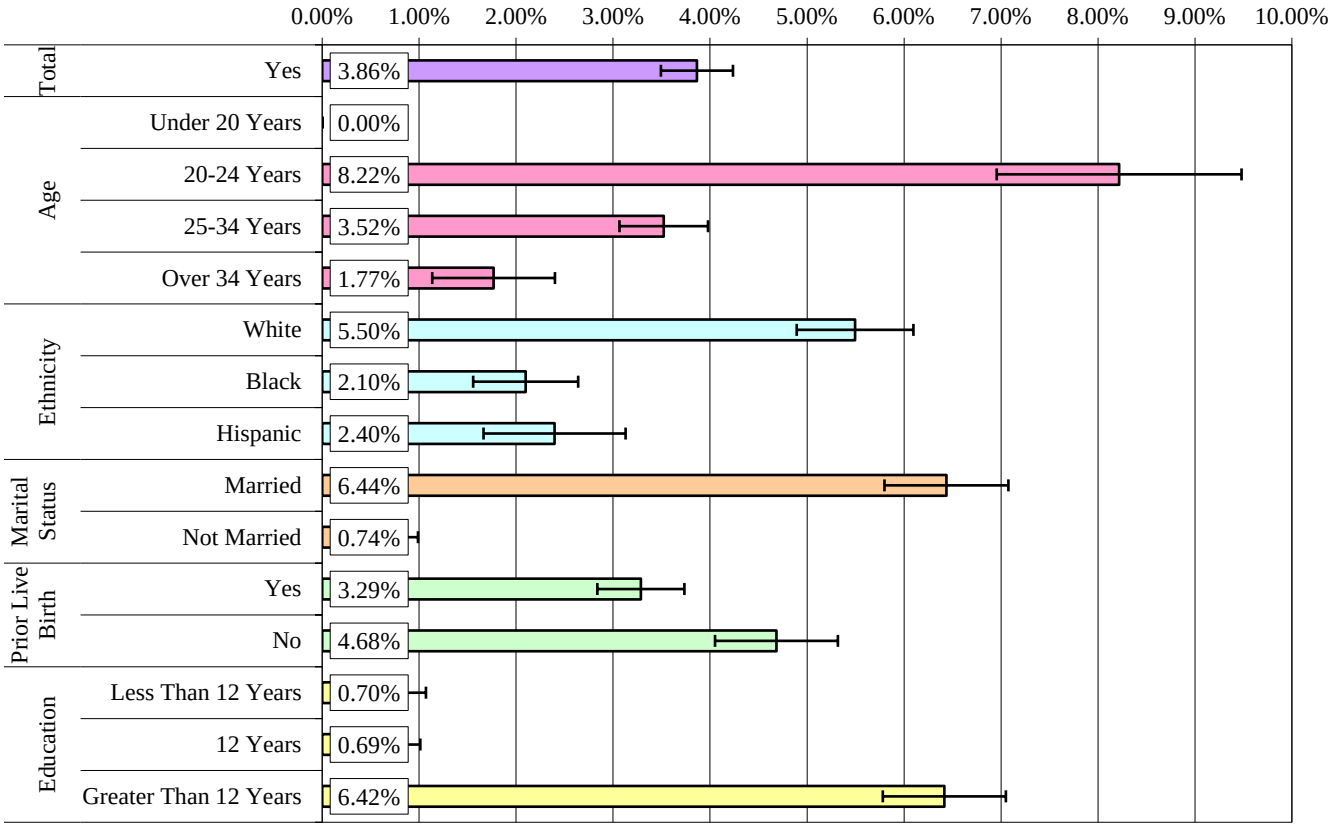
Appendix AQ16F: During my most recent pregnancy, I had Delaware Health Children Program (DHCP/SCHIP) as my health insurance for prenatal care. [RAW] (% "Yes")



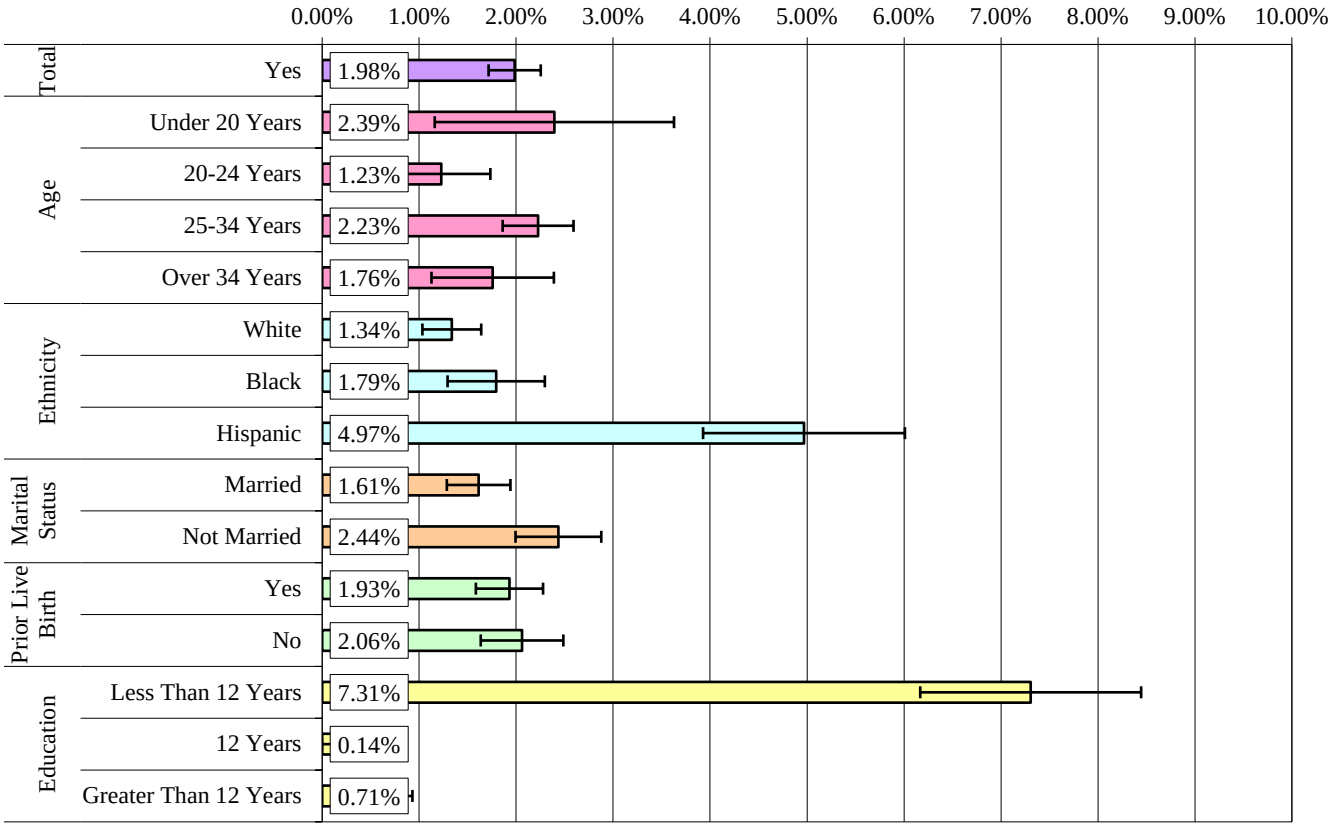
Appendix AQ16G: During my most recent pregnancy, I had CHAP – Community Healthcare Access Program as my health insurance for prenatal care. [RAW] (% "Yes")



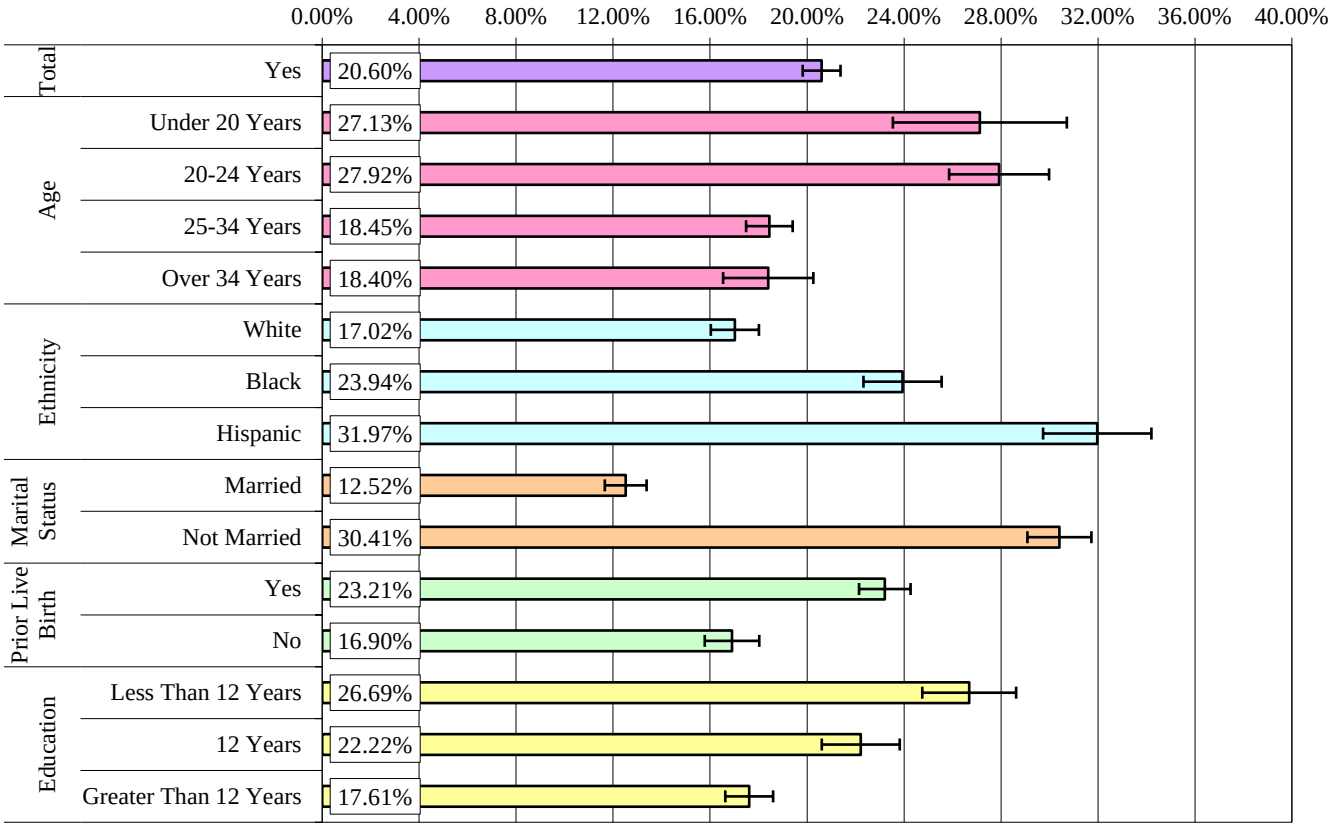
Appendix AQ16H: During my most recent pregnancy, I had TRICARE or other military health care as my health insurance for prenatal care. [RAW] (% "Yes")



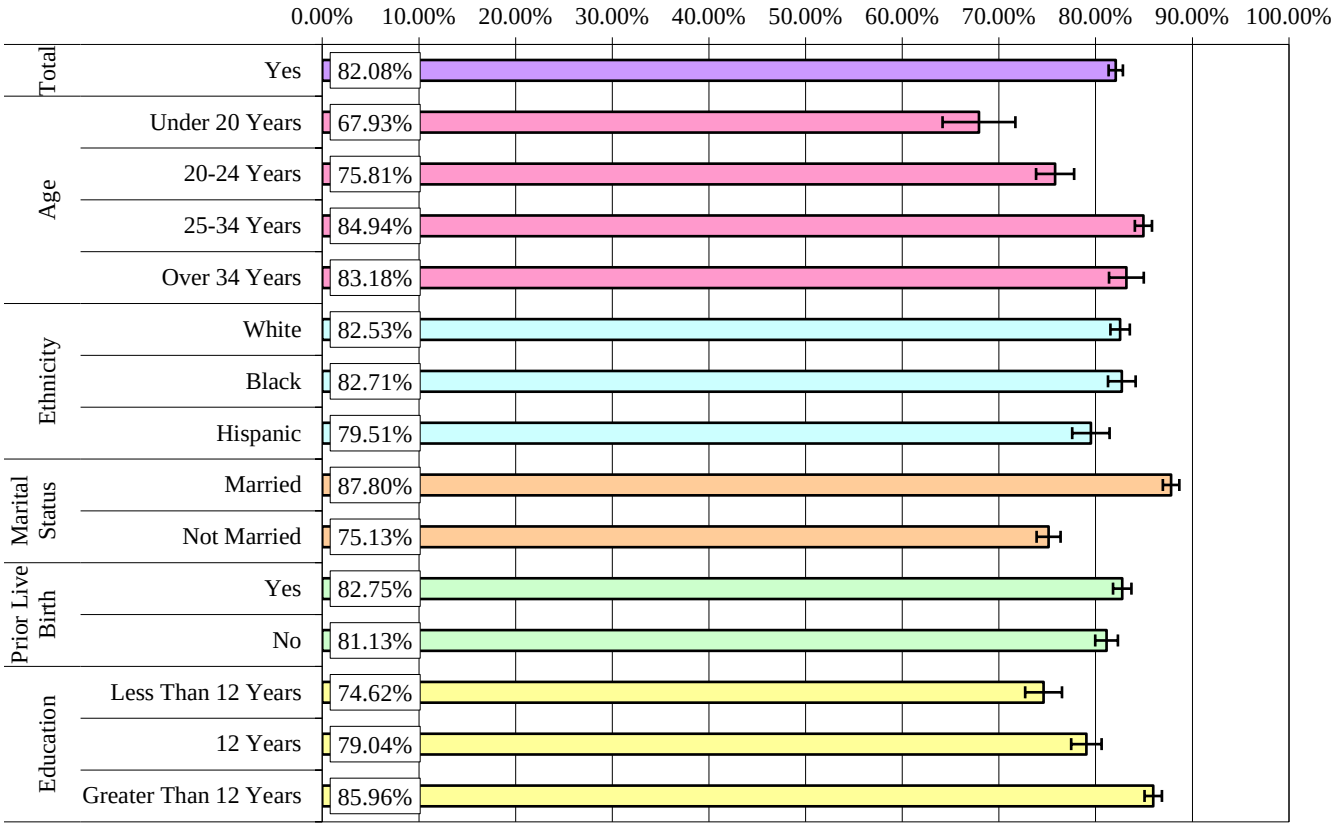
Appendix AQ16I: During my most recent pregnancy, I did not have any health insurance for my prenatal care. [RAW] (% "Yes")



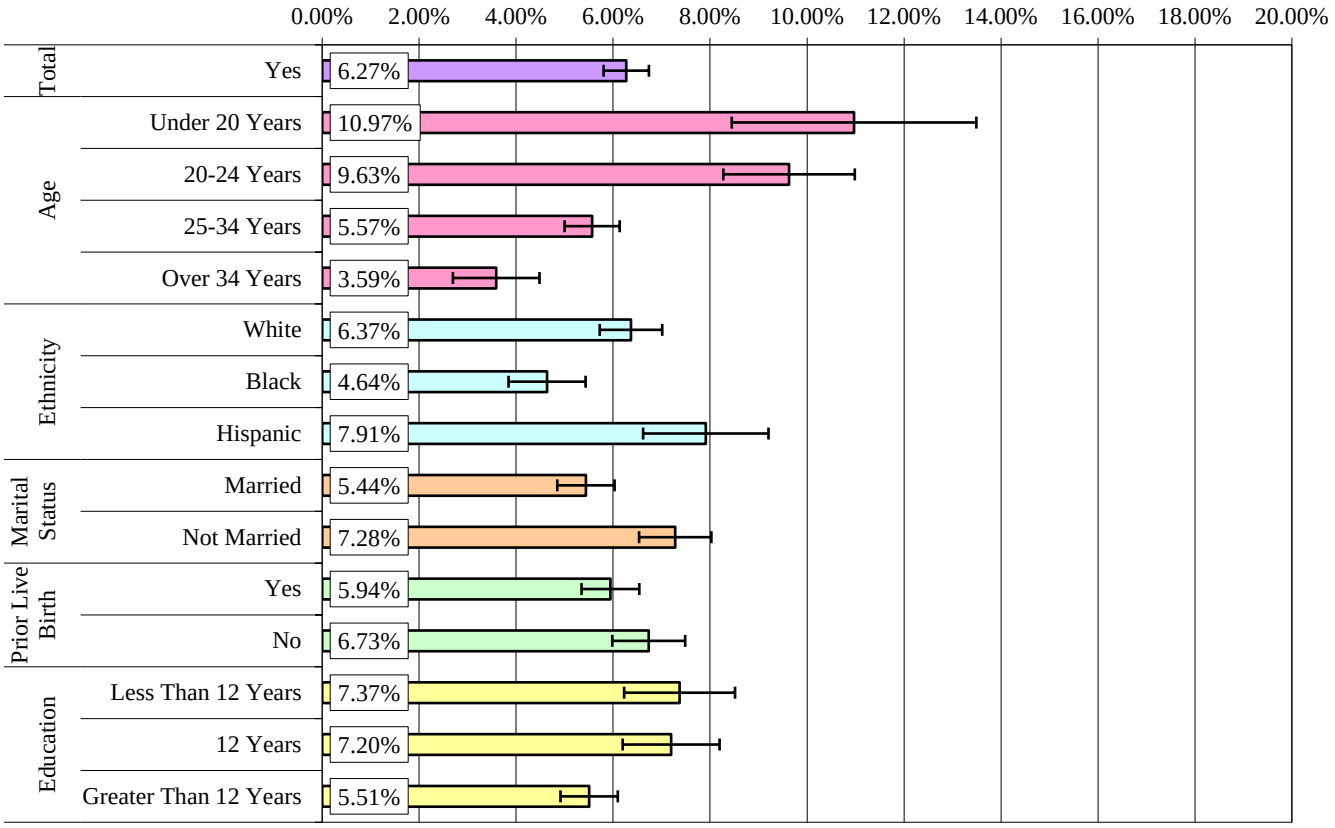
Appendix AQ20: When you got pregnant with your new baby, were you or your husband or partner doing anything to keep from getting pregnant?*** [RAW] (% "Yes")



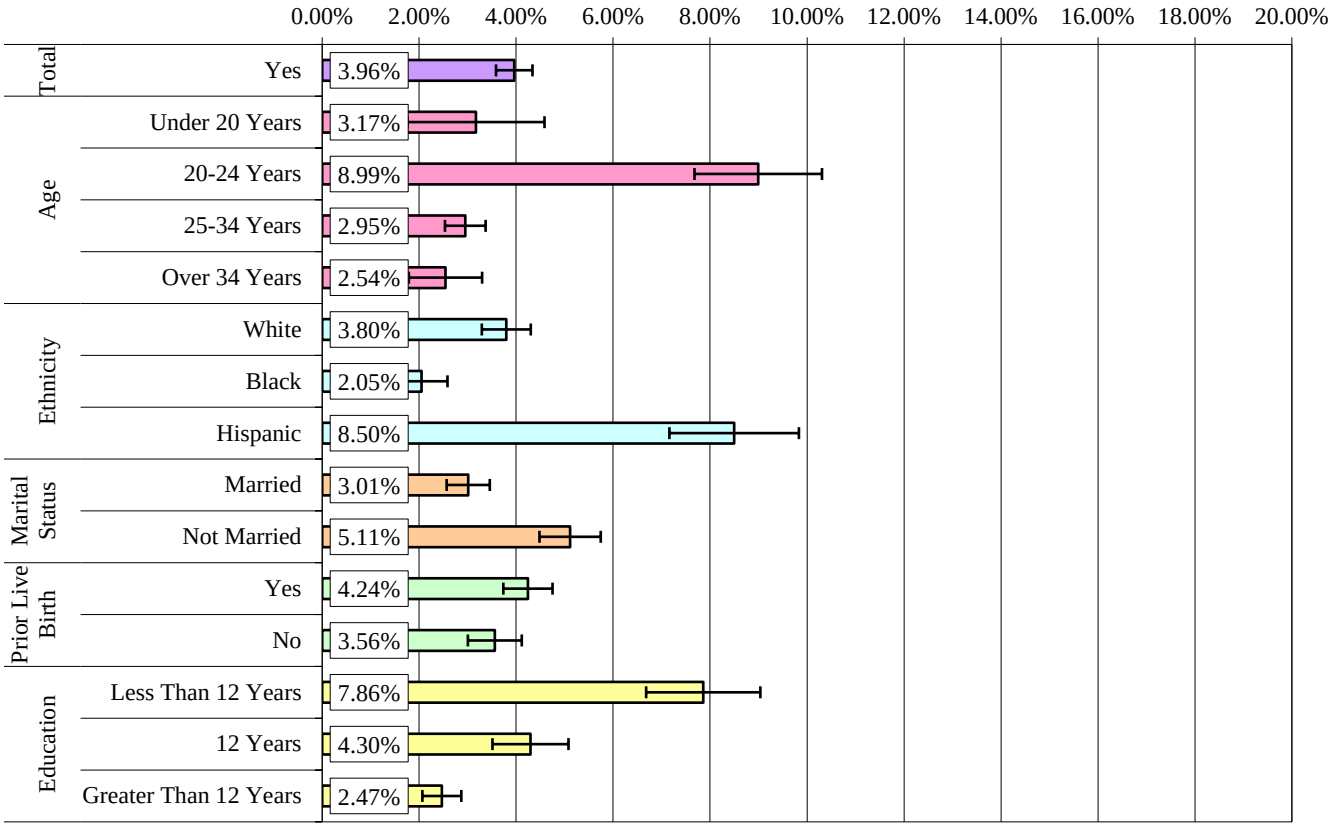
Appendix AQ23: Did you get prenatal care as early in your pregnancy as you wanted?[***] [RAW] (% "Yes")



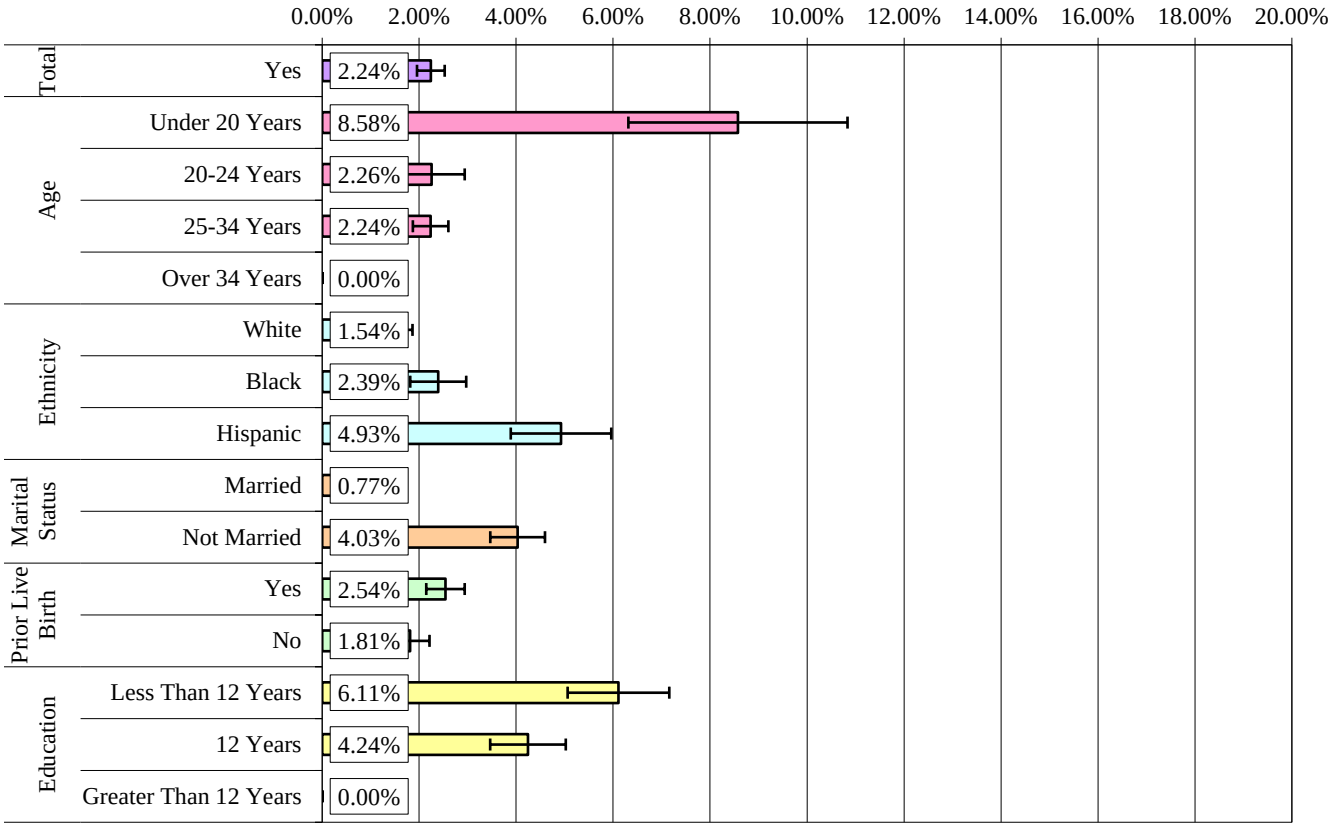
Appendix AQ24A: I couldn't get an appointment when I wanted one kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



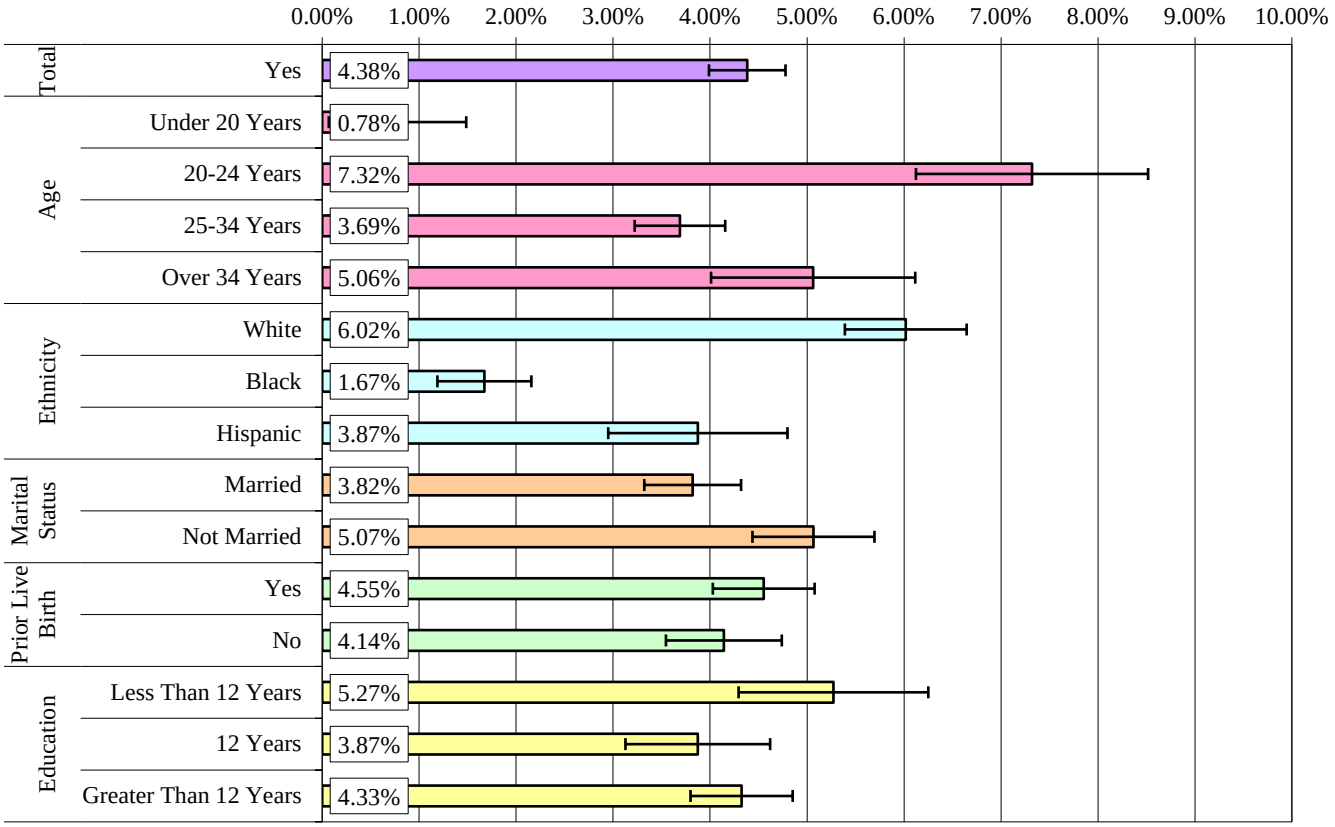
Appendix AQ24B: I didn't have enough money or insurance to pay for my visits kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



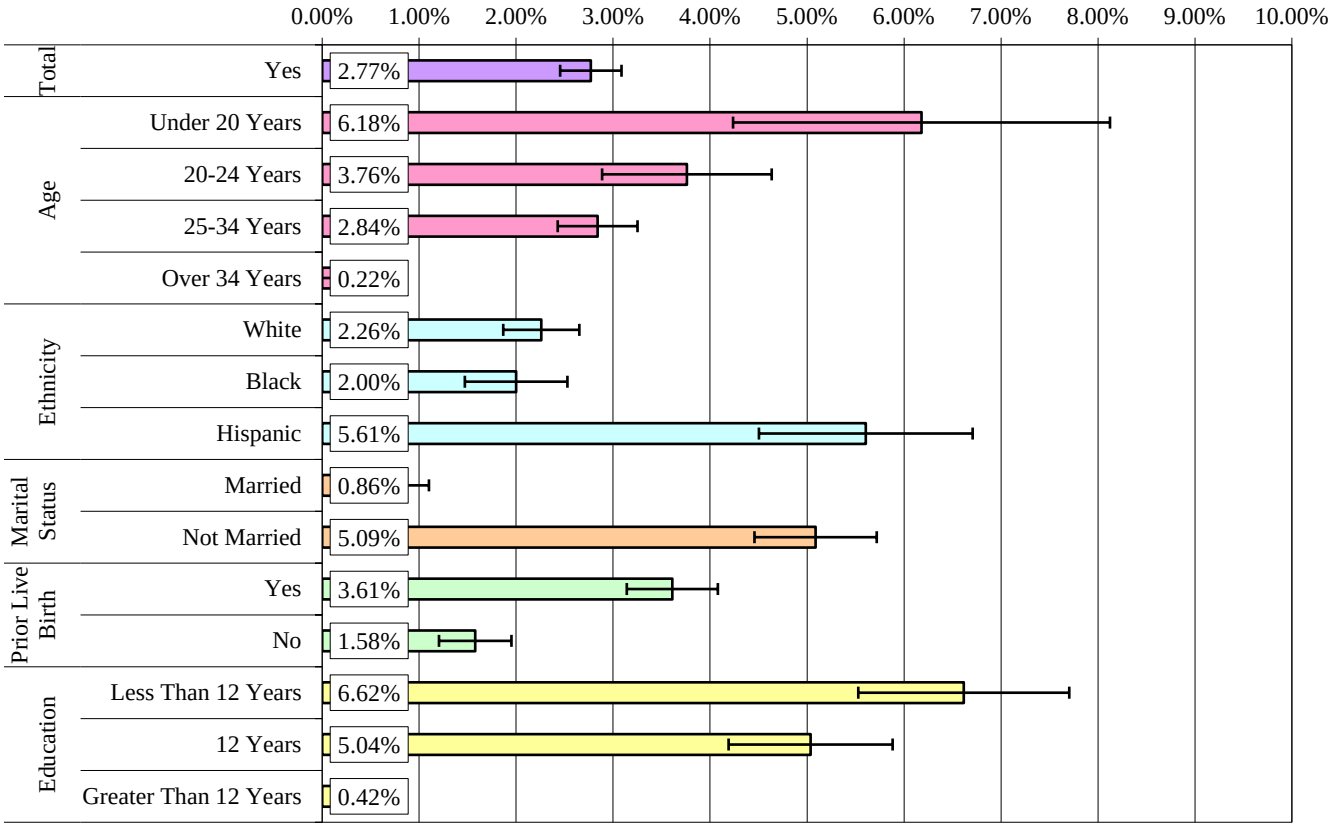
Appendix AQ24C: I didn't have any transportation to get to the clinic or doctor's office kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



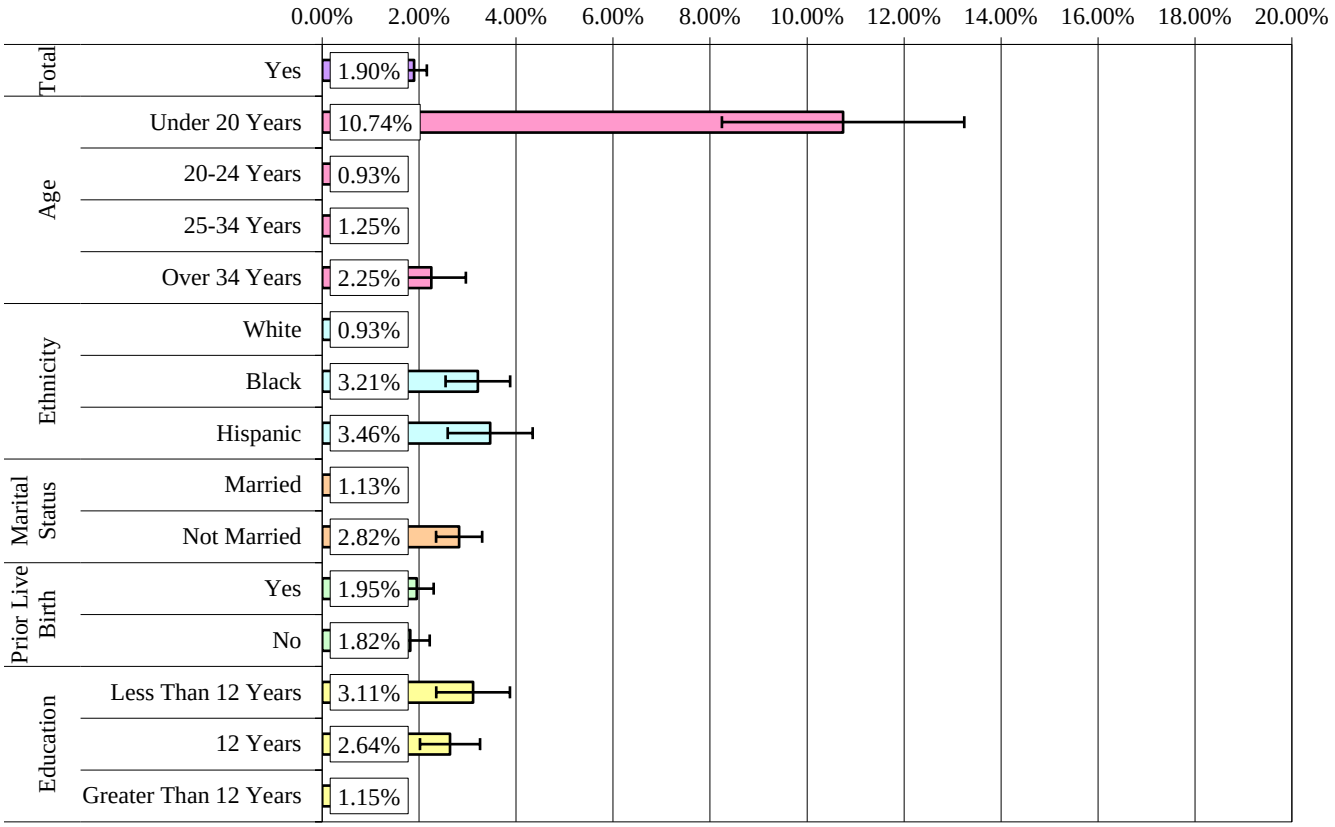
Appendix AQ24D: The doctor or the health plan would not start care as early as I wanted kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



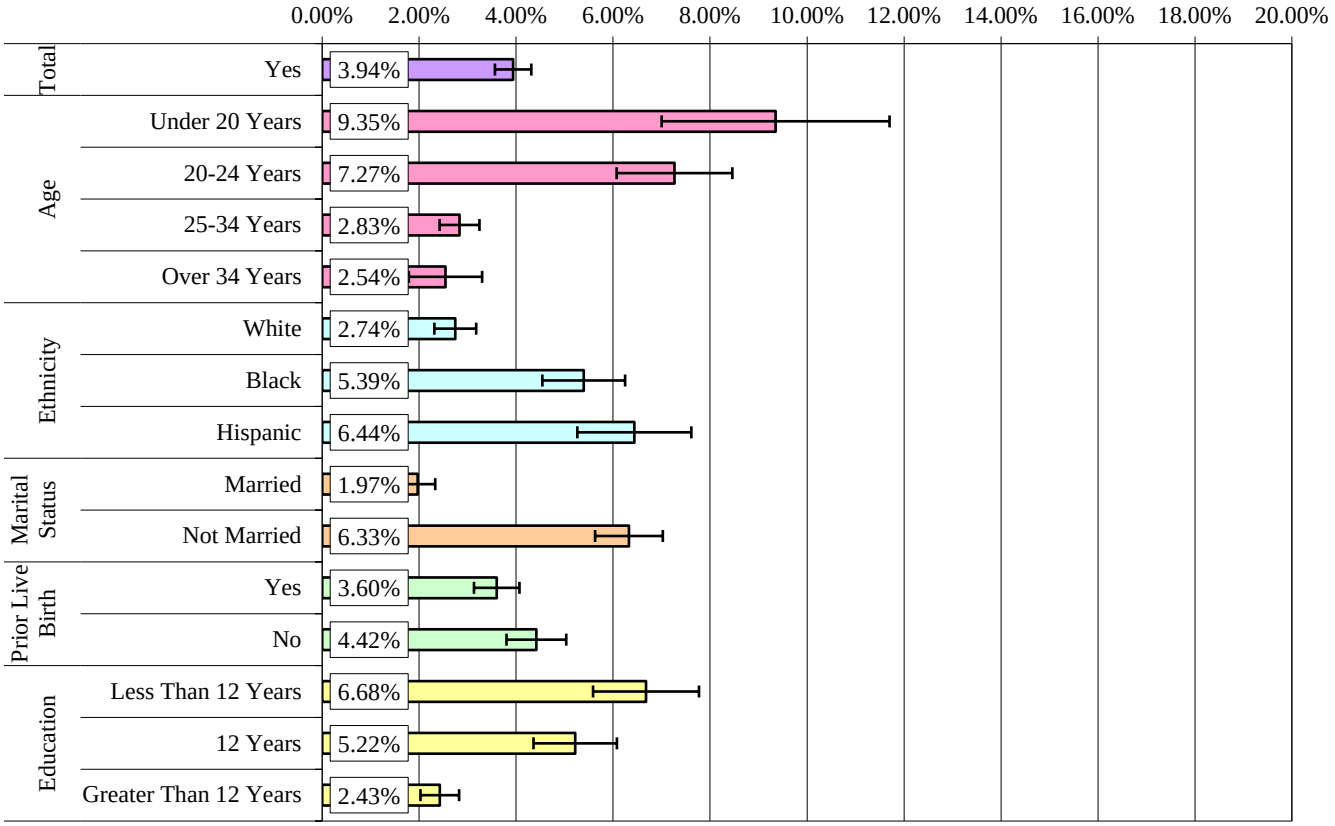
Appendix AQ24E: I had too many other things going on kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



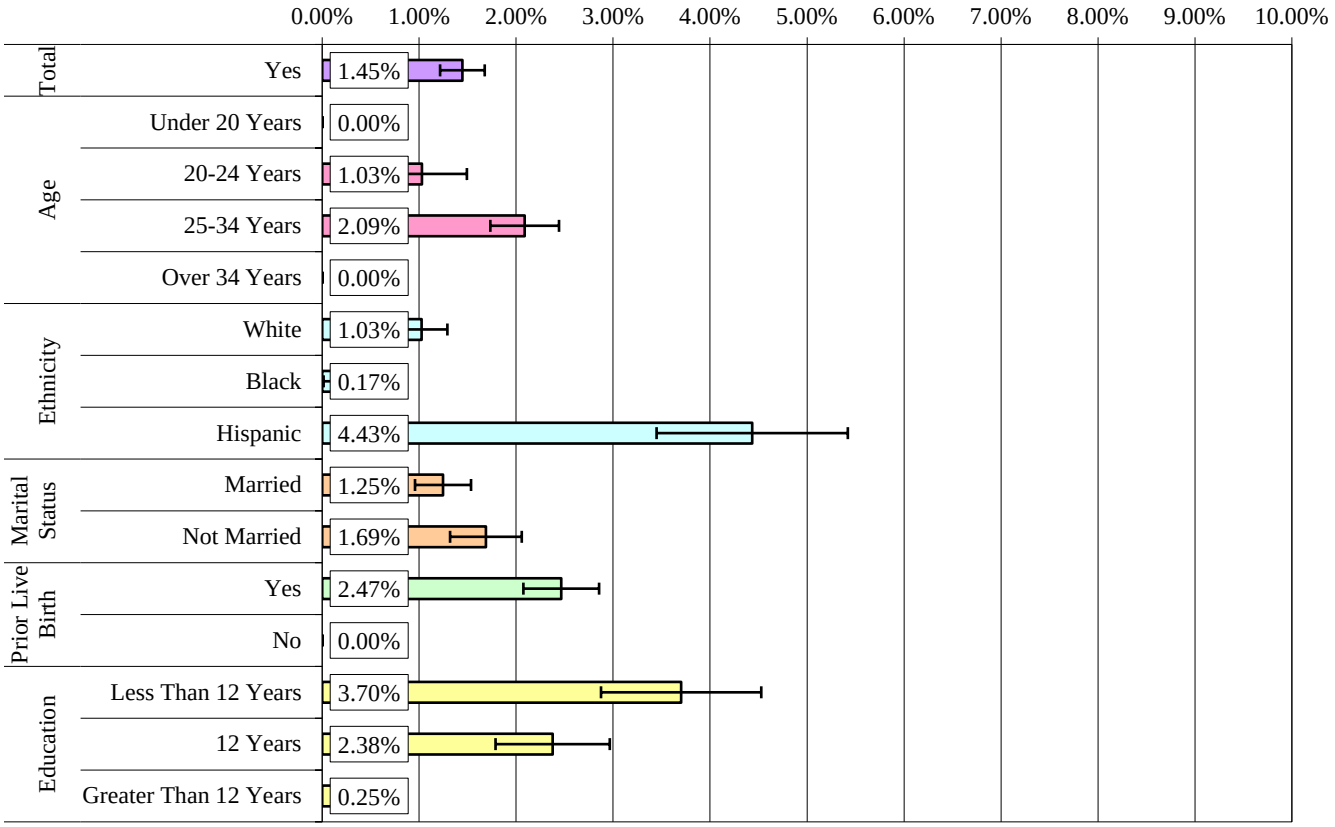
Appendix AQ24F: I couldn't take time off from work or school kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



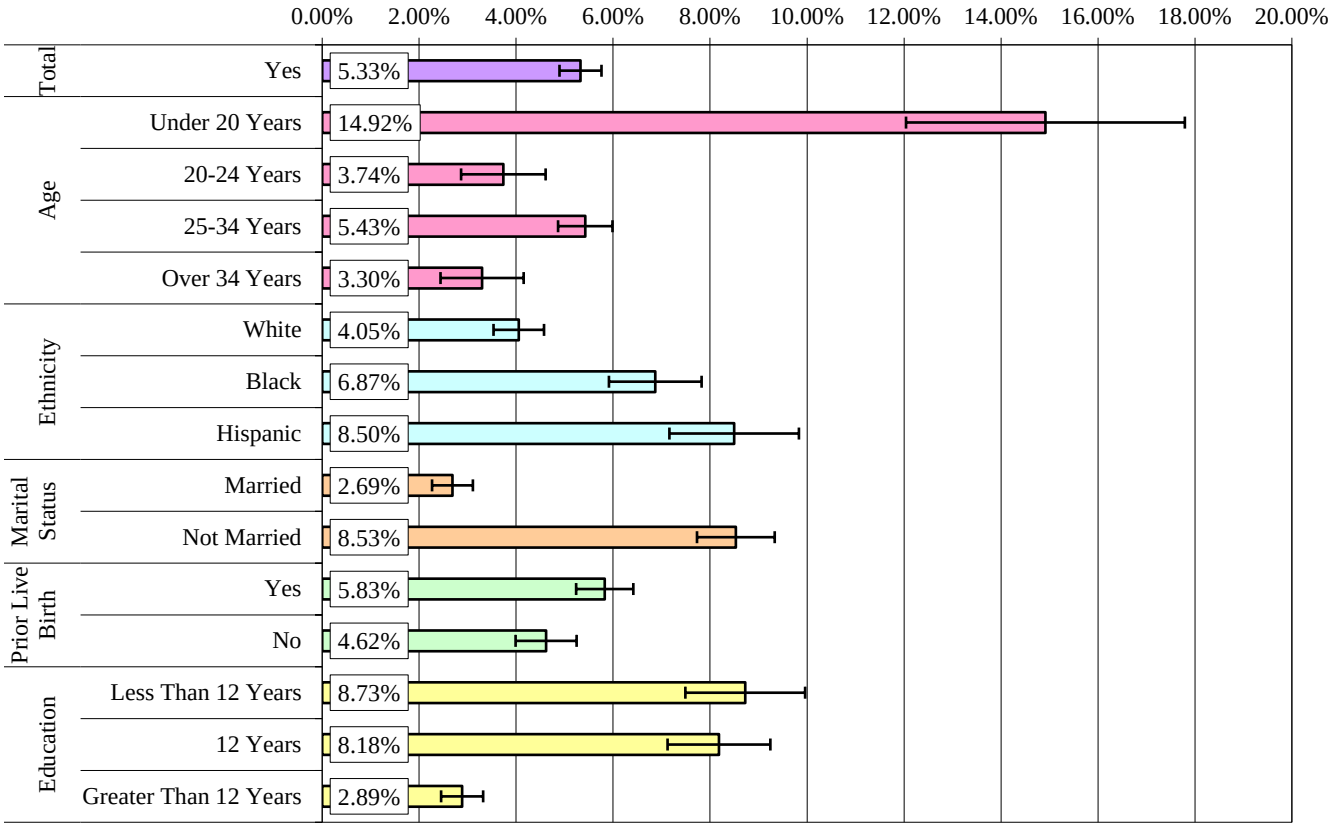
Appendix AQ24G: I didn't have my Medicaid (Diamond State Partners, Unison, or Delaware Physicians Care) card kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



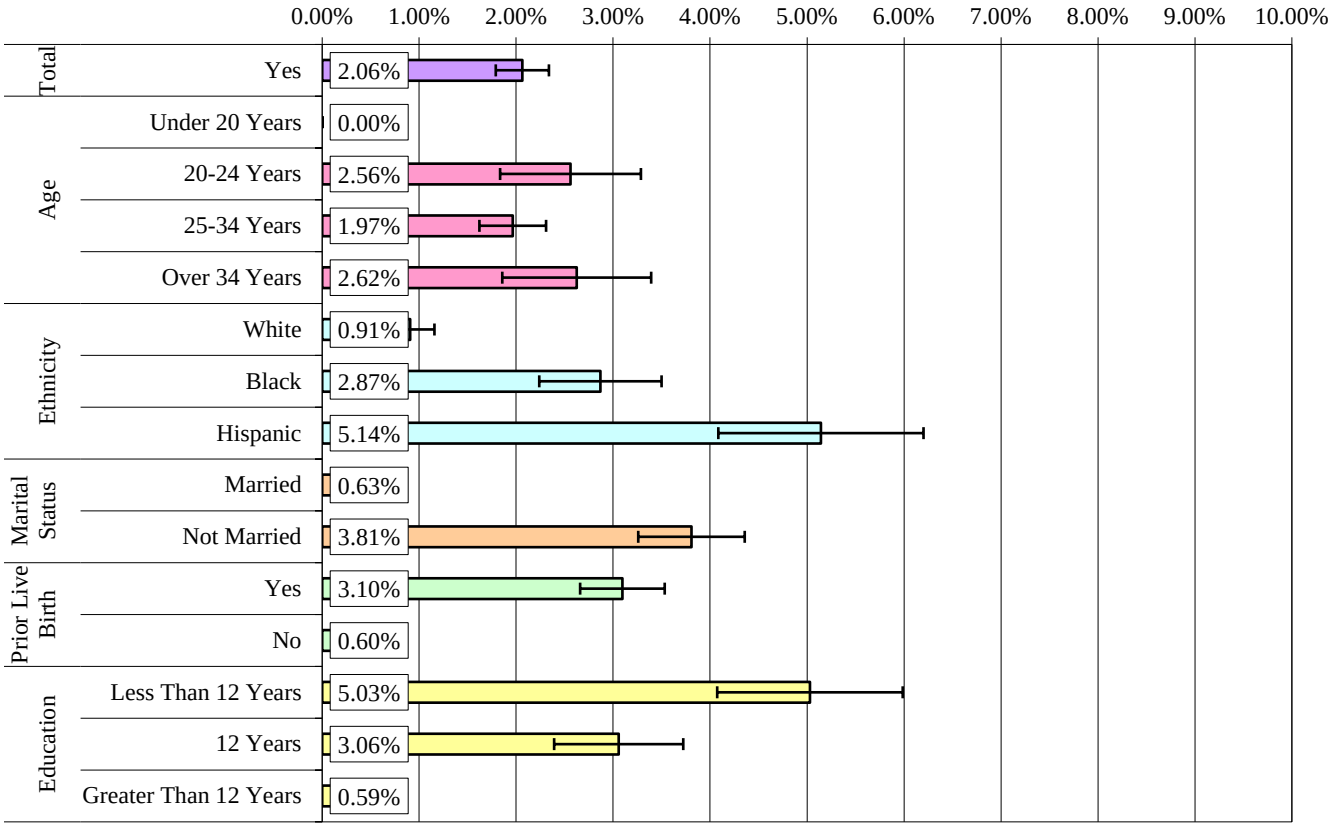
Appendix AQ24H: I didn't have anyone to take care of my children kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



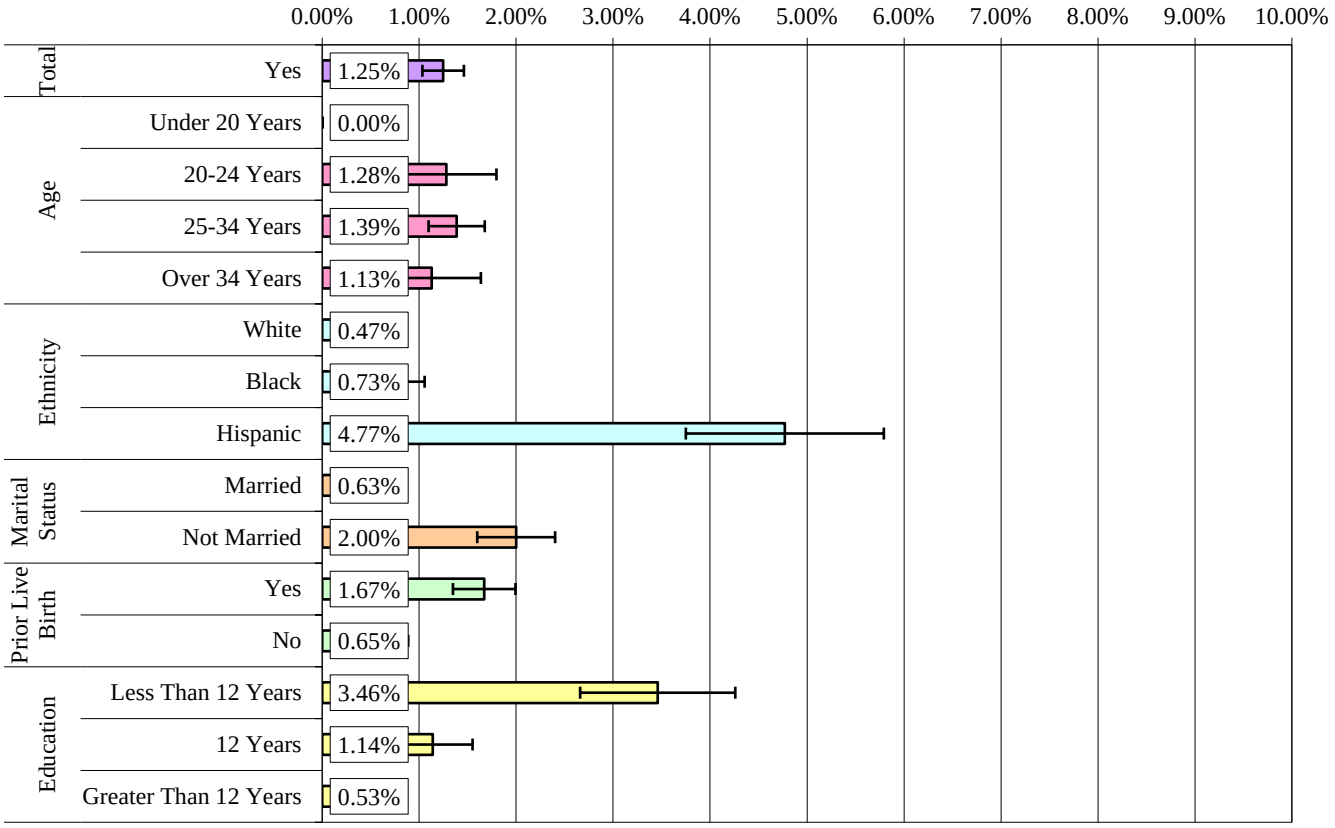
Appendix AQ24I: I didn't know I was pregnant kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



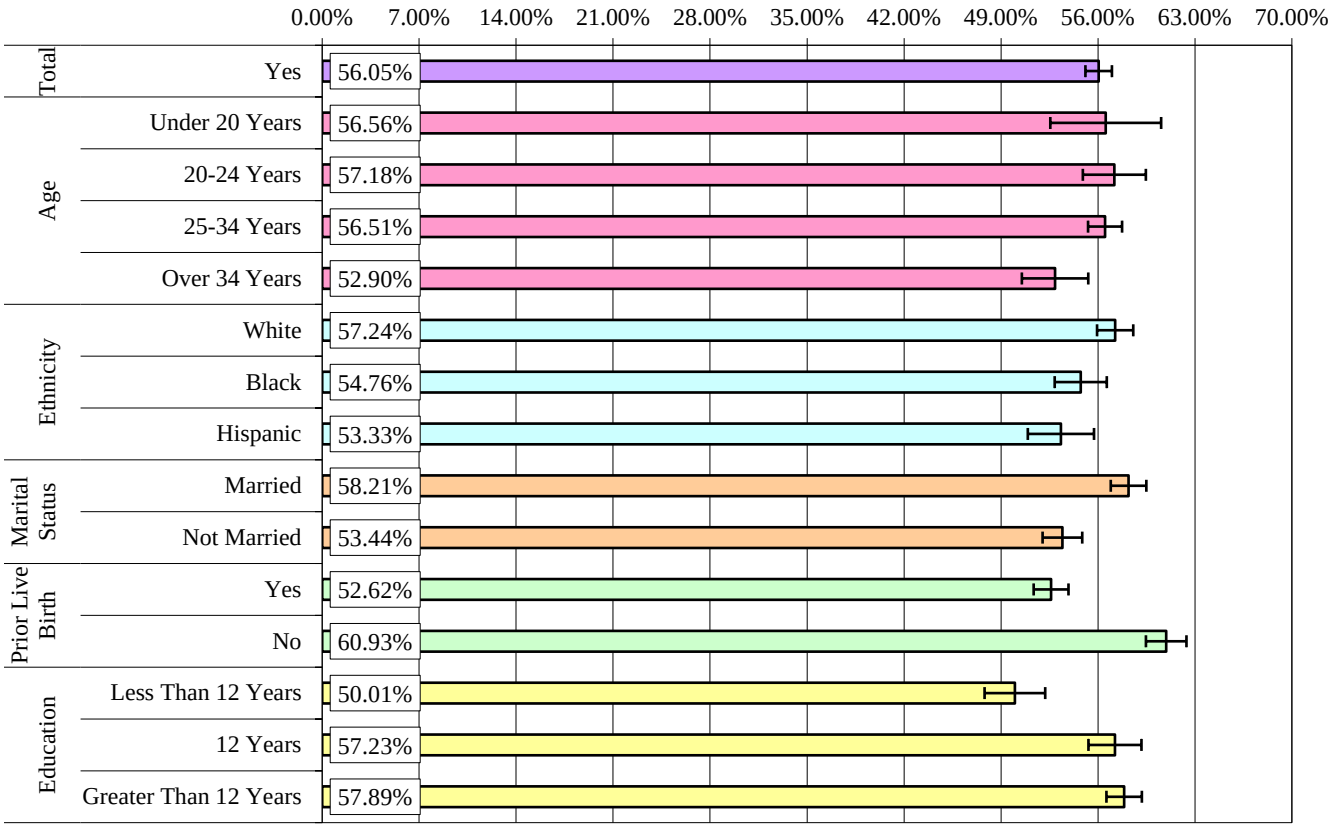
Appendix AQ24J: I didn't want anyone else to know I was pregnant kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



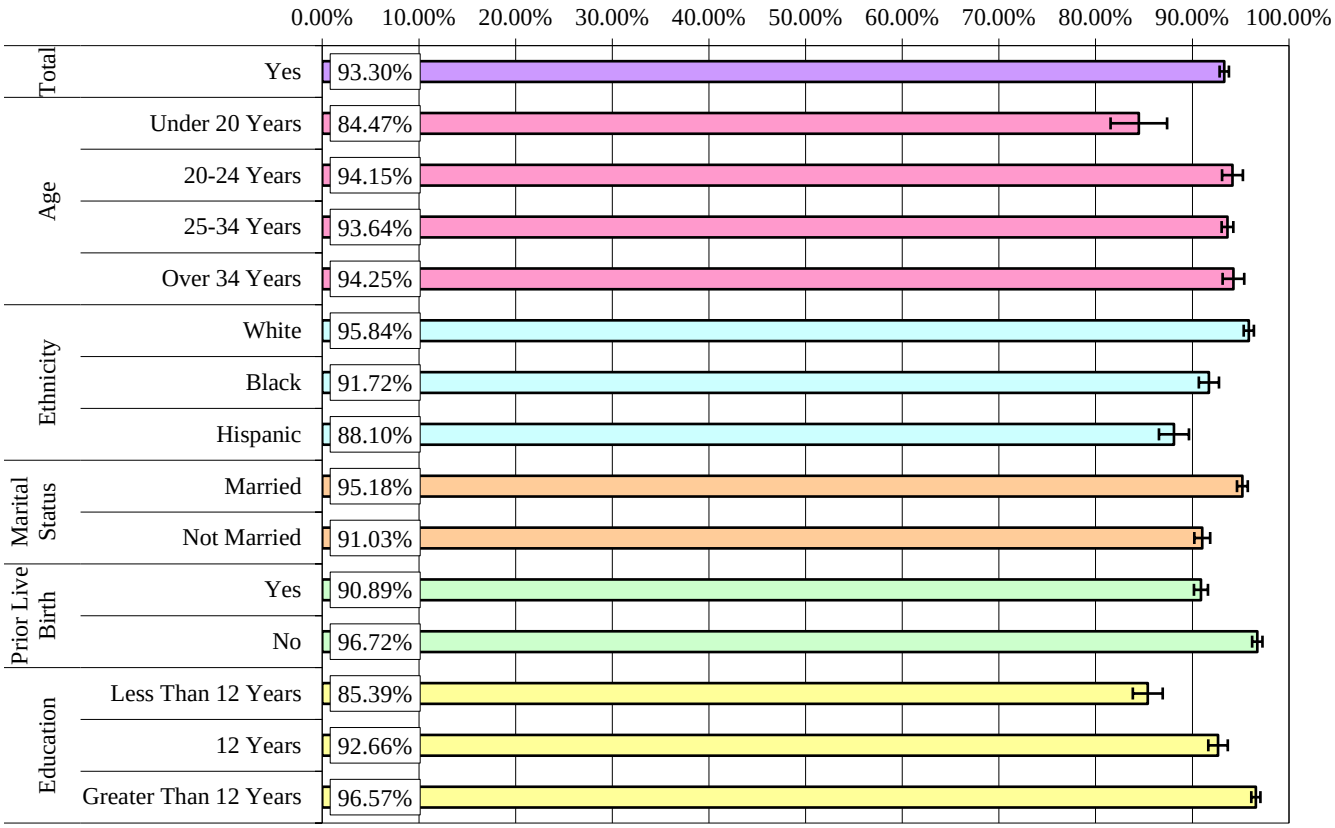
Appendix AQ24K: I didn't want prenatal care kept me from getting prenatal care at all or as early as I wanted.[***] [RAW] (% "Yes")



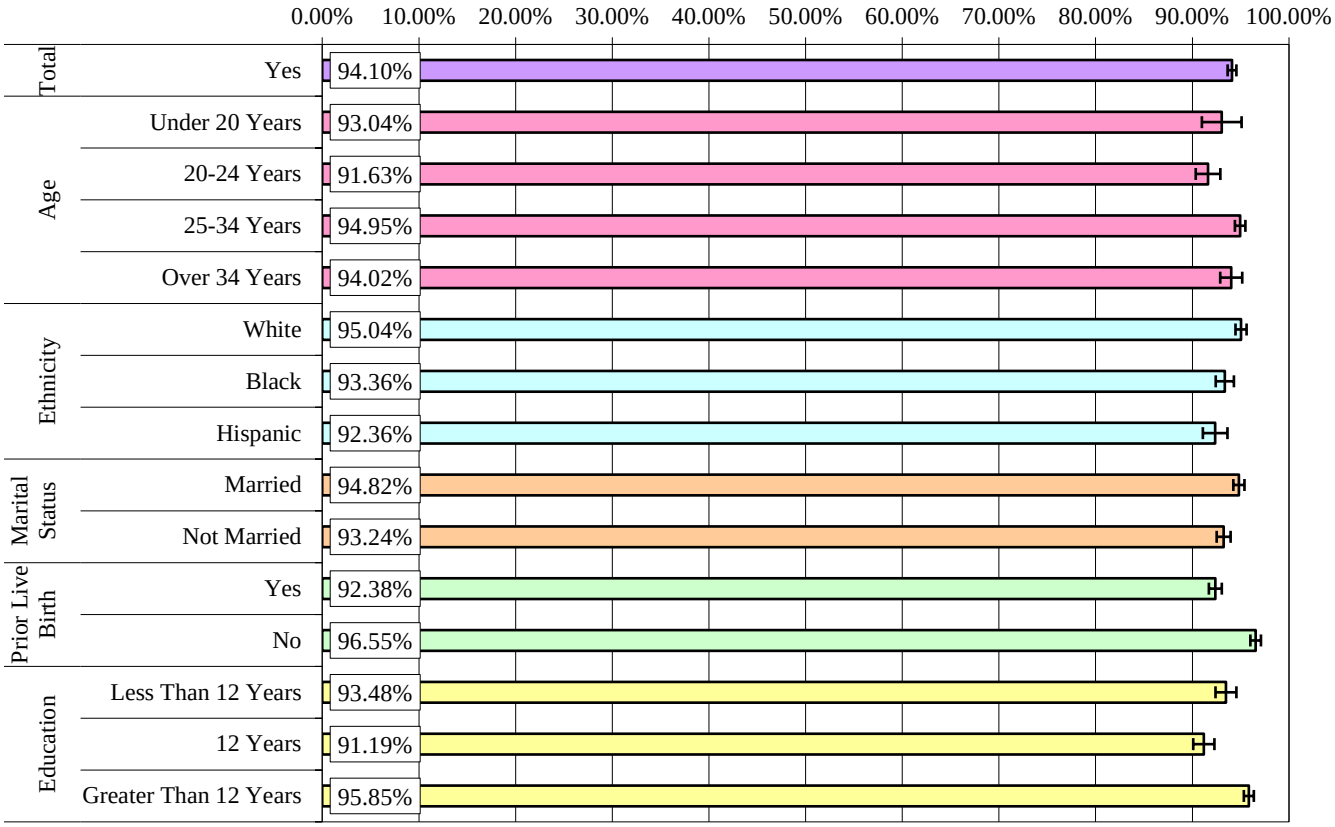
Appendix AQ25A: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you knew how much weight you should gain during pregnancy?[***] [RAW] (% "Yes")



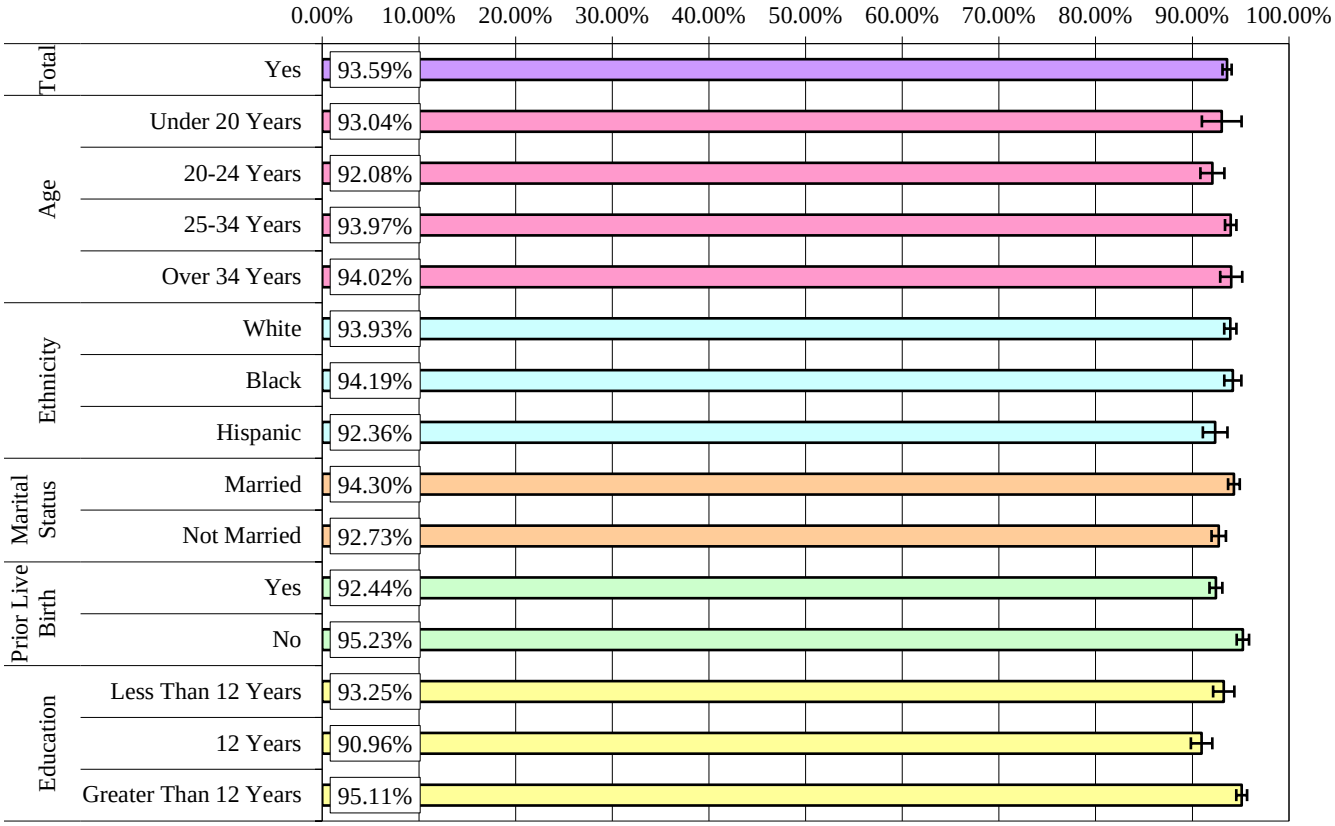
Appendix AQ25B: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you were taking any prescription medication?[***] [RAW] (% "Yes")



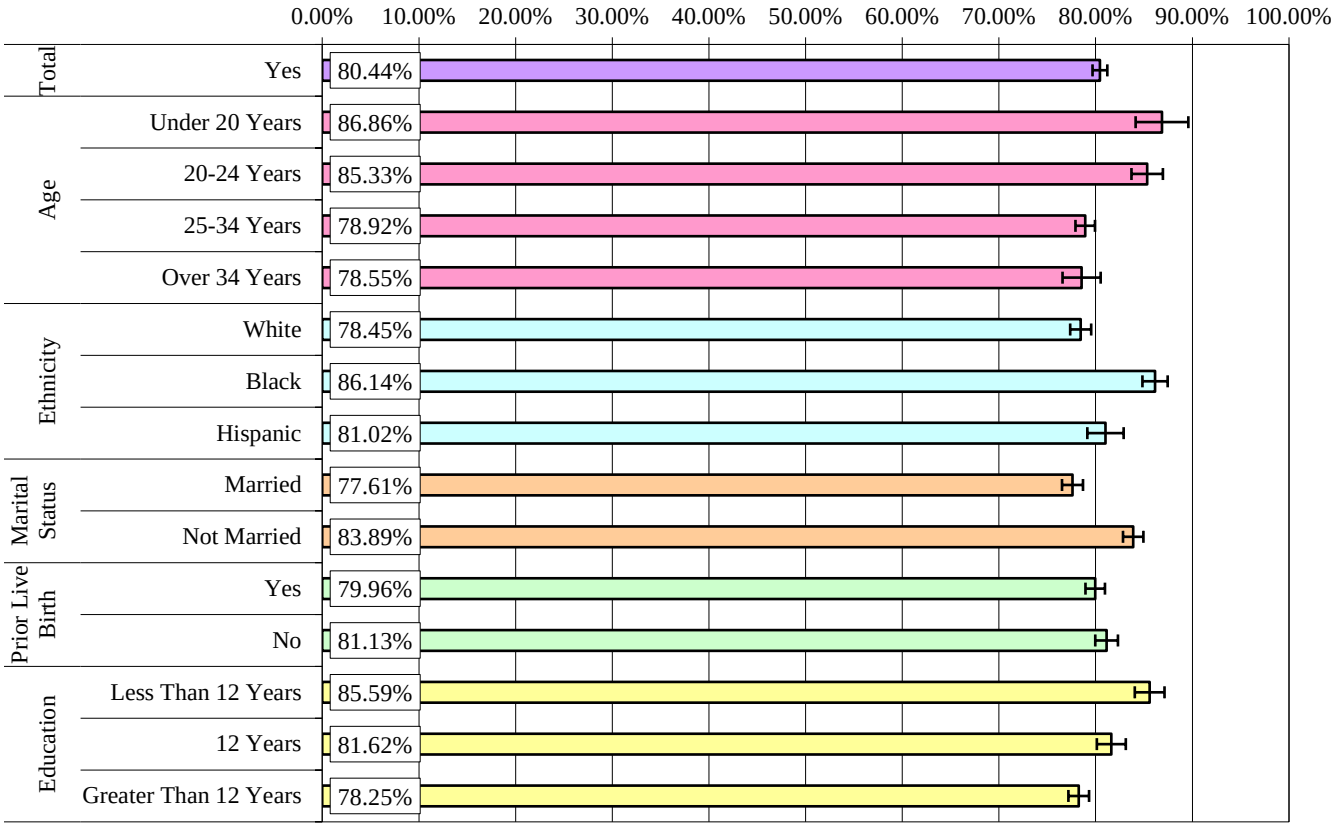
Appendix AQ25C: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you were smoking cigarettes?[***] [RAW] (% "Yes")



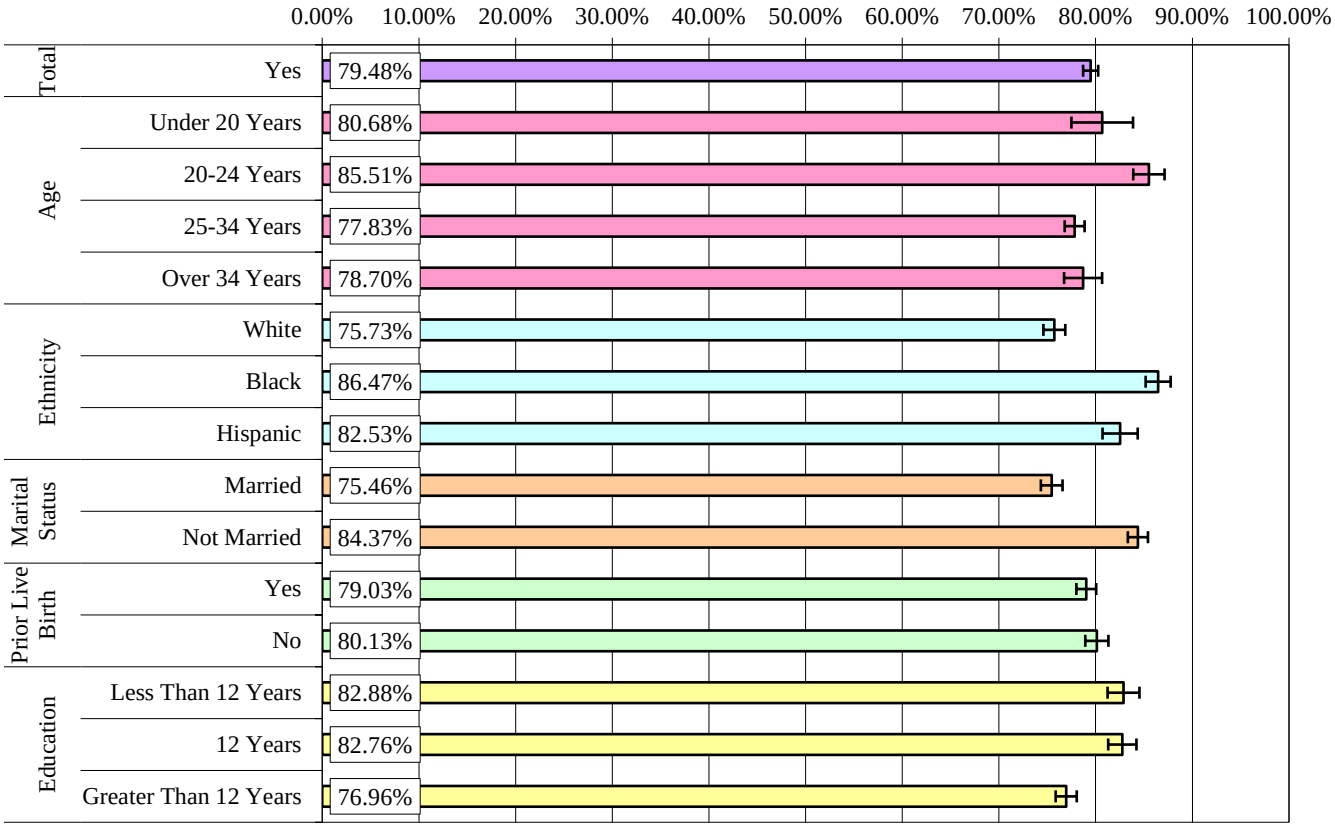
Appendix AQ25D: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you were drinking alcohol?[***] [RAW] (% "Yes")



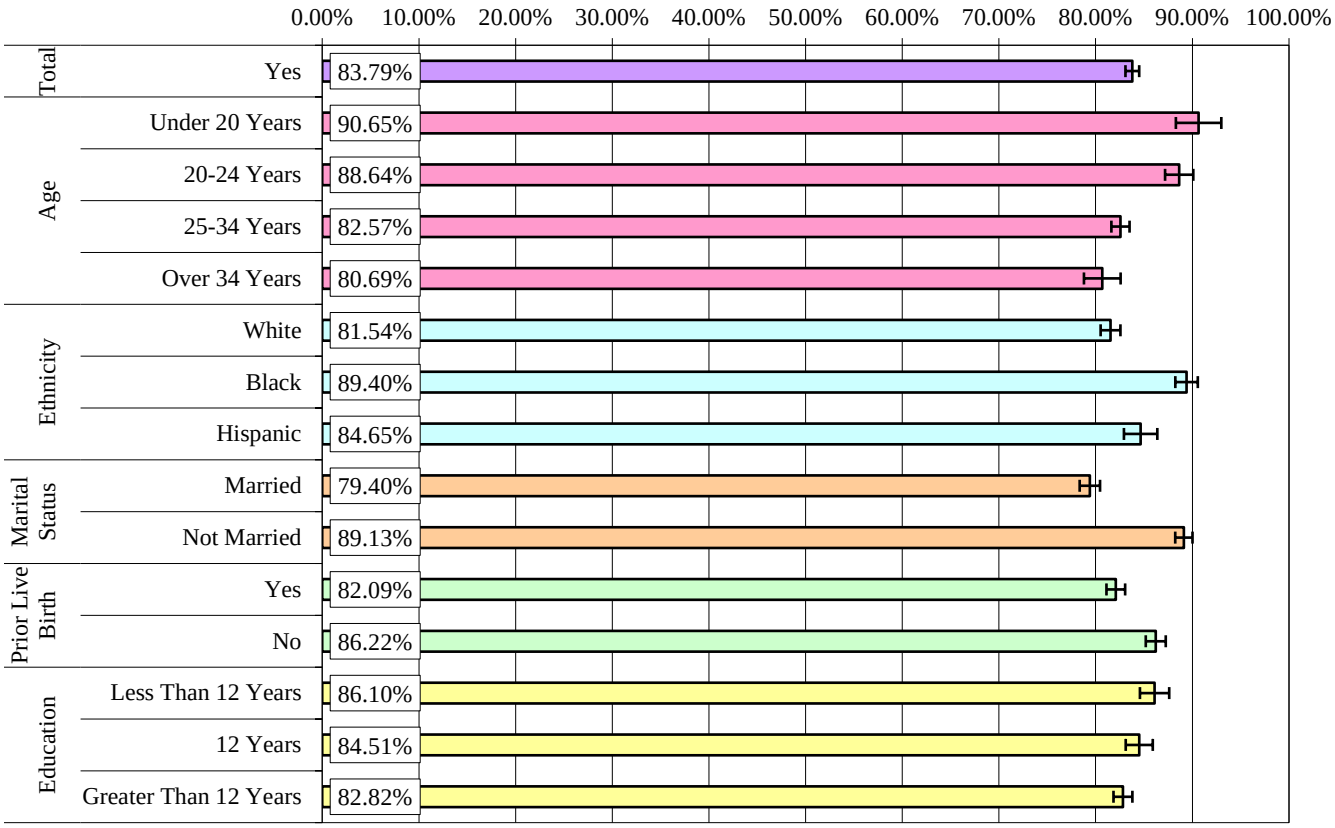
Appendix AQ25E: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if someone was hurting you emotionally or physically?[***] [RAW] (% "Yes")



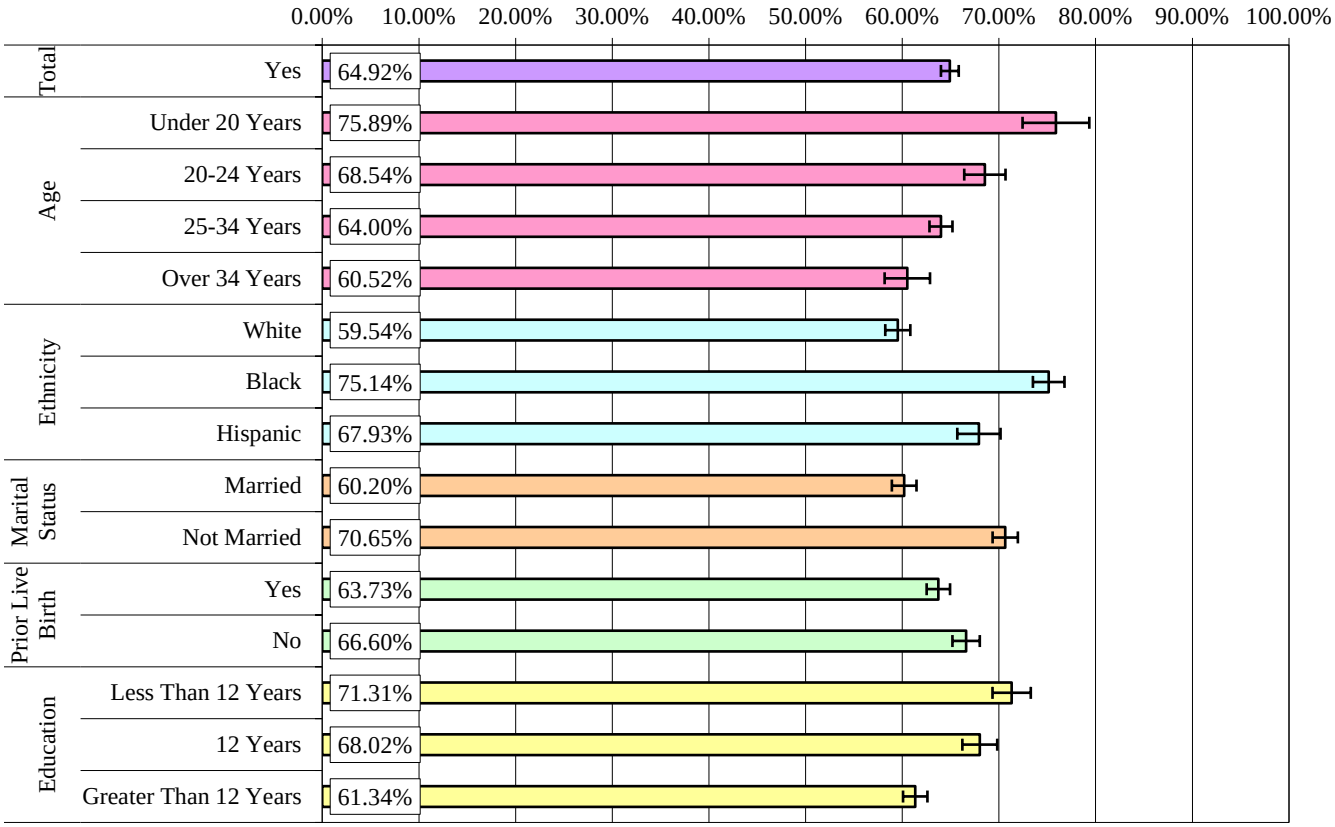
Appendix AQ25F: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you were feeling down or depressed?[***] [RAW] (% "Yes")



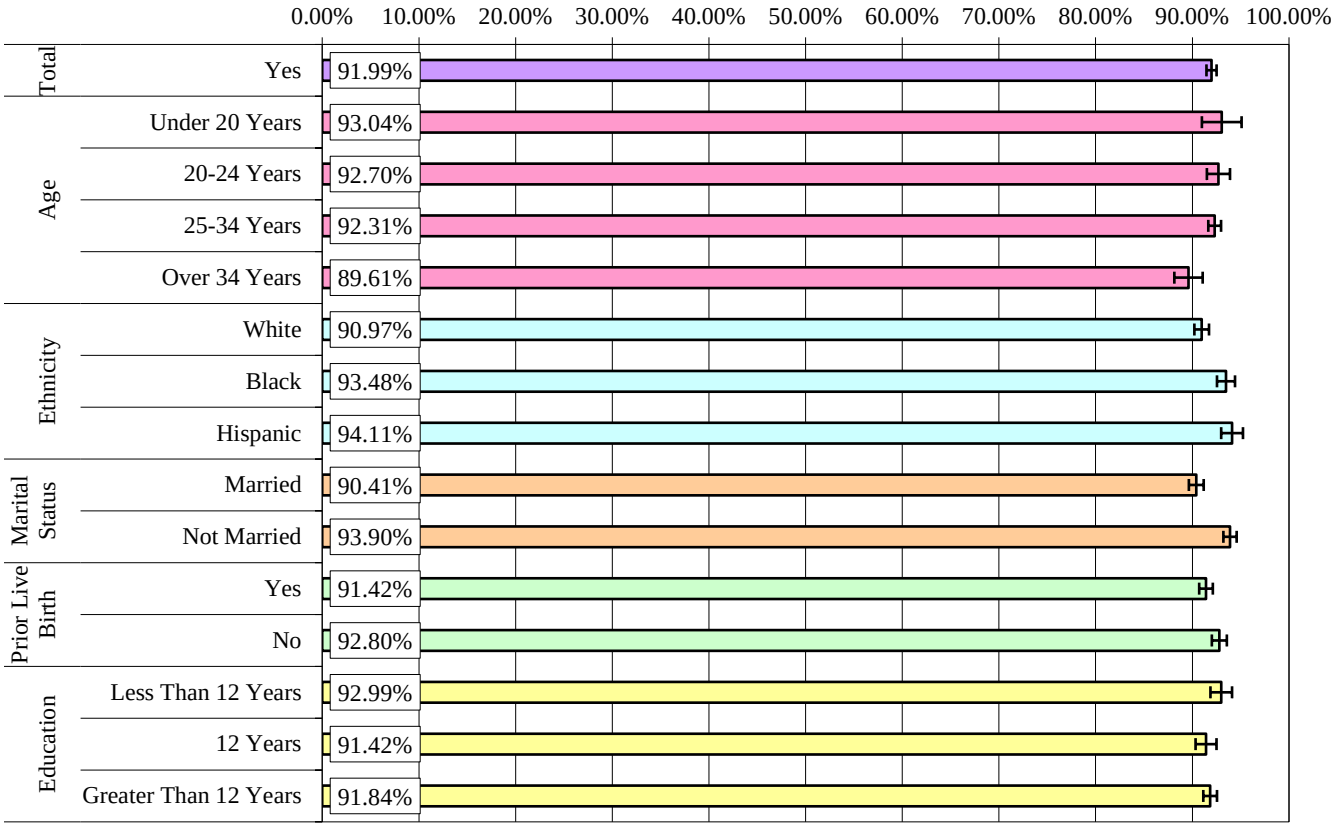
Appendix AQ25G: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you were using drugs such as marijuana, cocaine, crack, or meth?[***] [RAW] (% "Yes")



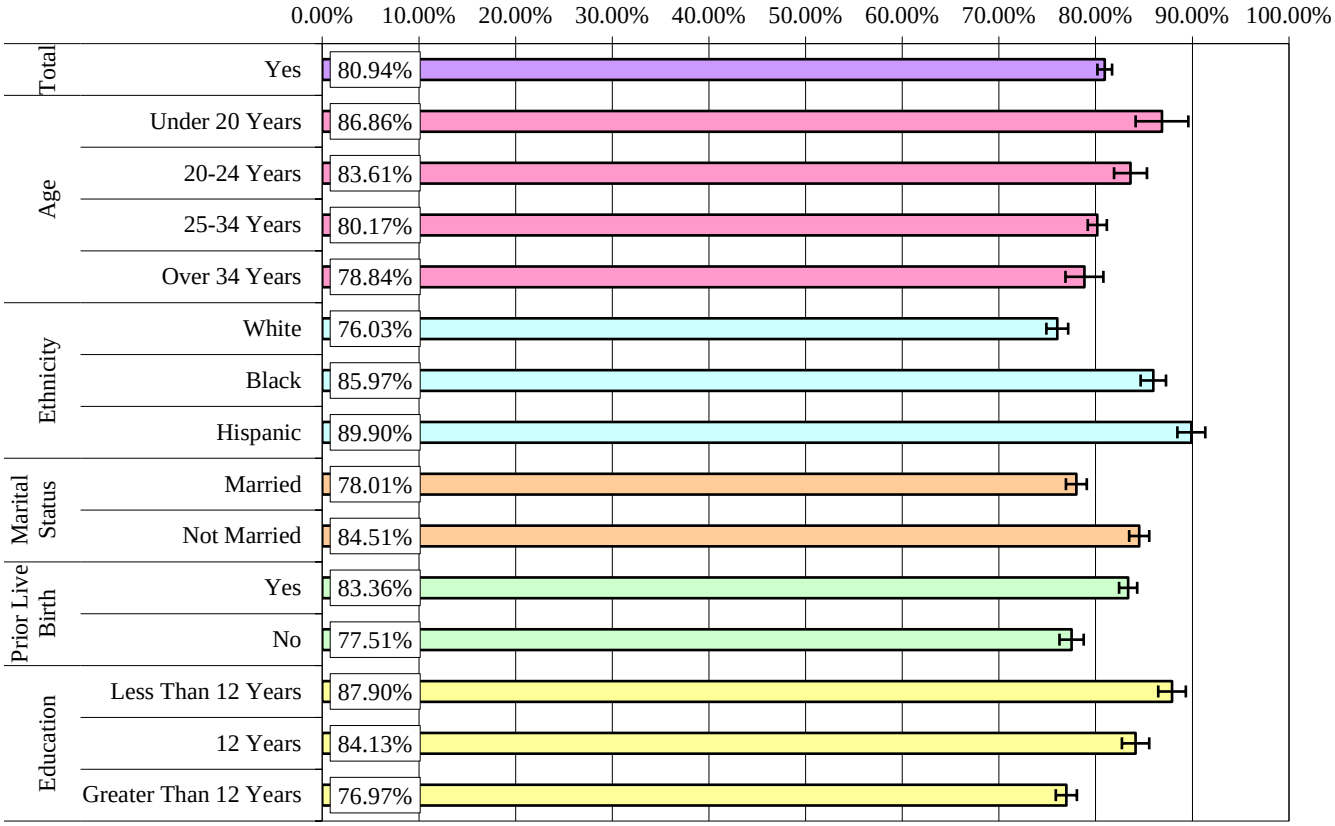
Appendix AQ25H: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you wanted to be tested for HIV (the virus that causes AIDS)?[***] [RAW] (% "Yes")



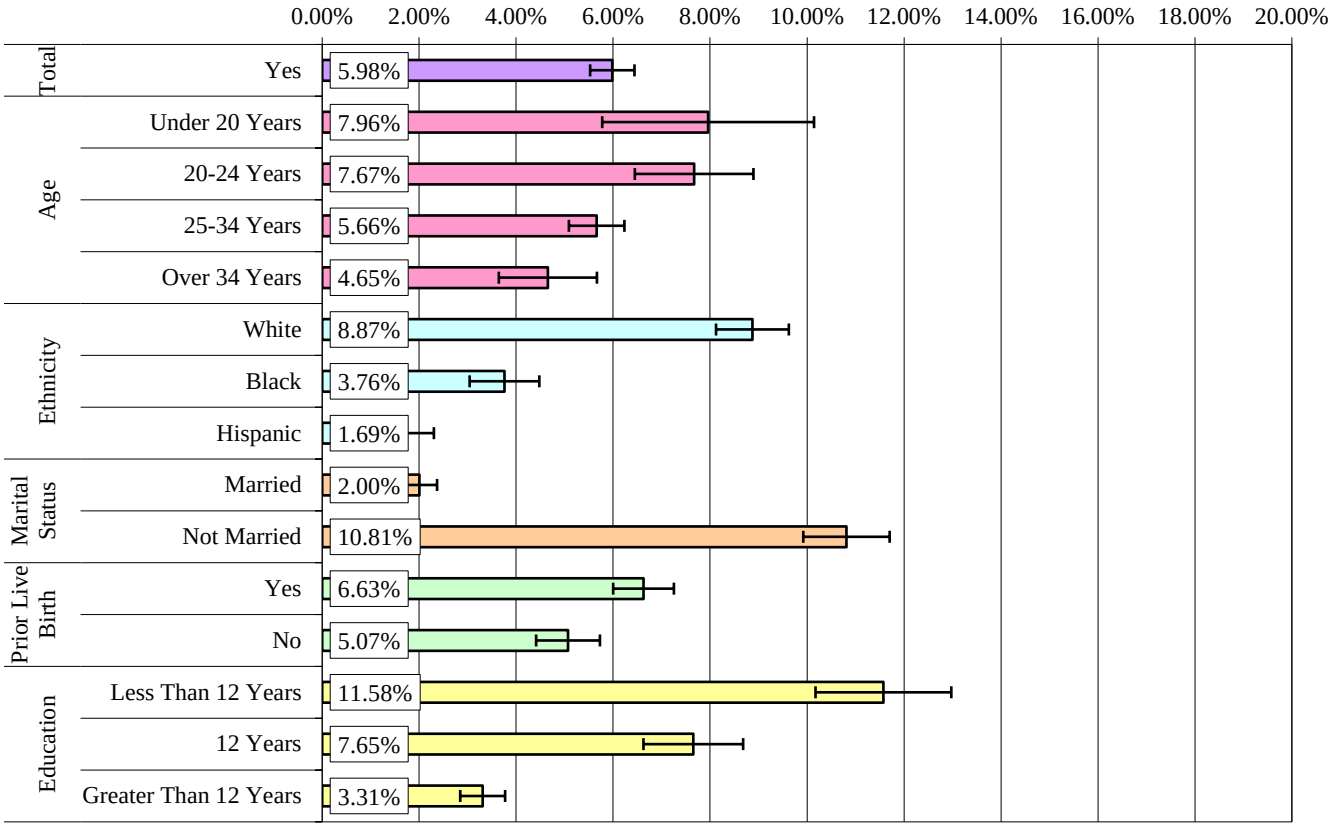
Appendix AQ25I: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you planned to breastfeed your new baby?[***] [RAW] (% "Yes")



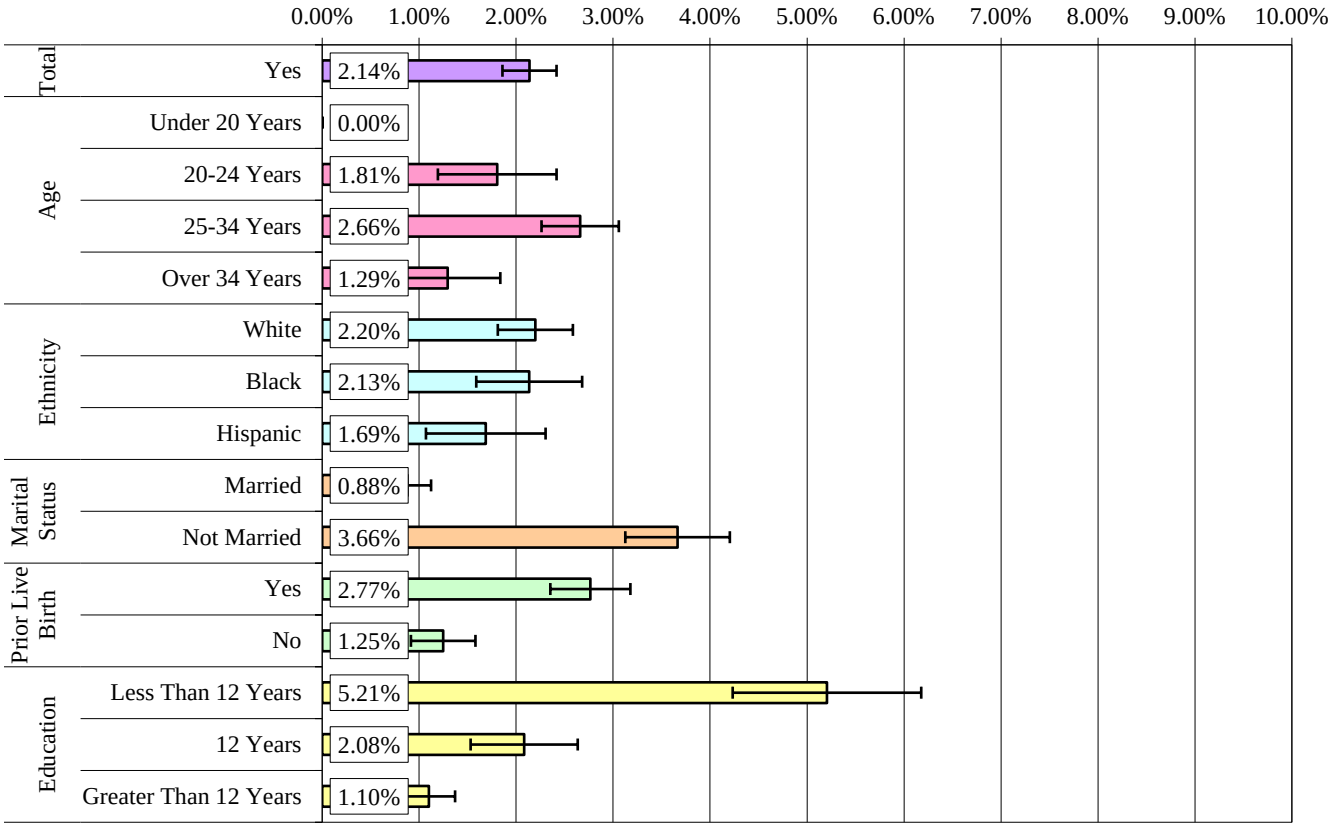
Appendix AQ25J: During any of your prenatal care visits, did a doctor, nurse, or other health care worker ask you if you planned to use birth control after your baby was born?[***] [RAW] (% "Yes")



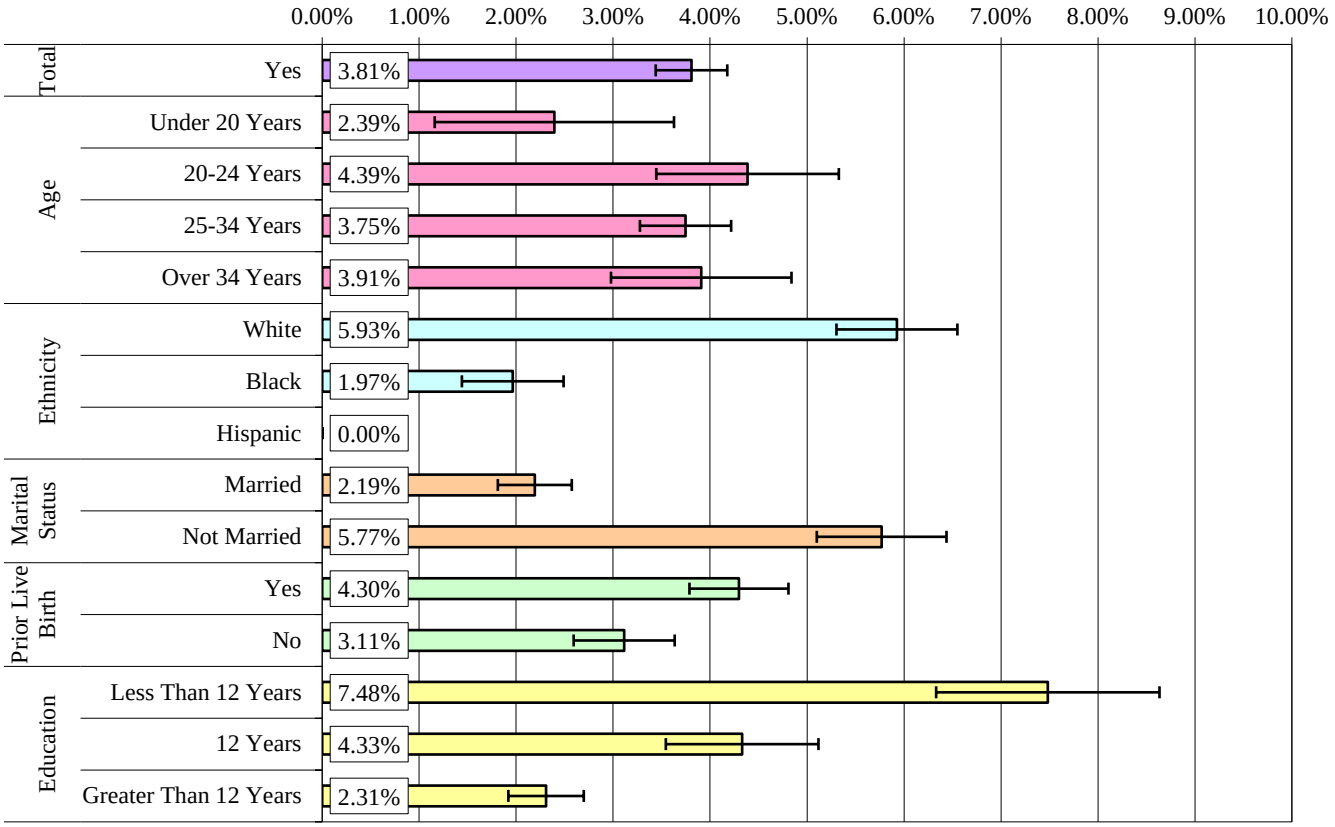
Appendix AQ36: In the 3 months before you got pregnant, did you smoke 11 or more cigarettes on average each day?[***] [RAW] (% "Yes")



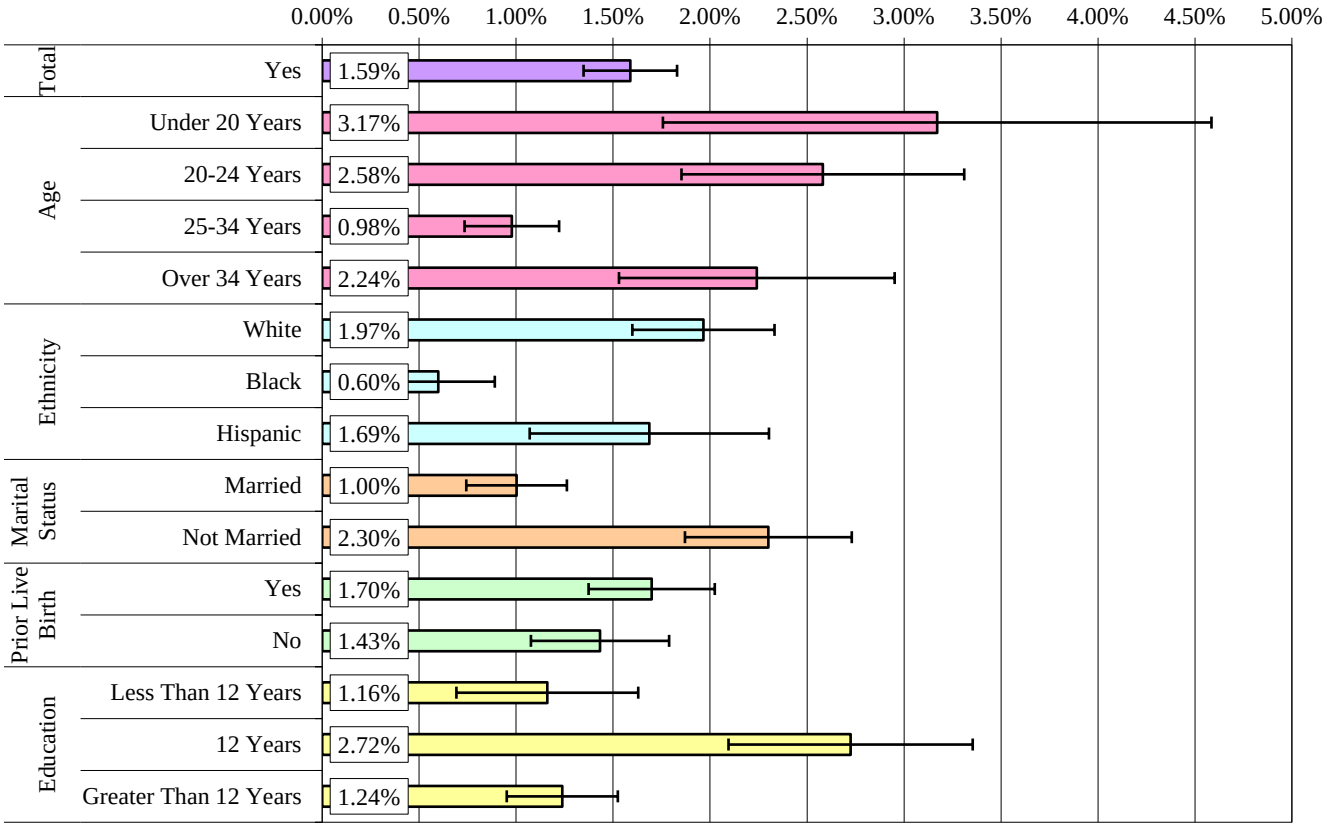
Appendix AQ37: In the last 3 months of your pregnancy, did you smoke one or more cigarettes on average each day?[***] [RAW] (% "Yes")



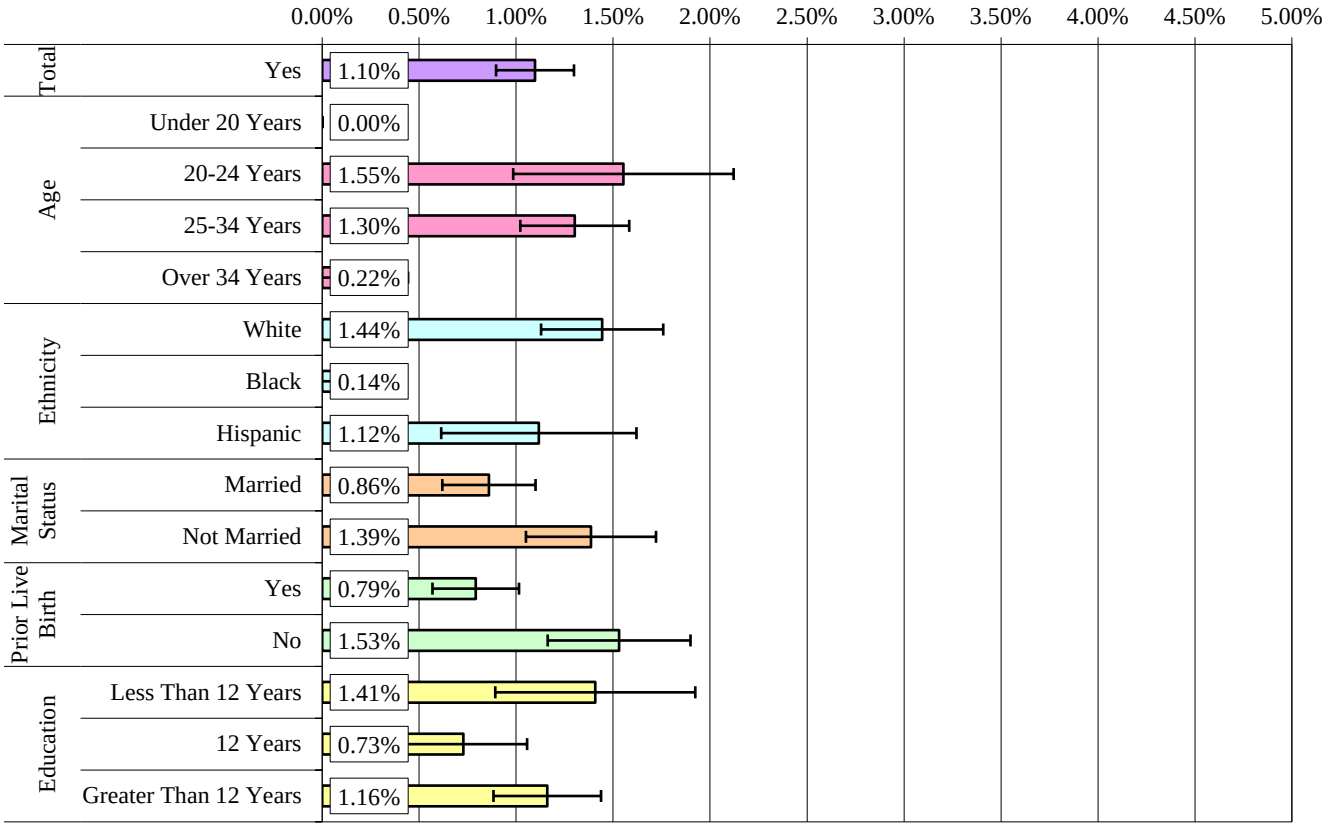
Appendix AQ38: Do you currently smoke 11 or more cigarettes on average each day?[***] [RAW] (% "Yes")



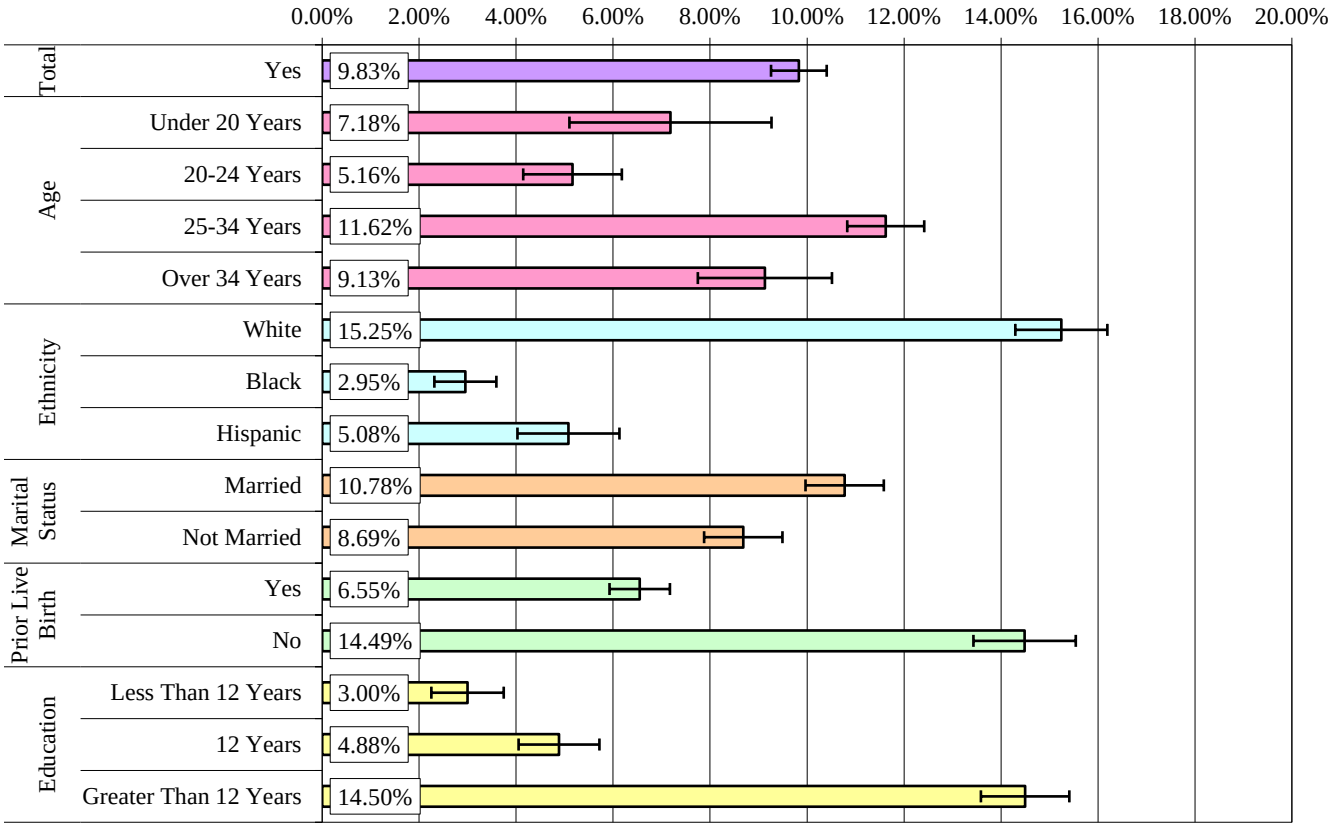
Appendix AQ41: During the 3 months before you got pregnant, on average, did you use e-cigarettes or other electronic nicotine products at least once a day or more?[***] [RAW] (% "Yes")



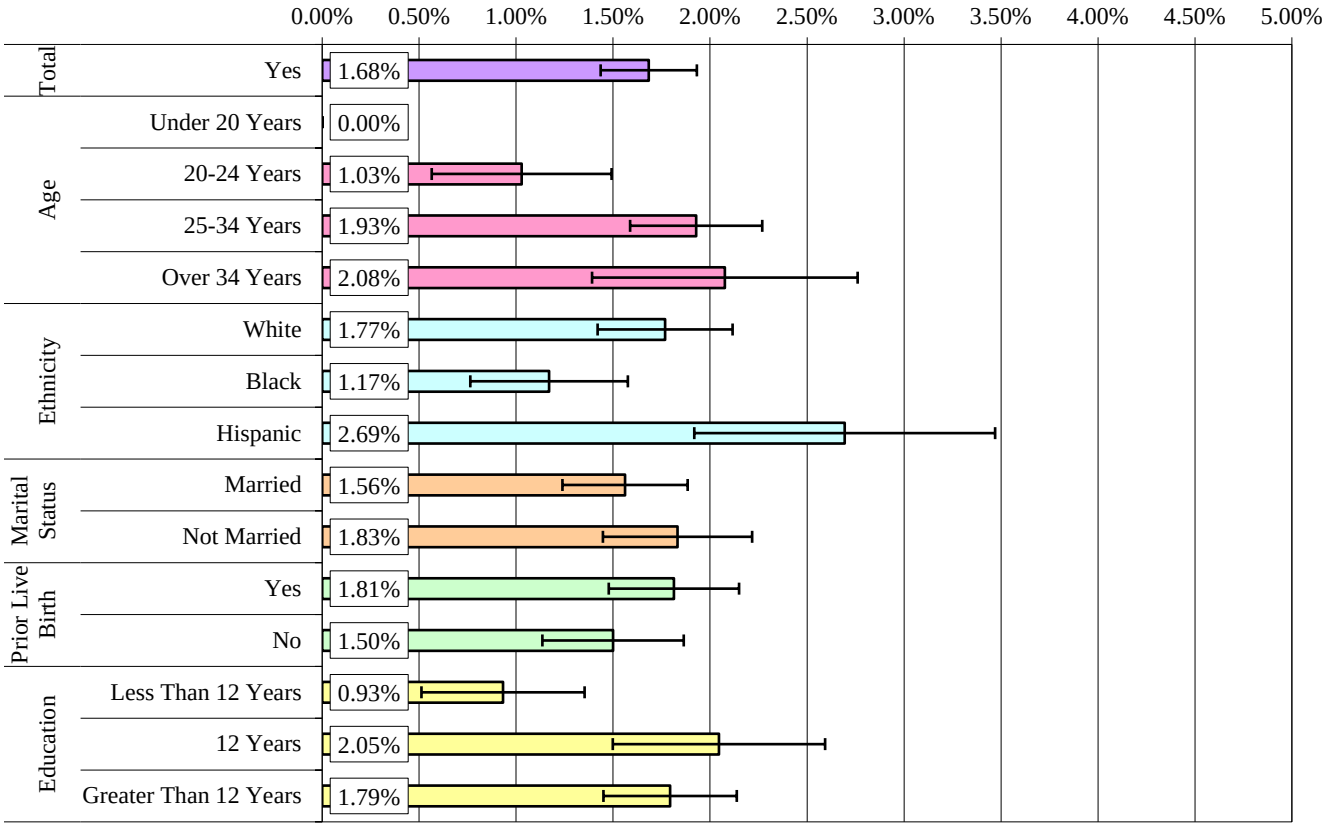
Appendix AQ42: During the last 3 months of your pregnancy, on average, did you use e-cigarettes or other electronic nicotine products at least once a day or more?[***] [RAW] (% "Yes")



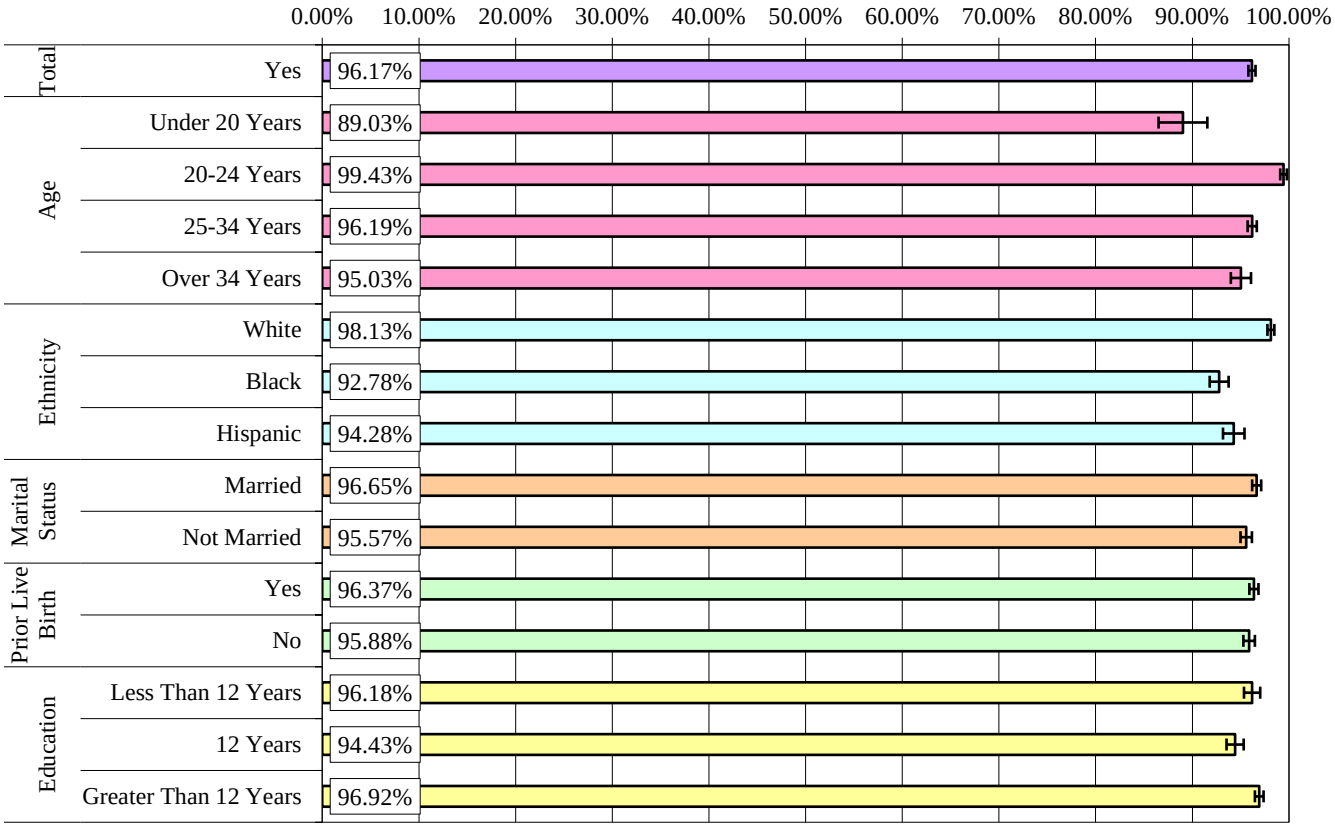
Appendix AQ44: During the 3 months before you got pregnant, did you have four or more drinks on average per week?[***] [RAW] (% "Yes")



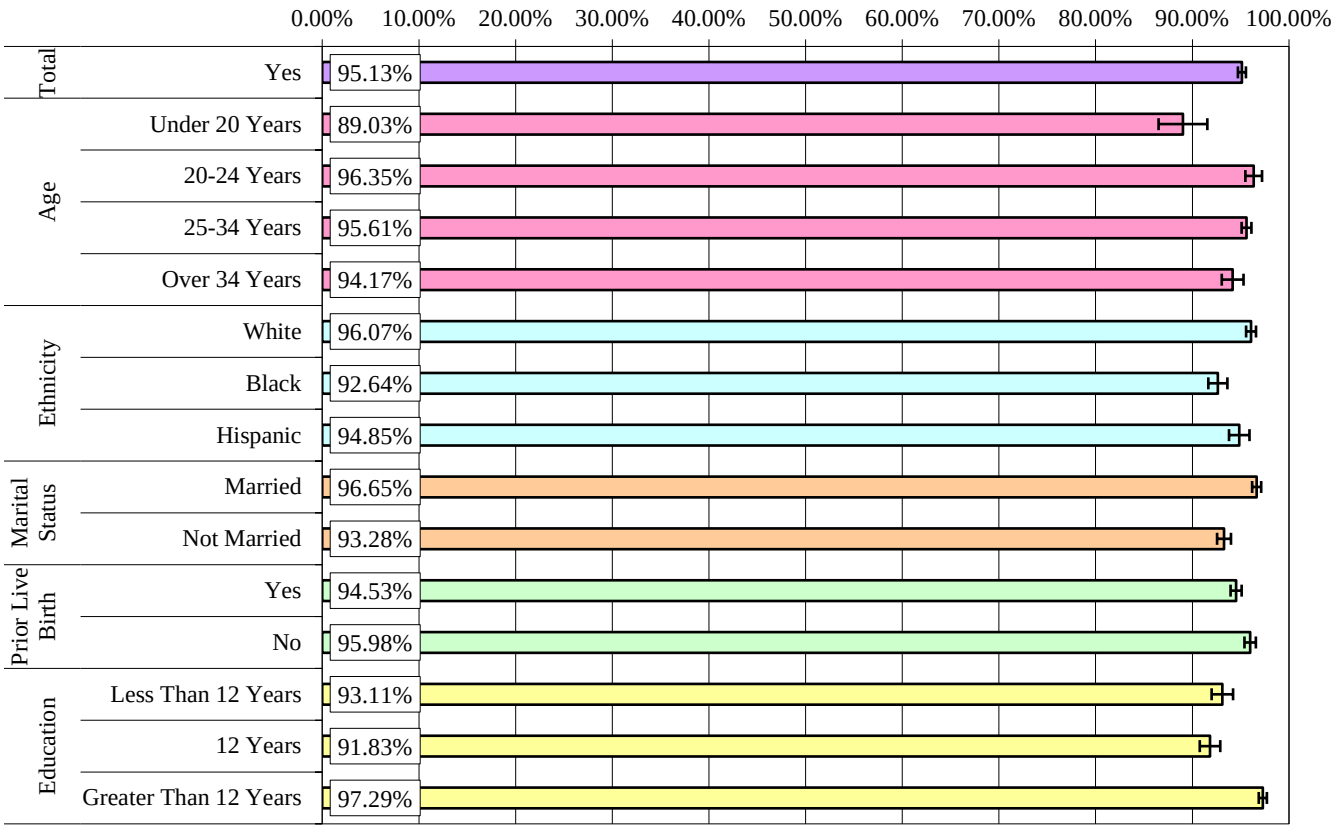
Appendix AQ45: During the last 3 months of your pregnancy, did you have one or more drinks on average per week?[***] [RAW] (% "Yes")



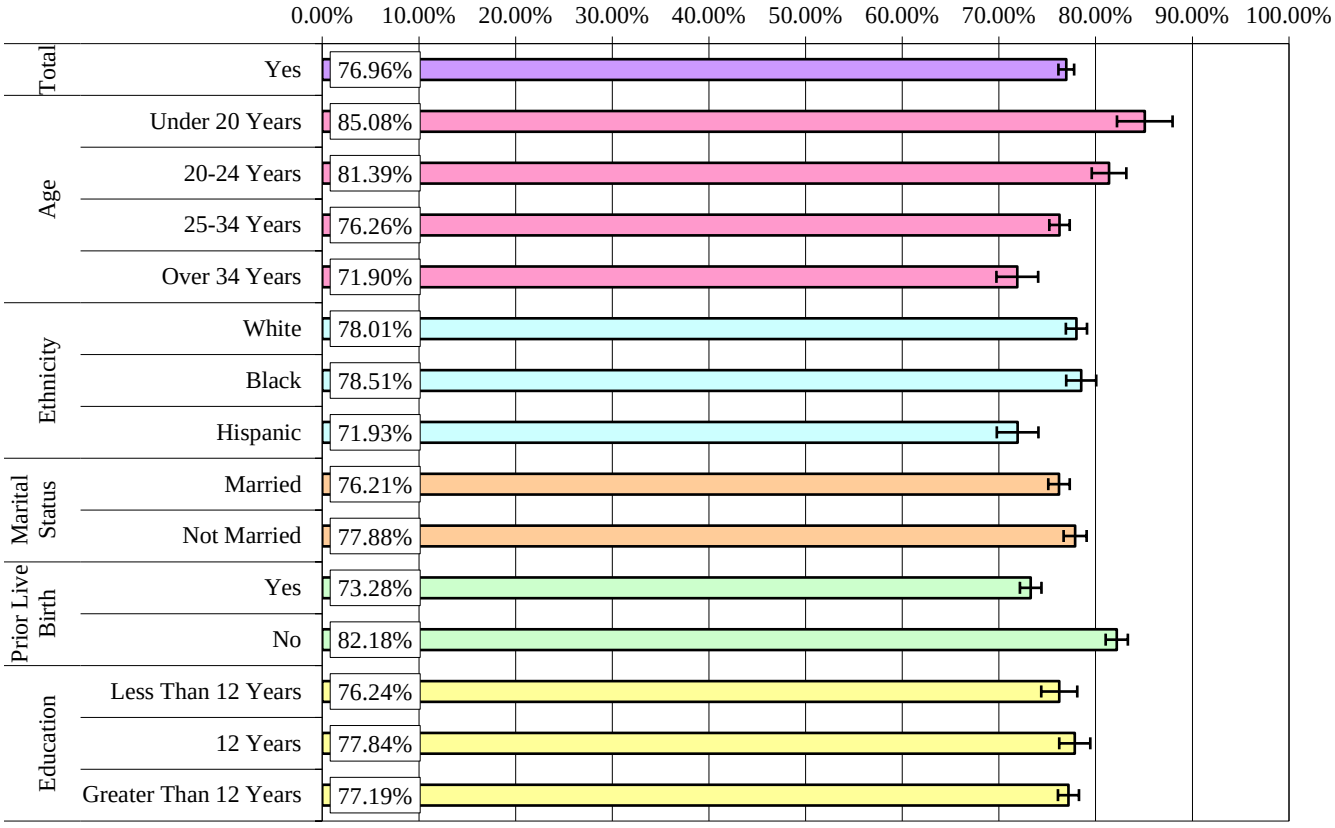
Appendix AQ53: Is your baby alive now?[***] [RAW] (% "Yes")



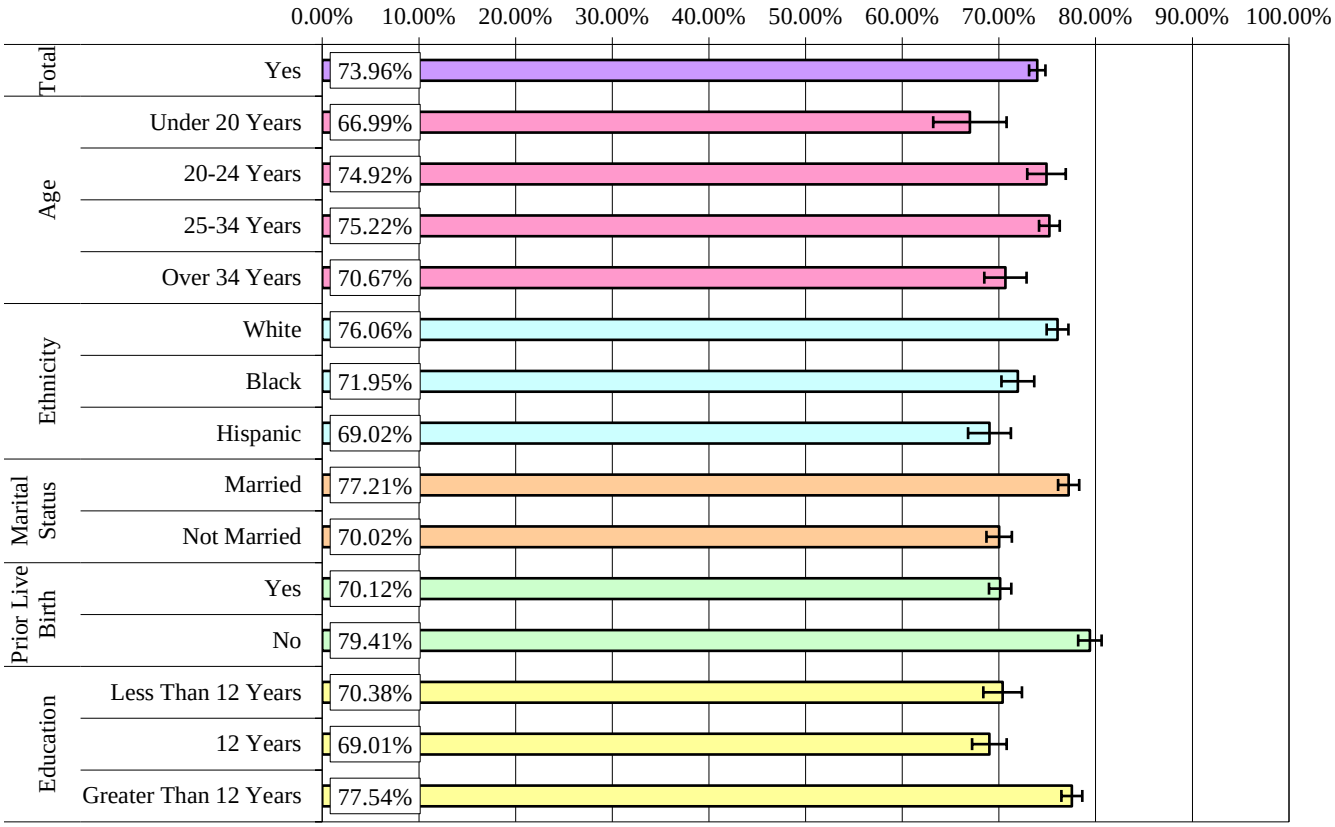
Appendix AQ54: Is your baby living with you now?[***] [RAW] (% "Yes")



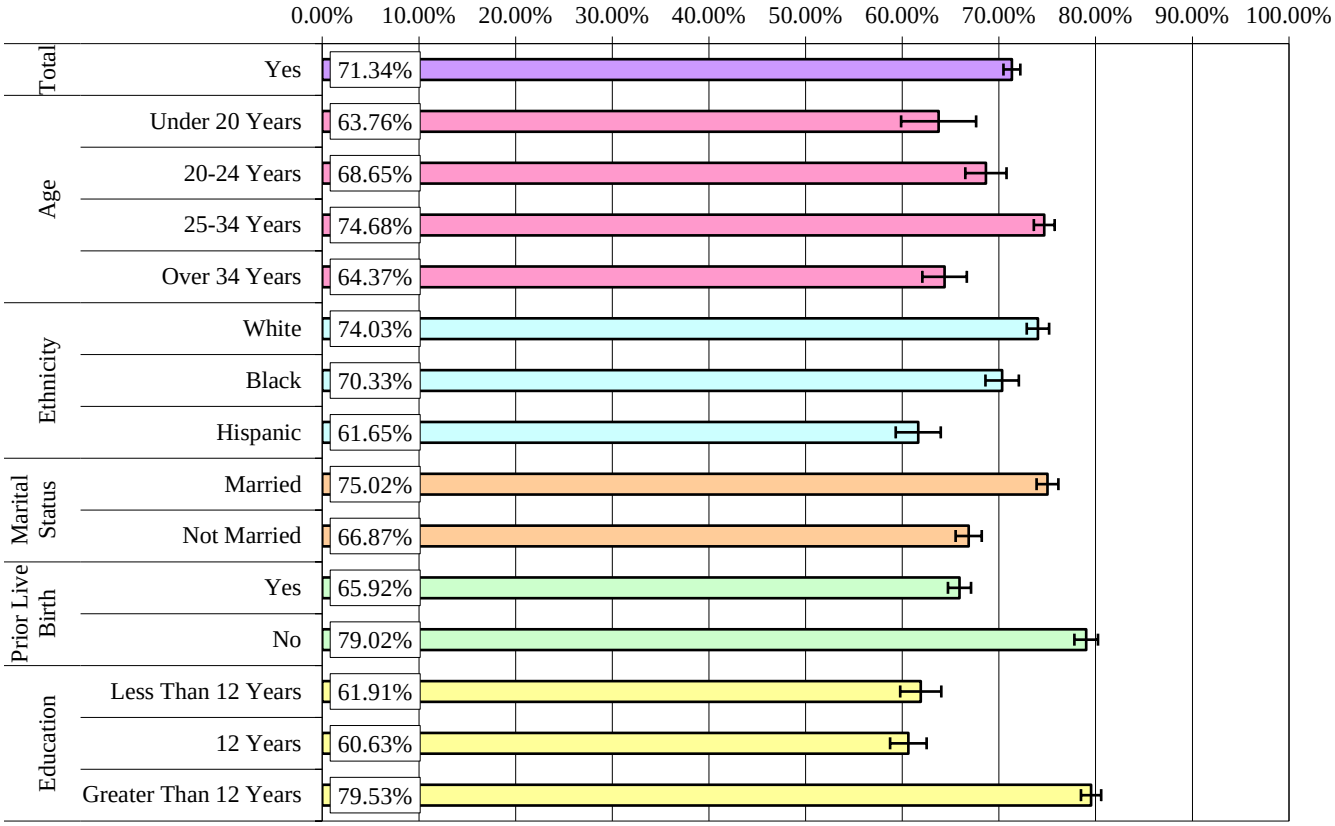
Appendix AQ55A: Before or after your new baby was born, did you receive information about breastfeeding from your doctor?[***] [RAW] (% "Yes")



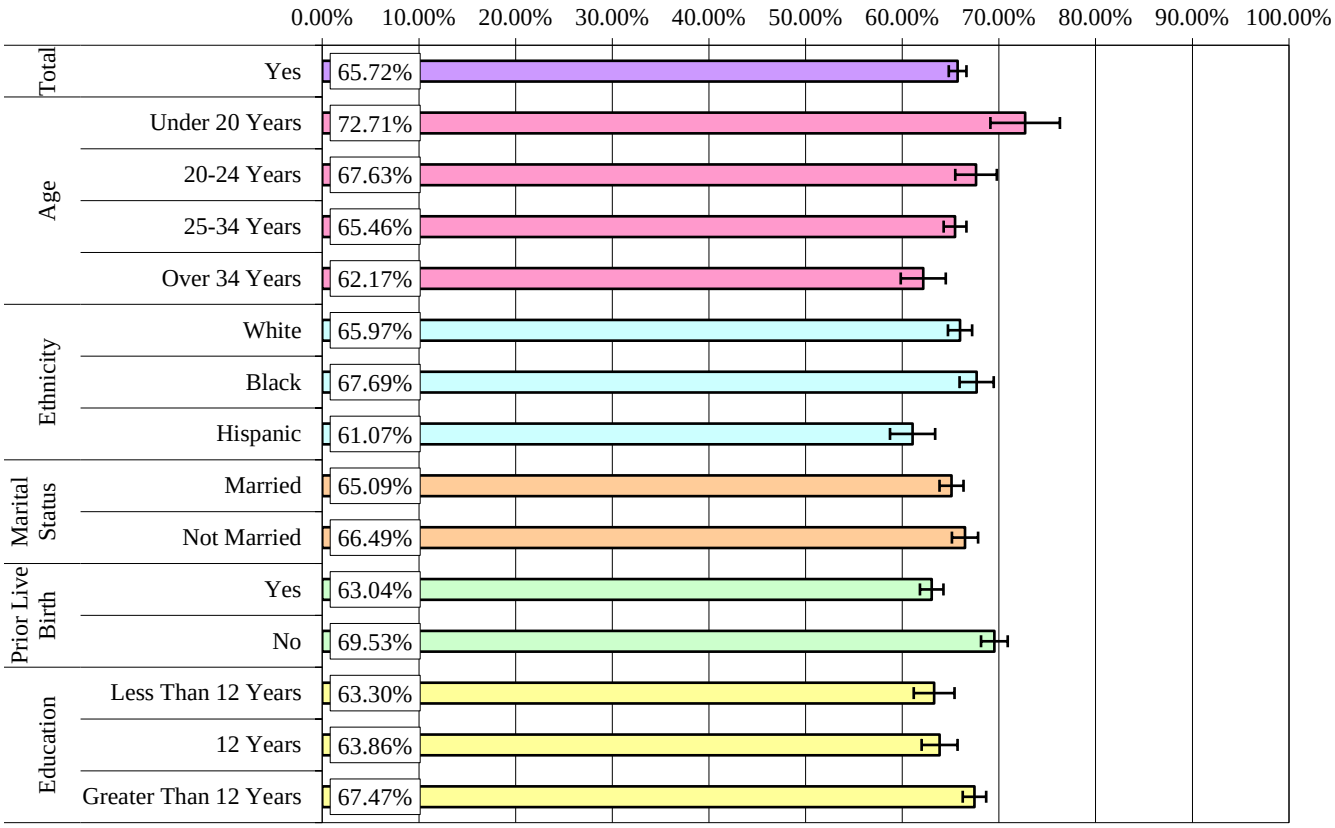
Appendix AQ55B: Before or after your new baby was born, did you receive information about breastfeeding from a nurse, midwife, or doula?[***] [RAW] (% "Yes")



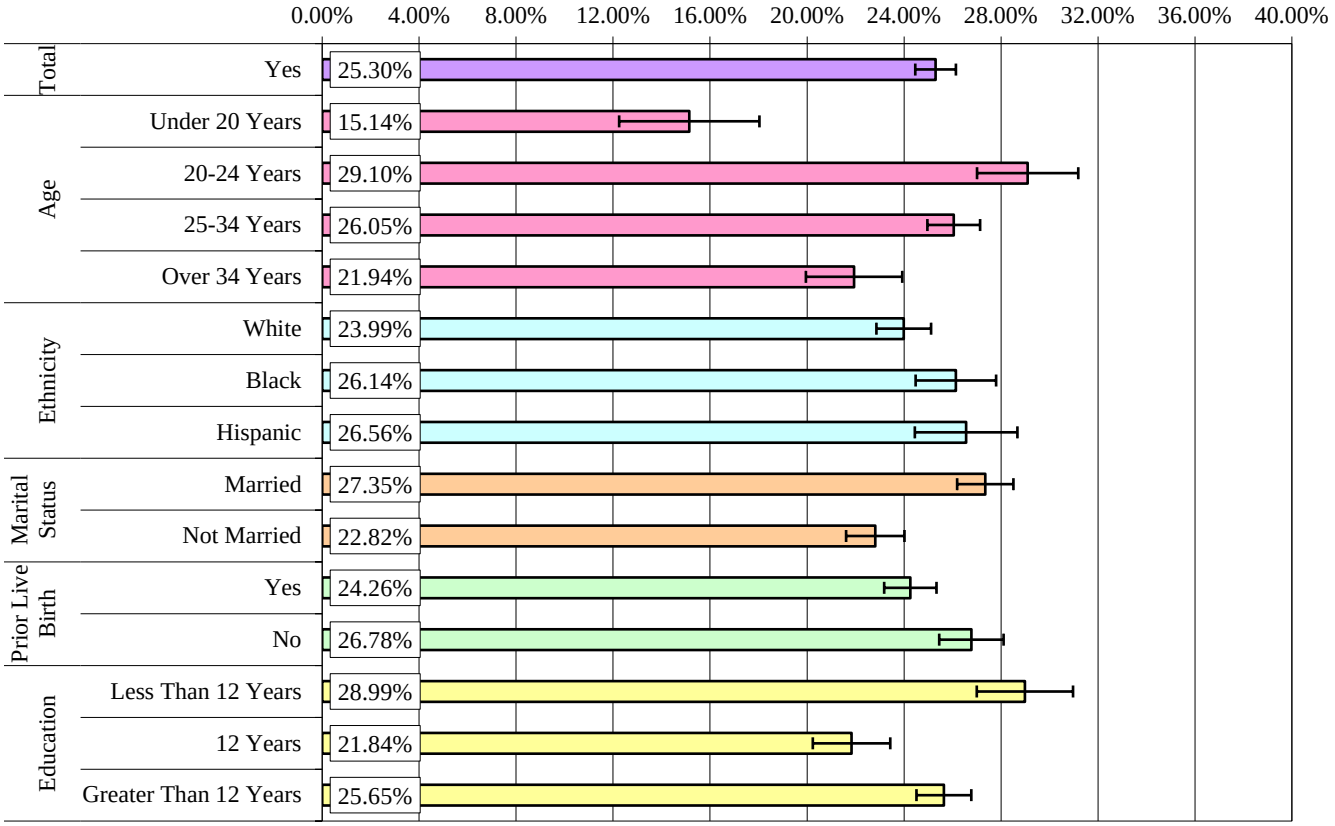
Appendix AQ55C: Before or after your new baby was born, did you receive information about breastfeeding from a breastfeeding or lactation specialist?[***] [RAW] (% "Yes")



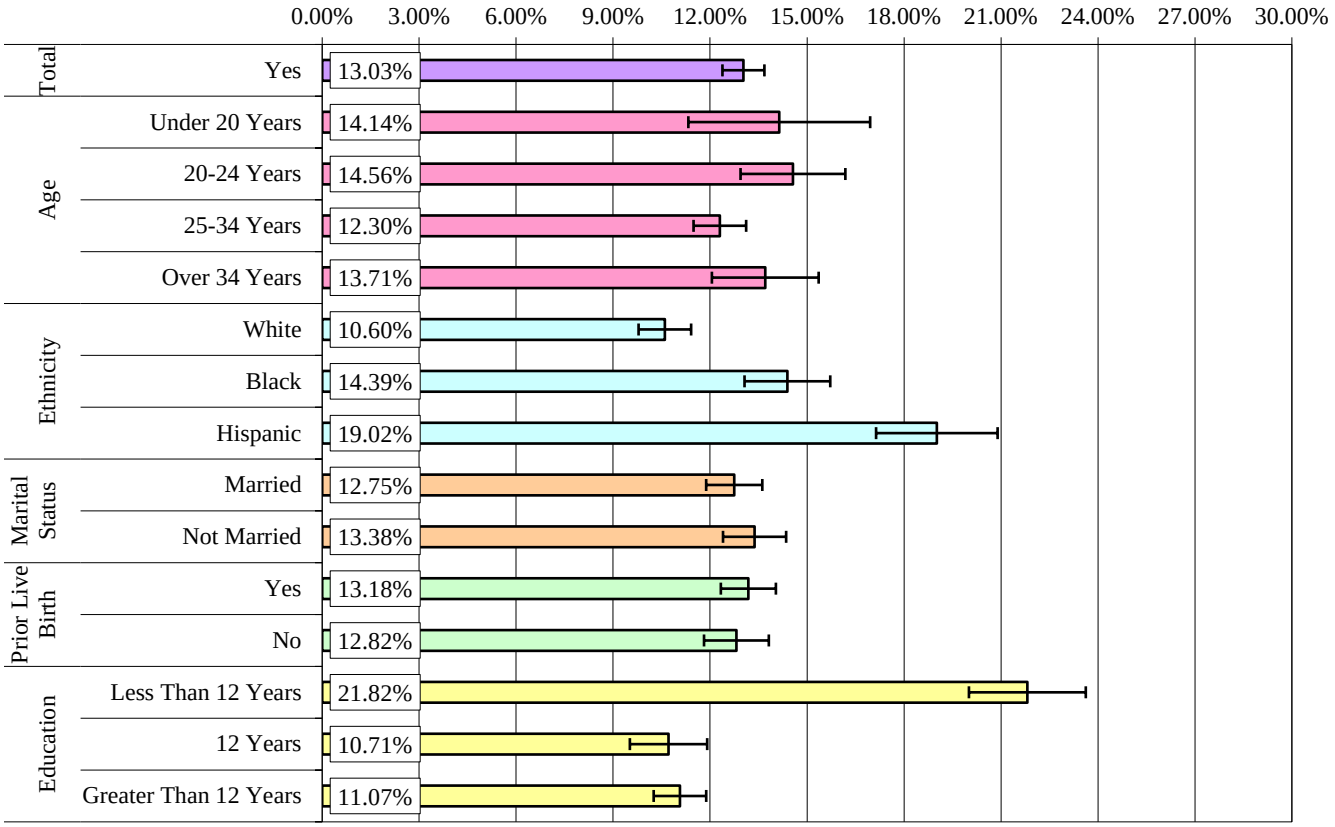
Appendix AQ55D: Before or after your new baby was born, did you receive information about breastfeeding from your baby's doctor or health care provider?[***] [RAW] (% "Yes")



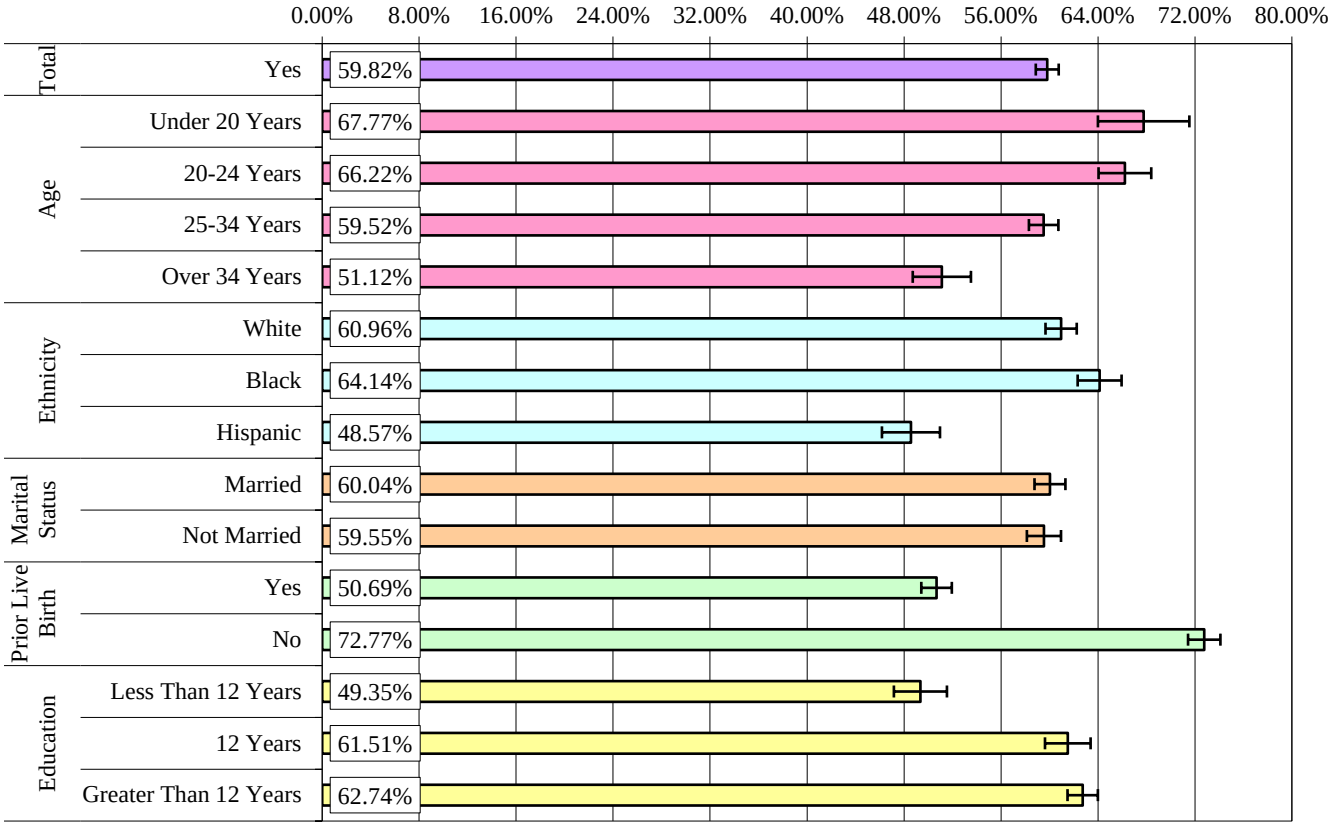
Appendix AQ55E: Before or after your new baby was born, did you receive information about breastfeeding from a breastfeeding support group? [RAW] (% "Yes")



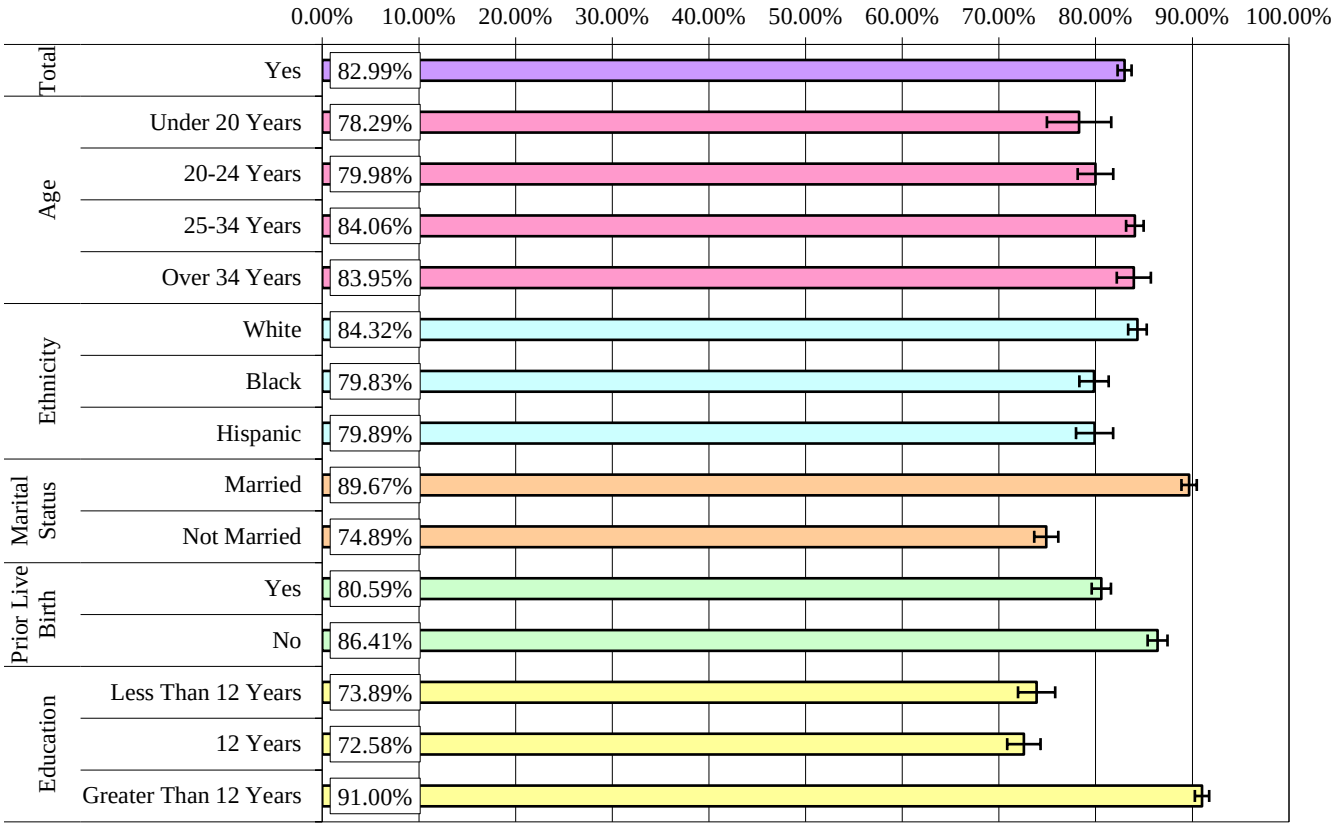
Appendix AQ55F: Before or after your new baby was born, did you receive information about breastfeeding from a breastfeeding hotline or toll-free number? [RAW] (% "Yes")



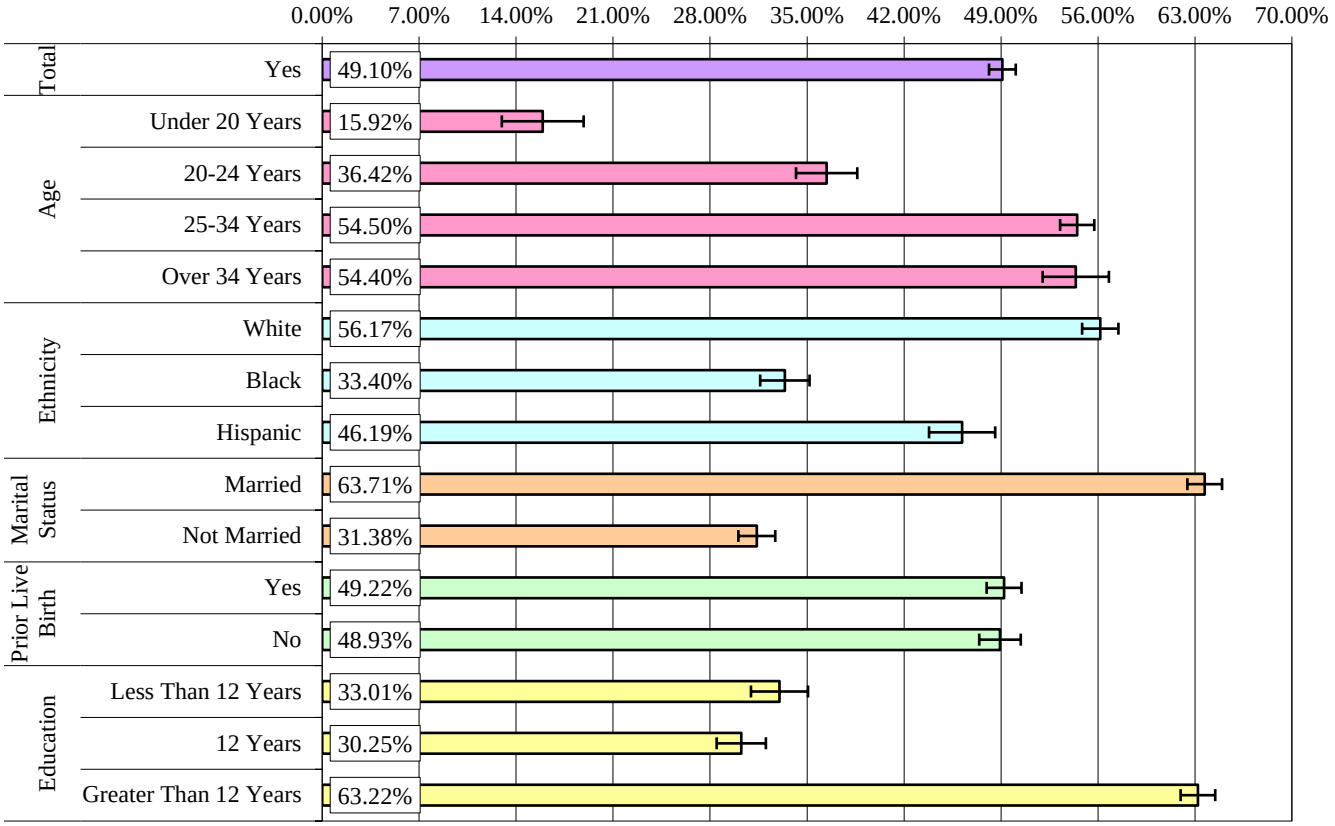
Appendix AQ55G: Before or after your new baby was born, did you receive information about breastfeeding from family or friends?[***] [RAW] (% "Yes")



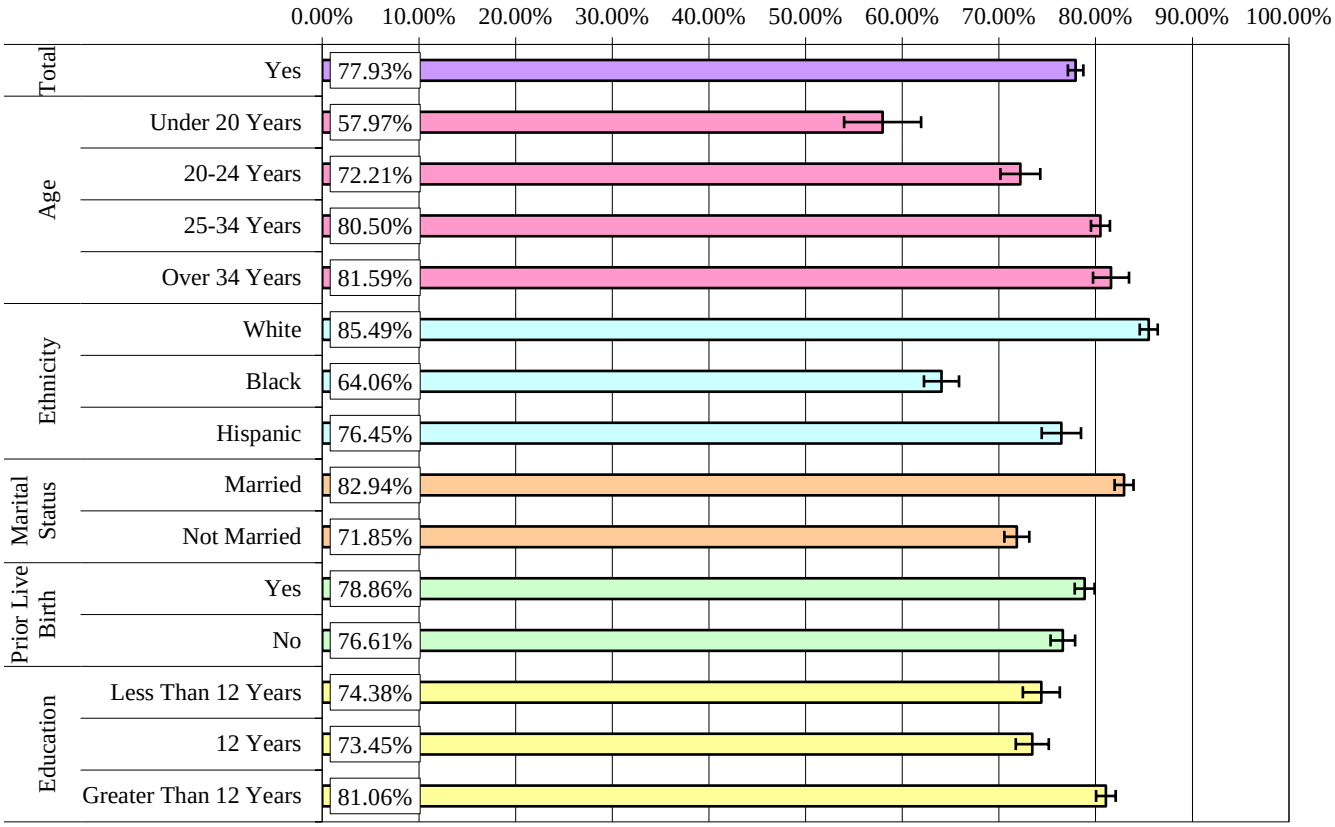
Appendix AQ56: Did you ever breastfeed or pump breast milk to feed your new baby, even for a short period of time?[***] [RAW] (% "Yes")



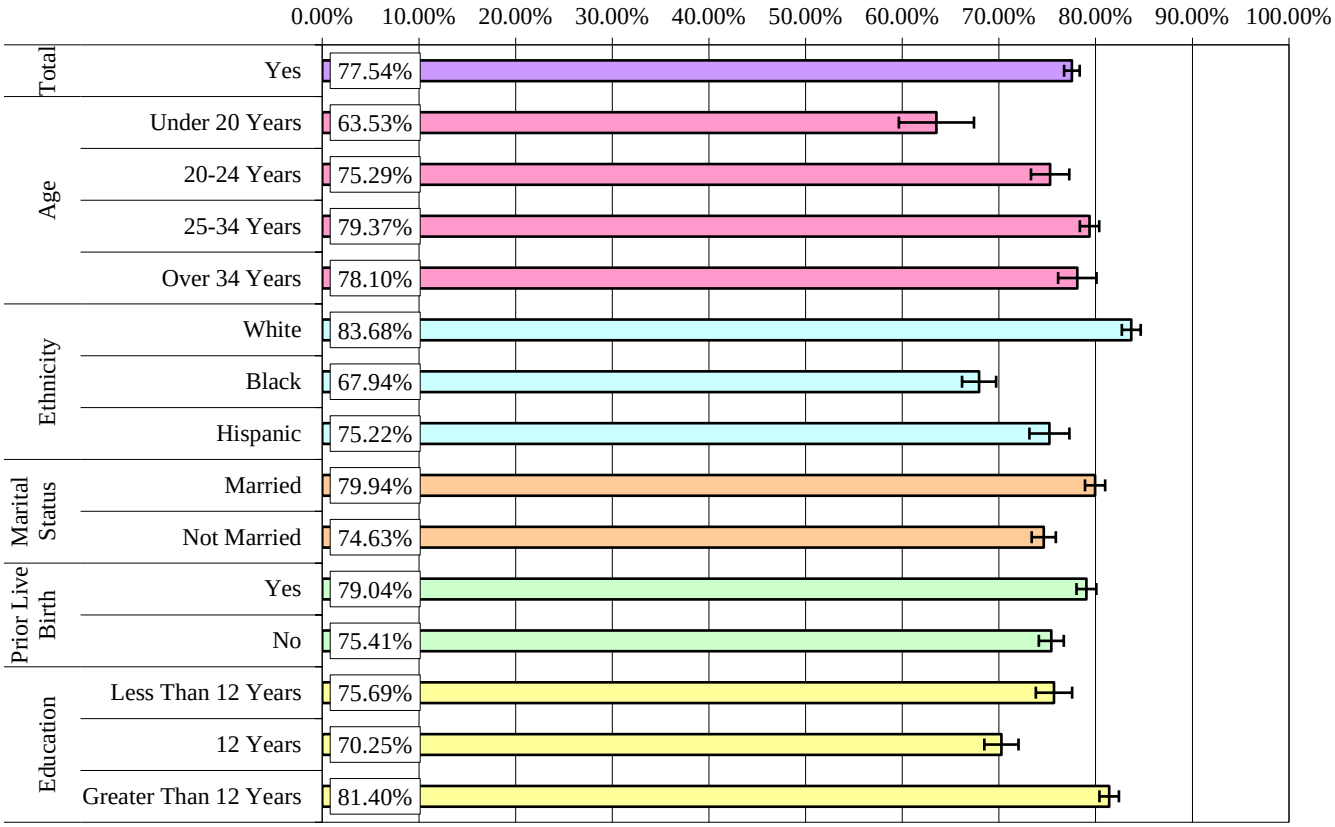
Appendix AQ57: Are you currently breastfeeding or feeding pumped milk to your new baby?[***] [RAW] (% "Yes")



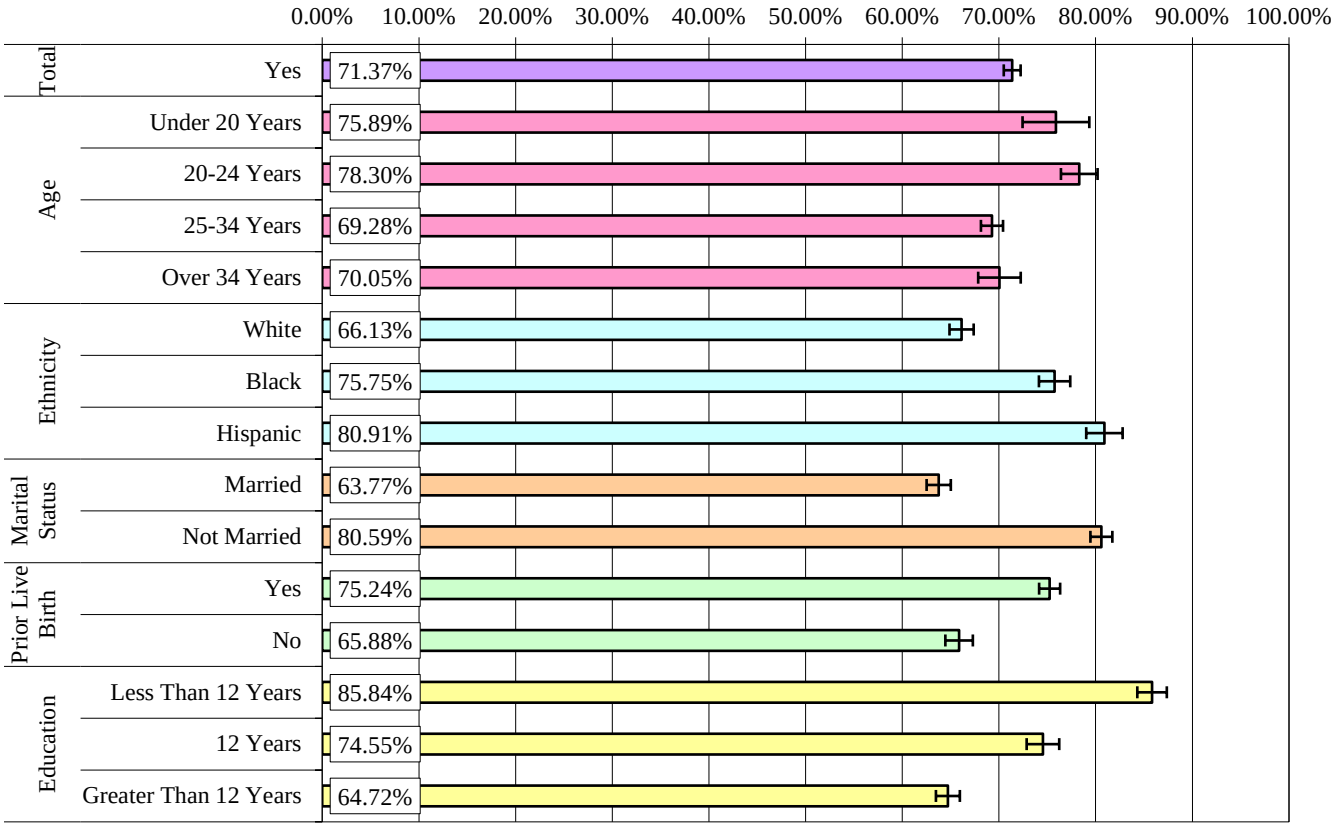
Appendix AQ59: Do you most often lay your baby down on his or her back when he or she sleeps now?[***] [RAW] (% "Yes")



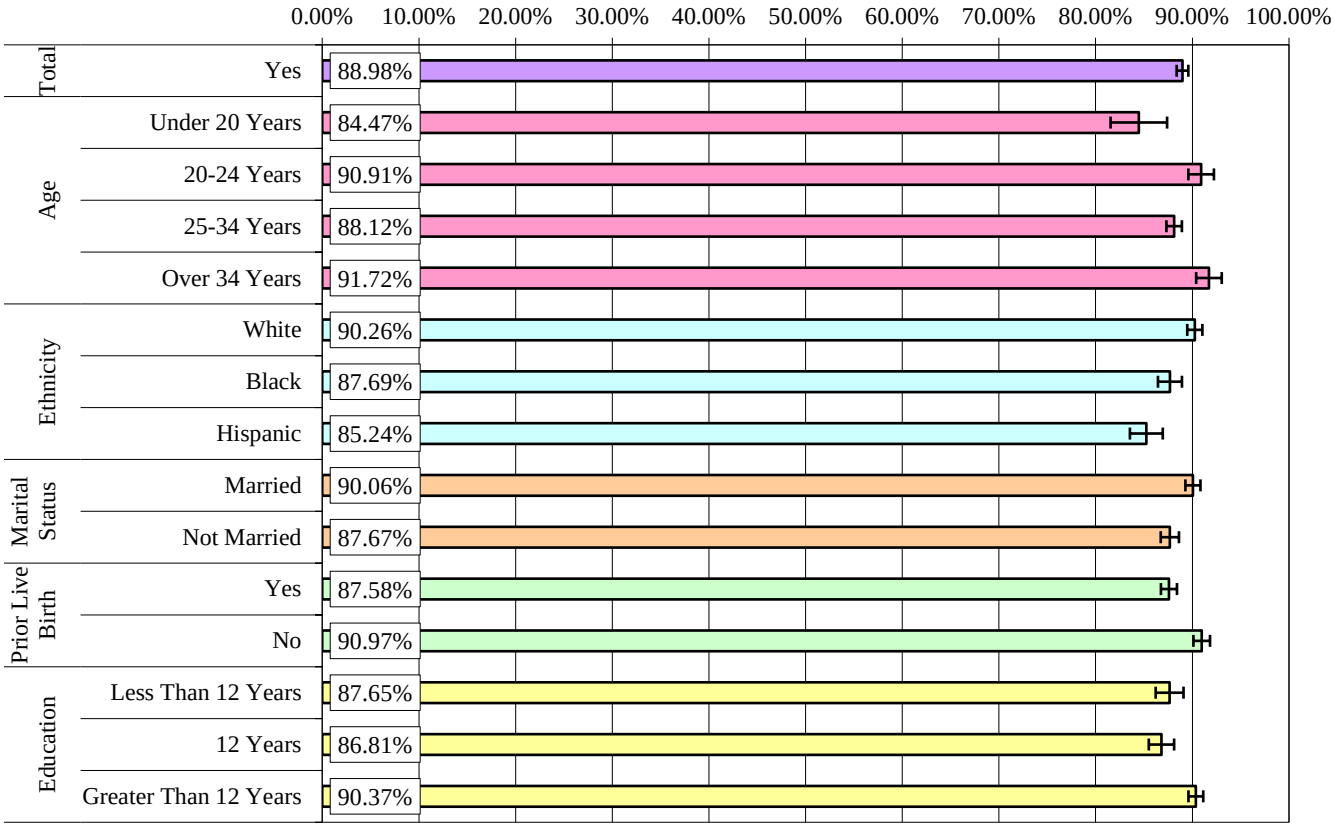
Appendix AQ60: Does your baby always or often sleep alone in his or her own crib or bed?[***] [RAW] (% "Yes")



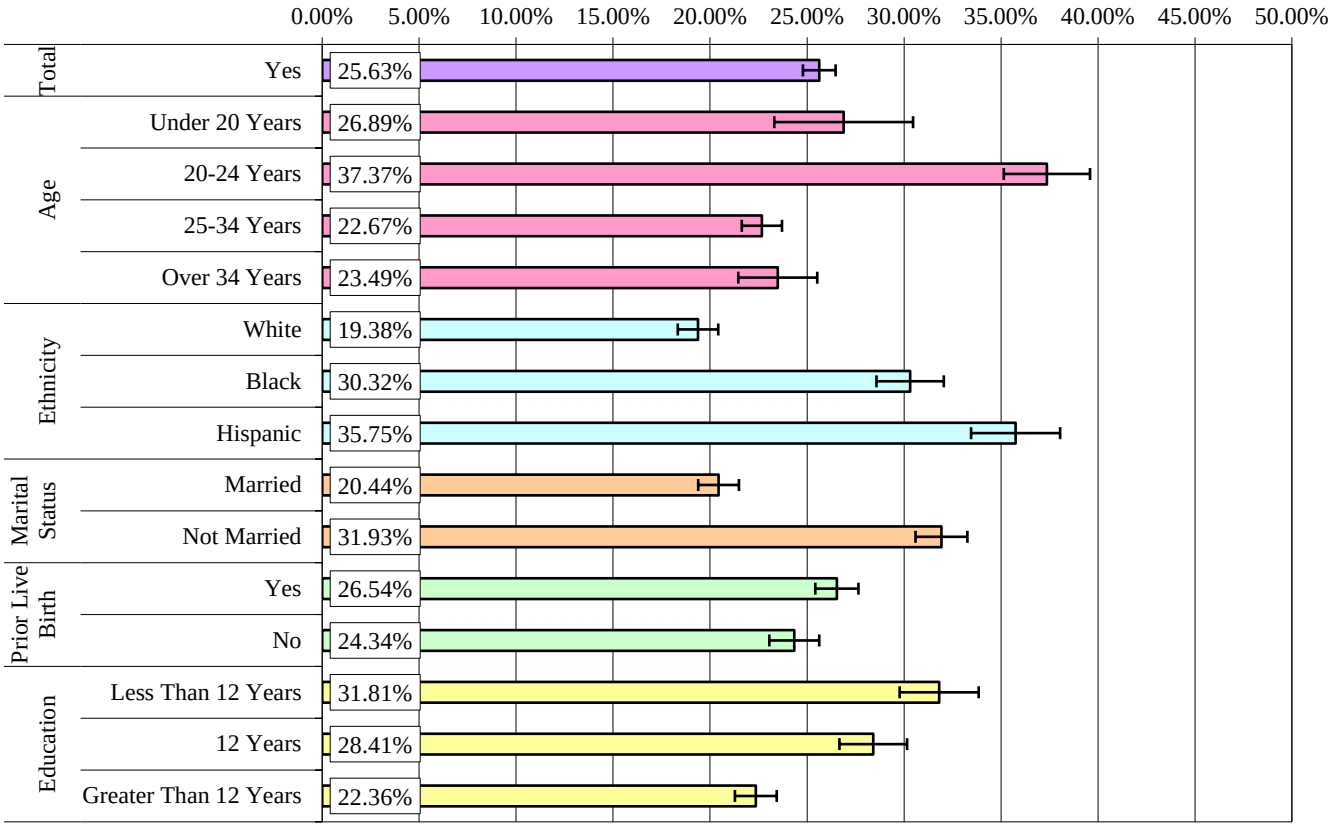
Appendix AQ61: When your new baby sleeps alone, is his or her crib or bed in the same room where you sleep?[***] [RAW] (% "Yes")



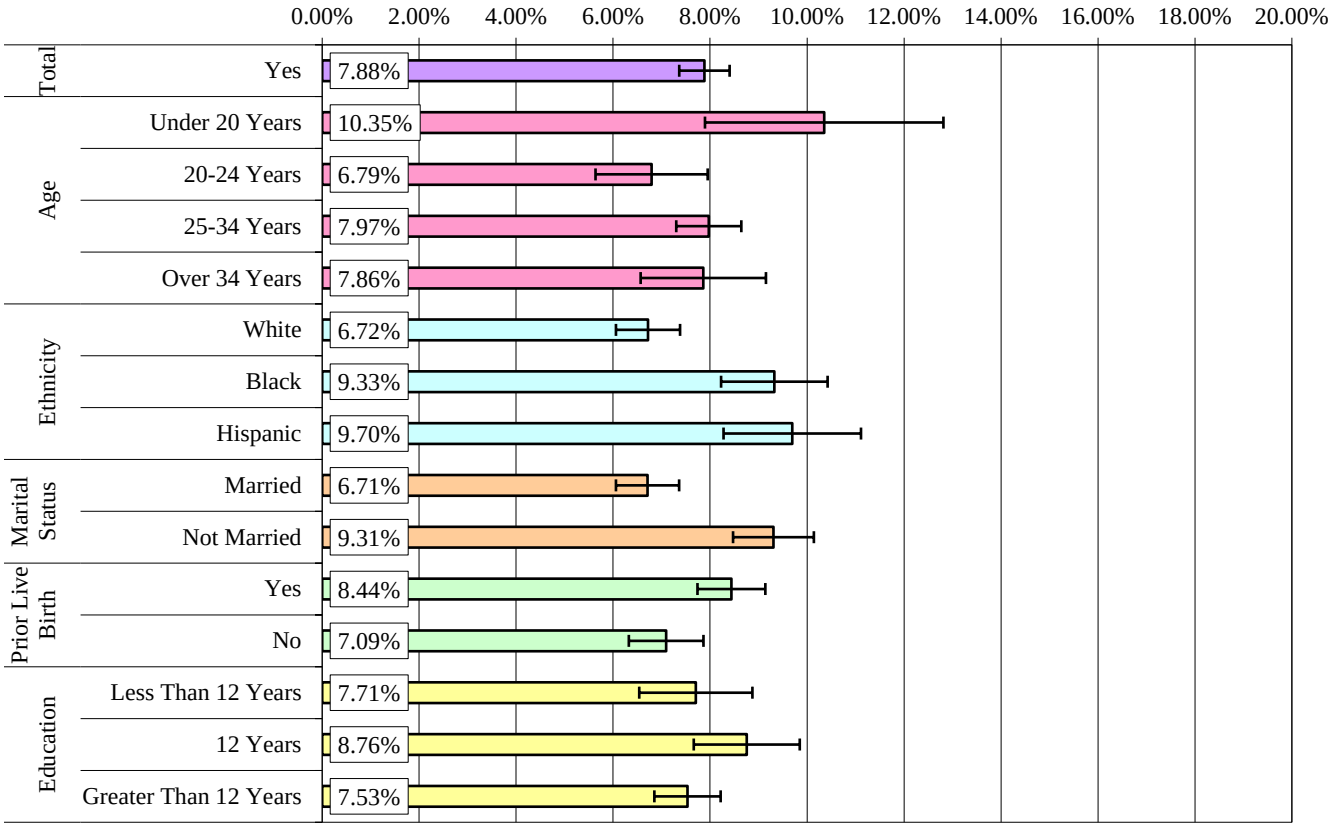
Appendix AQ62A: In the past 2 weeks, did your new baby usually sleep in a crib, bassinet, or pack and play?[***] [RAW] (% "Yes")



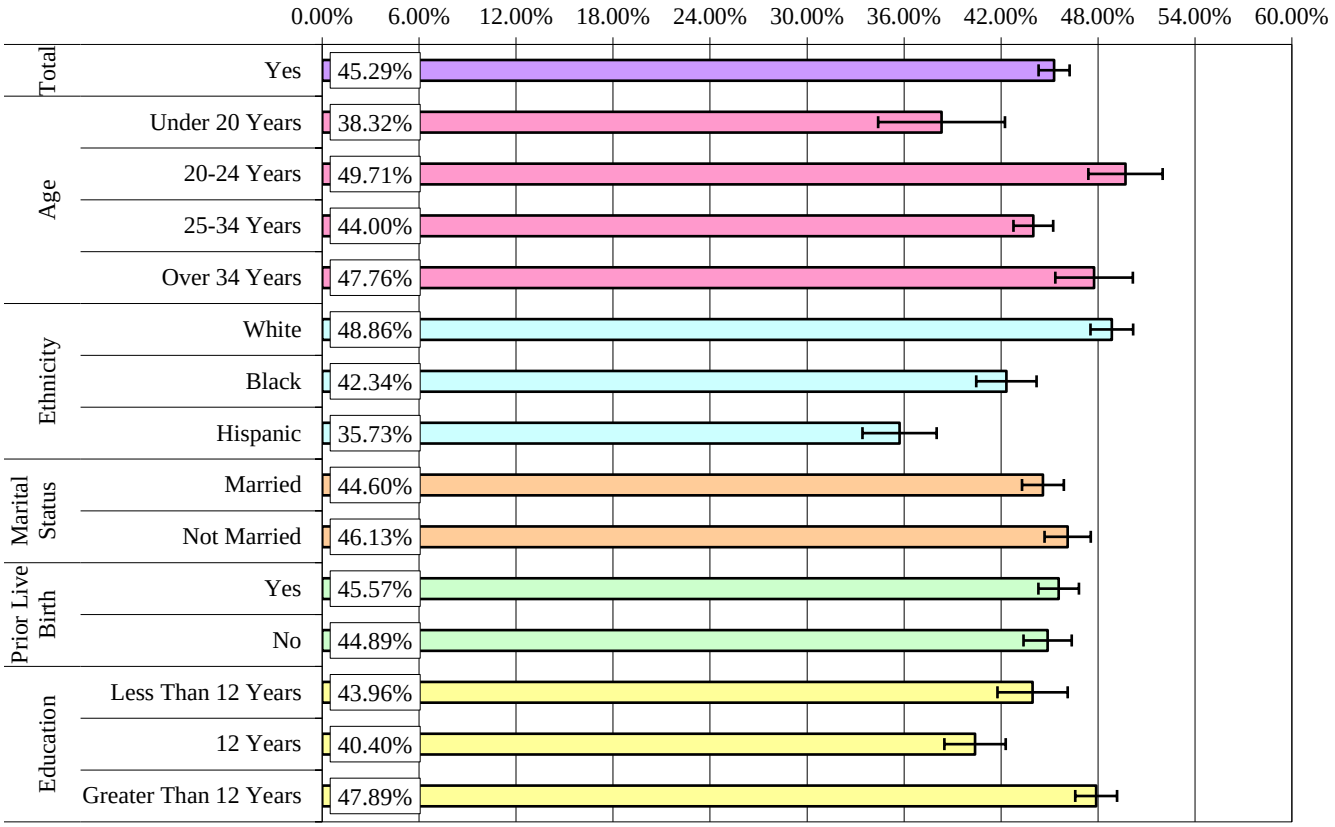
Appendix AQ62B: In the past 2 weeks, did your new baby usually sleep on a twin or larger mattress or bed?[***] [RAW] (% "Yes")



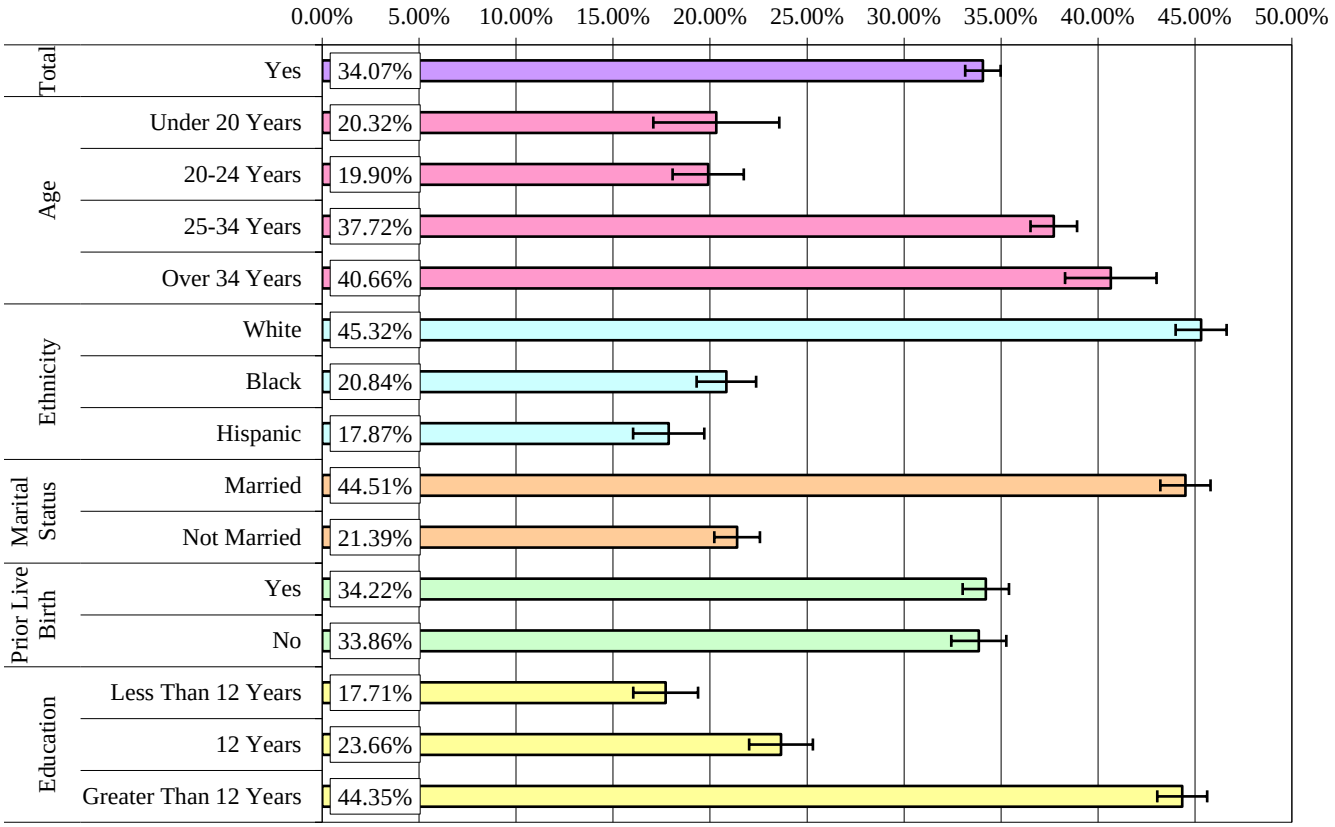
Appendix AQ62C: In the past 2 weeks, did your new baby usually sleep on a couch, sofa, or armchair? [RAW] (% "Yes")



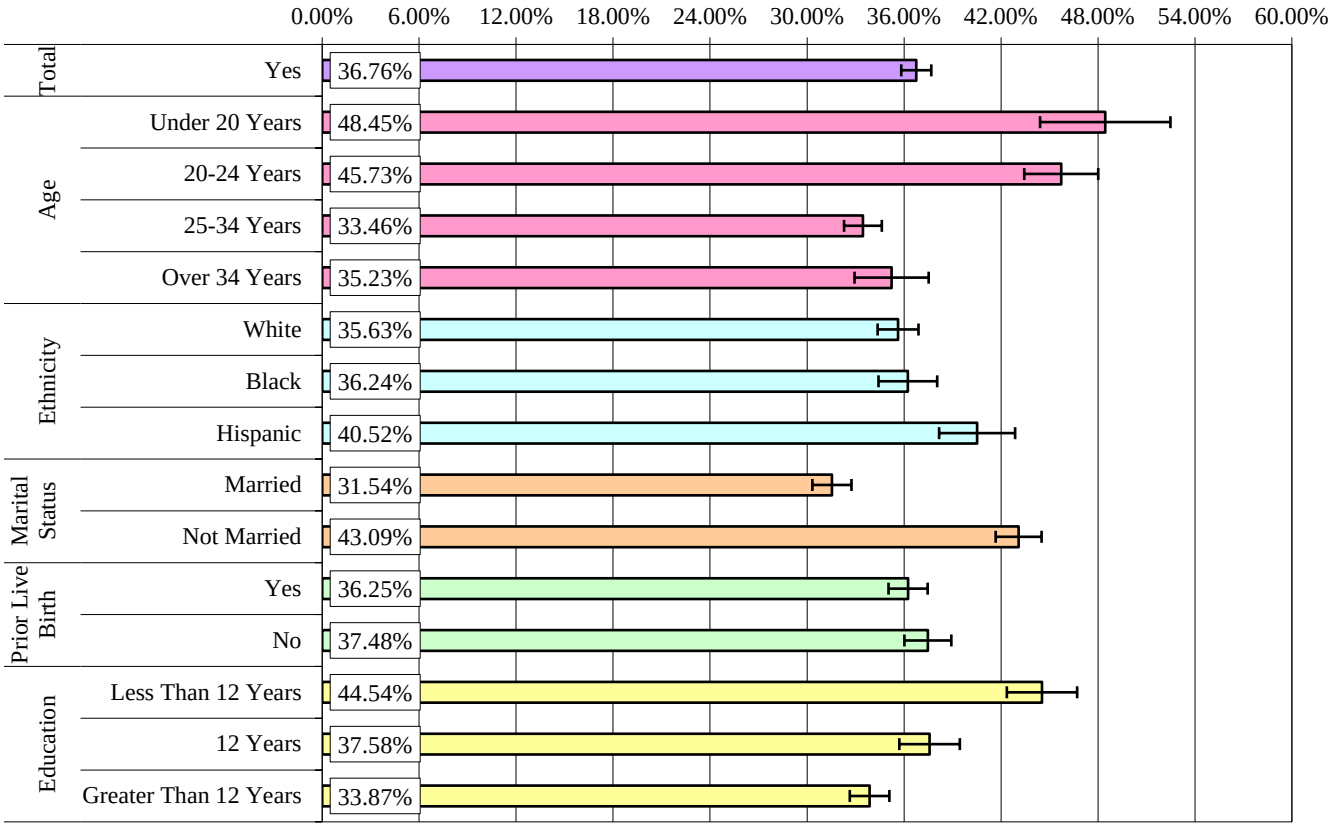
Appendix AQ62D: In the past 2 weeks, did your new baby usually sleep in an infant car seat or swing?[***] [RAW] (% "Yes")



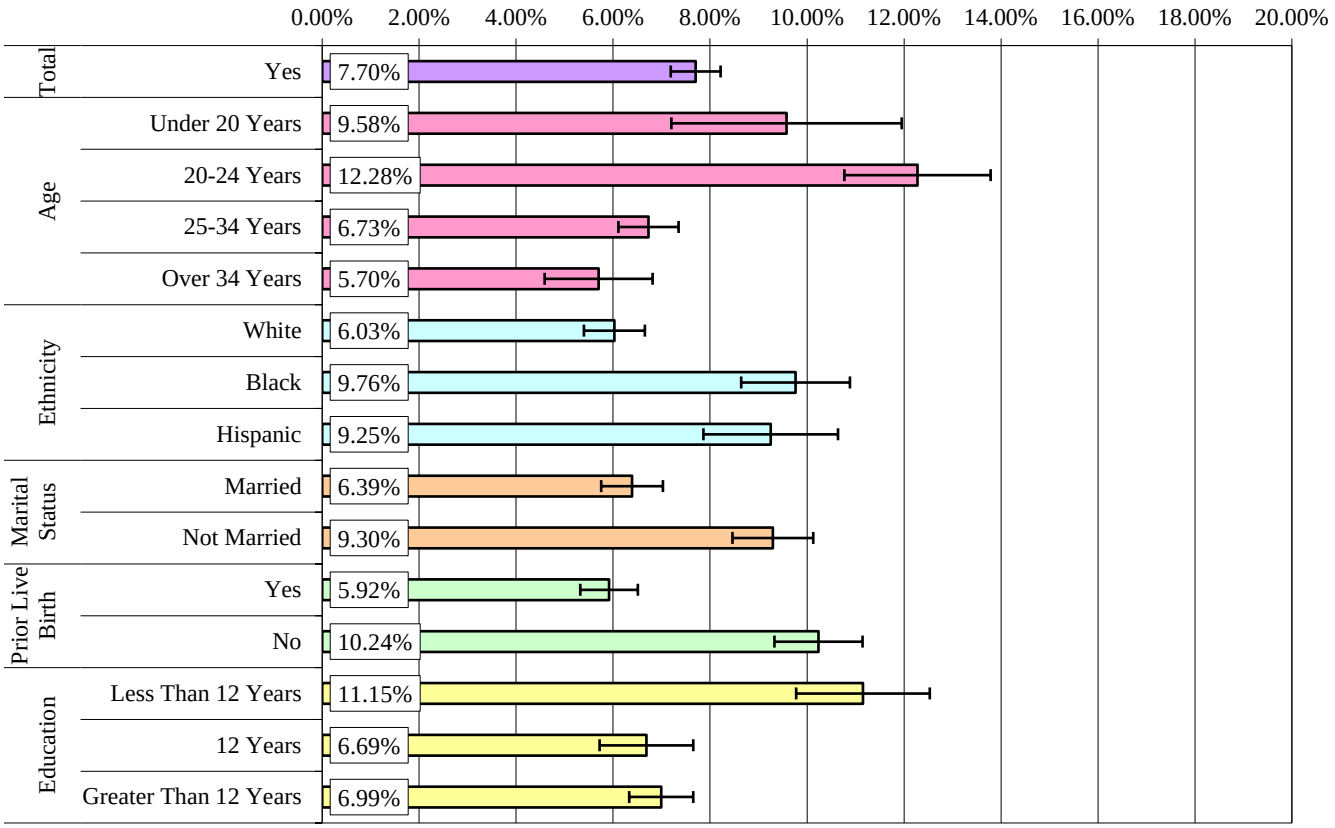
Appendix AQ62E: In the past 2 weeks, did your new baby usually sleep in a sleeping sack or wearable blanket? [RAW] (% "Yes")



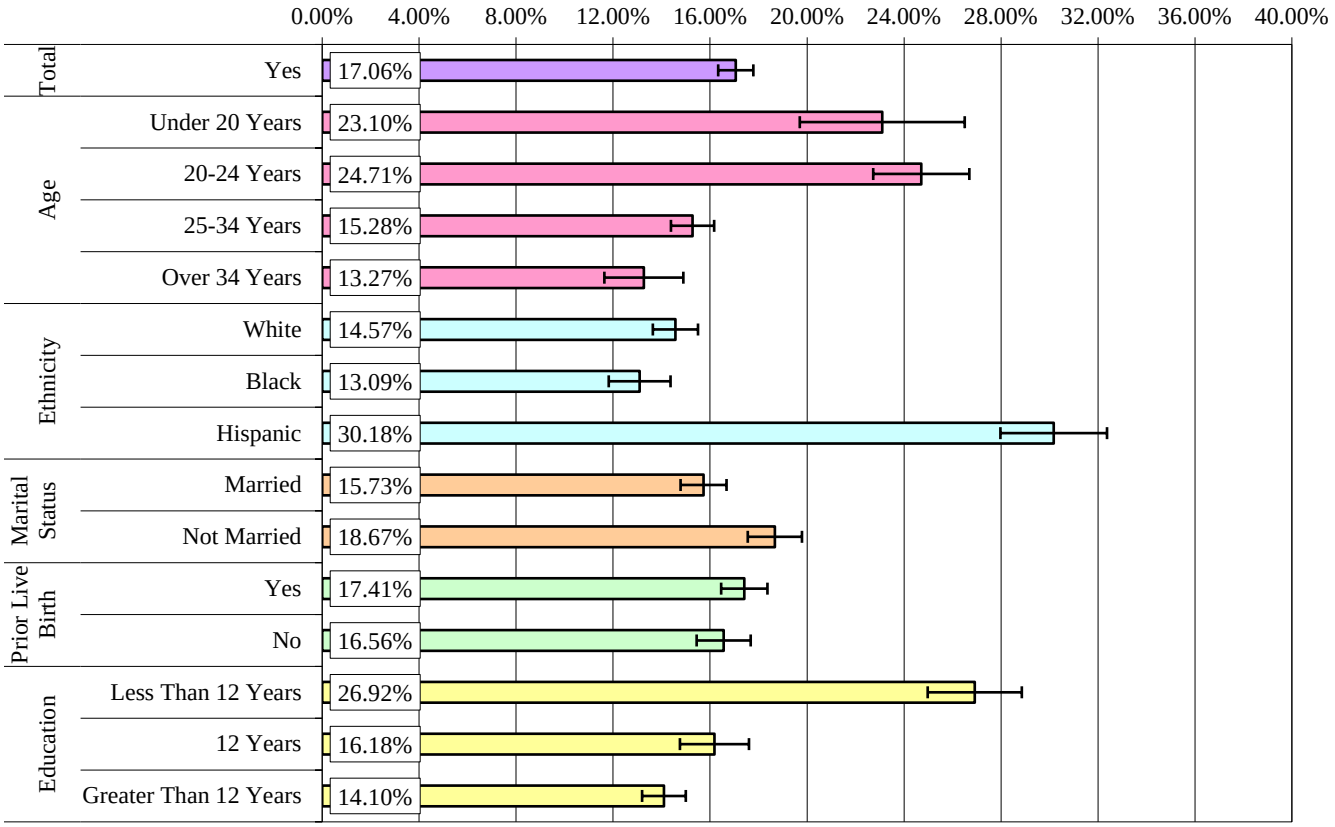
Appendix AQ62F: In the past 2 weeks, did your new baby usually sleep with a blanket?[***] [RAW] (% "Yes")



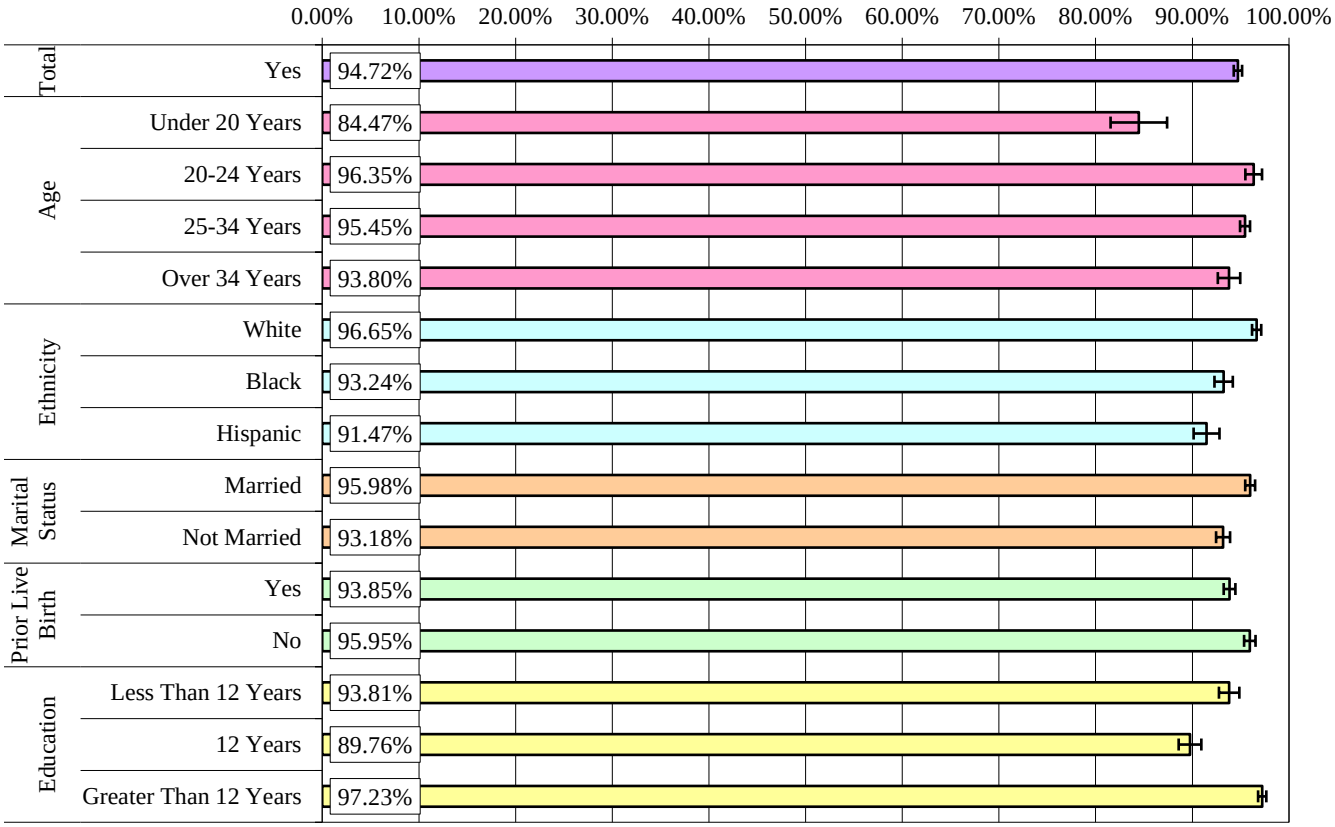
Appendix AQ62G: In the past 2 weeks, did your new baby usually sleep with toys, cushions, or pillows, including nursing pillows? [RAW] (% "Yes")



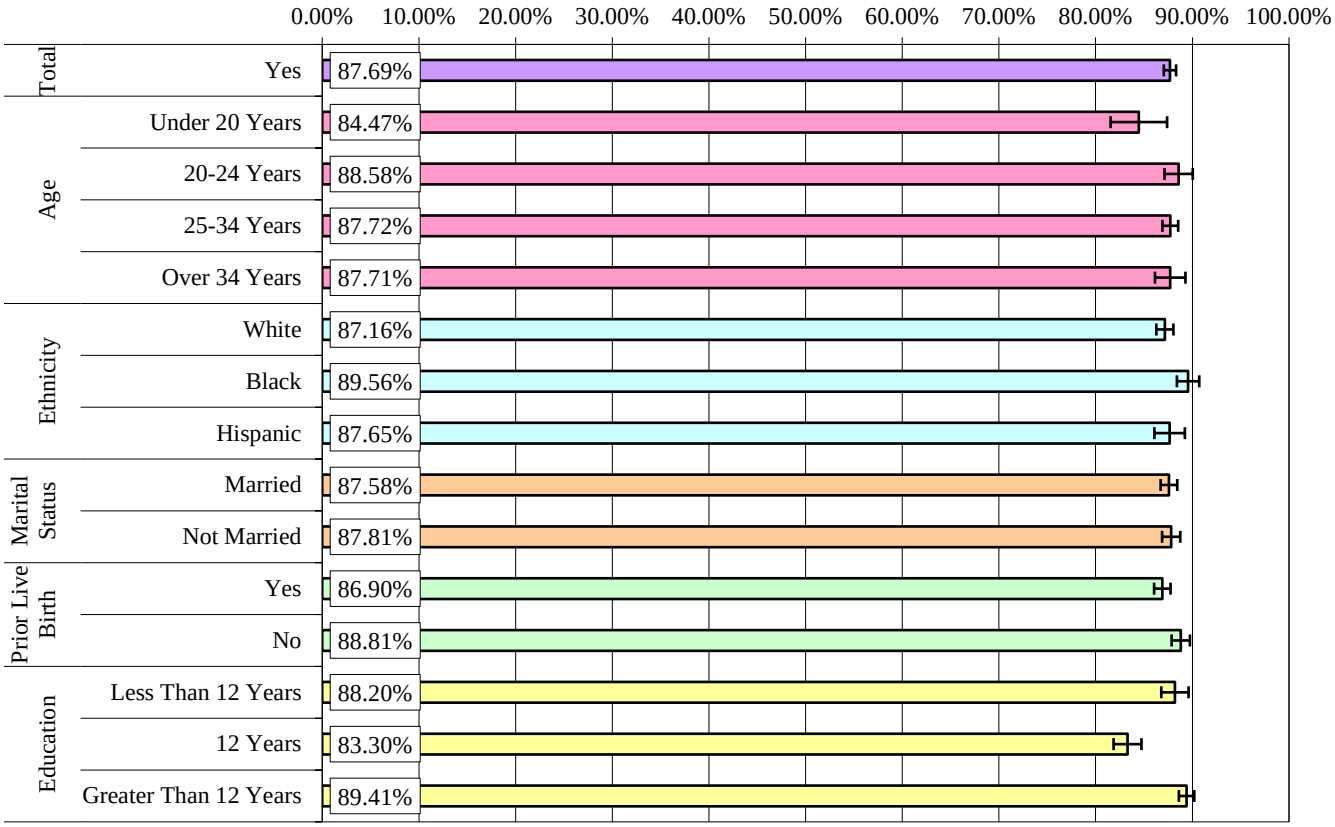
Appendix AQ62H: In the past 2 weeks, did your new baby usually sleep with crib bumper pads (mesh or non-mesh)?[***] [RAW] (% "Yes")



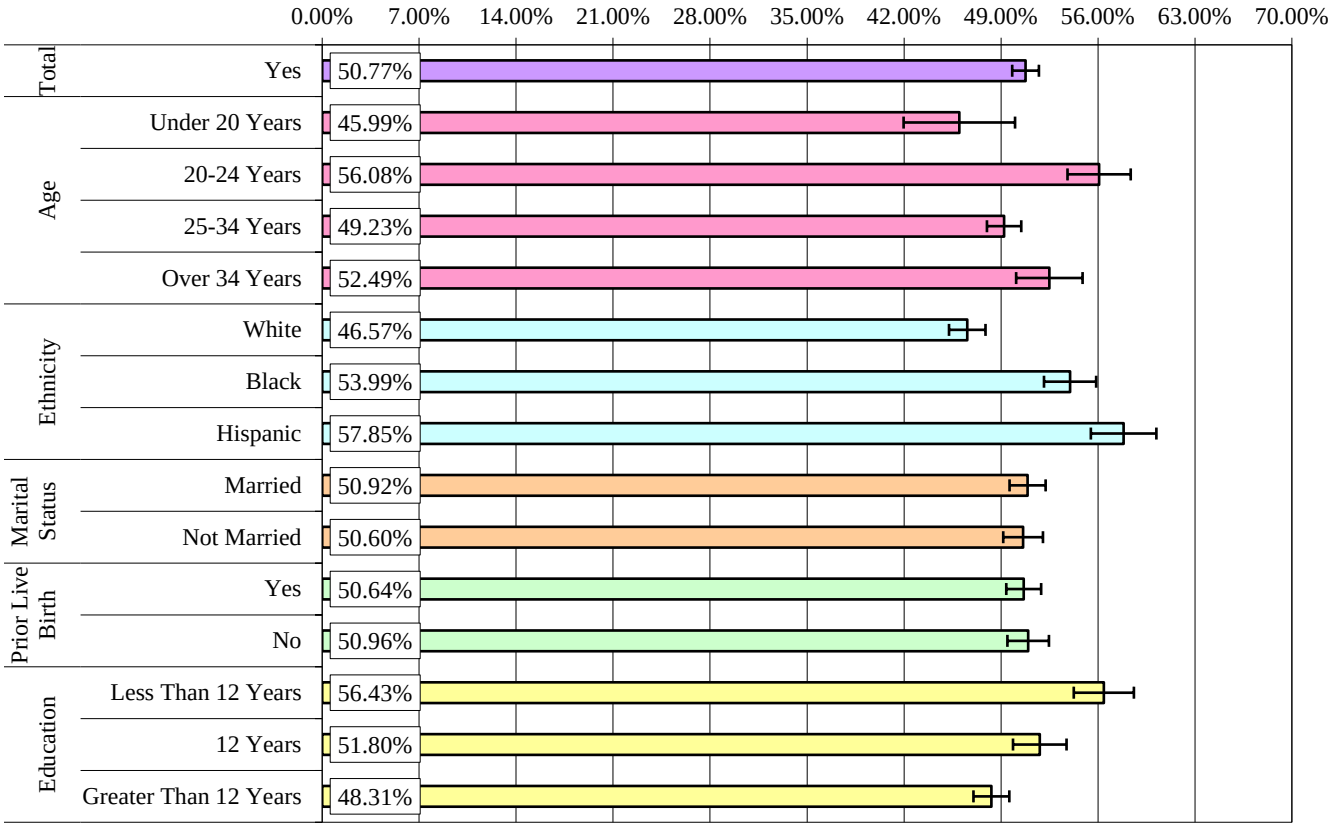
Appendix AQ63A: Did a doctor, nurse, or other health care worker tell you to place your baby on his or her back to sleep?[***] [RAW] (% "Yes")



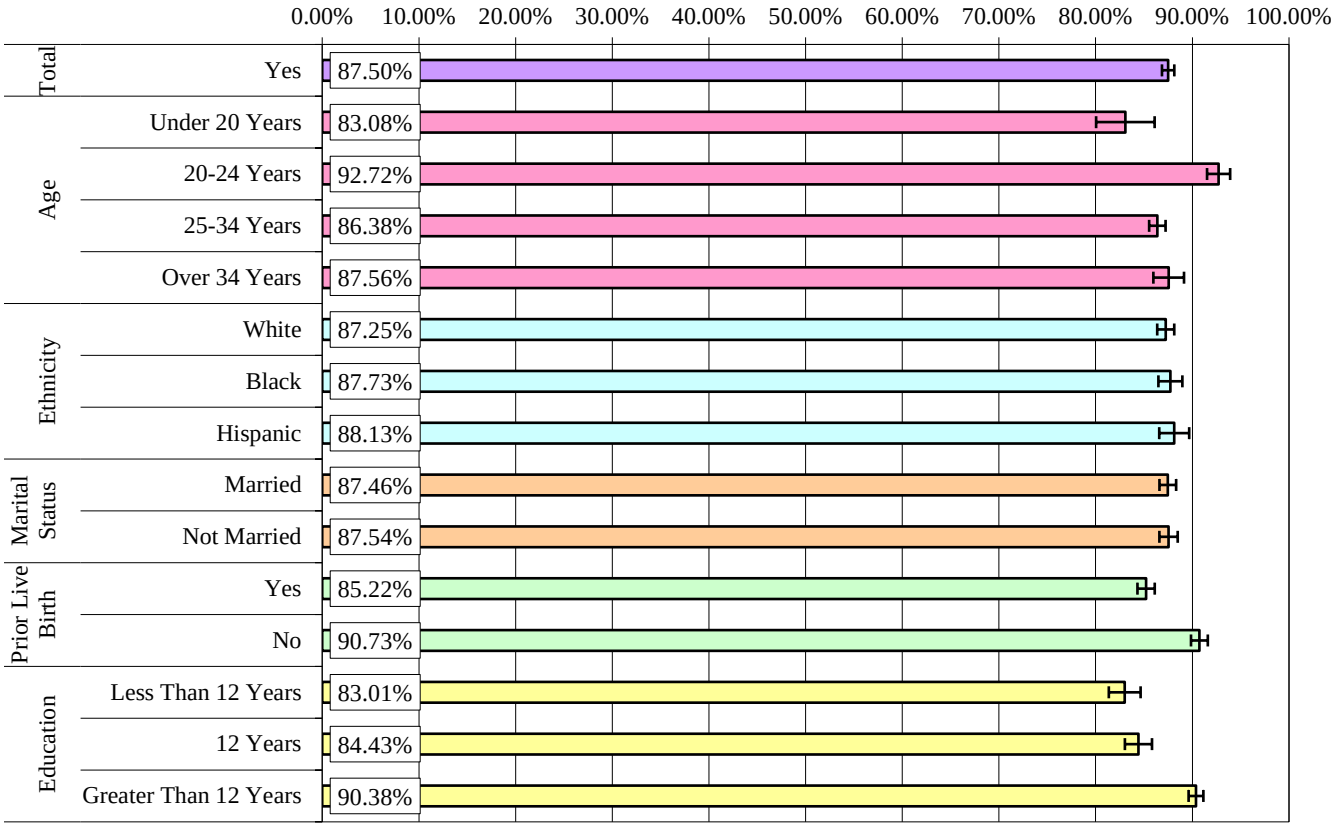
Appendix AQ63B: Did a doctor, nurse, or other health care worker tell you to place your baby to sleep in a crib, bassinet, or pack and play?[***] [RAW] (% "Yes")



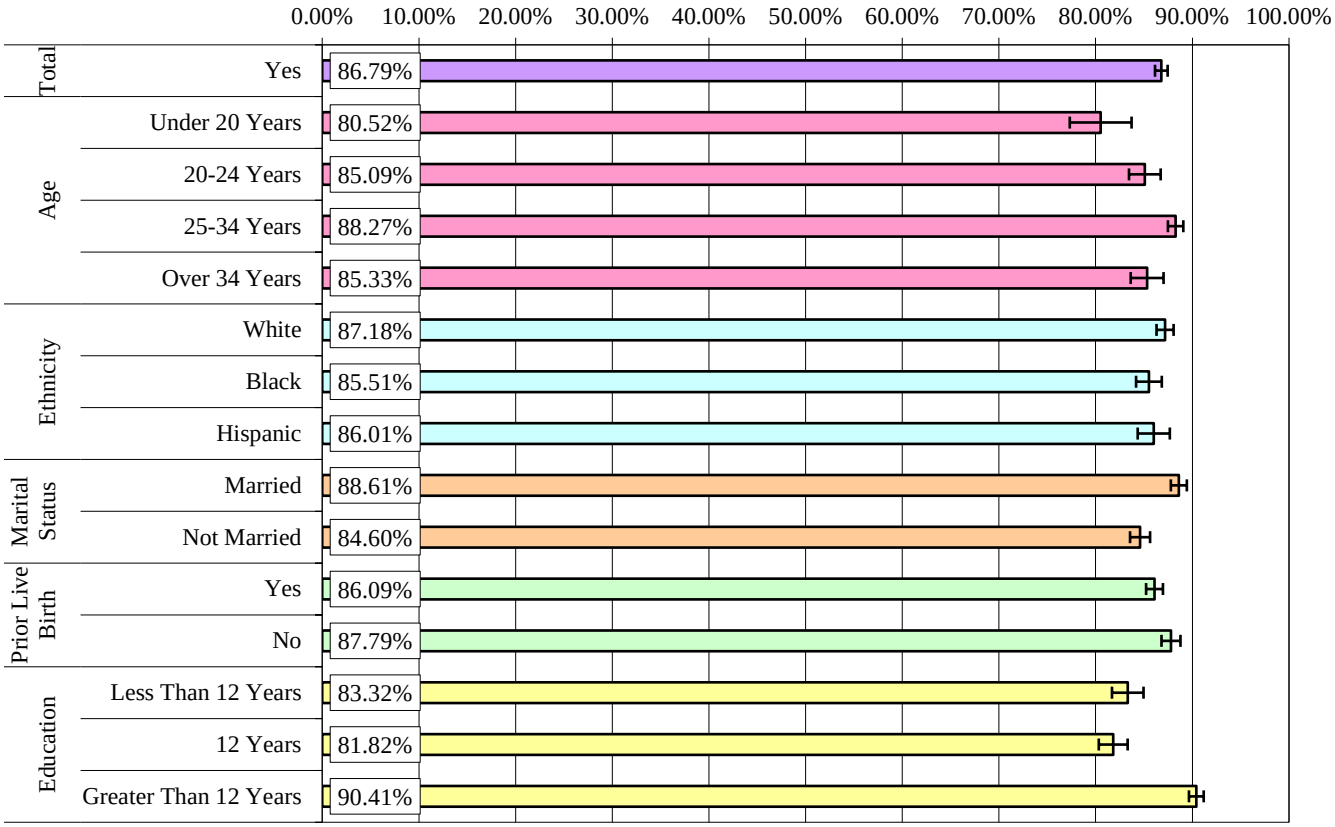
Appendix AQ63C: Did a doctor, nurse, or other health care worker tell you to place your baby's crib or bed in your room?[***] [RAW] (% "Yes")



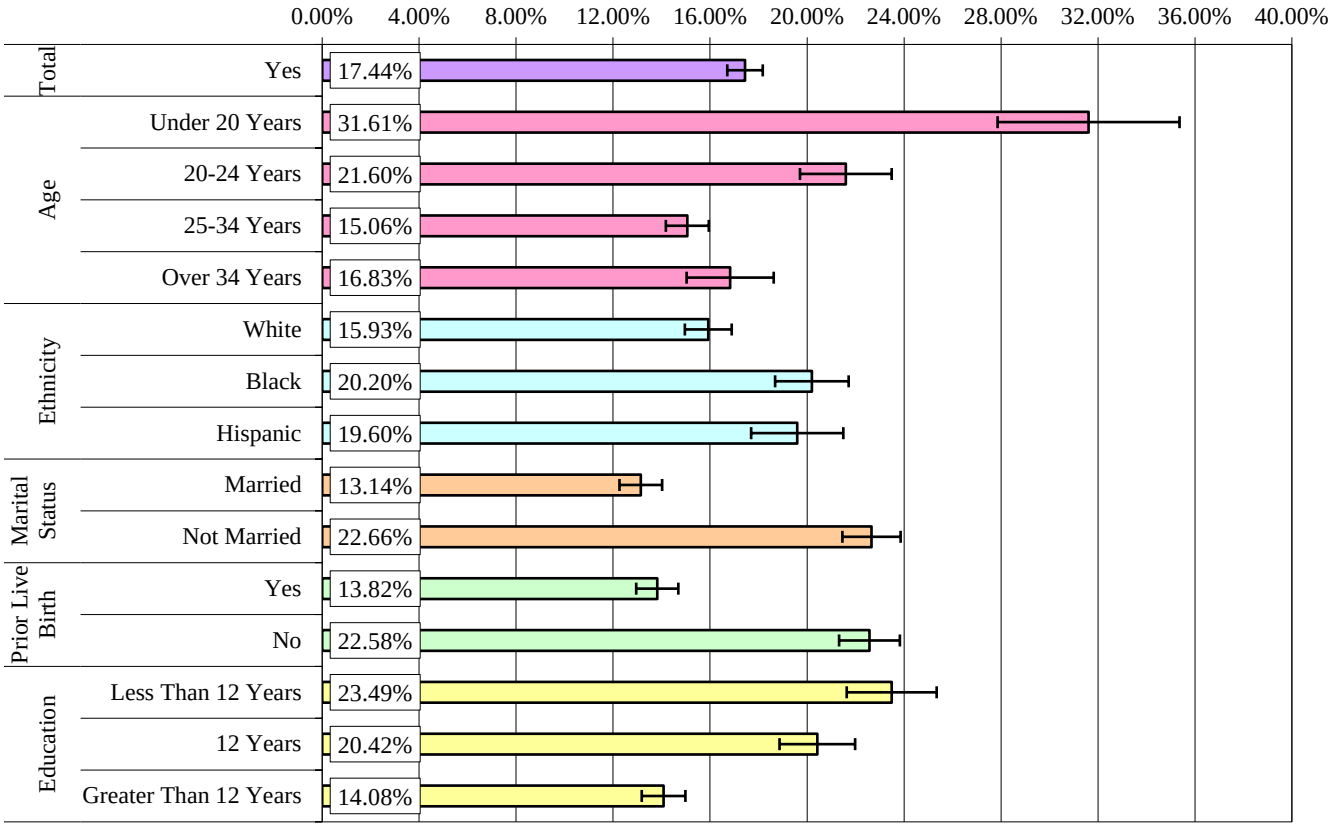
Appendix AQ63D: Did a doctor, nurse, or other health care worker tell you what things should and should not go in bed with your baby?[***] [RAW] (% "Yes")



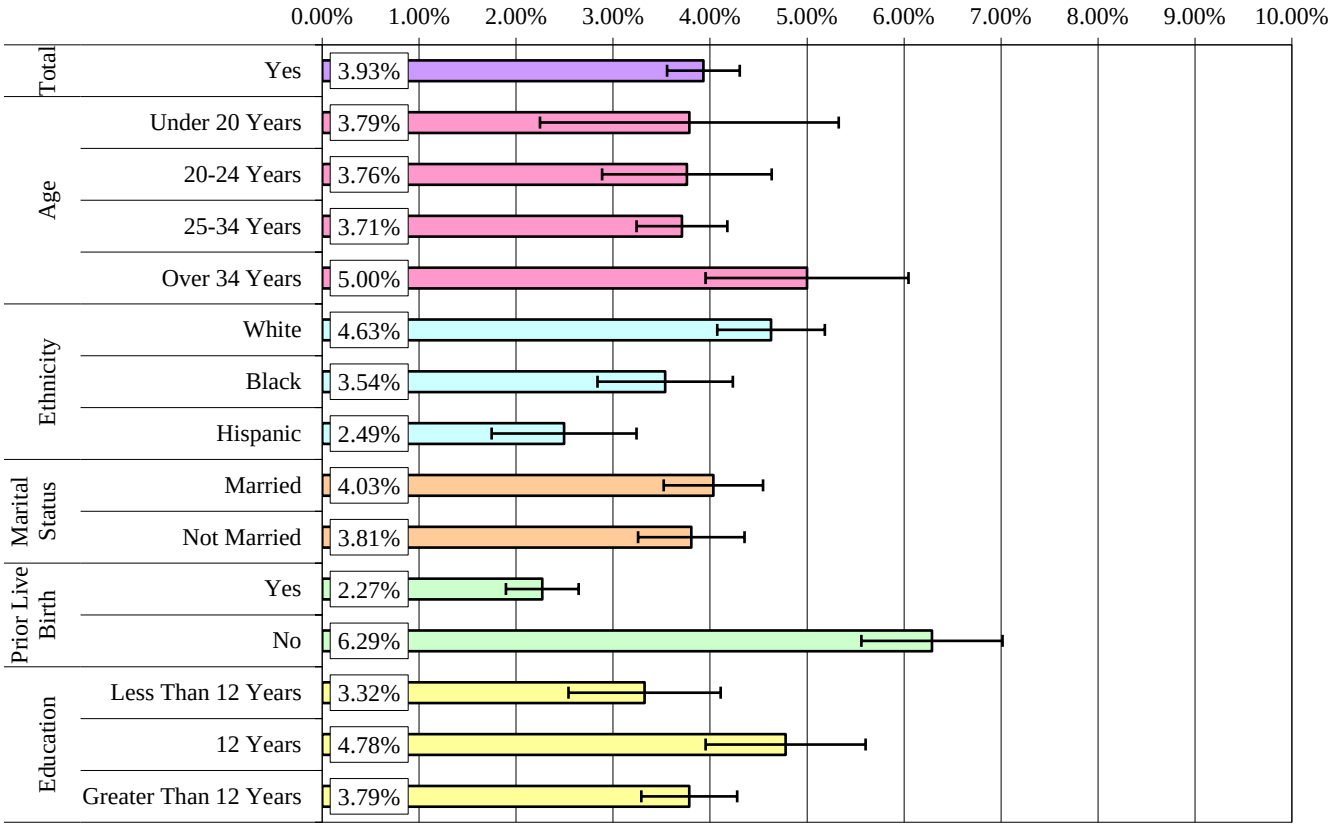
Appendix AQ64: Was your new baby seen by a doctor, nurse, or other health care worker for a one week checkup after he or she was born?[***] [RAW] (% "Yes")



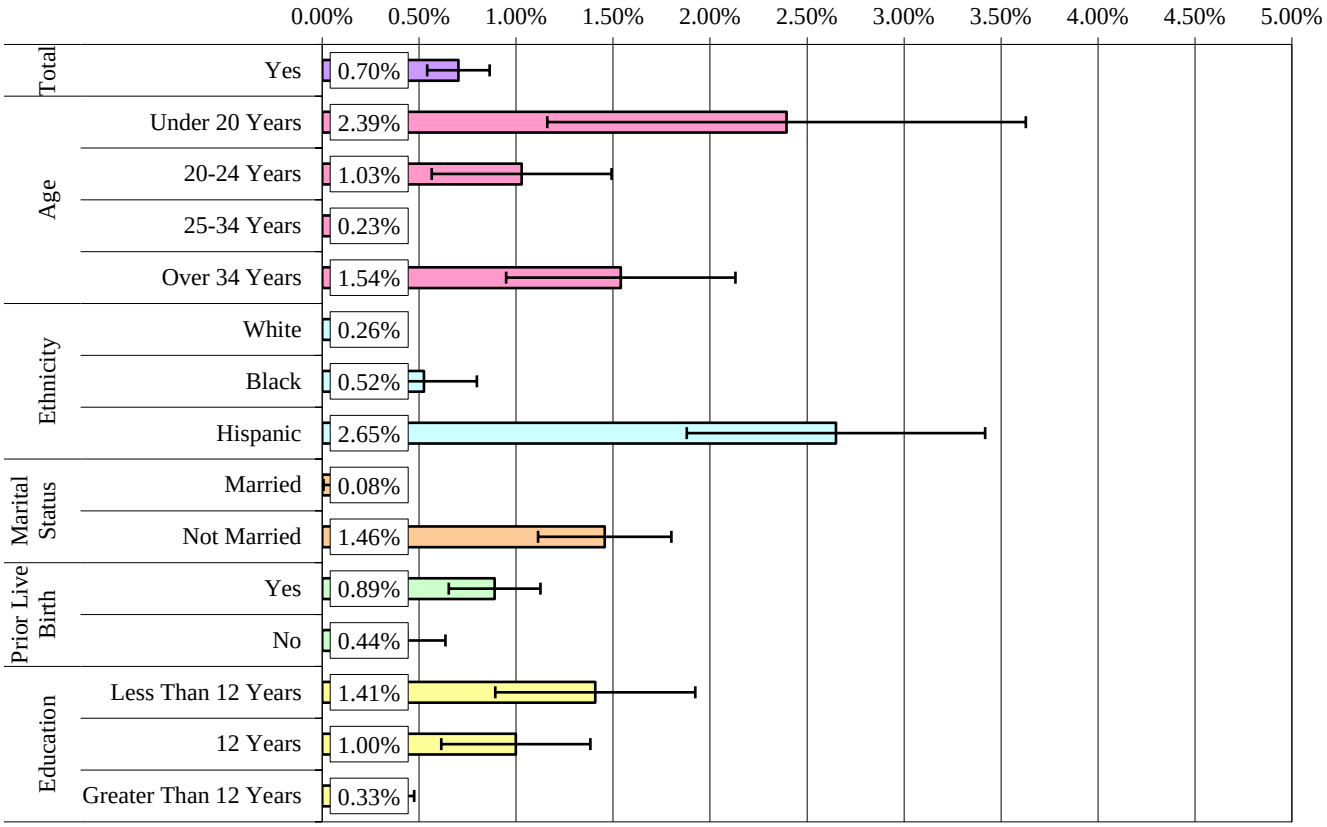
Appendix AQ65: Since your new baby was born, has a home visitor come to your home to help you learn how to take care of yourself or your new baby?[***] [RAW] (% "Yes")



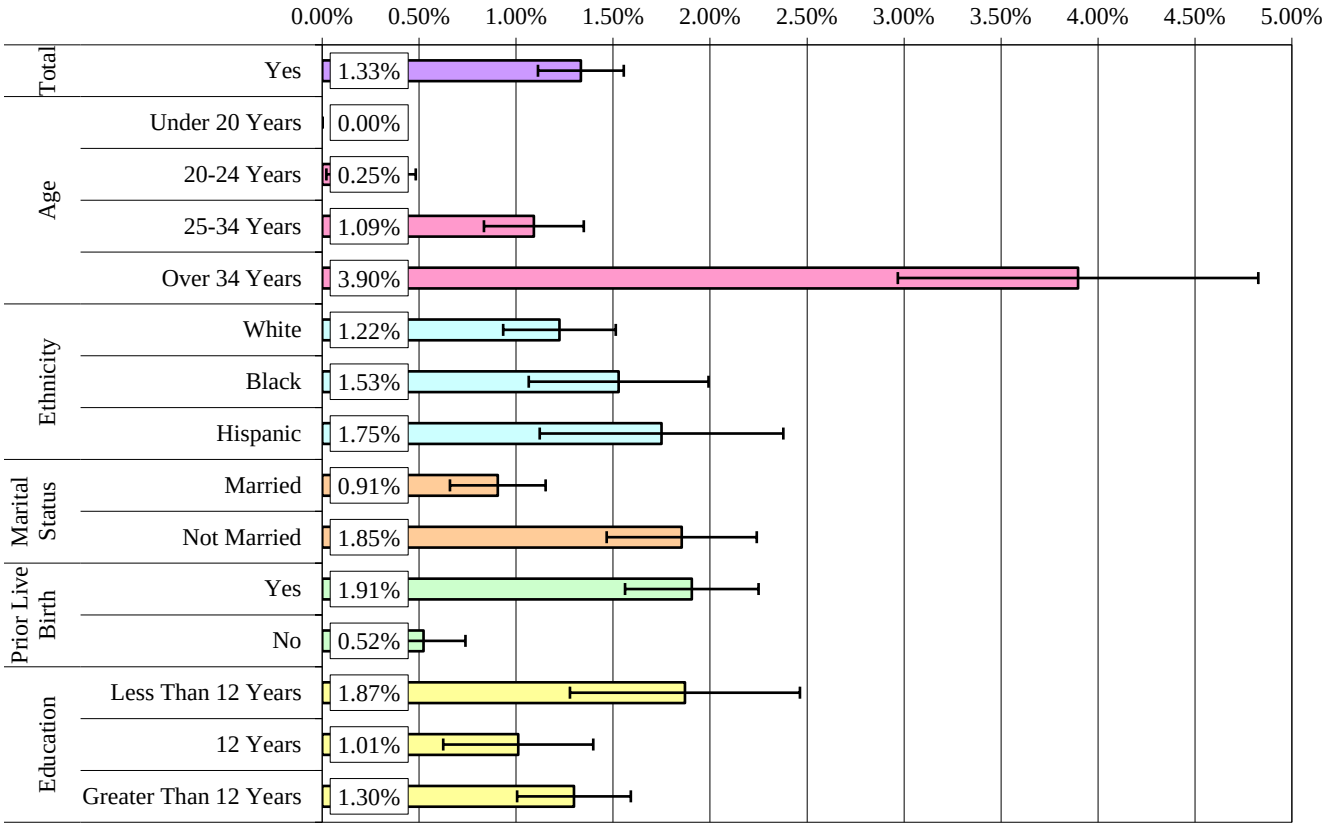
Appendix AQ67A: I want to get pregnant is why I or my husband or partner are not doing anything to keep me from getting pregnant now.[†††,***] [RAW] (% "Yes")



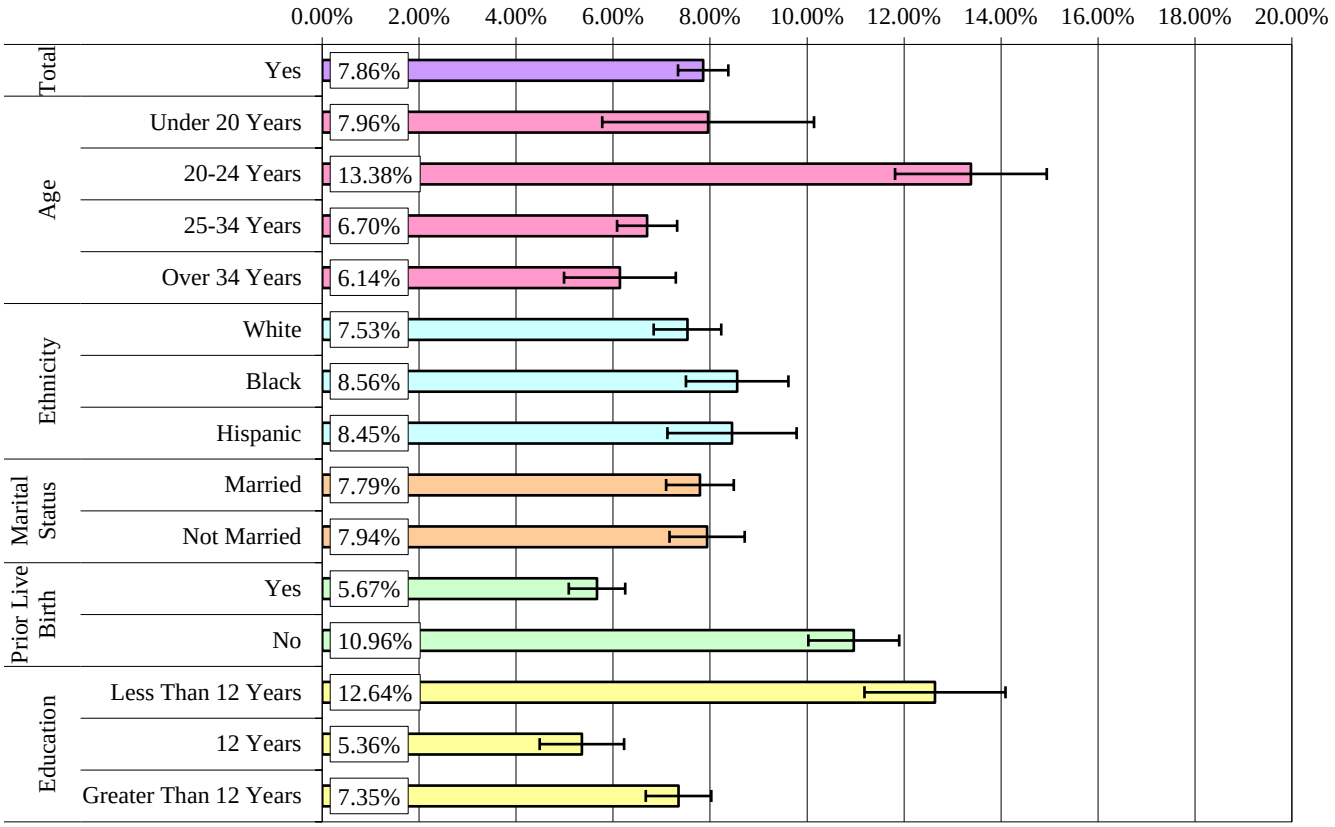
Appendix AQ67B: I am pregnant now is why I or my husband or partner are not doing anything to keep me from getting pregnant now.†††,* [RAW] (% "Yes")



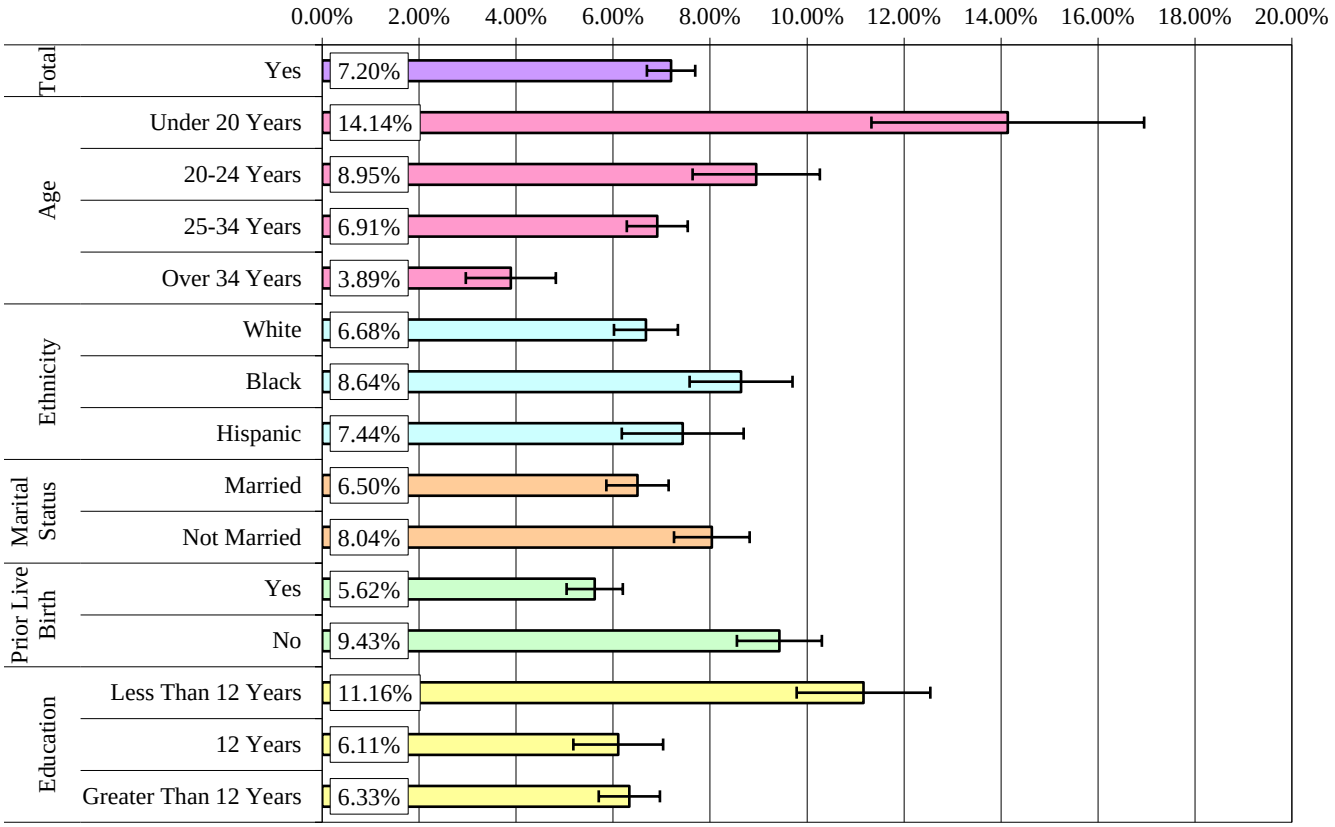
Appendix AQ67C: I had my tubes tied or blocked is why I or my husband or partner are not doing anything to keep me from getting pregnant now.†††,* [RAW] (% "Yes")



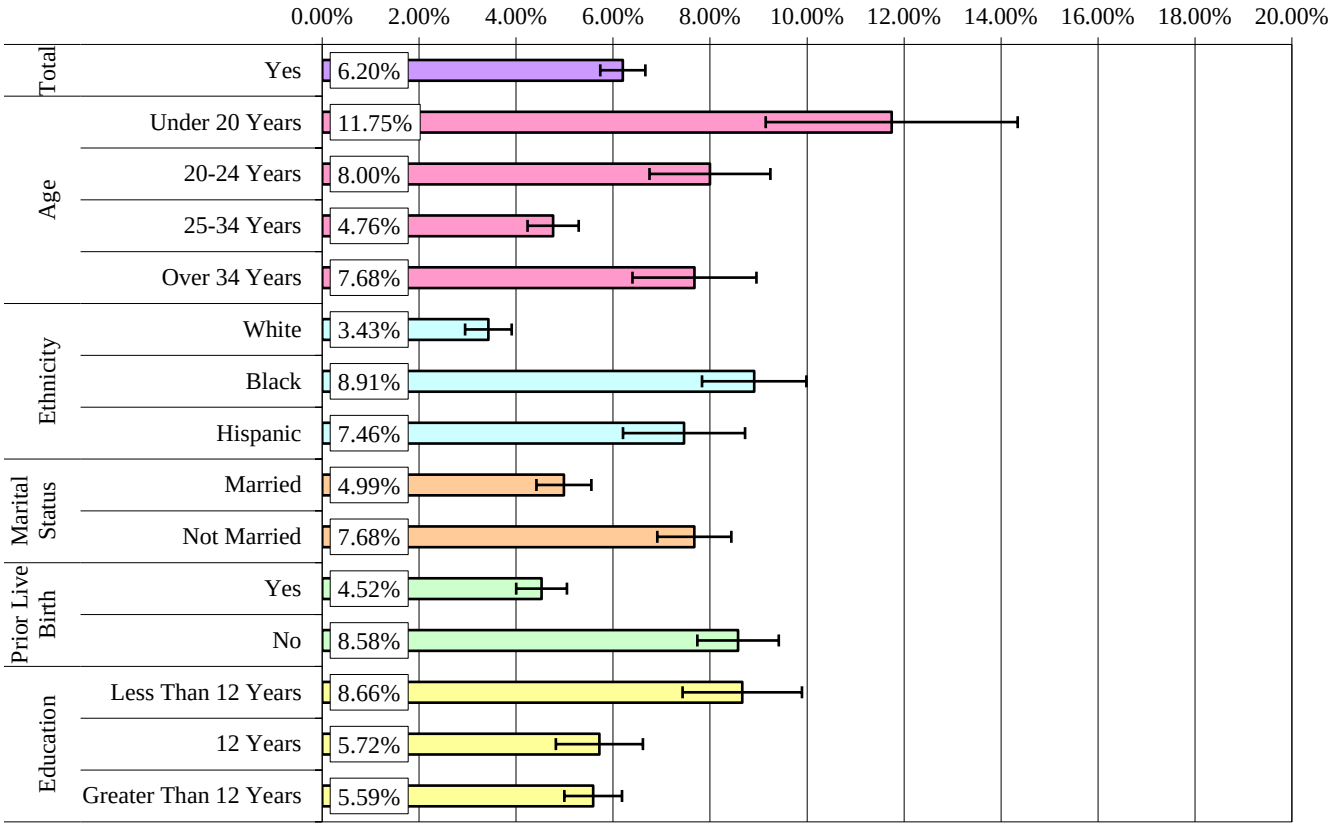
Appendix AQ67D: I don't want to use birth control is why I or my husband or partner are not doing anything to keep me from getting pregnant now. †††,*** [RAW] (% "Yes")



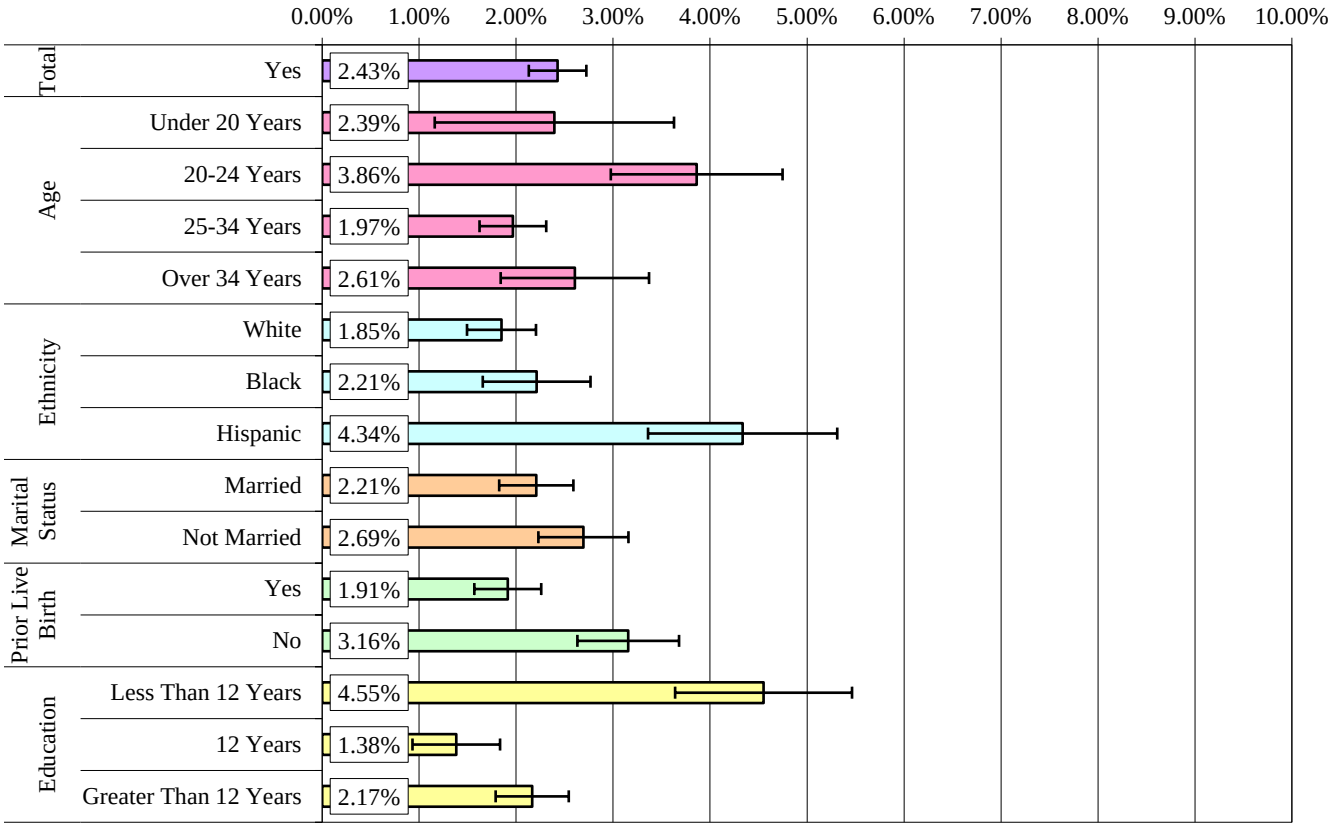
Appendix AQ67E: I am worried about side effects from birth control is why I or my husband or partner are not doing anything to keep me from getting pregnant now. *** [RAW] (% "Yes")



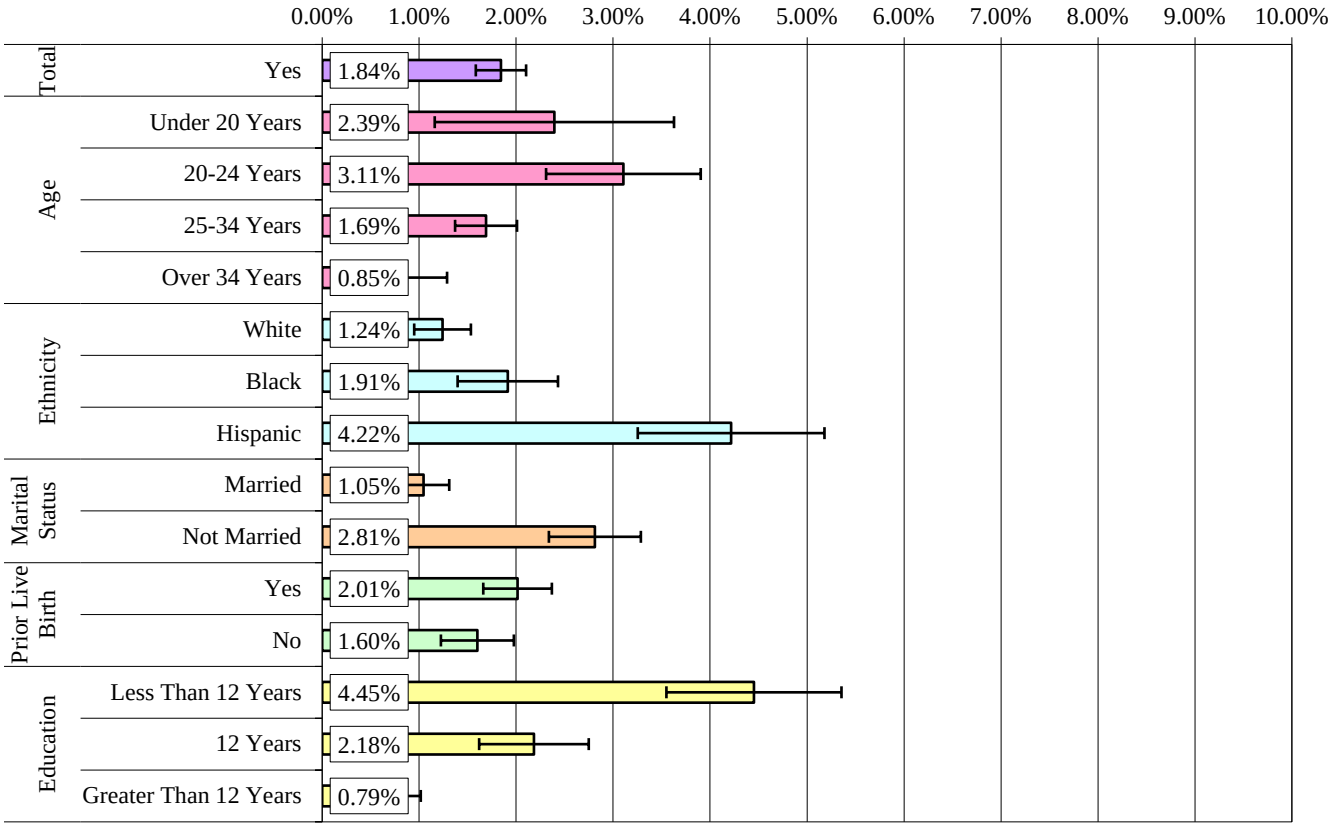
Appendix AQ67F: I am not having sex is why I or my husband or partner are not doing anything to keep me from getting pregnant now.†††,* [RAW] (% "Yes")**



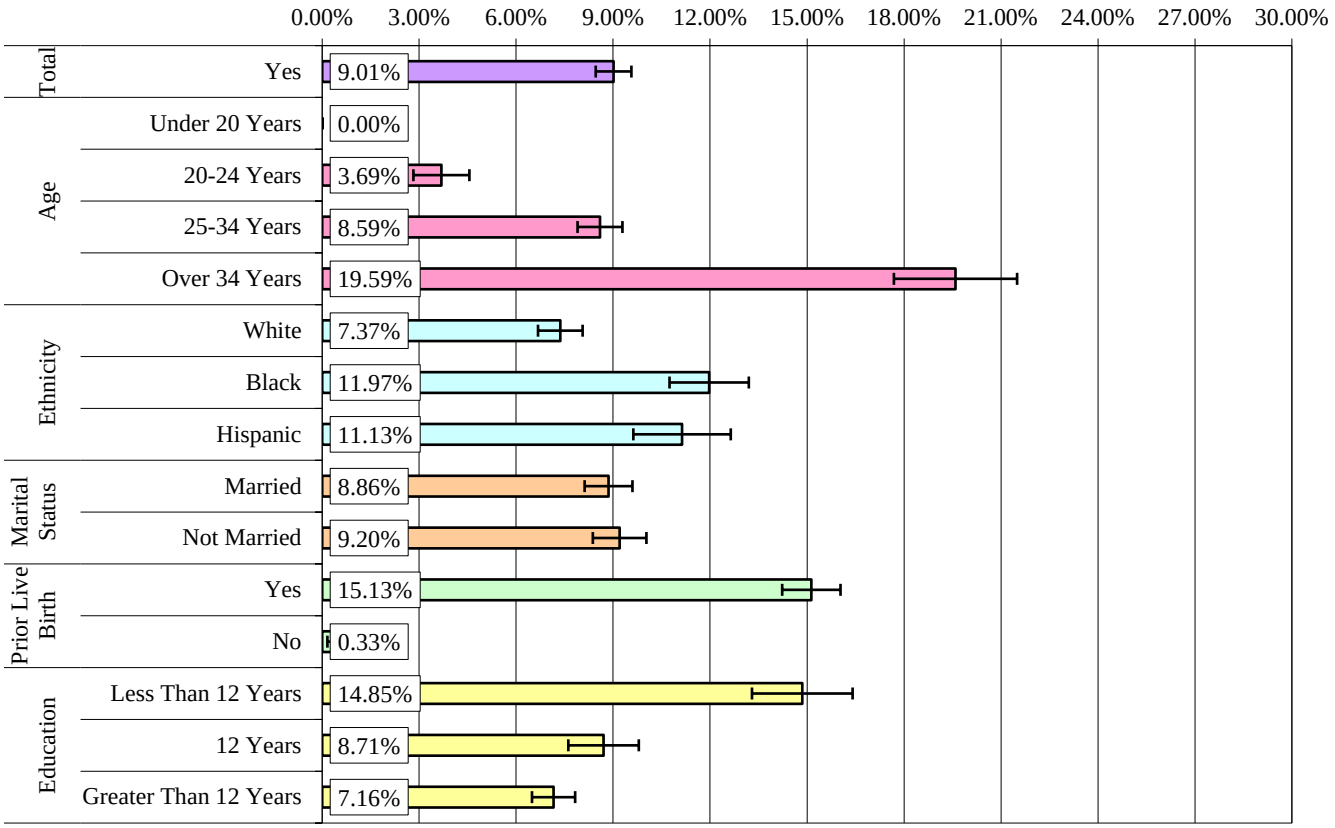
Appendix AQ67G: My husband or partner doesn't want to use anything is why I or my husband or partner are not doing anything to keep me from getting pregnant now.†††,* [RAW] (% "Yes")**



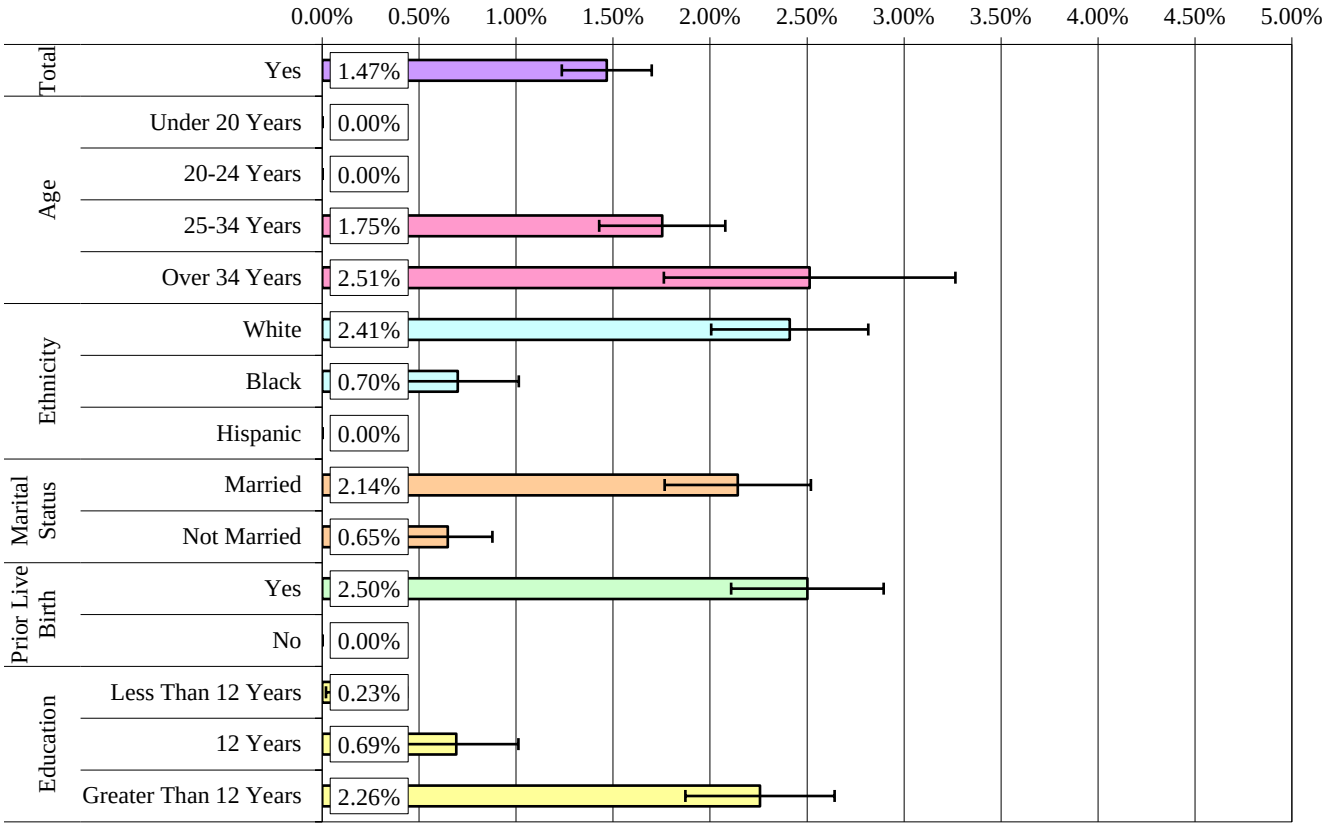
Appendix AQ67H: I have problems getting birth control when I need it is why I or my husband or partner are not doing anything to keep me from getting pregnant now.[†††,***] [RAW] (% "Yes")



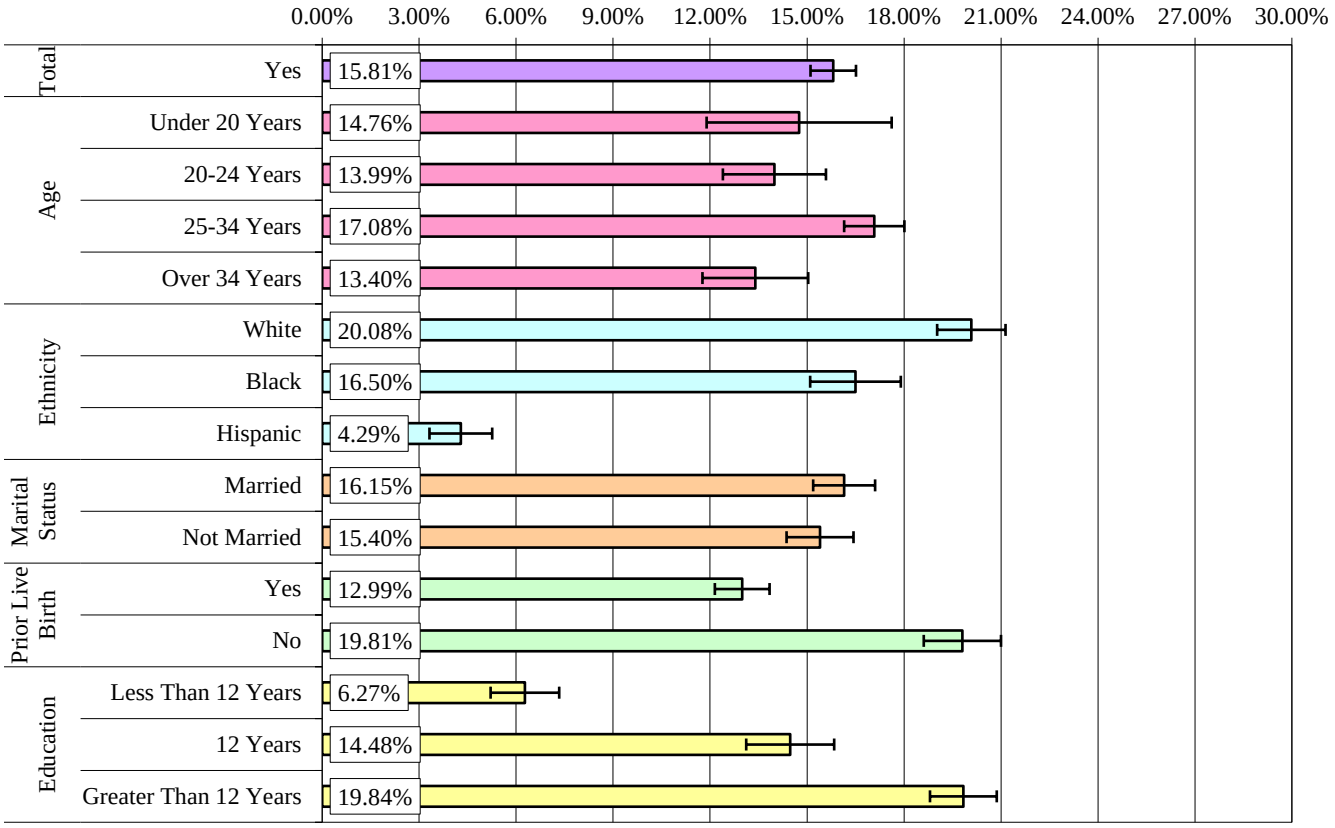
Appendix AQ68A: Having my tubes tied or blocked (female sterilization or Essure®) is the birth control that I or my husband or partner is using now to keep from getting pregnant. [RAW] (% "Yes")



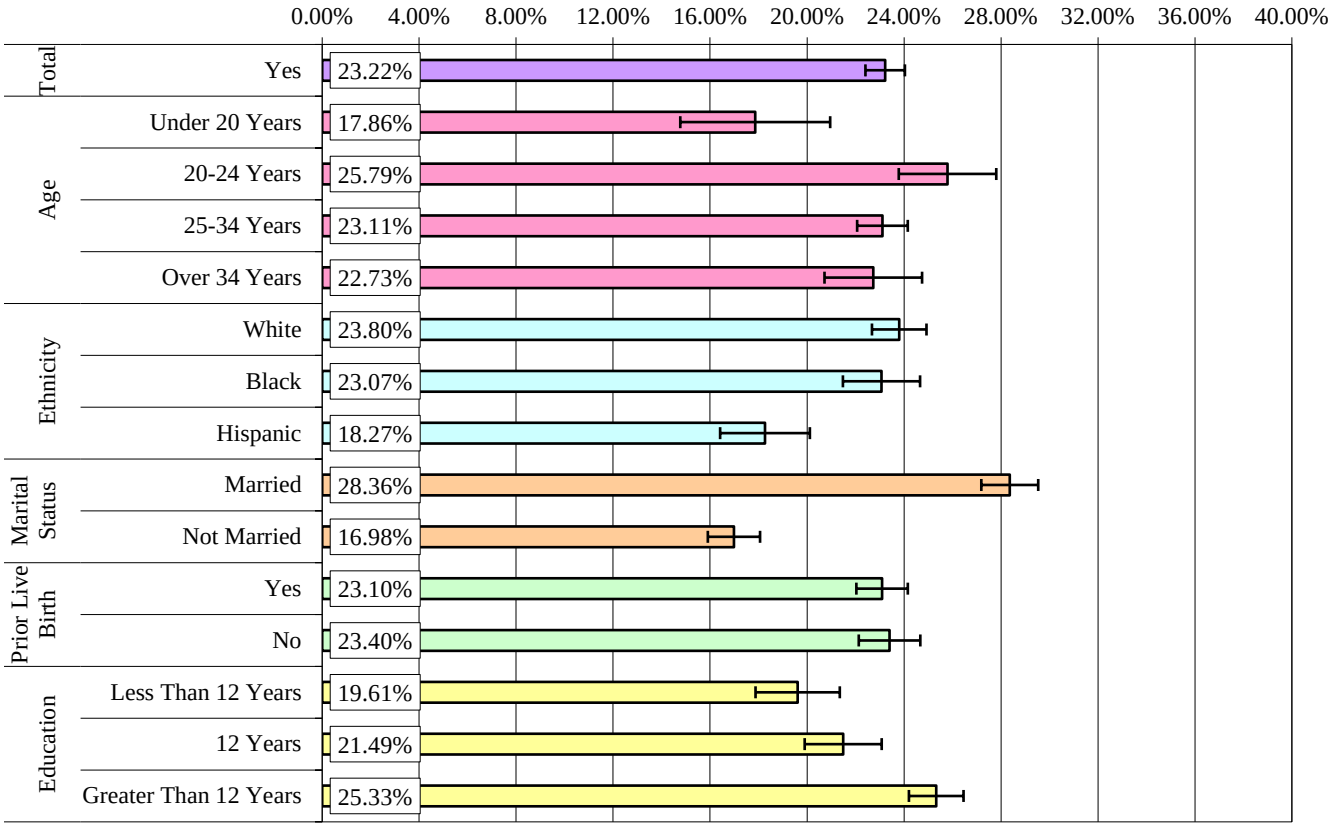
Appendix AQ68B: A vasectomy (male sterilization) is the birth control that I or my husband or partner is using now to keep from getting pregnant. [RAW] (% "Yes")



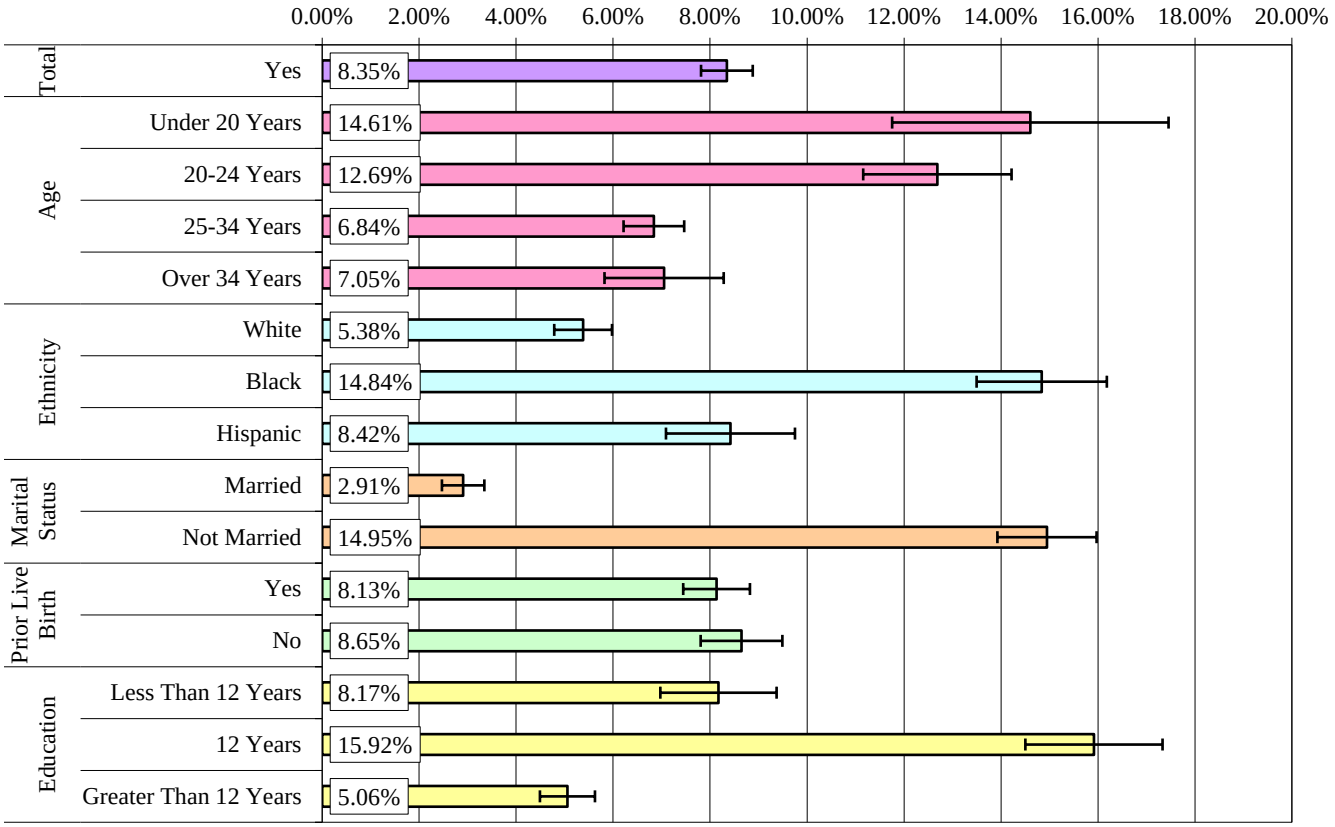
Appendix AQ68C: Birth control pills are the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



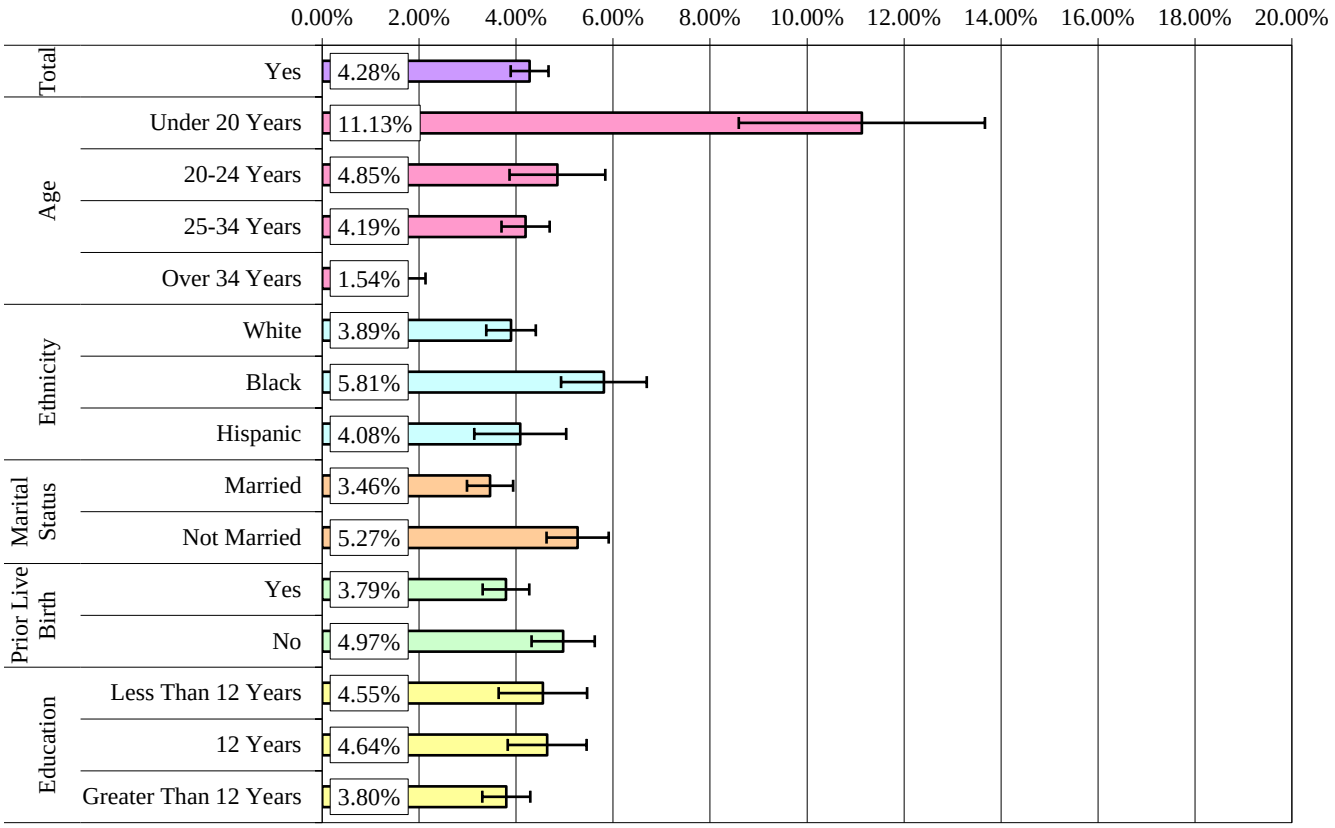
Appendix AQ68D: Condoms are the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



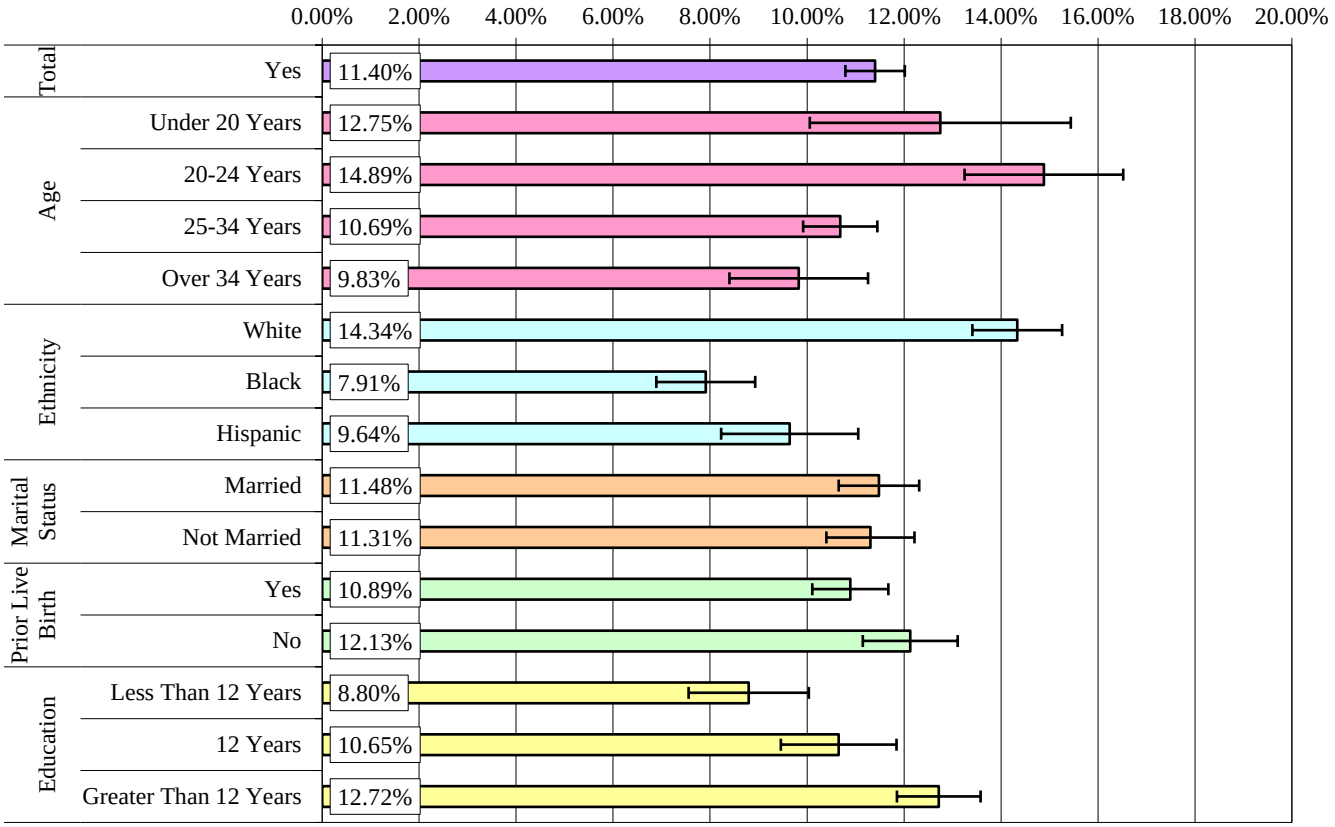
Appendix AQ68E: Shots or injections (Depo-Provera®) are the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



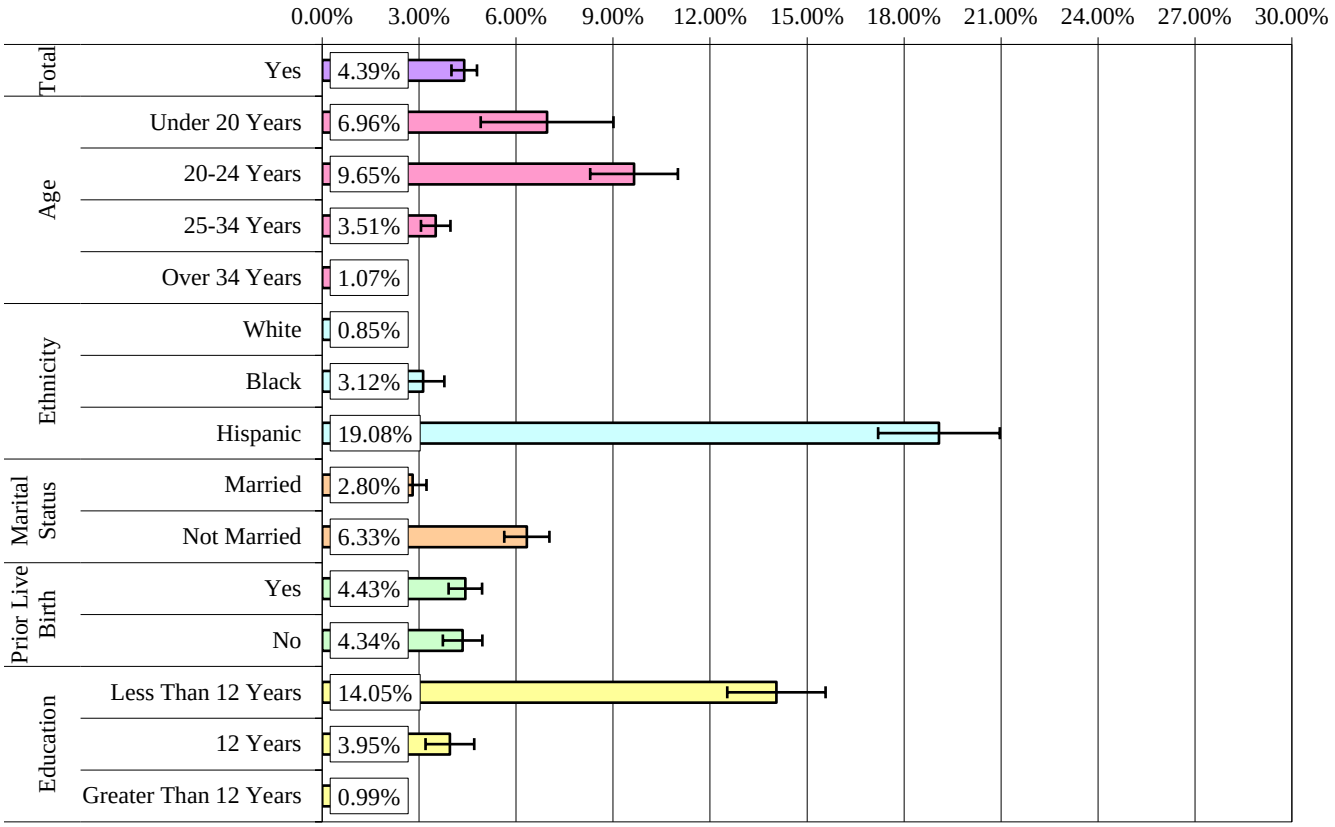
Appendix AQ68F: The contraceptive patch (OrthoEvra®) or vaginal ring (NuvaRing®) is the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



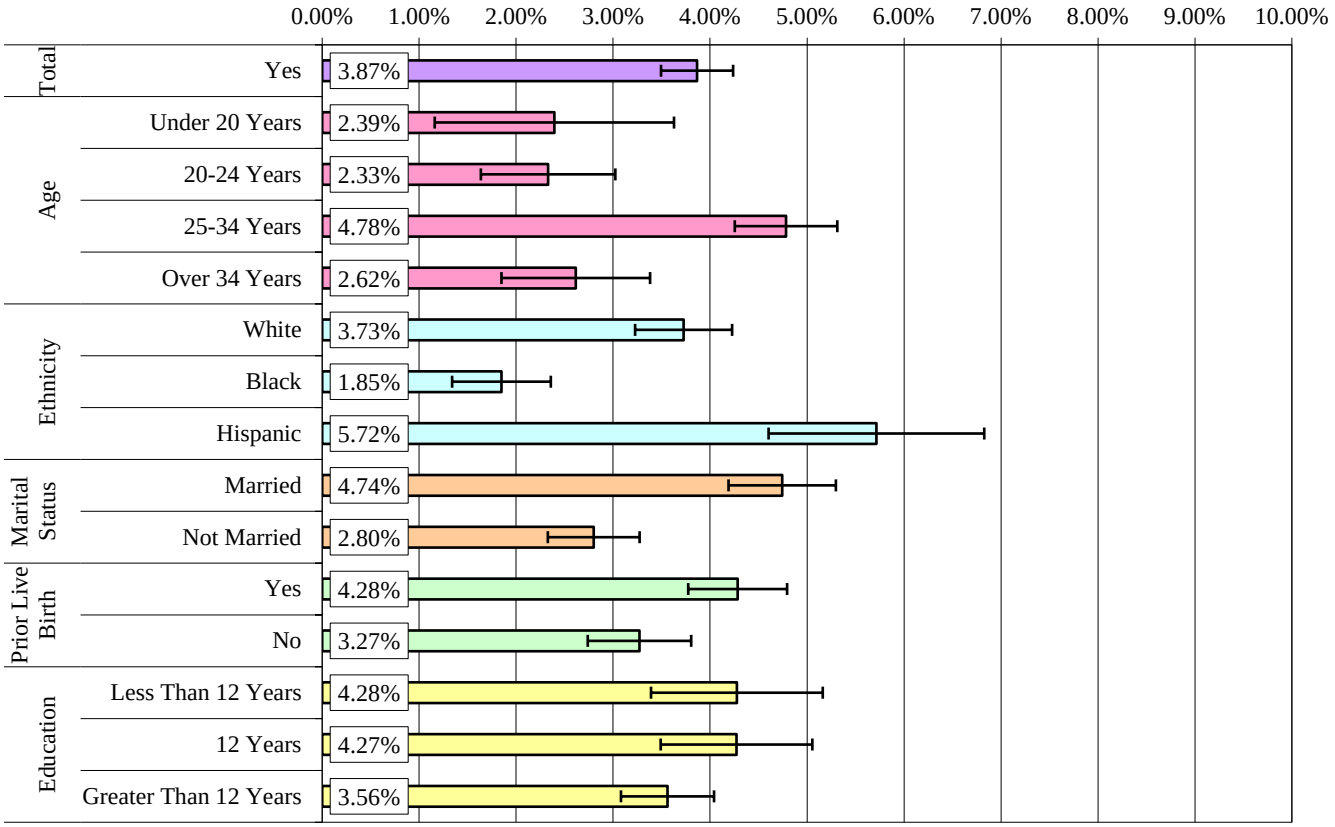
Appendix AQ68G: An IUD (including Mirena®, ParaGard®, Liletta®, or Skyla®) is the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



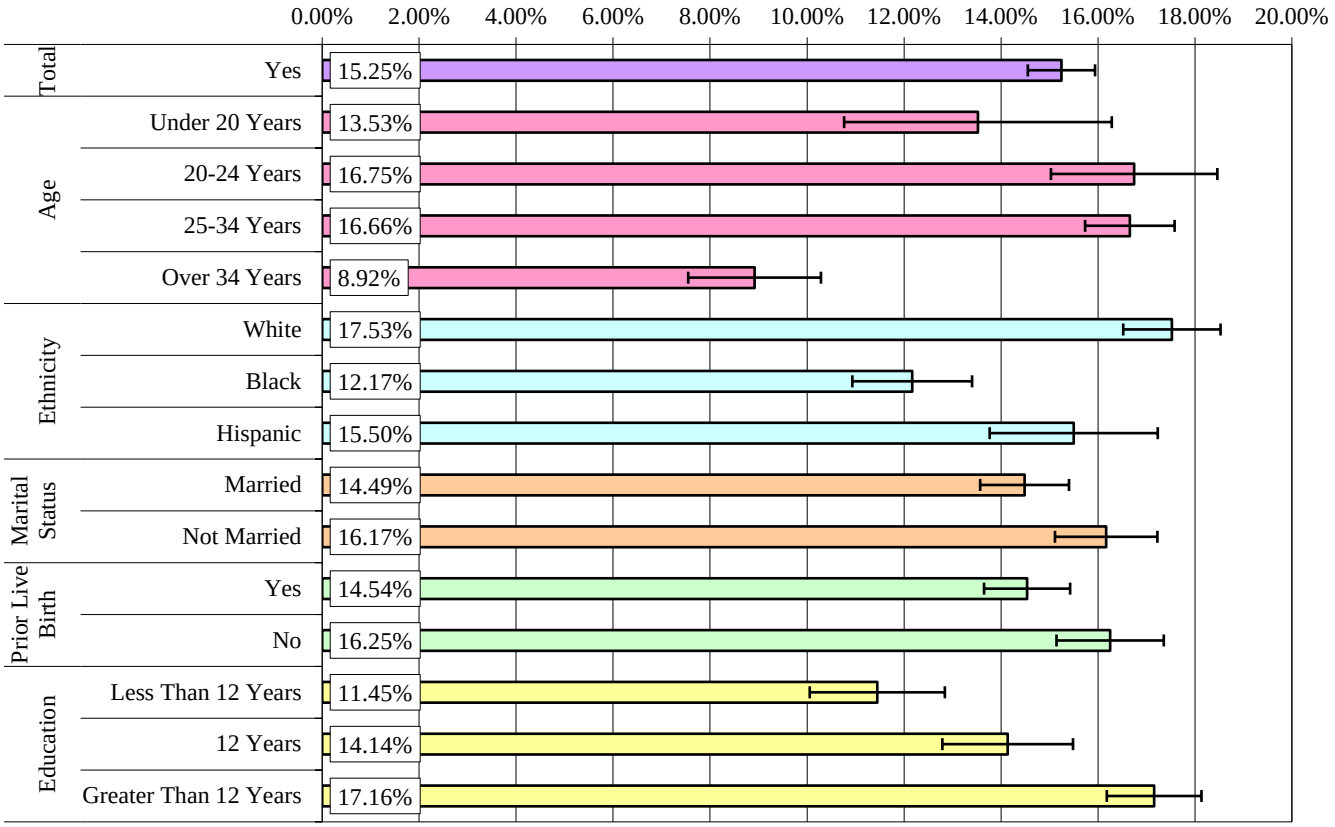
Appendix AQ68H: A contraceptive implant (Nexplanon® or Implanon®) is the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



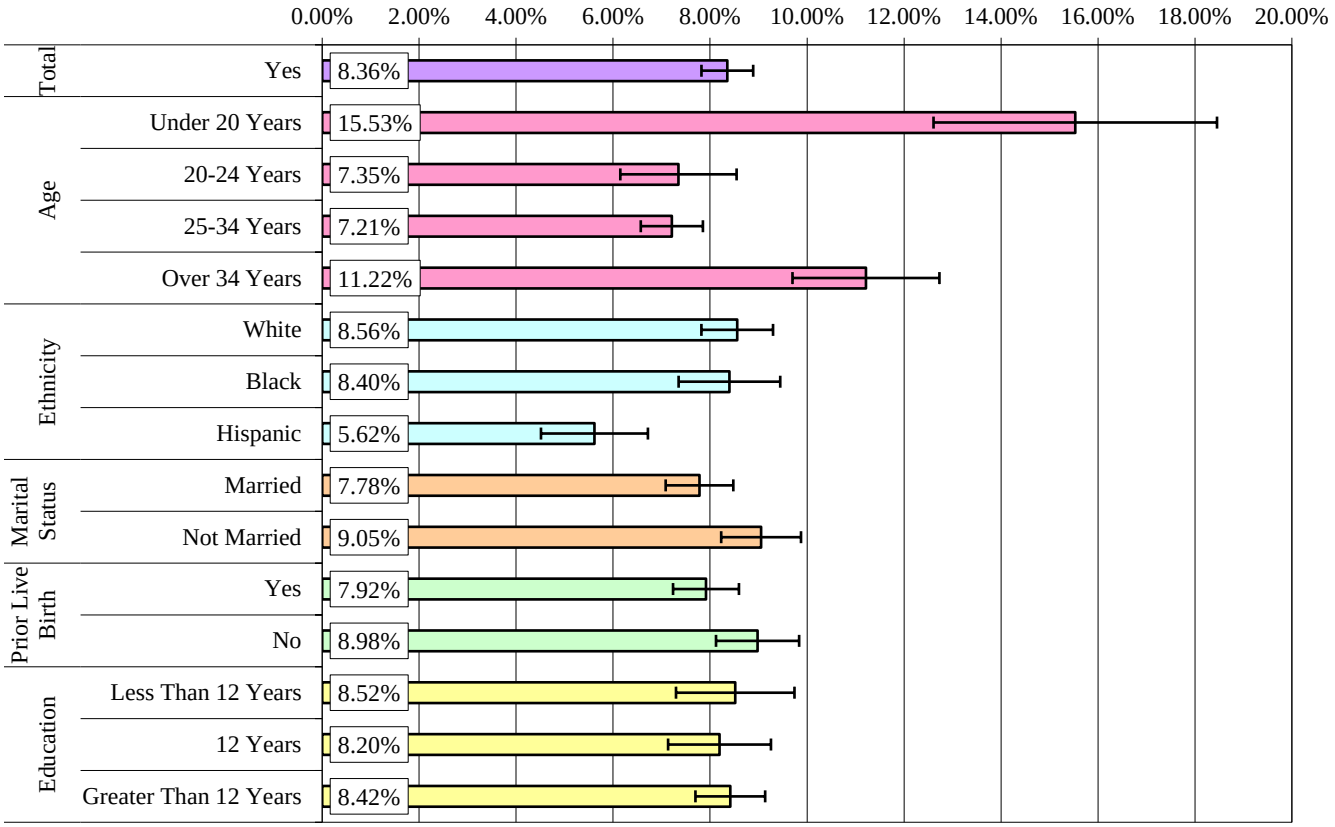
Appendix AQ68I: Natural family planning (including rhythm method) is the birth control that I or my husband or partner is using now to keep from getting pregnant. [RAW] (% "Yes")



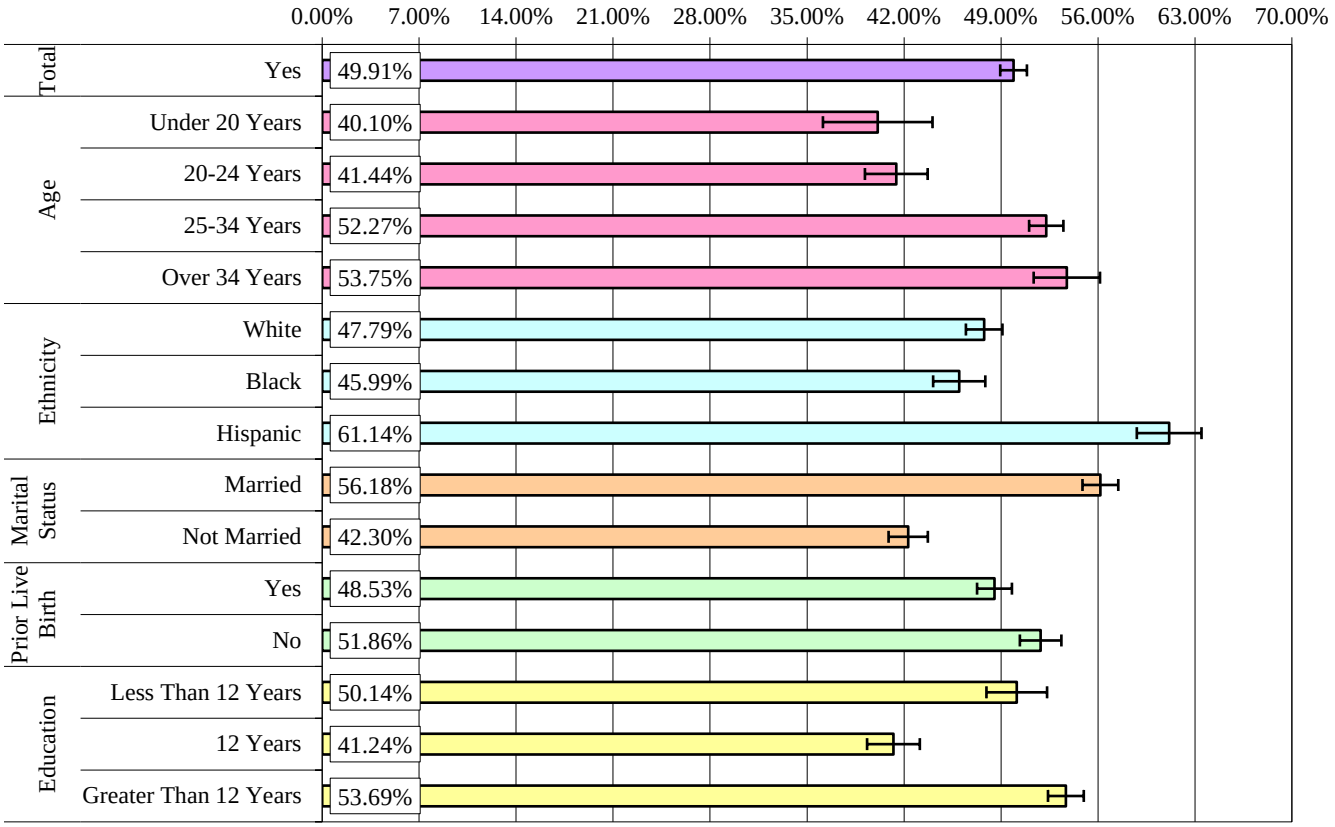
Appendix AQ68J: Withdrawal (pulling out) is the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



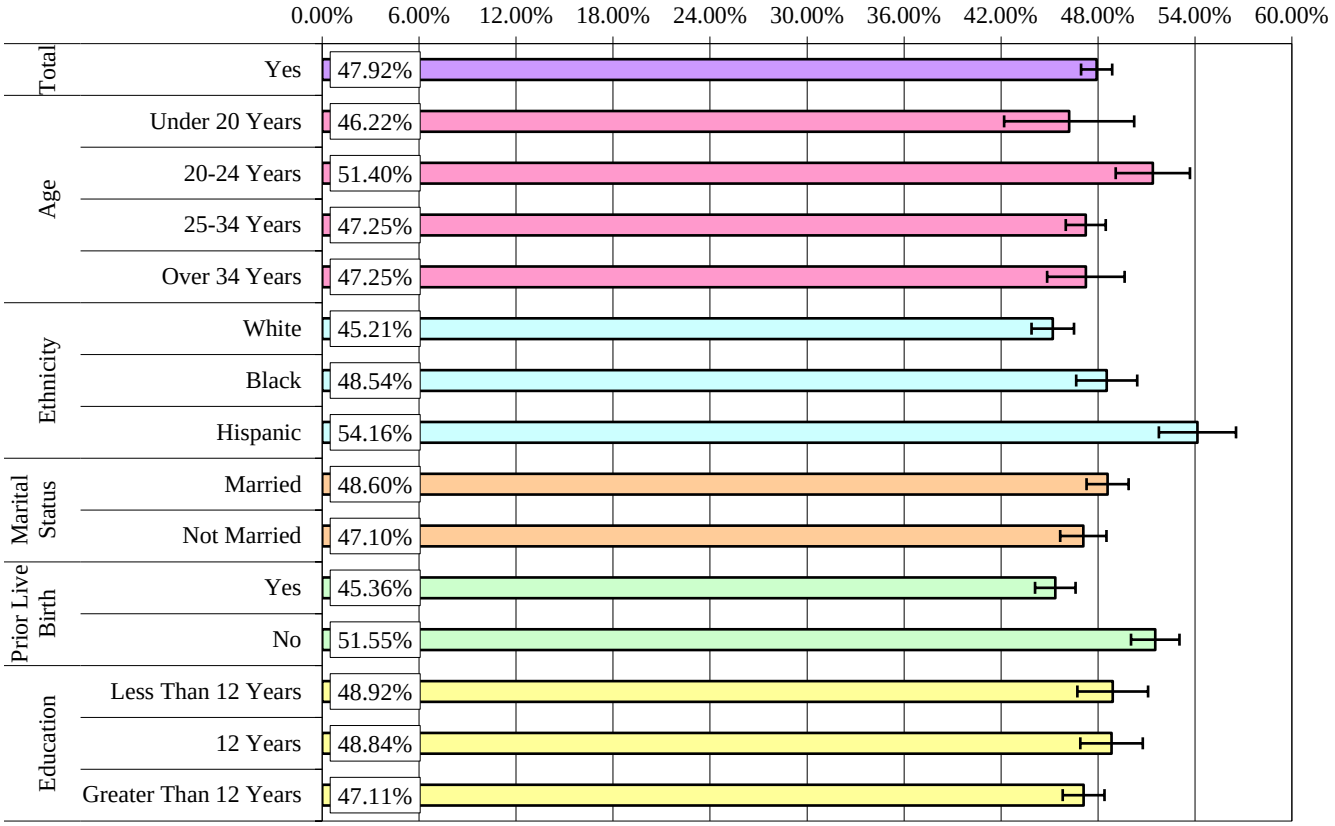
Appendix AQ68K: Not having sex (abstinence) is the birth control that I or my husband or partner is using now to keep from getting pregnant.[***] [RAW] (% "Yes")



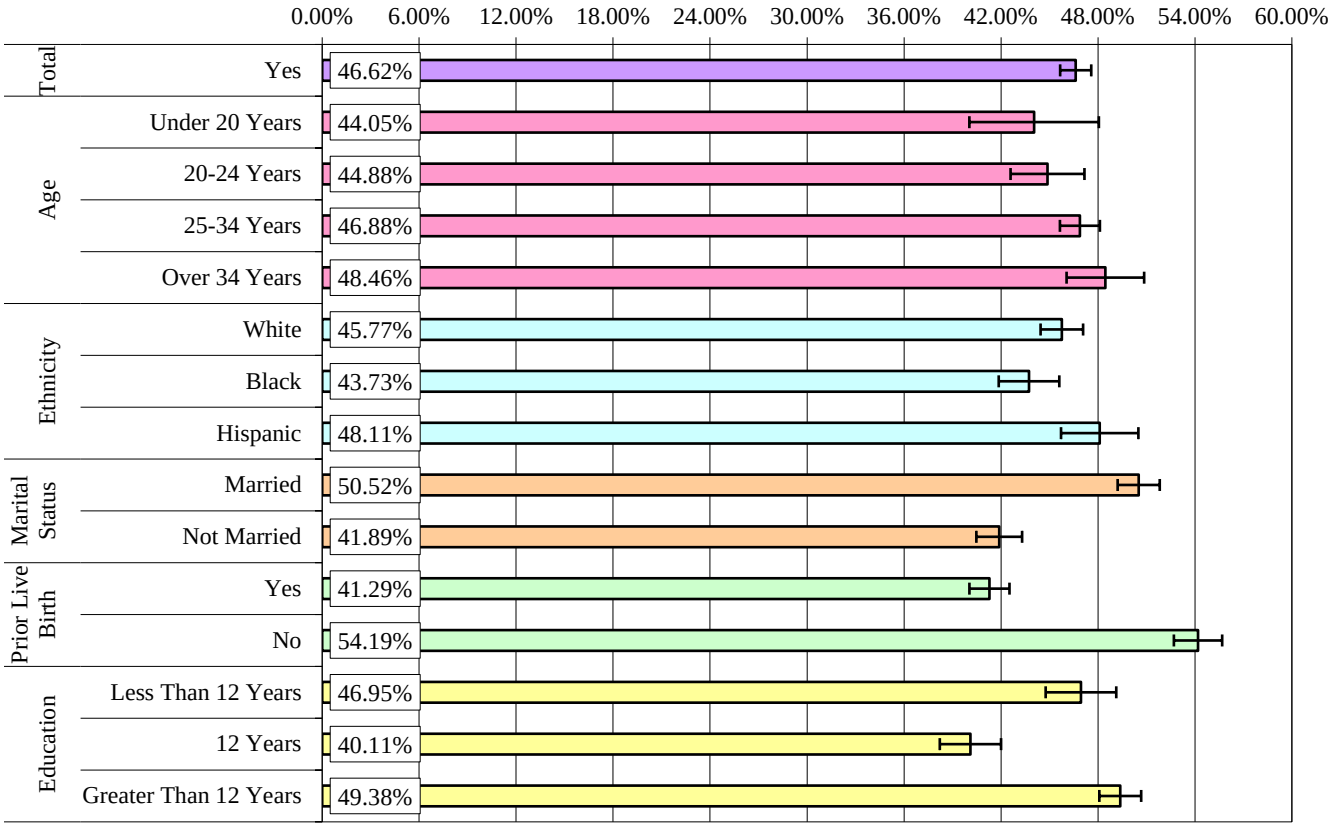
Appendix AQ70A: During your postpartum checkup, did a doctor, nurse, or other health care worker <u>tell you to take a vitamin with folic acid</u>?[***] [RAW] (% "Yes")



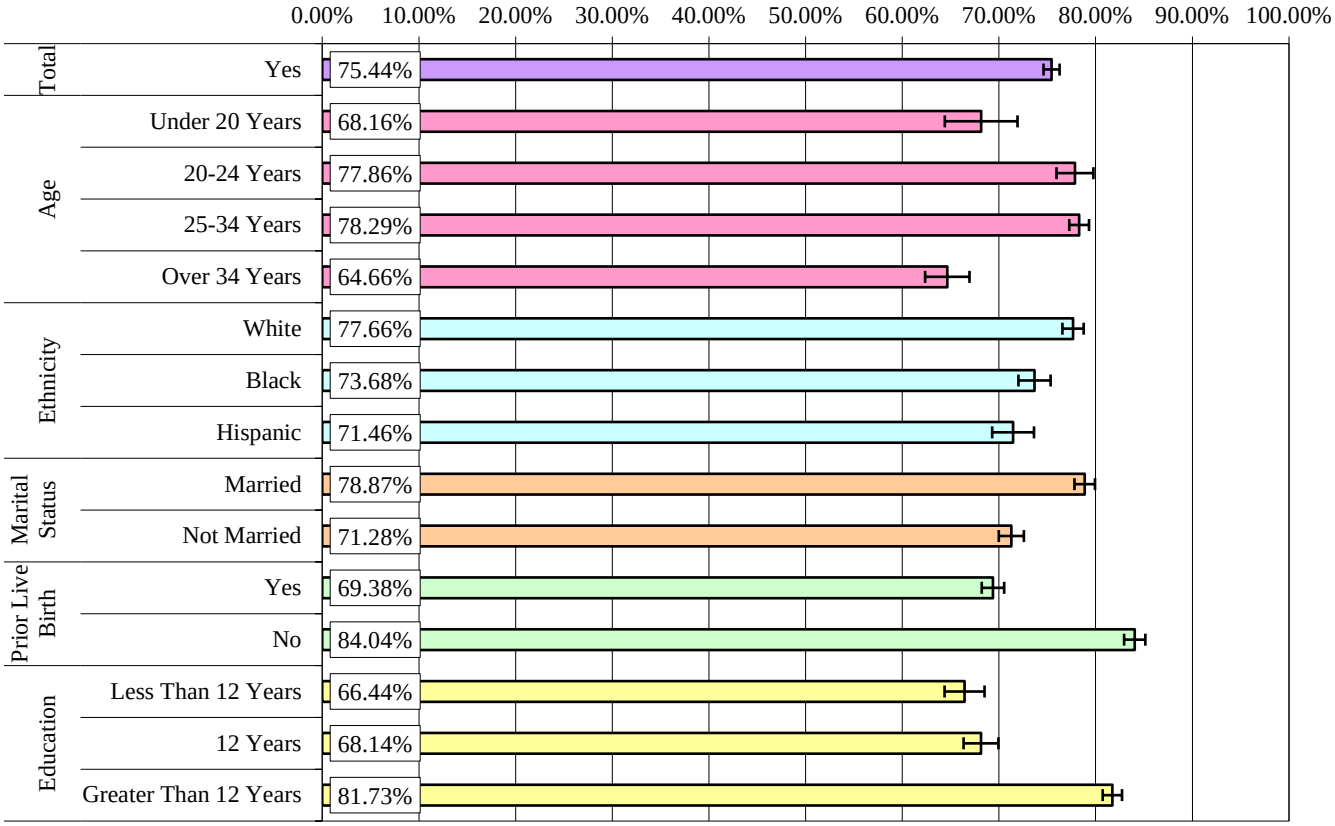
Appendix AQ70B: During your postpartum checkup, did a doctor, nurse, or other health care worker <u>talk with you about healthy eating, exercise, and losing weight gained during pregnancy</u>?[***] [RAW] (% "Yes")



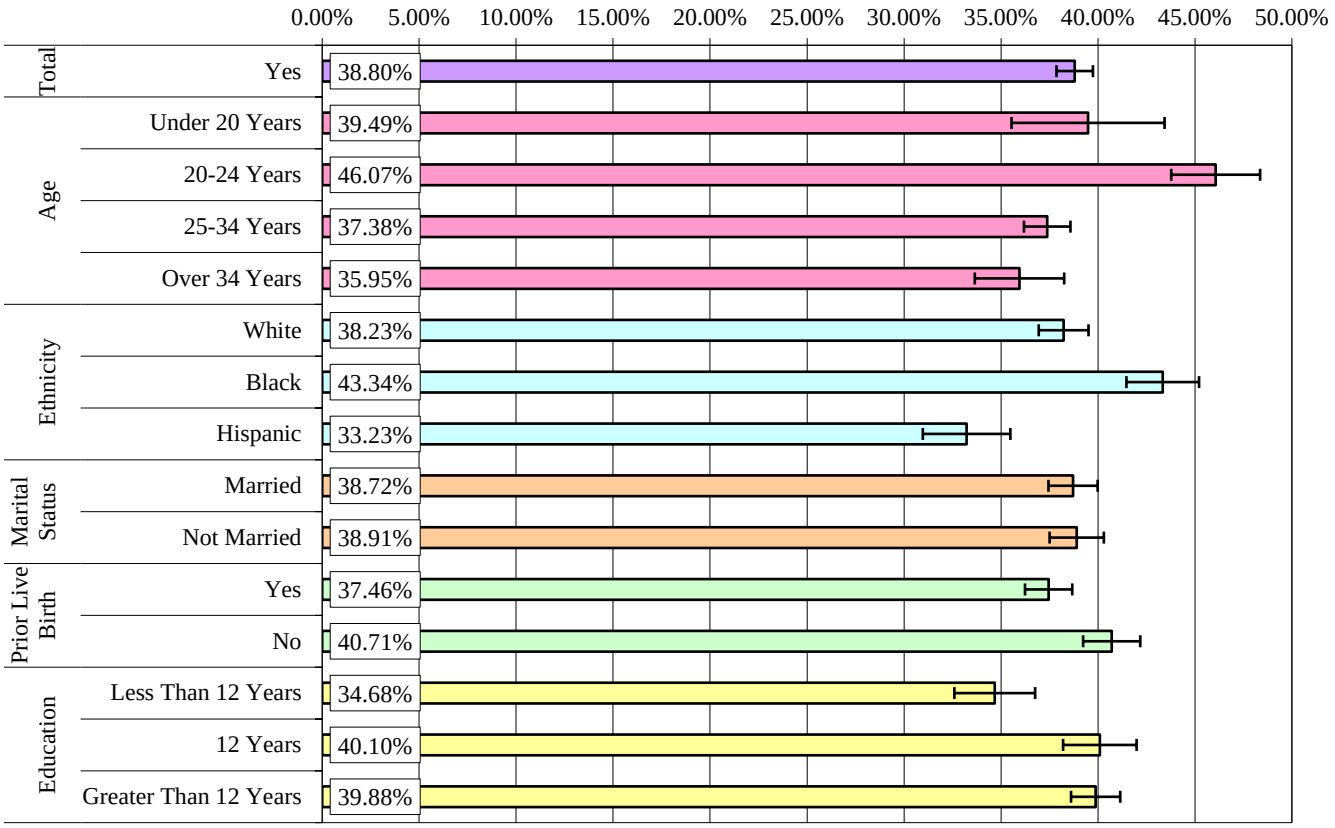
Appendix AQ70C: During your postpartum checkup, did a doctor, nurse, or other health care worker talk with you about how long to wait before getting pregnant again?* [RAW] (% "Yes")



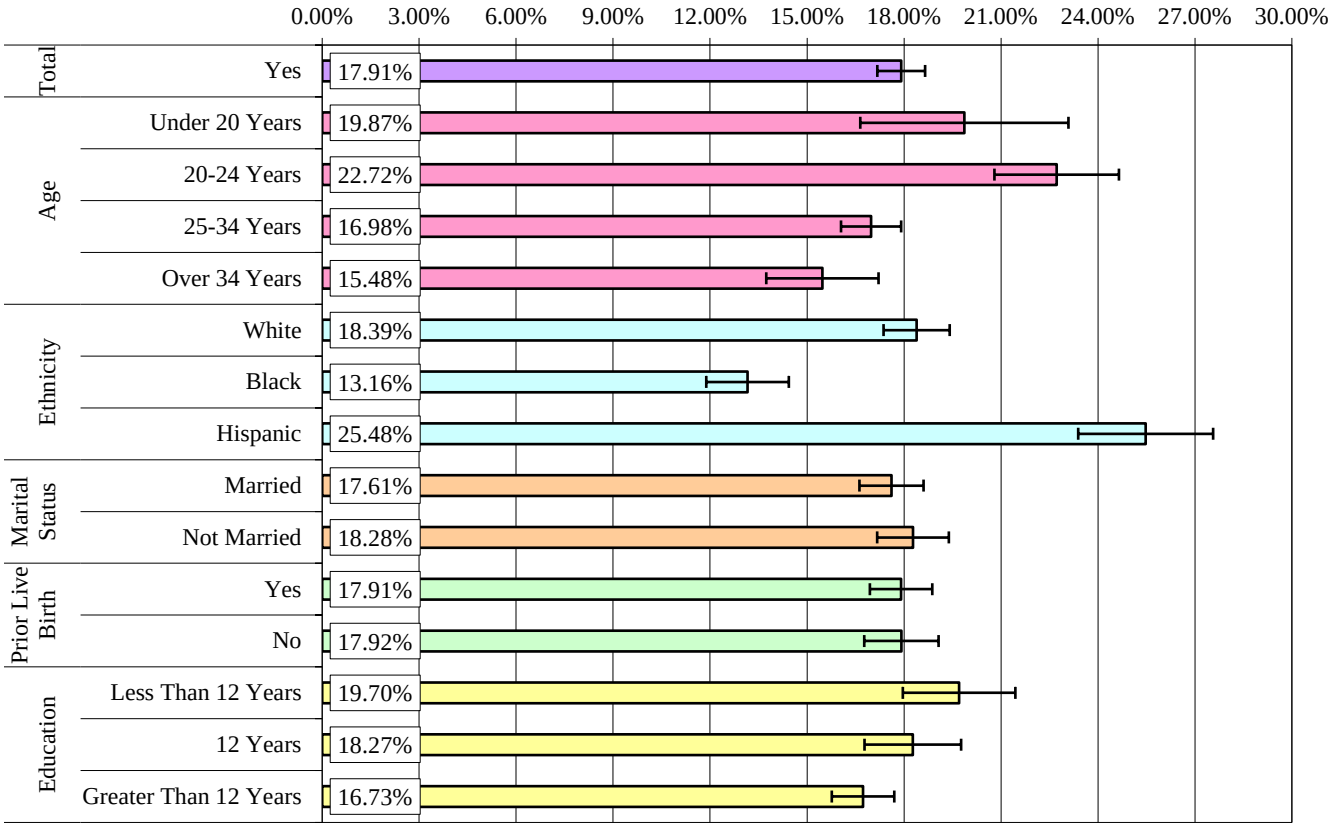
Appendix AQ70D: During your postpartum checkup, did a doctor, nurse, or other health care worker talk with you about birth control methods you can use after giving birth?* [RAW] (% "Yes")



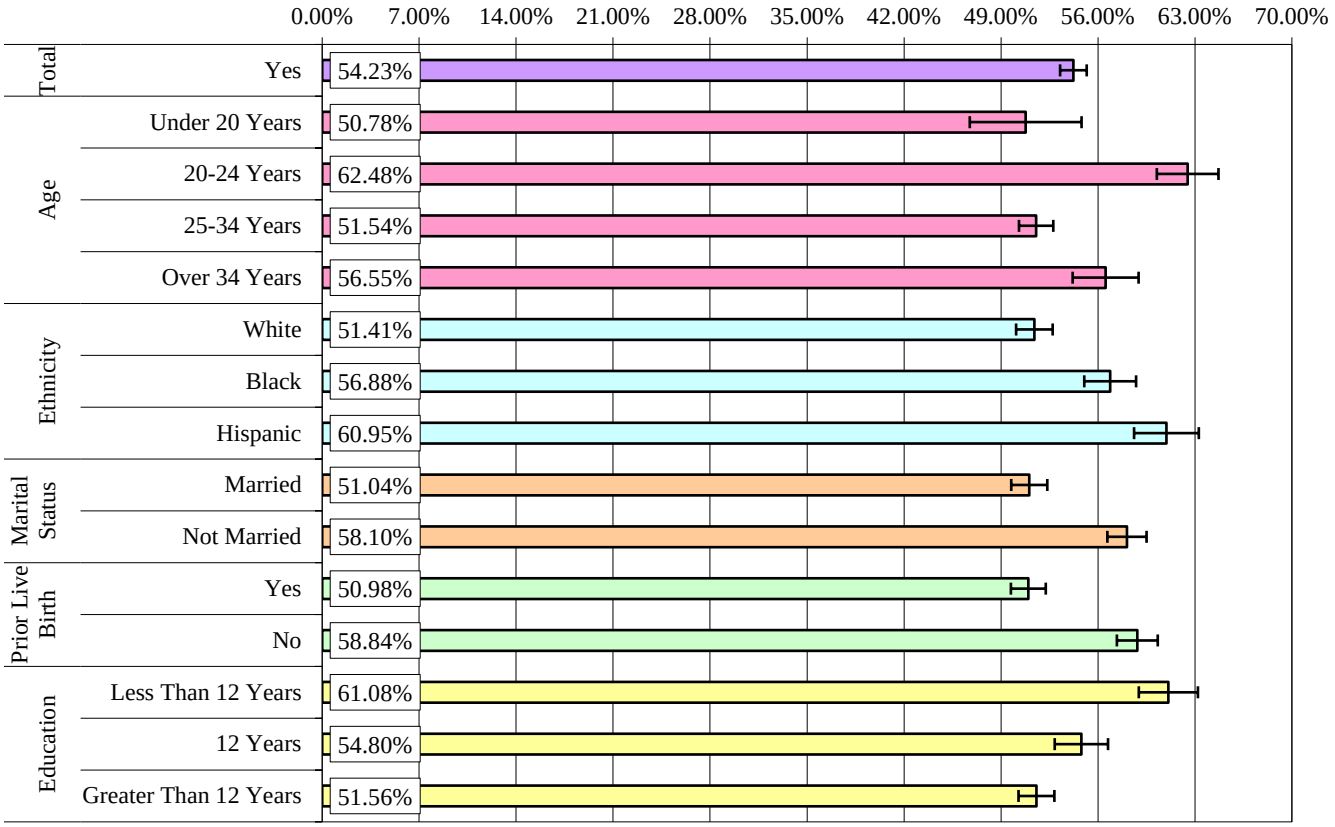
Appendix AQ70E: During your postpartum checkup, did a doctor, nurse, or other health care worker <u>give or prescribe for you a contraceptive method such as the pill, patch, shot (Depo-Provera®), NuvaRing®, or condoms</u>?[***] [RAW] (% "Yes")



Appendix AQ70F: During your postpartum checkup, did a doctor, nurse, or other health care worker <u>insert an IUD (Mirena®, ParaGard®, Liletta®, or Skyla®) or a contraceptive implant (Nexplanon® or Implanon®)</u>?[***] [RAW] (% "Yes")



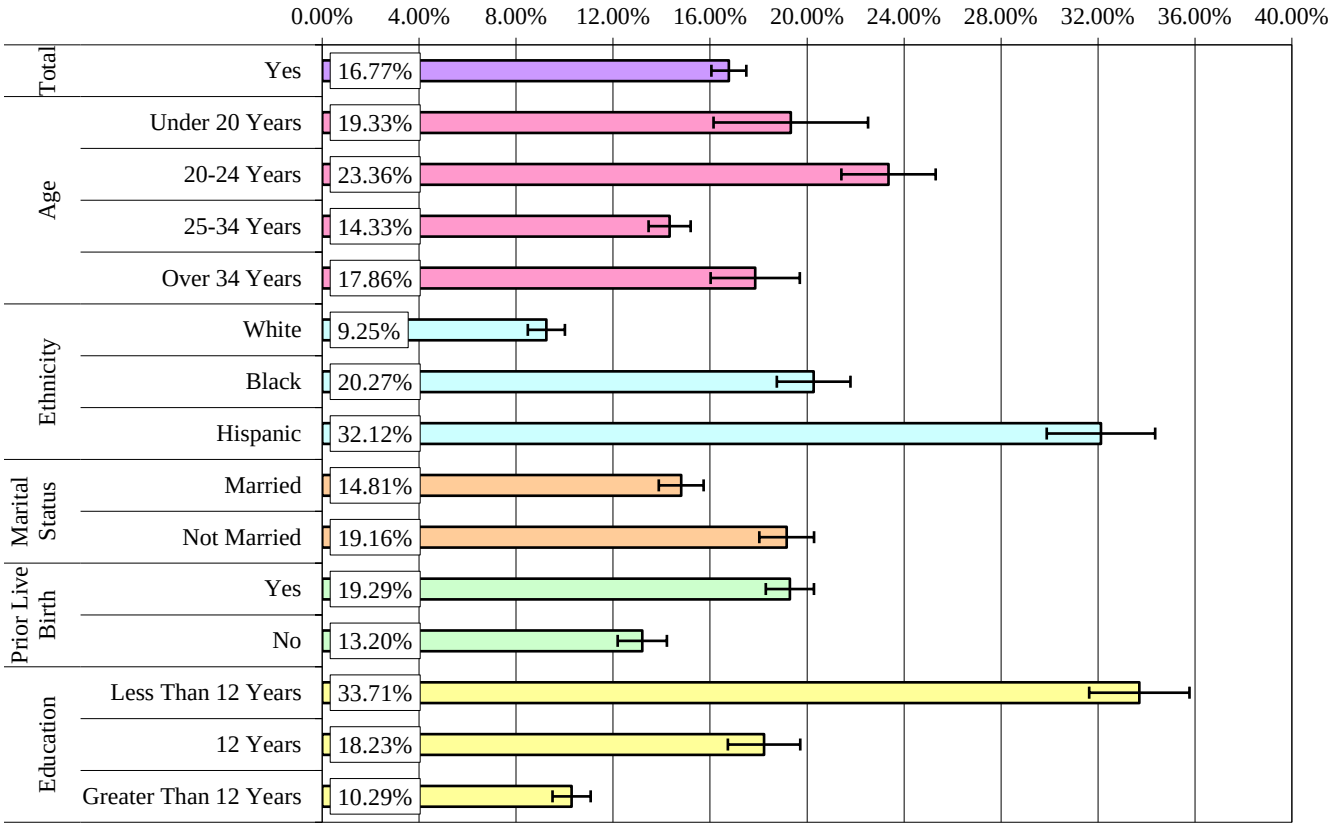
Appendix AQ70G: During your postpartum checkup, did a doctor, nurse, or other health care worker ask you if you were smoking cigarettes?* [RAW] (% "Yes")



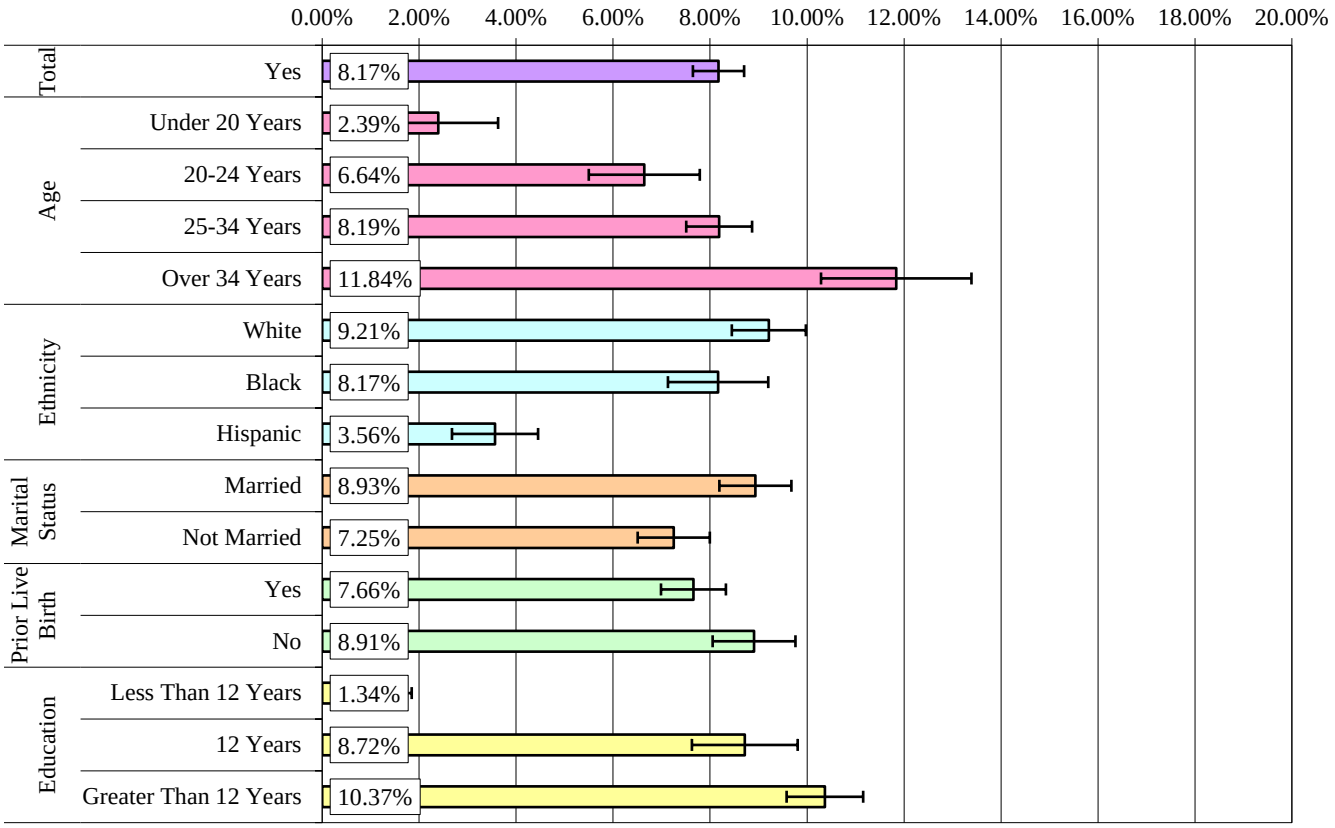
Appendix AQ70H: During your postpartum checkup, did a doctor, nurse, or other health care worker ask you if someone was hurting you emotionally o physically?* [RAW] (% "Yes")

Appendix AQ70I: During your postpartum checkup, did a doctor, nurse, or other health care worker ask you if you were feeling down or depressed?[***] [RAW] (% "Yes")

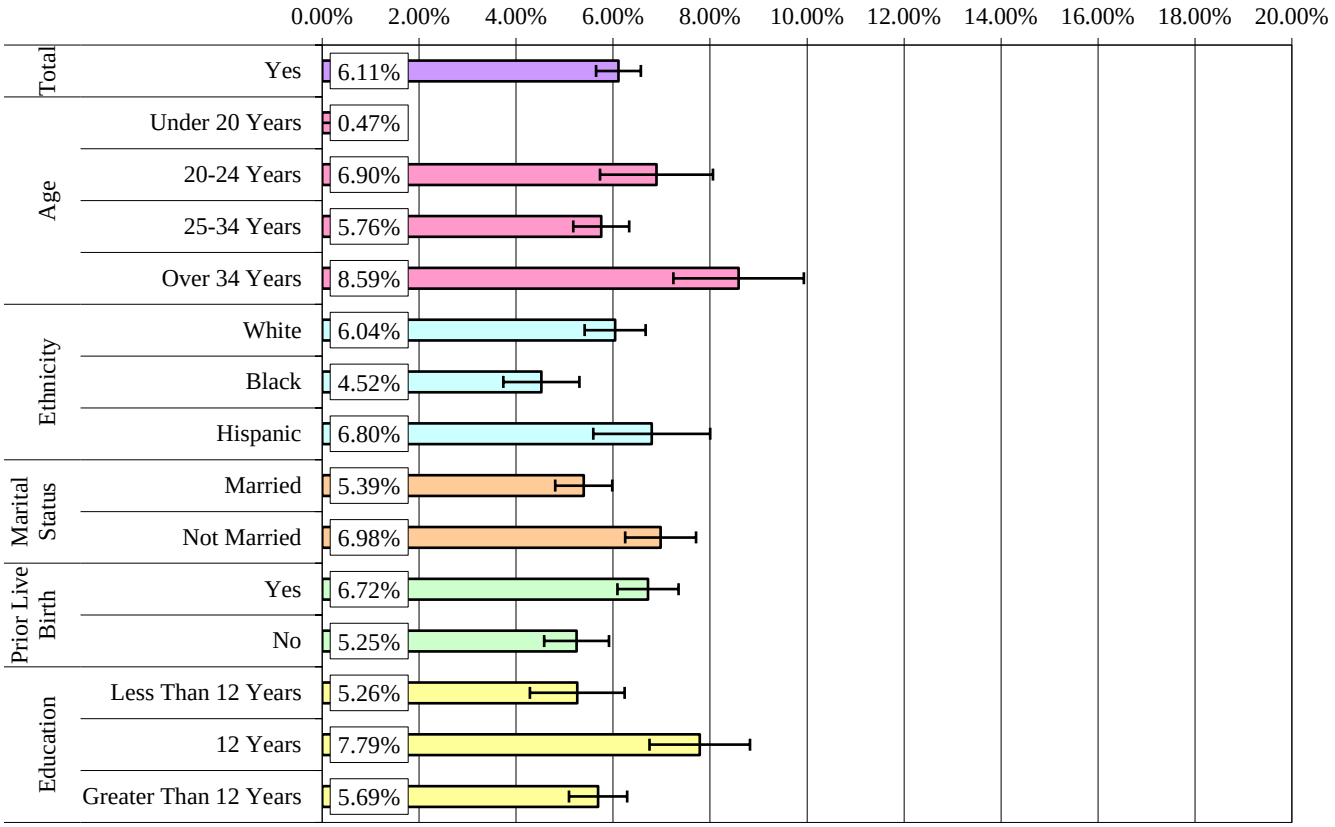
Appendix AQ70J: During your postpartum checkup, did a doctor, nurse, or other health care worker test you for diabetes?[***] [RAW] (% "Yes")



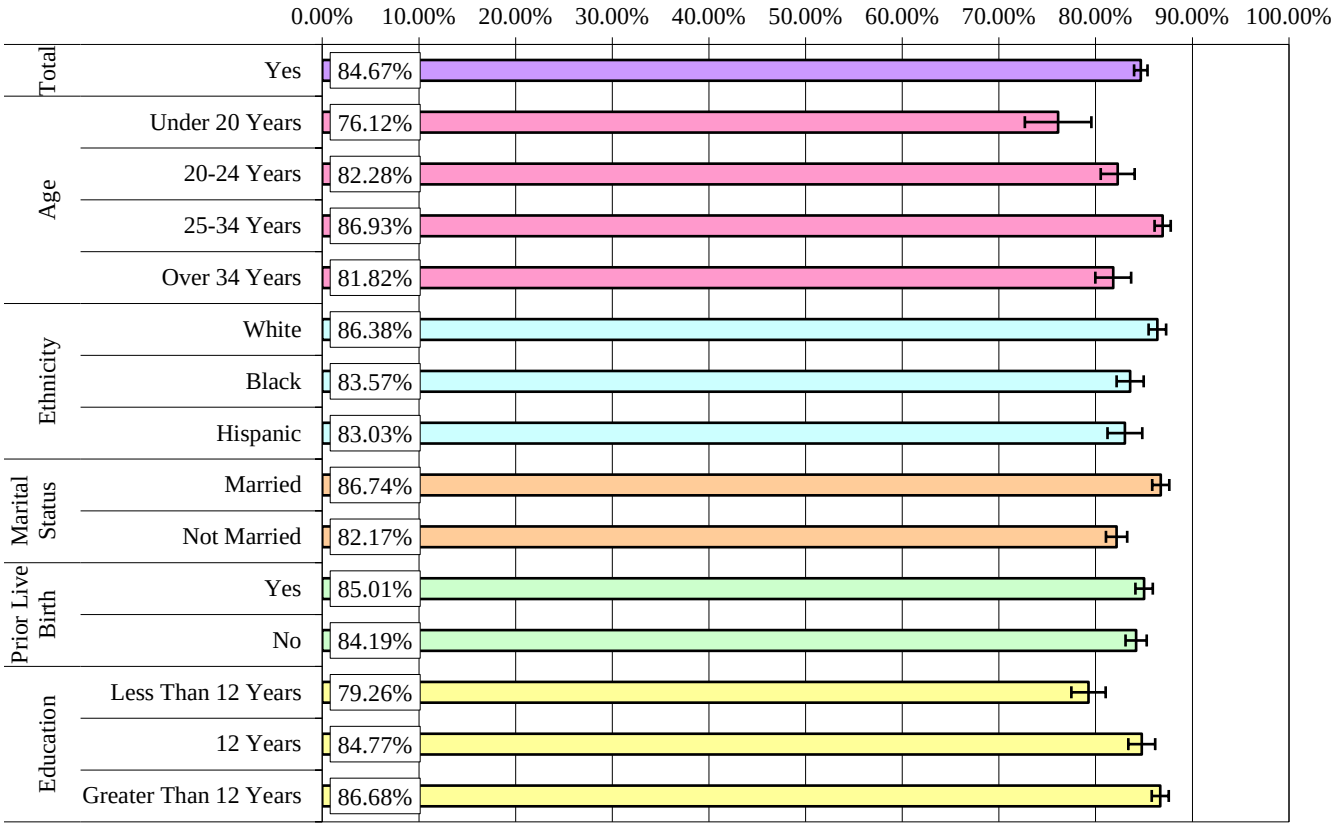
Appendix AQ75A: During the 12 months before you got pregnant with your new baby, did you have a miscarriage, fetal death, or stillbirth <u>less than 6 months</u> before getting pregnant?[***] [RAW] (% "Yes")



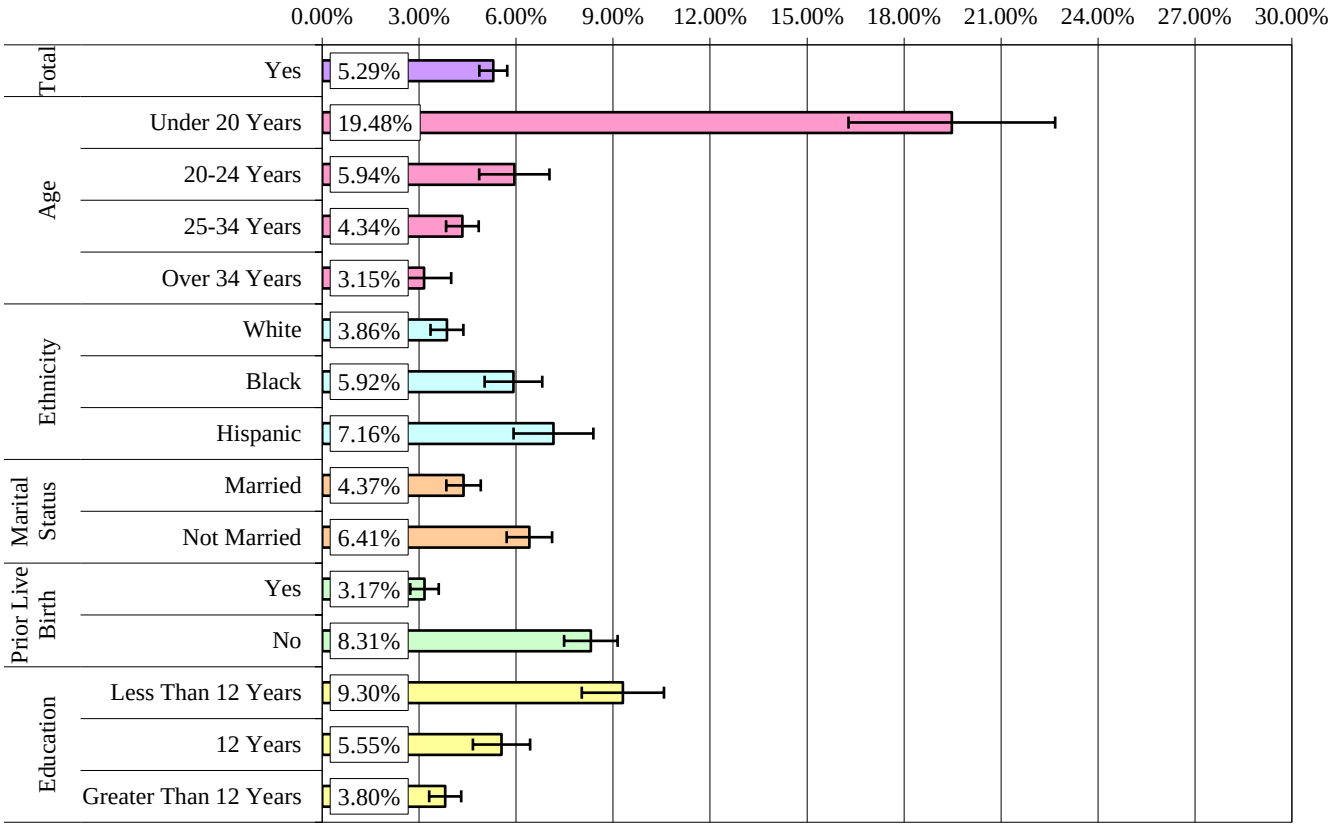
Appendix AQ75B: During the 12 months before you got pregnant with your new baby, did you have a miscarriage, fetal death, or stillbirth <u>6 to 12 months</u> before getting pregnant?[***] [RAW] (% "Yes")



Appendix AQ76: During any of your prenatal care visits, did a doctor, nurse, or other health care worker talk with you about fetal (baby) kick counts and how to do them?[***] [RAW] (% "Yes")



Appendix AQ79A: During your most recent pregnancy, did you take any <u>parenting classes</u>?[***] [RAW] (% "Yes")



Appendix AQ79B: During your most recent pregnancy, did you receive counseling for depression or anxiety?[***] [RAW] (% "Yes")
