

Primary Care Reform Collaborative – *Path Forward*

- **Develop a broad inclusive definition of primary care in terms of health professional specialties;**
- **Work with Delaware's data organization, the Delaware Health Information Network, to improve the data available to measure primary care investment;**
- **Determine how to track outcome measures that evaluate the benefit of increasing primary care investment;**
- **Ensure primary care investment policies support advanced care delivery models, including ACOs and CINs;**
- **Use a combination of payments for practice care management infrastructure and alternative payment models;**
- **Issue an annual report to the Insurance Commissioner on increasing primary care investment starting in 2020.**
